CONYERS/ROCKDALE PLANNING COMMISSION MEETING

October 10, 2024, at 6:00 PM Rockdale County Assembly Hall 901 Main St NW, Conyers, GA, 30012

AGENDA

- 1. Call to Order:
 - A. Invocation.
 - B. Pledge of Allegiance.
- 2. Determination of a Quorum:
 - A. Roll Call.
- 3. Approval of the Agenda.
- 4. Approval of the Minutes.
- 5. Rules of Procedure for Public Hearings.
- 6. Old Business: NONE
- 7. New Business:
 - A. City of Conyers:

ITEM C-1:	CASE 18(2024): Ordinance 1388
PURPOSE:	A request for a text amendment to Section 8-7-92 , Supplemental use
	Standards.
	To amend subsection identifier from letters to numbers.
APPLICANT:	City of Conyers

ITEM C-2:	<u>CASE 19(2024):</u>
	Ordinance 1379
PURPOSE:	A request to amend the Comprehensive Land Use Plan from Neighborhood Commercial to Commercial
	And
	To amend the Official Zoning Map from Business Neighborhood District
	(BN) in the North Conyers Design Overlay District (NCD) to General
	Business District (BG) in the North Conyers Design Overlay District (NCD)
LOCATION:	0 Sigman Road NW
PARCELS:	0570030094
SIZE:	6.80
OWNER:	The Housworth Family Irrevocable Trust
	2718 Pitlochry Street SW
	Conyers, GA 30094
APPLICANT:	Taameer Capital, LLC
	1176 Lanford Drive SW
	Lilburn, GA 30047

B. Rockdale County:

ITEM R-1:	REZ2024-16 and REZ2024-24
PURPOSE:	REZ2024-16: To rezone 131.68 acres from A-R (Agricultural-Residential) to CRS (Collaborative Residential Subdivision) for a single-family residential subdivision.
	REZ2024-24: To rezone 10.00 acres from A-R (Agricultural-Residential) to
	C-1 (Local Commercial) for a neighborhood commercial development.
LOCATION:	1920 SW Highway 212, 1929 SW Oglesby Bridge Road, 1900 SW Highway
	212, and SW Oglesby Bridge Road
PARCEL:	032002004G, 032002004C, 032002033A, and 032002004F
SIZE:	141.68 acres
APPLICANT:	Stephen A. Goodsell
OWNERS:	Benjamin Willis Seay III

ITEM R-2:	FLU2024-05 and REZ2024-18
PURPOSE:	To amend the Future Land Use Map Category from Medium Density Residential to Commercial.
	To rezone 12.88 acres from A-R (Agricultural-Residential) to C-2 (General Commercial) to allow the property to be developed with commercial uses including a restaurant.
LOCATION:	4250 SE Highway 20
PARCEL:	080A010014
SIZE:	12.88 acres
APPLICANT:	John Andrew Nix / Maddox Nix Firm
OWNERS:	1618 Land Holdings, LLC

ITEM R-3:	FLU2024-06 and REZ2024-20
PURPOSE:	To amend the Comprehensive Plan Future Land Use Map Category from
	Low Density Residential to Light Industrial.
	To rezone from R-1 (Single-Family Residential) and R-3 (Multi-Family
	Residential) to M-1 (Limited Industrial) to allow the property to be
	developed with a construction company's headquarters.
LOCATION:	1362 and 1390 NW Rockbridge Road
PARCELS:	0410010013, 041001013H, 041001013J, 041001013K
SIZE:	47.72 acres
APPLICANT:	Pittman Construction Company
OWNER:	Veritas Group LLC, Pamela A. Meadows, and Pamela A. Meadows as
	Executor of the Estate of Joanne Mumpher

ITEM R-4:	FLU2024-07 and REZ2024-25
PURPOSE:	To amend the Future Land Use Map from Watershed Protection to Medium Density Residential.
	To rezone 94.31 acres from WP (Watershed Protection) and A-R
	(Agricultural-Residential) to MRU (Mixed Residential Uses) for a mixed-residential development.
LOCATION:	2245 NE White Road
PARCELS:	0860010008
SIZE:	94.31 acres
APPLICANT:	Agnes Slack LLLP of Georgia
OWNER:	Agnes Slack LLLP of Georgia

ITEM R-5:	REZ2024-19
PURPOSE:	To rezone 230.35 acres of a 353.04-acre property from A-R (Agricultural-Residential) to MRU (Mixed Residential Uses) for a 347-unit, mixed-
	residential development.
LOCATION:	3031 NE Highway 138
PARCEL:	0870010001
SIZE:	230.35 acres of a 353.04-acre property
APPLICANT:	Andrew C Shipp, Sr. for Grove Park Farm, LLC/Allied Capital, LLC
OWNER:	Grove Park Farm, LLC and Allied Capital, LLC

ITEM R-6:	REZ2024-22
PURPOSE:	To rezone 73 acres of a 253.03-acre property from R-1 (Single-Family Residential) to CRS (Collaborative Residential Subdivision) for a 150-unit, single-family residential subdivision.
LOCATION:	0 NE Hi Roc Road
PARCEL:	0640010024
SIZE:	73 acres of a 253.03-acre property
APPLICANTS:	Tonya Woods, Thomas & Hutton Engineering Services
	Michele Battle, Battle Law, P.C.
OWNERS:	John Pickering, PLP Properties LLC

ITEM R-7:	REZ2024-23
PURPOSE:	To rezone a 1.03-acre property from R-1 (Single-Family Residential) to M-2
	(General Industrial) for an Auto Body Shop.
LOCATION:	1529 Farmer Rd NW
PARCEL:	0220010015
SIZE:	1.03 acres
APPLICANT:	Marshanda R Ferrell for Oral C Clarke

OWNERS:	Oral C Clarke
----------------	---------------

ITEM R-8:	REZ2024-26
PURPOSE:	To rezone a 55.34-acre property from R-1 (Single-Family Residential) to
	CRS (Collaborative Residential Subdivision) for a single-family residential subdivision.
LOCATION:	2660 SE Old Salem Road
PARCEL:	0770010007
SIZE:	55.34 acres
APPLICANT:	Jared Brode/Direct Residential Homes
OWNERS:	Mack H Barnes III

ITEM R-9:	SUP2024-04
PURPOSE:	To authorize a Special Use Permit to allow for the operation of Veterinarian Services.
LOCATION:	2156 Tucker Mill Road
PARCEL:	029002013E
SIZE:	14.27 acres
APPLICANT:	Glyne Greenidge
OWNERS:	Glyne Greenidge

ITEM R-10:	TXT2024-02
PURPOSE:	Initiation of UDO Text Amendment 2024-02 by County Staff to amend Sec. 222-11 (Parking Vehicles in Residential Districts) to allow a Commercial vehicle to be parked in a residential district, provided that such vehicle is owned by the Rockdale County Board of Education, or any private school licensed by the State of Georgia.
APPLICANT:	County Staff

ITEM R-11:	TXT2024-03
PURPOSE:	Initiation of UDO Text Amendment 2024-03 by County Staff to amend the code of Rockdale County, Georgia, as amended, to adopt two new definitions in Section 106-1, regarding "Trade Schools, Cosmetology and Barber Schools" and "Trade School, Apprenticeship Training and Other Technical and Trade Schools", and amend Section 218-1 Table of Permitted Uses.
APPLICANT:	County Staff

Commercial) for a neighborhood commercial development.

Applicant: Stephen A. Goodsell **Owner:** Benjamin Willis Seay III

Staff Recommendation: Denial

PC Hearing Date: September 12, 2024 BOC Hearing Date: September 24, 2024

Zoning History

The subject property is zoned A-R (Agricultural-Residential). No prior zoning requests are on record for this property.

Existing Site Conditions

The subject site is a 141.68-acre property located west of the intersection of GA Highway 212 SW and Oglesby Bridge Road SW and comprised of four parcels: 032002004G (1920 SW Highway 212), 032002004C (1929 SW Oglesby Bridge Road), 032002033A (1900 SW Highway 212), and 032002004F (SW Oglesby Bridge Road). The properties located at 1920 SW Highway 212, 1929 SW Oglesby Bridge Road, and 1900 SW Highway 212 are developed with single-family residences that were constructed in 1988, 1980 and 1983, and 1978, respectively. Apart from the residences, the site is characterized by wooded areas and open fields. The subject property has road frontage along both GA Highway 212 SW and Oglesby Bridge Road SW; sidewalks are not present along the frontages. Tributaries of Honey Creek, ponds, freshwater forested/shrub wetlands, and floodplains are present on the property.

Surrounding Use and Zoning

The subject site is adjacent to residential and commercial properties. The following is a summary of surrounding uses and zoning:

	Adjacent Zoning and Current Land Use						
Direction	Address	Zoning District	Current Land Use				
West	2471 SW Oglesby Bridge Rd 2165 SW Burley Ct	A-R A-R	Monastery of the Holy Ghost Single-Family Residence

Project Summary

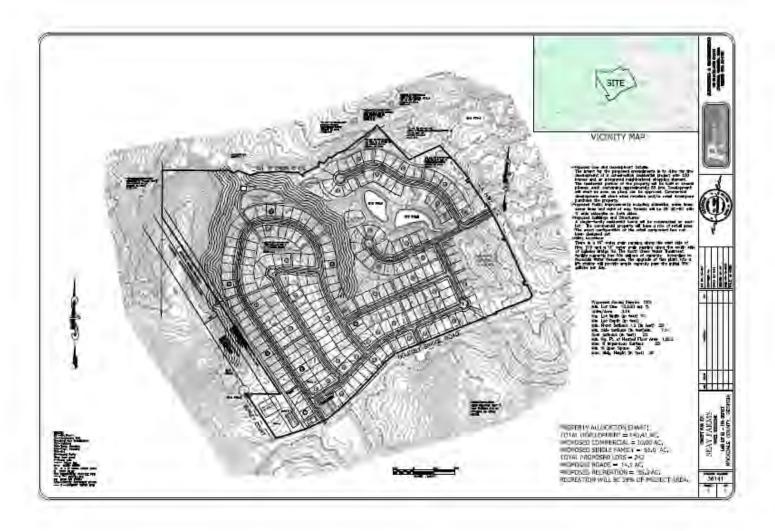

The applicant is requesting a rezoning of a 141.68-acre site from A-R (Agricultural-Residential) to CRS (Conservation Residential Subdivision) and C-1 (Local Commercial). The project includes:

- **REZ2024-16**: A request to rezone 131.68 acres at 1920 SW Highway 212, 1900 SW Highway 212, SW Oglesby Bridge Road, and a portion of 1929 Oglesby Bridge Road from A-R (Agricultural-Residential) to CRS (Collaborative Residential Subdivision) for the development of a single-family residential subdivision with 242 lots.
- **REZ2024-24**: A request to rezone 10.00 acres of 1929 Oglesby Bridge Road from A-R (Agricultural-Residential) to C-1 (Local Commercial) for a neighborhood commercial development.

