Addendum No. 2

ITB No. 21-13
HIGH SERVICE PUMPS 1 & 2 REBUILD

July 21, 2021

ITB #21-13 is hereby amended as follows:

1. **Below are questions received and corresponding answers:**

   **A. Question:** The specifications say that a GC license will need to be valid if it is required by law. I.e. **GENERAL CONTRACTOR’S LICENSE (if required by law)** We have not used them for work in the surrounding counties on jobs of this nature where we are Not pulling/installing electrical wiring.

   Our view would be to bid this job direct, with the references from other counties on those types of jobs where no GC license number was needed. Will this be acceptable?

   **Answer:** A licensed/certified (**Reference: (NCSCB) National cable splicer certification board**) electrician shall be required to remove and install motor taps on pump motors. One of these motors is powered by 4160 (medium voltage) and requires specific certification. These taps shall be tested for leakage and Megged for safety and warranty purposes. A copy of this license must be provided with your Bid. A GC License is not required.

2. All other conditions remain in full force and effect.

3. If a Bid has been submitted and anything in this Addendum causes the bidder to change the item offered or to increase or decrease the Bid price, the new price and/or changes will be inserted below:

   __________________________________________________________________________
   __________________________________________________________________________
4. All bidders under this Invitation to Bid are kindly requested to acknowledge receipt of this Addendum on page 14 of the Bid Form.
