

Table 1. Inventory of Potential Individual Sources of Pollution

Potential Pollutant Sources Facilities	Number of Facilities
Airports	2
Electric Substations	1
Fuel Facilities	10
Hazardous Waste Facilities	2
Junk/Scrap/Salvage Yards	2
Landfills	1
Large Industries which Utilize Hazardous Chemicals	1
Lift Stations	10
Mines	2
Water Treatment Plants	1
Wastewater Treatment Plants	1
Total	33

The Atlanta Regional Commission combined the individual and non-point source rankings and gave an overall watershed susceptibility ranking of "LOW." The potential pollutant source ranking categories are Low, Medium Potential and High.