Site Data

Proposed dimensional standards:

- Minimum lot size of 10,000 square feet meeting code requirements.
- Minimum lot width of 70 feet meeting code requirements.
- 20-foot front yard setback meeting code requirements.
- 25-foot rear yard setback meeting code requirements.
- 7.5-foot side yard setback meeting code requirements.
- Proposed recreation/conservation area to be 39% (55.3 acres) of the project area.
- Proposed gross density of 1.86 units per acre.
- 293 proposed parking spaces.

ZONING AND DEVELOPMENT STANDARDS

The following is a summary of applicable development standards from the Rockdale Unified Development Ordinance (UDO):

ZONING AND DEVELOPMENT STANDARDS							
Standard	Code Section	Required	Proposed	Meets Standard?			
Conservation Space	Sec. 206-5(d)(1)	30% of gross parcel area	39% of gross parcel area	YES			
Minimum Development Size	Sec. 206-5(d)(2)	10 contiguous acres (exclusive of conservation)	141.68 acres (total)	YES			
Minimum Lot Size	Sec. 206-5(d)(3)	10,000 SF	10,000 SF	YES			
Minimum Lot Width	Sec. 206-5(d)(4)	70 Feet	70 Feet	YES			
Setbacks Front Rear Side	Sec. 206-5(d)(5) Sec. 206-5(d)(6) Sec. 206-5(d)(7)	20 Feet (5 ft staggered) 25 Feet 7.5 Feet	20 Feet (5 ft staggered) 25 Feet 7.5 Feet	YES YES YES			
Residential Parking Guest Parking	Sec. 206-5(d)(16)(a) Sec. 206-5(d)(16)(b)	484 spaces (minimum) 40 spaces (minimum)	293 spaces proposed Not indicated	NO N/A			
Adjusted Density	Sec. 206-5(d)(17)	3.1 units per acre (maximum)	3.2 units per acre	NO			
Transitional Buffer	Sec. 206-5(d)(19)(b)	50 Feet	Not indicated on site plan	N/A			

INTERNAL AND EXTERNAL AGENCY REVIEW

The applicant must meet all other UDO requirements related to infrastructure improvements. Internal and External agency comments are attached and provided below.

Fire

No comments.

Rockdale Board of Education

School	Projected Enrollment	Current Enrollment	Current Capacity
LES	575	574	820
DMS	895	865	1104
SHS	799	866	1600

The lack of data on predicted per unit average student occupancy prohibits predicting the school's full occupancy dateline.

Multi developments within a school's zone within the same development period will impact capacity timelines. This month's list: DMS has two developments under consideration.

RCPS first steps to address impactful student numbers is to add mobile units to the site campus affected. Second step to consider will be larger class sizes. Third possible step, rezoning.

Transportation Department

Coordinate with GDOT on GA Hwy 212, Oglesby Bridge needs decel lane 175' travel lane and 100' taper.

Stormwater Department

Based on the submitted rezoning documents, there are existing State waters, Wetlands, and Rockdale County Future floodplain requirements that must be adhered to by Federal, State, and County ordinances. Tree protection must be adhered to as it relates to the Stormwater Management Department for Land Disturbance Permitting.

ARTICLE IV – STREAM BUFFER PROTECTION Sec. 310 – 103 Land development stream buffer requirements.

- (a) All land development activity, including subdivisions of land and platting activities governed by chapter 302 of the UDO, shall meet the following buffer and setback requirements unless otherwise exempted in this article:
- (1) An undisturbed natural vegetative buffer shall be maintained for 50 feet, measured horizontally, on both banks (as applicable) of the stream as measured from the top of the stream bank.
- (2) An additional setback shall be maintained for 25 feet, measured horizontally, beyond the undisturbed natural vegetative buffer, in which all impervious cover shall be prohibited. Grading, filling, and earthmoving shall be minimized within the setback.
- (3) No septic tanks or septic tank drain fields shall be permitted within the buffer or the setback.
- (b) Any land development activity within a buffer established hereunder or any impervious cover within a setback established hereunder is prohibited unless a variance is granted pursuant to sections 310-105.

CHAPTER 324 - ENVIRONMENTAL PLANNING CRITERIA

Sec. 324-2. - Protection of wetlands.

- (a) Purpose and intent. Pursuant to O.C.G.A. <u>12-2-8</u> and the DNR, environmental protection division's Rules for Environmental Planning Criteria chapter 391-3-16, this section establishes regulations to promote the wise use of wetlands and protect them from alterations that will significantly affect or reduce their primary functions for water quality, floodplain and erosion control, groundwater recharge, aesthetic natural areas, and wildlife habitat areas.
- (b) Wetlands development permit requirements. No activity or use, except those identified in subsection (c), shall be allowed in the wetlands without the issuance of a local development permit. Local permits will be issued only if the proposed use is in compliance with the requirements of the underlying zoning district and this section. Furthermore, if the area of proposed development is located within 100 feet of the wetlands boundaries, as established by Figure IV-2 of the Rockdale County Comprehensive Land Use Plan, a U.S. Army Corps of Engineers delineation is required under Section 404 of the Clean Water Act. If wetlands are altered or degraded, mitigation to offset losses may be required as a condition of a Section 404 permit. Local development permits will not be issued until after any necessary Section 404 permits have been secured.

CHAPTER 328 – Buffers, landscaping, and Tree Protection Sec. 328-15. - Authority, findings, purpose and intent.

- (a) *Authority*. This article is enacted pursuant to the county's exclusive planning authority granted by the Constitution of the State of Georgia, including but not limited to Ga. Const. art. IX, § II, para. IV, and Ga. Const. art. IX, § II, para. III, as well as authority granted by the General Assembly of the State of Georgia, including by not limited to O.C.G.A. § 36-70-3, as well as 1977 Ga. Laws, page 2817, as amended, and 1969 Ga. Laws, page 3639, as amended, and the general police powers of the county and other authority provided by federal, state and local laws applicable to this article.
- (b) Findings, purpose, and intent. It is the intent of this article to provide standards for landscaping and for the preservation and replacement of trees as part of the land development and building construction process in

unincorporated areas of the county. The county finds that the existence of adequate tree cover and landscaping in the county directly affects public health, safety, and welfare to comprehensively address these concerns through the adoption of the regulations in this article. The purpose and intent of the Board of Commissioners in enacting this article are as follows:

- (1) To protect the health, safety and general welfare of the citizens of the county, and to implement the policies and objectives of the comprehensive plan through the enactment of a comprehensive ordinance governing tree preservation and replacement in the county.
- (2) To require landscaping and the preservation and replacement of trees in certain areas within the county in order to ensure the continued health of its citizens through improved air and water quality.
- (3) To provide developers and others active in the county with the appropriate guidance to better ensure proper tree preservation and replacement in the course of the land development process in the county.
- (4) To preserve property values in the county by maintaining a safe, aesthetically pleasing environment.
- (5) To reduce flooding of county rivers and streams by planting trees and other vegetation so as to aid in slowing the rate of stormwater runoff.
- (6) To reduce soil erosion in the county by planting trees and other vegetation so as to aid in the prevention of soil loss through stormwater runoff and flooding and to promote stormwater infiltration.
- (7) To reduce noise and glare on adjacent properties from properties that have been extensively developed.
- (8) To conserve energy by cooling surrounding air temperatures through the existence of adequate shade trees.
- (9) To provide improved atmospheric quality by reducing airborne particulates and carbon monoxide and by increasing oxygen through adequate tree cover.
- (10) To promote the saving of trees in nodes throughout a development, rather than as individual trees scattered over a development or around the periphery of a development.
- (11) To prevent clear-cutting and mass grading of land that results in the loss of mature trees, and to ensure appropriate replanting when tree loss does occur.

Sec. 328-25. - Requirements for other developments.

- (a) Each new development not covered by <u>section 328-24</u> shall prepare a landscape and tree protection and replacement plan showing compliance with this section.
- (b) The tree protection and replacement plan must, at a minimum, protect or plant 15 units per acre of trees on the land being developed. The tree density calculations shall not utilize trees within required buffers in determining the overall density factor, existing density factor, or replacement density factor. All new development with eight (8) or more parking spaces, or expanded development that results in eight (8) or more parking spaces, shall provide interior landscaping.
- (c) Rockdale County has given priority to the retention and placement of trees in frontage planting strips and parking lot planting islands. Trees retained or placed in these areas may be used to meet the tree density factor for a project. However, if the tree density factor is met with trees saved or planted in other areas, the tree location guidelines outlined below must still be performed with additional tree plantings.
- (d) Required landscape strips and re-vegetated buffers. Landscape strips shall meet the minimum depth requirements as indicated in the following table. Trees may be planted in groups rather than in a single line. Adjoining residential zoning districts, evergreen trees shall be saved or planted in such density or spacing as to provide an eight-foot tall visual barrier within two years of planting. Required landscaping strips shall not be encroached upon by parking spaces, driveway surfaces, or storm water detention facilities except when complying with the requirements below. Driveway crossings may traverse such strips as near to a perpendicular alignment as practical. Signs may be located in the required landscape strip.

