Addendum No. 3

RFP No. 19-28
Fire Reporting Software for Rockdale County Fire Rescue (Re-Bid)

November 25, 2019

RFP #19-28 is hereby amended as follows:

1. Below are questions received and corresponding answers:

A. Question: On page 13, section 2.2, subsection F, of the RFP it states:

The offeror shall provide training in the use of the program for both end users and department system administrators on at least three dates to accommodate shift employees. The training shall include system administration, any needed installation or transfer of RMS interface, general system operations, trouble shooting, and common problems related to software operation and interface with other systems.

It does not specify if the County looking for at least 3 dates of on-site training or web-based training? Please clarify.

Answer: An online training platform would be acceptable as long as there is live support available.

B. Question: Does Rockdale Counties Spillman CAD populate the GPS coordinates in the CAD Field YCoordinate and XCoordinate or CAD Field GeoYCoordinateOfUnit and GeoXCoordinateOfUnit?

Answer: Spillman CAD populates the GPS coordinates in the CAD Field YCoordinate and XCoordinate as shown below.
C. **Question:** The RFP lists 10,000 calls a year. Can this be broken down into EMS and Fire calls?

**Answer:** Call breakdown is approximately 5% structure fires, 55% medical, 40% miscellaneous.

D. **Question:** The RFP lists inspections as a requirement. How many mobile inspectors do you intend to have? Will this be for every station? Will there be a dedicated staff of inspectors? Or a combination of both?

**Answer:** In the scope of the RFP, the inspections module and mobile applications would primarily be utilized in documenting building familiarizations and preplans in the operations division. The Fire Marshal's office has three dedicated inspectors. Currently, all County permit inspections are conducted through the Planning department via [http://magnetgov.com/](http://magnetgov.com/). Any ability to communicate with that software to reduce duplicated efforts would be a plus and should be included.
E. Question: For the listed inspections, what fire code should be used: International Fire Code (ICC) or NFPA 1 & 100 codes?

2. All other conditions remain in full force and effect.

3. If a proposal has been submitted and anything in this Addendum causes the bidder to change the item offered or to increase or decrease the proposal price, the new price and/or changes will be inserted below:

____________________________________________________________________________

4. All bidders under this Request for Proposals are kindly requested to acknowledge receipt of this Addendum on Page 17 of the Proposal Form.