CHAPTER 320 – FLOOD DAMAGE PREVENTION

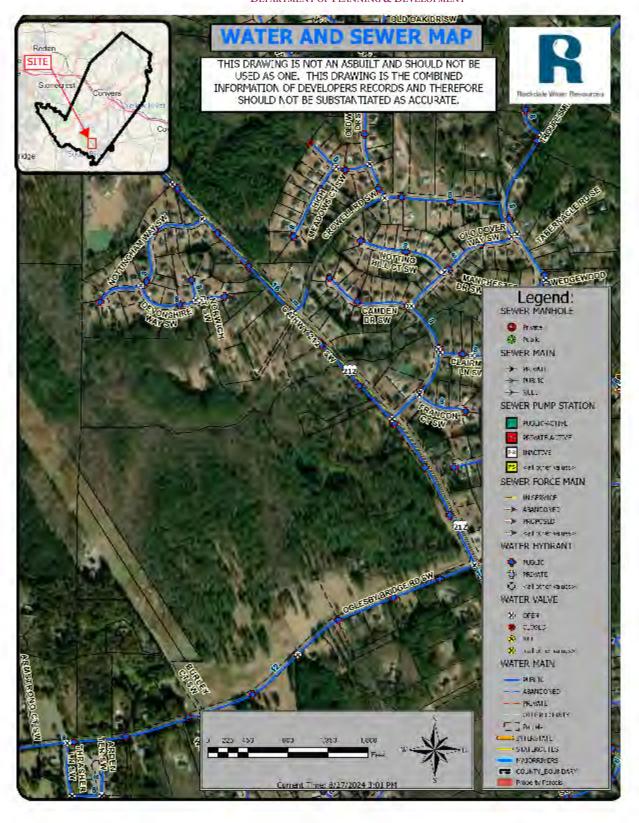

Sec. 320-1. - Introduction.

- (a) It is hereby determined that:
- (1) The flood hazard areas of Rockdale County, GA are subject to periodic inundation which may result in loss of life and property, health and safety hazards, disruption of commerce and governmental services, extraordinary public expenditures for flood relief and protection, and impairment of the tax base, all of which adversely affect the public health, safety, and general welfare.

- (2) Flood hazard areas can serve important stormwater management, water quality, streambank protection, stream corridor protection, wetland preservation, and ecological purposes when permanently protected as undisturbed or minimally disturbed areas.
- (3) Effective floodplain management and flood hazard protection activities can:
- a. Protect human life and health,
- b. Minimize damage to private property,
- c. Minimize damage to public facilities and infrastructure such as water and gas mains, electric, telephone, and sewer lines, streets and bridges located in floodplains, and
- d. Minimize expenditure of public money for costly flood control projects associated with flooding and generally undertaken at the expense of the general public.
- (b) Article IX, Section II of the Constitution of the State of Georgia and Section 36-1-20(a) of the Official Code of Georgia Annotated have delegated the responsibility to local governmental units to adopt regulations designed to promote the public health, safety, and general welfare of its citizenry. Therefore, Rockdale County, GA, does ordain this chapter and establishes this set of floodplain management and flood hazard reduction provisions for the purpose of regulating the use of flood hazard areas. It is determined that the regulation of flood hazard areas and the prevention of flood damage are in the public interest and will minimize threats to public health and safety, as well as to private and public property.

EVALUATION OF THE REZONING REQUEST

O.C.G.A. Chapter 36-66: Zoning Procedure Act

When considering an application to amend the current zoning designation of a property, the Board of Commissioners, the Planning Commission, and the Planning & Development Department shall consider the following:

A. Is the zoning proposal permitted as a use that is suitable in view of the use and development of adjacent and nearby property?

The applicant's requests for rezoning from AR (Agriculture-Residential) to CRS (Collaborative Residential Subdivision) and C-1 (Local Commercial) for a single-family residential and neighborhood commercial development are proposed on a largely undeveloped area of 141.68 acres. Adjacent properties are zoned AR, R-1, and C-1. The lots in the Stratford subdivision to the north of the subject site are approximately an acre in size. The Manchester subdivision to the east of the site is composed of half-acre lots. The lots to the south of the site range from 1-2 acres in size. The proposed development's 10,000-square-foot lot sizes are smaller than that of surrounding properties and may not be suitable in view of the use of the surrounding lots.

B. Will the zoning proposal adversely affect the existing use or usability of adjacent or nearby property?

The proposed 242-lot single-family residential development will likely have negative effects on the surrounding properties, with increased density impacting the rural character of the area, increased impervious surfaces, and increased traffic.

C. Will the property to be affected by the zoning proposal have a reasonable economic use as currently zoned?

The property has reasonable economic use as currently zoned.

D. Will the zoning proposal result in a use that will or could cause excessive or burdensome use of existing streets, transportation, facilities, utilities, or schools?

The 242-lot subdivision will likely have an impact on existing streets. The Traffic Impact Study (TIS) found that the development would generate 319 new morning peak hour trips and 588 new afternoon peak hour trips. A total of 6,664 new weekday trips will be generated. The study recommended improvements to mitigate the effects, such as new turn lanes which will necessitate widening of the roads. Rockdale Water Resources (RWR) has indicated that public water is available at the site location, but public wastewater is not available. Schools in the area are generally under capacity.

E. Is the zoning proposal in conformity with the Future Land Use Map and the policy intent of the Comprehensive Land Use Plan?

The Future Land Use Category of this site is Low Density Residential with approximately 10 acres at the intersection of Highway 212 SW and Oglesby Bridge Road SW designated as Neighborhood Commercial. The Future Land Use Category of Low-Density Residential is not in alignment with the requested CRS zoning district. As defined by the Comprehensive Land Use Plan, properties with a future land use designation of Low-Density Residential are appropriate for single-family detached residential dwellings with a density of 1 unit per acre. The proposed development will have a proposed gross density of 1.86 units per acre and an adjusted tract area site density of 3.2 units per acre, which is neither in conformance with the Comprehensive Land Use Plan nor the CRS zoning district.

F. Are other existing or changing conditions affecting the use and development of the property, which give supporting grounds for either approval or disapproval of the zoning proposal?

The small lot sizes and proposed density are not compatible with the rural character of the area. Furthermore, 242 new housing units would pose a burden to public facilities.

PLANNING & DEVELOPMENT STAFF RECOMMENDATIONS

Staff recommends **Denial** of the requests to rezone from A-R (Agricultural-Residential) to CRS (Collaborative Residential Subdivision) and C-1 (Local Commercial). Should the rezoning requests be approved, staff recommends the following conditions.

Proposed conditions:

- 1. The site shall be developed in compliance with the Collaborative Residential Subdivision (CRS) and Local Commercial (C-1) Zoning Districts if adopted.
- 2. The applicant shall provide the Traffic Impact Study with the Preliminary Plat. Any recommendations for improvements shall be required to be shown on the Land Disturbance Permit (LDP). Additionally, as determined by the Rockdale County Department of Transportation, a new study may be required for the development. Any recommendations for improvements from any new studies shall be required to be shown on the LDP.
- 3. Applicant must provide proof of sewer capacity before proceeding to preliminary plat phase.
- 4. The site shall be restricted not to exceed 242 lots.
- 5. The adjusted tract area site density shall be adjusted to conform with the requirements of the CRS zoning district.
- 6. A mandatory Homeowners' Association shall be established and shall be responsible for the maintenance of all common areas and facilities.
- 7. The Homeowners' Association covenants shall include a rental restriction of five percent (5%) of all single-family residential dwelling units.
- 8. All single-family residential dwelling units shall have a two-car garage.
- 9. Provide a five-foot-wide sidewalk along at least one side of the proposed internal streets and along the front lines of all CRS-zoned lots. Sidewalks shall be separated from street curbs by a "tree lawn" not less than five feet wide, planted with shade trees in accordance with the Rockdale County plant palette.
- 10. Provide a five-foot-wide concrete sidewalk along the Oglesby Bridge Road SW and GA Highway 212 SW rights-of-way. A strip of grass or other approved landscape material at least four feet in width shall separate sidewalks from adjacent curbs on public streets.
- 11. All grassed areas shall be sodded.
- 12. All utilities shall be placed underground.
- 13. Natural vegetation shall remain on the property until the issuance of a development permit.
- 14. All sides of proposed buildings shall consist of brick, stone, cementitious siding, or real (lath and portland) stucco from ground to eaves, with brick, stone, cedar shake, real stucco, painted wood siding or cementitious siding to be used as accents. Metal siding, vinyl siding, metal canopies, and exposed standard concrete blocks are prohibited. Soffits may be constructed of vinyl.
- 15. Streetlights are to be provided along one side of every street, a minimum of 16 feet high and a maximum of 20 feet high if overhanging into the street, and placed no more than 160 feet apart.
- 16. Stormwater detention ponds shall be screened from view from adjoining residential properties. Screening plans shall be subject to review and approval by the Director of Planning and Development.
- 17. Any structures in the amenity areas shall be constructed using exterior building materials that complement the adjacent residential structures. The amenity areas may be in a single area or in multiple areas. Amenity areas shall be accessible by five-foot-wide concrete sidewalks.

REZONING (ZONING MAP AMENDMENT) AND ALTERATIONS TO CONDITIONS OF APPROVAL APPLICATION CHECKLIST

This application is required for Rezoning submittals that do NOT require a Future Land Use (FLU) Map Amendment application. Additionally, this application is required for Alterations to or Repeal of Conditions of Approvals. The Instructions provide further details.

FILING INFORMATION (OFFICE USE ONLY)

Filin	g Date: BOC IR WS: BOC IR VS: PC Hearing: BOC Hearing: BOC 2R WS: BOC 2R VS:
	h City and Zip Code) Hwy 212 and Oglesby Bridge Road O32002004C Tax Parcel Numbers: 032002004C
	Acreage: 10.0 Number of Properties: 1
be c	2019 House Bill 493, detailed checklists of items required to be submitted for each type of project are supplemental to this application. Each item must hecked off and a page number where the item is located must be noted and included with the application. The applicant must sign the affidavit, at and of the application and each required checklist, certifying that all required items are provided. If there are questions regarding items required for your life project, contact staff for clarification prior to submitting the application.
Plan	lications that do not provide documentation or required materials will be noted as incomplete and may result in delays in the Board of Commissioners', ning Commission's, or Staff's review of the application and/or denial of the request. The Board of Commissioners and Planning Commission reserves ight to require additional information if it believes that the submission of such information is necessary to understand the nature of the intended activity.
	isions made to the applications after the submittal deadline and prior to the Board of Commissioners' or Planning Commission's Public Hearing may be inued to the following month's hearing.
The	Unified Development Ordinance (UDO) Sec. 202.6 provides the zoning districts that are permitted within each FLU Category. If the FLU Category nits the proposed zoning district, this application is required.
The	filing fee is based upon the number of properties, the amount of acreage of each property that require a Rezoning, the requested Zoning District that is grequested, and the amount of acreage of each property to be rezoned.
	REQUIRED Pre-Application Conference (UDO Sec. 238-4(d)(1)):
_	Date attended and with which staff member: 4/11/24 Tracie Roberts, Carolina Angulo, Kierston McDaniel
	Completed Application: Provide one (1) digital copy and three (3) hard copies of the entire submittal packet.
	Property Information (Page 4)
•	Contact Information (Page 4): Property Owner(s). Applicant. Authorized Agent. Attorney.
	Site and Development Information (Page 5): General information on the property, services and utilities.
	Justification of the Request (Page 6): In your own words, type the reason you believe the zoning of the subject property should be amended.
	Rezoning Review Standards (Page 7): Provide justification for each of the review standards listed in UDO Sec. 238-4(g)(1). The Board of Commissioners, the Planning Commission, and the Department will use these standards to evaluate the request.
	Conditions of Approval (Page 8): UDO Sec. 238-15. Provide justification for each of the review standards listed in UDO Sec. 238-4(g)(1). The Board of Commissioners, the Planning Commission, and the Department will use these standards to evaluate the request.
	Applicant Certification (Page 9)
	Ownership Statement and Campaign Contribution Disclosure Statement (Page 10): If the property is listed in the name of more than one individual or entity, each owner must sign all documents. Property owner(s) signature(s) must be notarized. If the property has been sold within the last 90 days, a copy of the deed with the new owner(s) name(s) is required. Ownership of property will be verified by staff. The owner(s) of the property is required to disclose political campaign contributions. Disclosures must be notarized.
×	Agent Authorization Form and Campaign Disclosure Statement (Page 11): If the owner of the property wishes to have someone represent his/her interest in all matters relating to a rezoning application, the notarized signatures of the owner(s) and agent are required. Agents are required to disclose

political campaign contributions. Disclosures must be notarized.

JUSTIFICATION OF THE REZONING REQUEST

In your own words, type the reason you believe the zoning of the subject property should be amended. Please address the following:

The intent of the proposed amendment and the intended timing and phasing of development. State the reasons why you believe the current zoning district classification for the subject rezoning site is incorrect and why approval of a different zoning district classification is appropriate.

The intent for the proposed amendments is to allow for the development of a commercial development which will start when retailers and/or retail developers purchase the property.

2. The impact of the proposed amendment on the capacities of public facilities including, but not limited to, transportation facilities, sewage facilities, water supply, parks, drainage, schools, solid waste, and emergency medical facilities.

Impact on capacities of public facilities:

- •Transportation: See traffic study
- •Sewer facilities: Sewage will run to the Scott Creek plant which is being upgraded to a lift station that will have adequate capacity according to Rockdale Water Resources (David Cervone)
- ·Water supply: Available
- •Parks: Impact on county parks is expected to be minimal.
- •Drainage: The property drains into a creek branch which runs through Monastery property and then directly into the south River.
- •Schools: There is currently adequate capacity for the expected increase in use.
- Solid waste: dumpster.
- •Emergency Medical: There is no anticipated burden on medical facilities.
- 3. The impact of the proposed amendment on the natural environment, especially existing trees, water bodies, and water quality.

Environmental Impact

•Trees: The property is partly pasture and is currently wooded with primarily pines of less than 20 years old. Per the Rockdale County tree ordinance, a mix of different hardwood species would be planted post development.

Water bodies: No

Water quality: The property will be compliant will all local, state and federal regulations that require stream buffers and water quality features for the pond.

The contribution of the proposed amendment to an orderly and logical development pattern.

The proposed project contributes to the orderly development pattern because the location of the proposed commercial is in an already commercial intersection that can offer more services to nearby residents.

REZONING REVIEW STANDARDS

Additionally, provide justification for each of the following review standards (UDO Sec. 238-4(g)(1)). The Board of Commissioners, the Planning Commission and the Department will use these standards to evaluate the request: Whether a proposed rezoning will permit a use that is suitable, in view of the use and development of a nearby property. The proposed commercial the property will be across the street from existing commercial uses and land designated for commercial in the comprehensive plan. Whether the property to be affected by a proposed rezoning has a reasonable economic use as currently zoned. The property is not economically useable under the current zoning. The signalized intersection is not suitable for residential use because of the prozximity to the tintersection and light. The current zoning deprives the constitutionally guaranteed ritgh to be allowed an economic use for the property. The impact of the proposed amendment on the natural environment, especially existing trees, water bodies and water quality. See response to question 3 Whether the proposed rezoning will result in a use that will or could cause an excessive or burdensome use of existing streets, transportation facilities. utilities or schools. See response to question 2 Whether the proposed rezoning is in conformity with the policy and intent of the comprehensive plan. Yes. Whether there are other existing or changing conditions affecting the use and development of the property that give supporting grounds for either approval or disapproval of the proposed rezoning. The surrounding existing uses support the requested zoning as the proposed zoning is the same as the existing zoning of two of the other three corners in the intersection. Whether, and the extent to which, the proposed amendment would result in significant adverse impacts on the natural environment. No. The feasibility of serving the property with public wastewater treatment service and the impacts of such on the wastewater system; and, if an

According to Rockdale Water Resources, the new Snapping Shoals Water Treatment Plant has the capacity available to safely and effectively handle sewer needs for our project.

detrimental impact on the environment.

alternative wastewater treatment method is proposed, whether such wastewater treatment method is authorized in Rockdale County and will have a

WARRANTY DEED

Mey 23,1973 With Coone

GEORGIA STATE OF

COUNTY OF ROCKDALE

THIS INDENTURE, Made the 22nd day of . one thousand nine hundred Seventy Five, between

, in the year

Deer Run Development Corporation, A Georgia Corporation

of the County of Rockdale , and State of Georgia, as party or parties of the first part, hereinafter called Grantor, and

Willis Benjamin Seay, III, and Phillip Roger Seay

as party or parties of the second part, hereinafter called Grantee (the words. "Grantor" and "Grantee" to include their respective heirs, successors and assigns where the context requires or permits)

WITNESSETH that: Grantor, for and in consideration of the sum of Seventy Thousand One Hundred Eighteen and no/100 ----- (70,118.00) DOLLARS in hand paid at and before the sealing and delivery of these presents, the receipt whereof is hereby acknowledged, has granted, bargained, sold, aliened, conveyed and confirmed, and by these presents does grant, bargain, sell, alien, convey and confirm unto the said Grantee,

All that tract or parcel of land lying and being in Land Lots 81, 82, 111, and 112, of the 11th District of Rockdale County Georgia, and being more particularly described to wit:

BEGINNING at an iron pin found at the northwest corner formed by the southwest side of the right of way of Georgia Highway 212 and the northwest side of the right of way of Oglesby Bridge Road; thence running south 66 degrees 46 minutes west and with the northwest side of the right of way of Oglesby Bridge Road 469.70 feet to an iron pin; thence running south 66 degrees 40 minutes west and with the northwest side of the right of way of Oglesby Bridge Road 400.00 feet to an iron pin; thence north 28 degrees 25 minutes west 691.44 feet to an iron pin found; thence north 30 degrees 05 minutes west 240.09 feet to an iron pin found; thence north 37 degrees 22 minutes west 763.87 feet to an iron pin found; thence north 66 degrees 20 minutes east 889.20 feet to an iron pin found on the southwest side of the right of way of said Georgia Highway 212; thence running south 44 degrees 49 minutes east and with the southwest side of the right of way of said Georgia Highway 212 108.60 feet to an iron pin; thence running in a southeasterly direction and with the southwest side of the right of way of Georgia Highway 212 southwest side of the right of way of Georgia Highway 212 a distance of 814.25 feet to a right of way marker; thence south 28 degrees 22 minutes east and with the southwest side of the right of way of said Georgia Highway 212 783.79 feet to an iron pin set on the northwest side of the right of way of Oglesby Bridge Boad and the point of beginning Bridge Road and the point of beginning.

Expressly excluded from the warranty of this instrument is a drainage easement shown on plat of said property recorded in Plat Book I, Page 207, reading "10 foot drainage easement and water line easement along all lot lines". Also any and all utility easements of record and not of record, including but not limited to power lines shown on plat hereinafter referred to.

Said tract or parcel of land is that same tract or parcel of land referred to in a map or plat prepared by Hayes, James & Associates of Lawrenceville, Georgia, and being recorded in Plat Book \underline{I} , Page __, Records of Rockdale County, Georgia.

Book: 149 Page Sequence: 200

BOOK 149 PAGE 200

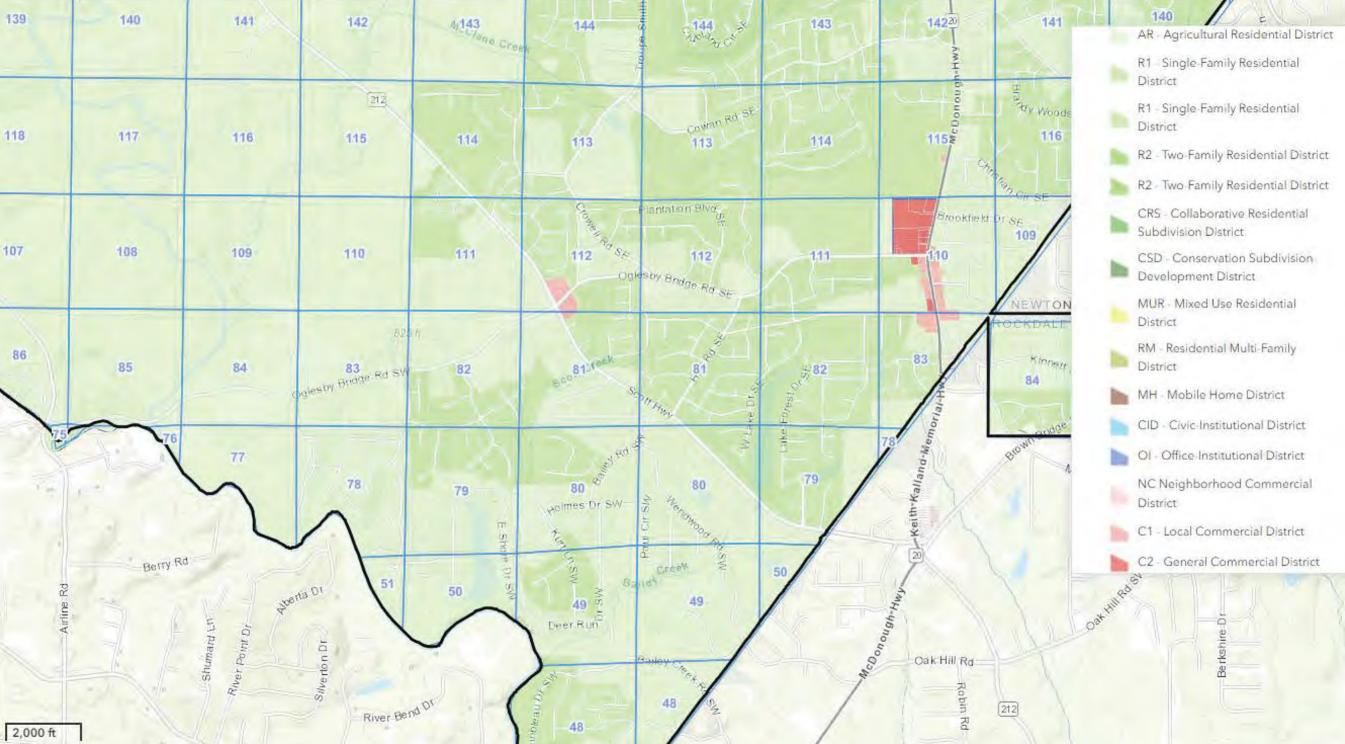

TO HAVE AND TO HOLD the said tract or parcel of land, with all and singular the rights, members and appurtenances thereof, to the same being, belonging, or in anywise appertaining, 30 the only proper use, benefit and behoof of the said Grantee forever in FEE SIMPLE.

AND THE SAID Grantor will warrant and forever defend the right and the said described property unto the said Grantee against the claims of all persons whomsdever to the said Grantee against the claims of all persons whomsdever to the day and year above.

IN WITNESS WHEREOF, the Grantor has signed and sealed this deed, the day and year above.

JUSTIFICATION OF THE REZONING REQUEST

In your own words, type the reason you believe the zoning of the subject property should be amended. Please address the following:

1. The intent of the proposed amendment and the intended timing and phasing of development. State the reasons why you believe the current zoning district classification for the subject rezoning site is incorrect and why approval of a different zoning district classification is appropriate.

The intent for the proposed amendments is to allow for the development of a conservation residential project with 230 homes and an integrated neighborhood shopping element. The residential portion of the property will be built in several phases, each containing approximately 58 lots. Development will start as soon as plans can be approved. Commercial development will start when retailers and/or retail developers purchase the property.

The impact of the proposed amendment on the capacities of public facilities including, but not limited to, transportation facilities, sewage facilities, water supply, parks, drainage, schools, solid waste, and emergency medical facilities.

Impact on capacities of public facilities:

- •Transportation: See traffic study
- •Sewer facilities: Sewage will run to the Scott Creek plant which is being upgraded to a lift station that will have adequate capacity according to Rockdale Water Resources (David Cervone)
- ·Water supply: Available
- •Parks: Since the project is to have multiple amenities and recreation options, its impact on county parks is expected to be minimal.
- •Drainage: The property drains into a creek branch which runs through Monastery property and then directly into the south River.
- *Schools: There is currently adequate capacity for the expected increase in use.
- •Solid waste: Trash pick up would occur house-by-house and there would be no dumpster.
- •Emergency Medical: There is no anticipated burden on medical facilities.
- 3. The impact of the proposed amendment on the natural environment, especially existing trees, water bodies, and water quality.

Environmental Impact

- •Trees: The property is partly pasture and is currently wooded with primarily pines of less than 20 years old. Per the Rockdale County tree ordinance, a mix of different hardwood species would be planted post development. Because the majority of the project will be a CRS subdivision, 30% of the 131 acres will be green space.
- •Water bodies: There are two existing ponds on the property. They will remain and become part of the green space for the project.

Water quality: The property will be compliant will all local, state and federal regulations that require stream buffers and water quality features for the pond.

4. The contribution of the proposed amendment to an orderly and logical development pattern.

The proposed project contributes to the orderly development pattern by putting residential and commercial uses in close proximity to each other, which lowers vehicular traffic and shortens trip times. The location of both uses at the corner of two major roads gives easy local access to schools and shopping in addition easy access to I-20 via State Highway 212 and Smyrna Road.

REZONING REVIEW STANDARDS

Additionally, provide justification for each of the following review standards (UDO Sec. 238-4(g)(1)). The Board of Commissioners, the Planning Commission and the Department will use these standards to evaluate the request:

a.	Whether a proposed rezoning will permit a use that is suitable, in view of the use and development of adjacent and nearby property.
0	he residential portion of the property will be near to and adjacent to projects with similar densities. The proposed commercial portion f the property will be across the street from existing commercial uses and land designated for commercial either in the comprehensive lan or on the zoning map.
b.	Whether the property to be affected by a proposed rezoning has a reasonable economic use as currently zoned.
	The property is not economically useable under the current zoning. Current development costs would put the price of an AR lot at over \$125,000 which is well above the \$80,000 current market value of such a lot.
c.	The impact of the proposed amendment on the natural environment, especially existing trees, water bodies and water quality.
S	See response to question 3
d.	Whether the proposed rezoning will result in a use that will or could cause an excessive or burdensome use of existing streets, transportation facilities, utilities or schools.
S	tee response to question 2
<u>e.</u>	Whether the proposed rezoning is in conformity with the policy and intent of the comprehensive plan.
1 n	The Comprehensive Plan envisions neighborhood commercial development for the front corner of the property and nedium density residential development on the balance of the property. This is what we are requesting.
f.	Whether there are other existing or changing conditions affecting the use and development of the property that give supporting grounds for either approval or disapproval of the proposed rezoning.
	The surrounding existing uses support the requested zoning as the new zoning would match existing uses in the project.
g.	Whether, and the extent to which, the proposed amendment would result in significant adverse impacts on the natural environment.
τ	he project will feature over 30 acres of green space and storm water management which will mitigate environmental impact.
h.	The feasibility of serving the property with public wastewater treatment service and the impacts of such on the wastewater system; and, if an alternative wastewater treatment method is proposed, whether such wastewater treatment method is authorized in Rockdale County and will have a detrimental impact on the environment.
	According to Rockdale Water Resources, the new Snapping Shoals Water Treatment Plant has the capacity available to safely and effectively handle sewer needs for our project.

APPLICANT CERTIFICATION

Please re	ad and initial the following statements:
past.	I hereby request the County consider the information contained within this application relative to the property shown on the attached plats and site plan and further request that this item be placed on the Planning Commission (PC) and/or Board of Commissioners (BOC) Agenda for a public hearing.
11/2	I understand that my request will be rejected if all the necessary information and/or requirements are not presented.
MA	I understand that I have an obligation to present all necessary information required by the Rockdale County Department of Planning & Development (P&D) to enable the PC and/or BOC to make an informed determination on my request. I will seek advice of P&D Staff or an attorney if I am not familiar with the zoning and land use requirements.
ML.	I understand that my request will be acted upon at the PC and BOC Public Hearings and that I am required to be present or to be represented by the authorized representative as indicated on this application, so that someone is available to present all facts and answer questions. I understand that failure to appear at a public hearing may result in the postponement or denial of my request. I further understand that it is my responsibility to be aware of relevant public hearing dates and times regardless of notification from Rockdale County.
从从	The Rockdale County Unified Development Ordinance requires a public participation sign on the subject property. In order to ensure that the correct information is included on the public participation sign, P&D will prepare the sign and post the sign.
THE STATE OF THE S	I hereby acknowledge that I understand the requirements listed on the checklist for what constitutes a complete application. I have checked off each box and included a page number where the item is located. I confirm that the requirements for a complete application have been met.
117	I have read and understood the applicable sections of the Rockdale County Unified Development Ordinance, as provided in the Instructions.
Marie	, the undersigned also hereby verifies that he or
she is 18	years of age or older and has provided at least one secure and verifiable document, as required by O.C.G.A. § 50-36-1(e)(1), with this affidavit.

Introduction

This study assesses the traffic impact of a proposed development which will include a residential subdivision and a retail tract in Rockdale County, Georgia. The site is located along the west side of SR 212 and the north side of Oglesby Bridge Road, as shown in Figure 1. The project will consist of 230 detached single family homes and 65,000 square feet of retail. The residential will be served by one full-movement access on SR 212 and two full-movement accesses on Oglesby Bridge Road and the retail tract will have one access on each road.

The purpose of this traffic impact study is to determine existing traffic operating conditions in the vicinity of the proposed development, project future traffic volumes, assess the impact of the subject development, then develop conclusions and recommendations to mitigate the project traffic impact and ensure safe and efficient existing and future traffic conditions in the vicinity of the project.

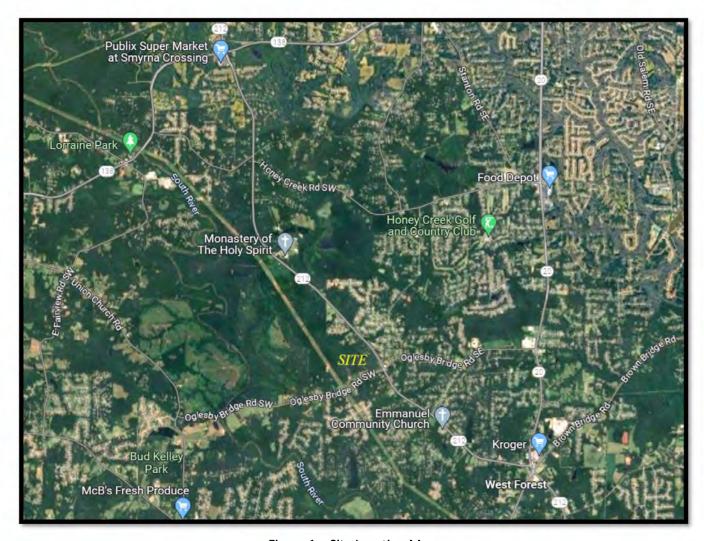

Figure 1 – Site Location Map

Existing Traffic Conditions

Existing traffic operating conditions in the vicinity of the proposed development were assessed. The following is a description of existing transportation facilities, traffic volumes, and intersection operations.

Description of Existing Roadways

SR 212 is a northwest-southeast urban minor arterial that begins at SR 155, passes the subject site, intersects SR 20, then has an offset and continues to the southeast. The road has one through travel lane in each direction with exclusive left and right turn lanes at major intersections. In the vicinity of the proposed development, the intersections of SR 212 at SR 138, Oglesby Bridge Road, and SR 20 are signalized. The terrain along SR 212 is gently rolling and the posted speed limit is 55 mph. The road has a rural cross-section with a small shoulder but no sidewalks (see below), or curb-and-gutter. In 2023 the Georgia DOT recorded an Annual Average Daily Traffic (AADT) volume of 7,600 vehicles per day (vpd) with 5% trucks on SR 212 near the project frontage. A 24-hour traffic volume count was collected for this study in May 2024 on SR 212 at the project frontage and recorded a volume of 9,834 vehicles.

Oglesby Bridge Road is a two lane east-west urban major collector that begins at Union Church Road / Airline Road, passes the subject site, intersects with SR 212 and terminates at SR 20. The terrain along Oglesby Bridge Road is level to very gently rolling and the posted speed limit is 45 mph. The road has a rural cross-section with no shoulder, sidewalks, or curb-and-gutter. In 2023 the Georgia DOT recorded an AADT volume of 3,770 vpd with 5% trucks on Oglesby Bridge Road west of the subject development site. A 24-hour traffic volume count was collected for this study in May 2024 on Oglesby Bridge Road at the project frontage and recorded a volume of 6,024 vehicles.

Pedestrian, Bicycle, and Transit Accessibility

There is no sidewalk along most of SR 212 and Oglesby Bridge Road or other nearby roadways. There are just short segments of sidewalk along the frontages of the retail sites at the corner of SR 212 at Oglesby Bridge Road. There are crosswalks and pedestrian signals at the SR 212 / Oglesby Bridge Road intersection and the other signalized intersections in this study. There are no dedicated bicycle lanes in this vicinity. There is no regularly-scheduled mass transit route or service within a reasonable walking distance of the proposed development.

Existing Traffic Volumes

Existing full turning movement peak hour traffic volume counts were collected at the following intersections in the vicinity of the site:

- 1. SR 212 at Oglesby Bridge Road (signal)
- 2. Union Church Road / Airline Road at Oglesby Bridge Road (side street stop sign)
- 3. SR 138 at SR 212 (signal)
- 4. SR 20 at SR 212 / CVS Access (signal)

The counts were collected on Tuesday, May 7, 2024, from 7:00 a.m. to 9:00 a.m. and from 4:00 p.m. to 6:00 p.m. In addition to the intersection counts, a 24-hour bi-directional traffic volume count was collected on SR 212 and on Oglesby Bridge Road adjacent to the site. Area schools were in session on the day on which the counts were recorded. The locations of the traffic counts are presented in Figure 2.

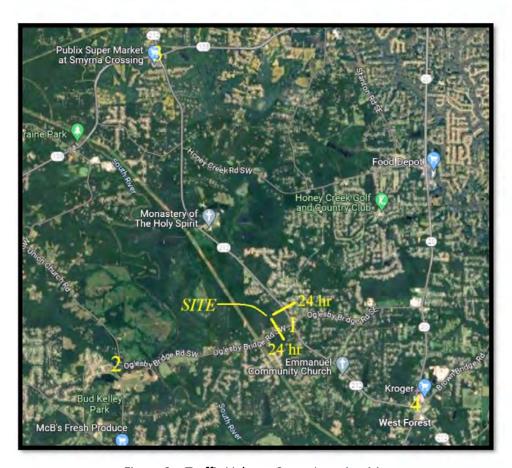

Figure 2 – Traffic Volume Count Location Map

From the intersection turning movement count data, the highest four consecutive 15-minute interval volumes at each intersection, during each time period, were determined. These volumes make up the existing weekday a.m. and p.m. peak hour traffic volumes at the intersections and are shown in Figure 3. The raw count data is found in Appendix A.

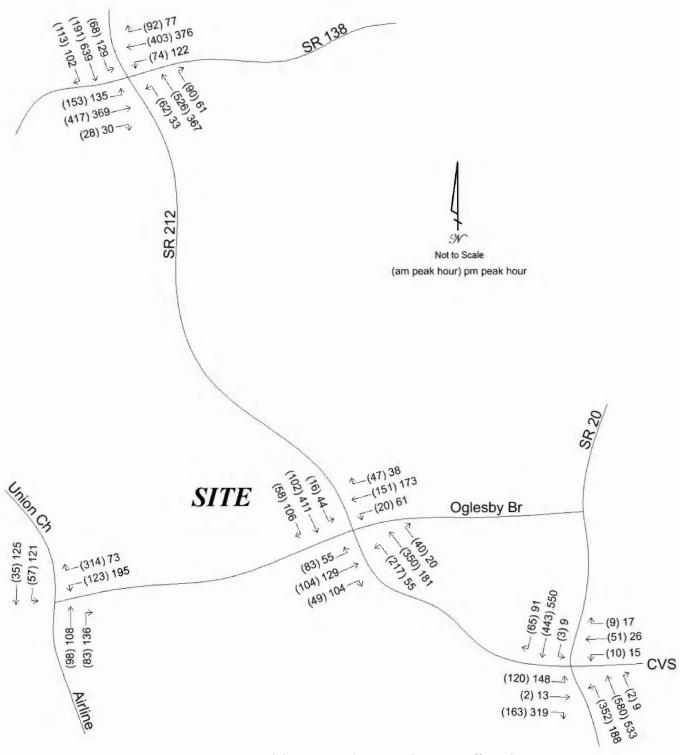

Figure 3 – Existing Weekday A.M. and P.M. Peak Hour Traffic Volumes

Existing Intersection Operations

Existing traffic operations were analyzed at the counted intersections using Synchro software, version 12, in accordance with the methodology presented in the Transportation Research Board's 2022 *Highway Capacity Manual* 7th Edition (*HCM* 7). This methodology is presented in Appendix B. The analysis was based on the existing volumes, lanes, and control. The results of the analysis are shown in Table 1. Computer printouts containing detailed results of the existing analysis are located in Appendix C. Levels of service and delays are provided for each overall intersection and for each controlled approach or movement. Locations that operate unacceptably (LOS E or LOS F) are presented in bold type.

Table 1 – Existing Intersection Operations

	A.M. Po	eak Hour	P.M. Peak Hour	
Intersection / Approach	LOS	Delay (s/veh)	B A B B A D C C C D B A B C	Delay (s/veh)
1. SR 212 at Oglesby Bridge Rd (signal)	В	11.9	В	13.4
northbound approach	А	8.3	А	7.7
southbound approach	А	9.8	В	10.9
eastbound approach	В	18.5	В	19.0
westbound approach	В	17.6	В	19.5
2. Union Church Rd at Oglesby Bridge Rd (side street stop)	С	16.8	В	12.1
southbound left turn	А	7.8	А	8.2
westbound approach	С	25.0	D	29.0
3. SR 138 at SR 212 (signal)	С	33.9	D	35.6
northbound approach	С	28.4	С	22.6
southbound approach	В	18.0	С	28.3
eastbound approach	D	39.4	D	43.9
westbound approach	D	43.0	D	49.4
4. SR 20 at SR 212 / CVS Access (signal)	А	9.9	В	10.8
northbound approach	А	5.9	А	5.6
southbound approach	В	11.9	В	11.7
eastbound approach	С	25.9	С	26.0
westbound approach	С	24.6	С	23.3

The existing analysis reveals acceptable traffic operations at all study locations. Therefore, no mitigation is identified for the existing condition.

No-Build Traffic Conditions

A 2029 no-build condition was developed. This represents the traffic conditions that will exist in the future at the anticipated date of the build-out of the proposed development, but not including the project's trips. The purpose of the analysis of this condition is to isolate the traffic impacts of the proposed development from background growth in volumes that is expected to occur in the area while the project is under construction.

In order to develop no-build volumes, a background growth factor was developed based on a review of historic Georgia DOT AADT traffic counts, as shown in Table 2.

SR 212 Annual Oglesby Br Annual Oglesby Br Annual SR 212 Annual Year W of site Ĕ of Hull W of SR 20 at site Growth Growth Growth Growth 217-0111 Station ID 247-0101 247-0298 247-0300 2019 7,980 7,310 3,050 4,360 2020 7,350 -7.9% -7.2% 4,050 -7.1% 6,740 -7.8% 2,830 7,380 2021 0.4% 3,150 11.3% 4,300 6.2% 7,280 8.0% 2022 7,540 2.2% 3,230 2.5% 4,220 -1.9% 6,920 -4.9% 2023 7,600 0.8% 3,770 16.7% 4,330 2.6% 6,970 0.7% avg -1.0% 4.3% -0.1% -0.9% growth

Table 2 – Historic Georgia DOT Traffic Volume Counts and Annual Growth Rates

Growth in the area has fluctuated. All four Georgia DOT count stations experienced a decrease in volumes between 2019 and 2020 which is considered an anomaly due to the pandemic. There was positive growth at all locations the following year, which is somewhat attributable to a return to pre-pandemic levels and not necessarily new growth. In the last year of the data there were small increases at three of the four locations and a strong increase at the fourth. Overall, the location at the site frontage experienced a decrease (-1.0%), one location experienced moderate growth, and the other two locations also experienced small decreasing trends. Based on the growth trends identified in Table 2, and taking the pandemic into consideration, it was decided that a modest background annual growth rate of 2.0% could be expected on the roads in this study while the proposed development is built-out. This equates to a 10.4% increase in volumes from existing to the anticipated 2029 project buildout year. The 10.4% background growth factor was applied to the counted volumes at each study intersection to develop the 2029 no-build volumes.

Programmed Transportation Infrastructure Improvements

The Georgia DOT projects website and the *Rockdale in Motion Comprehensive Transportation Plan Update*, September 2018, were reviewed for transportation projects in the vicinity of the subject development. The following programmed (scheduled and funded) or planned (anticipated) transportation infrastructure project was identified:

CTP 102 – Widening of SR 138 from SR 155 to Ebenezer Road – This project recommends widening SR 138 from two to four lanes. This would include the study intersection of SR 212 at SR 138. It is listed in the Rockdale CTP as a mid-term project, but is not programmed by the Georgia DOT. Therefore, this widening was not modeled in the nobuild or future build analysis in this traffic impact study.

No-Build Intersection Operations

The no-build condition includes the no-build traffic volumes, as described above, applied to the existing lanes and control. The no-build volumes were entered into the Synchro 12 model and the 2029 no-build traffic operations were analyzed at each study intersection. The results of the no-build analysis are shown in Table 3. Computer printouts containing detailed results of the no-build analysis are located in Appendix D. Levels of service and delays are provided for each overall intersection and for each controlled approach or movement. Locations that operate unacceptably (LOS E or LOS F) are presented in bold type.

Table 3 – No-Build Intersection Operations

	A.M. Po	eak Hour	P.M. Peak Hour	
Intersection / Approach	LOS	Delay (s/veh)	B A B B C A E D C D D B A B C	Delay (s/veh)
1. SR 212 at Oglesby Bridge Rd (signal)	В	12.6	В	14.2
northbound approach	А	9.3	А	8.5
southbound approach	В	10.9	В	12.6
eastbound approach	В	18.6	В	19.1
westbound approach	В	17.5	В	19.6
2. Union Church Rd at Oglesby Bridge Rd (side street stop)	D	25.4	С	18.5

westbound approach	Ε	38.1	Ε	46.3
3. SR 138 at SR 212 (signal)	D	40.7	D	44.1
northbound approach	D	38.0	С	27.3
southbound approach	С	20.3	D	48.1
eastbound approach	D	45.9	D	47.1
westbound approach	D	49.5	D	50.2
4. SR 20 at SR 212 / CVS Access (signal)	В	11.8	В	12.2
northbound approach	А	7.7	А	6.6
southbound approach	В	14.6	В	14.1
eastbound approach	С	25.9	С	26.1
westbound approach	С	24.4	С	23.1

The no-build analysis reveals slight deteriorations in operations due to growth in volumes, but most locations will continue to experience acceptable traffic operations. One location, the westbound approach of Oglesby Church Road at Union Church Road, drops to LOS E in the a.m. and p.m. peaks. It is recommended that a westbound right turn lane be added on Oglesby Church Road at this intersection. This will separate the more challenging left turn movement from the easier right turn movement, substantially reducing their delay. In the a.m. peak, this improvement will produce acceptable operations for all movements. In the p.m. peak the westbound left turn will continue to operate at LOS E but the right turn will improve to LOS B and the overall approach will operate at LOS D. This right turn lane is considered a system improvement which should be built whether or not the development that is the subject of this study is built. A signal warrant analysis should be performed to determine if and when signalization of this intersection will be appropriate. Alternatively, this intersection is a good candidate for conversion to a roundabout. A change in control here would also be a system improvement, which should be considered for implementation, whether or not the proposed development is built. All other study intersections will operate acceptably and, therefore, no other mitigation is identified for the no-build condition.

Project Traffic Characteristics

This section describes the anticipated traffic characteristics of the proposed development, including a site description, how much traffic the project will generate, and where that traffic will travel.

Project Description

The proposed development will consist of 230 detached single family homes and 65,000 square feet of retail. The residential will be served by one full-movement access on SR 212 and two full-movement accesses on Oglesby Bridge Road and the retail will have one access on each road. The site plan is presented in Figure 4.

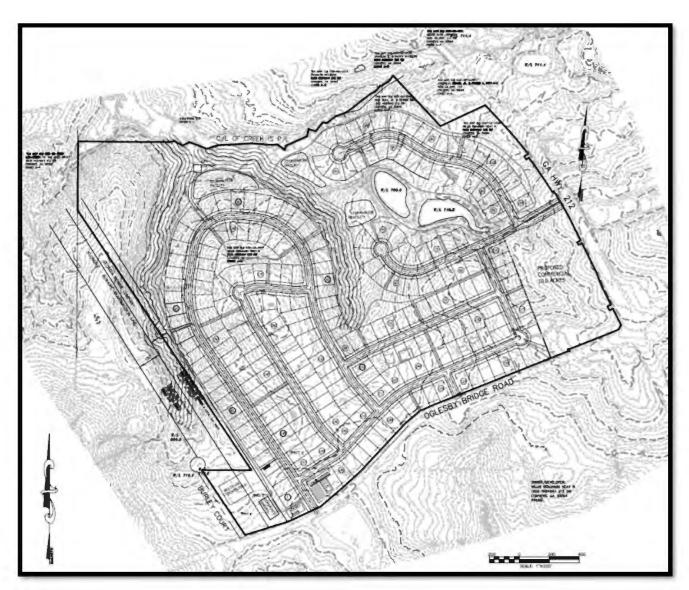

Figure 4 - Site Plan

Trip Generation

Trip generation is an estimate of the number of entering and exiting vehicular trips that will be generated by the proposed development. The volume of traffic that will be generated by the mixed-use development was calculated using the equations and rates in the Institute of Transportation Engineers (ITE) *Trip Generation Manual*, 11th Edition (the current edition). ITE Land Use 210 – Single Family Detached Housing was chosen as representative of the single family homes. The retail trips were calculated using ITE Land Use 821 – Shopping Plaza (40-150K).

An adjustment was made to the retail trips to account for pass-by trips. These are trips that are already passing the site in the existing counts, but will turn into the site for retail shopping purposes, then resume their original trip. These are new trips entering and exiting the retail site driveways but are not new to the adjacent intersections. The ITE *Trip Generation Manual* provides a p.m. pass-by percentage for Land Use 821 of 40%. For the a.m. and 24-hour periods, 30% was assumed.

The trip generation for the project is presented in Table 4.

24-A.M. Peak Hour P.M. Peak Hour ITE Hour Land Use Size Code In Out Total Out Total 2-Way In 230 homes Single Family Detached 210 40 119 159 137 80 217 2,172 **Shopping Center** 820 65,000 ft² 142 87 229 296 321 617 6,416 -pass-by trips 30/40/30% -43 -26 -118 -128 -1,924 -69 -246 **Shopping Center New Trips** 99 61 160 178 193 371 4,492 180 315 273 139 319 588 6,664

Table 4 – Trip Generation

The proposed mixed-use development will generate 319 new a.m. peak hour trips, 588 new p.m. peak hour trips, and 6,664 new weekday trips. The retail driveway volumes will be higher because they will also include the pass-by trips which already exist passing the site.

Trip Distribution and Assignment

The trips that will be generated by the proposed mixed-use development were distributed and assigned to the roadway network. The trip distribution percentages indicate what proportion of the project's trips will travel to and from various directions. The trip distribution percentages for the residential were developed based on the locations and proximity of likely trip origins and destinations including regional employment centers, retail and offices in the area, nearby schools, other regional trip attractors, and also considered the major routes of travel in the area. The new retail trips were distributed based on the locations of residential populations in the area and the distances of those populations to the site, as well as the major routes of travel in the area. The retail pass-by trips were assigned based on the existing flows of traffic passing the site. The trip distribution percentages and the a.m. and p.m. peak

hour trips expected to be generated by the proposed development are shown in Figure 5. The traffic volume worksheets in Appendix A show the trips separately for the residential and retail uses and the pass-by trips at each study intersection.

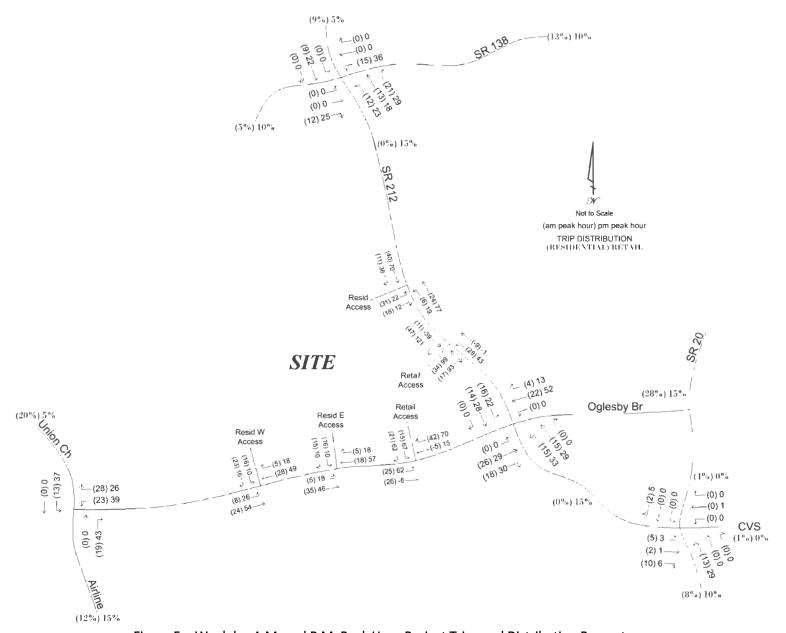

Figure 5 – Weekday A.M. and P.M. Peak Hour Project Trips and Distribution Percentages

Future Traffic Conditions

The future volumes consist of the no-build volumes plus the trips that will be generated by the proposed mixed-use development. The future volumes are shown in Figure 6.

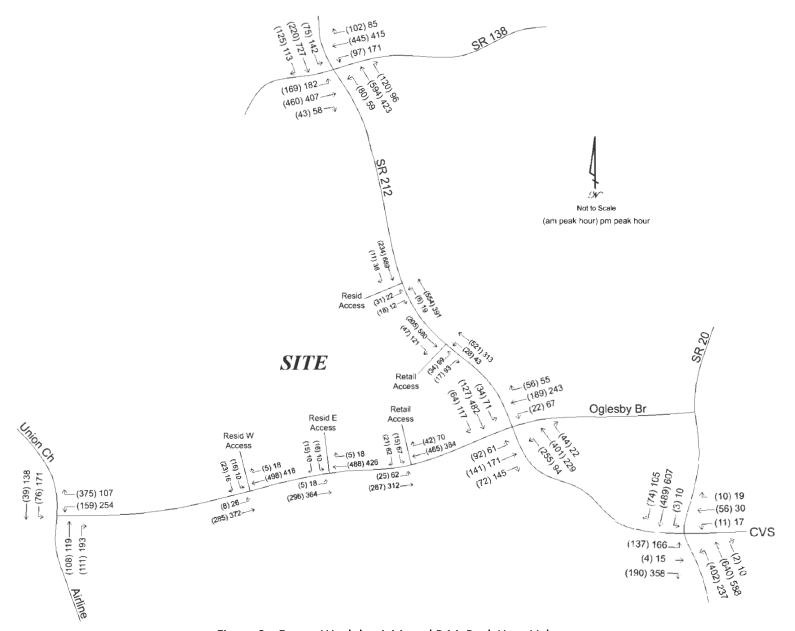

Figure 6 – Future Weekday A.M. and P.M. Peak Hour Volumes

Auxiliary Lane Requirements at Project Accesses

The auxiliary turn lane standards were reviewed at each project access to determine the need for left and/or right turn lanes on the public roadways to serve the project. The project accesses on SR 212 were reviewed according to the Georgia DOT standards while the Rockdale County standards were reviewed for the Oglesby Bridge Road accesses.

SR 212 Accesses

To determine if southbound right turn lanes or northbound left turn lanes should be added on SR 212 at the two project accesses, the Georgia DOT standards for determining the need for these auxiliary lanes, as set forth in their Regulations for Driveway and Encroachment Control (Driveway Manual), revision 5.4 dated 2/10/2023, were evaluated. The right turn lane analysis is based on Driveway Manual Table 4-6, Minimum Volumes Requiring Right Turn Lanes, which is shown below as Table 5.

Posted Speed 2 Lane Routes More than 2 Lanes on Main Road AADT AADT < 6,000 >=6,000 <10,000 >=10,000 35 MPH or Less 200 RTV a day 100 RTV a day 200 RTV a day 100 RTV a day 40 to 50 MPH 150 RTV a day 75 RTV a day 150 RTV a day 75 RTV a day 55 to 60 MPH 100 RTV a day 50 RTV a day 100 RTV a day 50 RTV a day >= 65 MPH Always Always Always Always

Table 5 – Georgia DOT Right Turn Lane Standards

Table 4-6 Minimum Volumes Requiring Right Turn Lanes

The 2023 AADT on SR 212 is 7,600 vpd and the counted volume is 9,834 vehicles, both of which are above the 6,000 vpd threshold for roads with two lanes. On a road with two lanes, a 55 mph speed limit, and a 24-hour volume above 6,000 vpd, the right turn volume (RTV) above which a right turn lane is required is 50 right turn vehicles (RTV) per day. The future right turn volume (RTV) projection on SR 212 at the project residential access is 293 daily southbound right turn vehicles, while the RTV projection at the retail access is 1,183 RTV. These RTVs are both above the minimum threshold. Therefore a southbound right turn lane is required on SR 212 at each project access and this study agrees with those requirements.

The left turn lane analysis is based on *Driveway Manual* Table 4-7a, Minimum Volumes Requiring Left Turn Lanes, which is shown below as Table 6.

LEFT TURN REQUIREMENTS-FULL CONSTRUCTION Posted Speed 2 Lane Routes More than 2 Lanes on Main Road ADT <6.000 >=6.000 <10.000 >=10,000 200 LTV a day 35 MPH or Less 300 LTV a day 400 LTV a day 300 LTV a day 325 LTV a day 250 LTV a day 40 to 50 MPH 250 LTV a day 175 LTV a day >= 55 MPH 200 LTV a day | 150 LTV a day | 250 LTV a day | 200 LTV a day

Table 6 – Georgia DOT Left Turn Lane Standards

Table 4-7a Minimum Volumes Requiring Left Turn Lanes

The 2023 AADT on SR 212 is 7,600 vpd and the counted volume is 9,834 vehicles, both of which are above the 6,000 vpd threshold for roads with two lanes. On a road with two lanes, a 55 mph speed limit, and a 24-hour volume above 6,000 vpd, the left turn volume (LTV) above which a left turn lane is required is 150 left turn vehicles (LTV) per day. The future left turn volume (LTV) projection on SR 212 at the project residential access is 155 daily northbound left turn vehicles, while the LTV projection at the retail access is 540 LTV. These LTVs are both above the minimum threshold. Therefore a northbound left turn lane is required on SR 212 at each project access and this study agrees with those requirements. It is noted that the southbound left turn lane on SR 212 at Oglesby Bridge Road extends along much of the project frontage and may conflict with the left turn lanes at the project accesses, especially the retail access. The retail access, and possibly the residential access, may need to be restricted to right-in/right-out (RIRO) movements if a suitable left turn lane design cannot be accommodated.

Oglesby Bridge Road Accesses

To determine if westbound right turn lanes or eastbound left turn lanes should be added on Oglesby Bridge Road at the three project accesses, the Rockdale County's Code of Ordinances, as approved June 10, 2021, were reviewed. The Code states the following pertaining to turn lane requirements at development accesses:

Section 332-3 – Driveway Design Standards, (d) Auxiliary Lanes

- (1) Along any arterial or major collector street, a deceleration lane, acceleration lane, larger turning radius, traffic islands or other devices or designs may be required to avoid specific traffic hazards that, otherwise, would be created by the proposed driveway location.
- (2) Deceleration lanes shall be required by Rockdale County at each access point on roads classified as arterials or collectors when the posted speed limit is 30 mph or higher and otherwise where considered necessary by the director based on traffic volumes. Deceleration lanes are required on county roads classified as arterial and major collector streets when the posted speed limit is 30 mph or higher. Minimum deceleration lengths are specified in the "Table of deceleration lane requirements." The director may vary length requirements based upon a consideration of available sight distance and traffic volumes.

Based on the Code, the classification of Oglesby Bridge Road as a major collector, and the posted speed limit of 45 mph, a westbound right turn lane is required on Oglesby Bridge Road at all three project accesses and this study agrees with those requirements.

A left turn lane standard is not provided in the County Code. Therefore, to determine if an eastbound left turn lane is required on Oglesby Bridge Road at each project access, the Georgia DOT standards for determining the need for these auxiliary lanes, as set forth in their *Regulations for Driveway and Encroachment Control (Driveway Manual)*, revision 5.4 dated 2/10/2023, were evaluated. The left turn lane analysis is based on *Driveway Manual* Table 4-7a, Minimum Volumes Requiring Left Turn Lanes, which was presented above as Table 6.

The 2023 AADT on Oglesby Bridge Road is 3,770 vpd which is below the 6,000 vpd threshold for roads with two lanes. However, the count that was collected for this study in May 2024 revealed a 24-hour volume of 6,024 vehicles, which is above the 6,000 vpd threshold. Because this count was recorded directly adjacent to the site, while the AADT count was collected west of the site, the higher, closer count was applied in this analysis. On a road with two lanes, a 45 mph speed limit, and a 24-hour volume above 6,000 vpd, the left turn volume (LTV) above which a left turn lane is required is 175 left turn vehicles (LTV) per day. The future left turn volume (LTV) projection on Oglesby Bridge Road at the project west residential access is 209 daily eastbound left turn vehicles, while the LTV projection at the east residential access is 139 LTV. The left turn volume at the west access is above the 175 LTV threshold but the LTV at the east access is below the threshold. Therefore, an eastbound left turn lane is required at the west residential access and this study agrees with that requirement. At the retail access the eastbound LTV is projected at 617 LTV. This LTV is above the minimum threshold and, therefore an eastbound left turn lane is required on Oglesby Bridge Road at the retail access, consideration should be given to providing one at this access, given that Oglesby Bridge Road will be widened to accommodate left turn lanes at the adjacent access on either side of this access.

Future Intersection Operations

An operational analysis was performed for the anticipated future project build-out at the study intersections and the project accesses. The analysis at the accesses assumed that the turn lanes recommended above will be constructed, each access will be constructed with one entering lane and one exiting lane, and the side street approaches exiting the project will be controlled by side street stop sign. Table 7 presents the results of the future analysis. Computer printouts containing detailed results of the future analysis are located in Appendix E. Levels of service and delays are provided for each overall intersection and for each controlled approach or movement. Locations that operate unacceptably (LOS E or LOS F) are presented in bold type.

Table 7 – Future Intersection Operations

eastbound left turn (entering retail)	A	8.9	A	8.7

The future analysis with the addition of the proposed mixed-use development's trips reveals a slight deterioration in operations at each study intersection, with all locations continuing to operate comparably to the no-build condition. As in the no-build condition, the westbound approach of Oglesby Bridge Road at Union Church Road will continue to fail, with the approach dropping from LOS E to LOS F. The westbound right turn lane recommended in the no-build analysis will continue to be appropriate. Likewise, a change in control to a signal or a roundabout was advised for consideration in the no-build condition, and this recommendation continues to be appropriate in the future.

The project accesses are expected to operate acceptably with the lanes and control recommended, with just one approach at one access during one time period operating at LOS E. This is the exiting approach of the retail access at SR 212. As advised previously in this report, the left turns to and from this access may conflict with the southbound left turn lane on SR 212 at Oglesby Bridge Road and restriction to right-in/right-out (RIRO) movements will be appropriate if a workable design solution cannot be achieved. All other accesses will operate acceptably and no mitigation, other than the lanes recommended at the project accesses, is identified as a consequence of the proposed development.

Conclusions and Recommendations

This study assesses the traffic impact of a proposed development which will include a residential subdivision and a retail tract in Rockdale County. The site is located along the west side of SR 212 and the north side of Oglesby Bridge Road. The project will consist of 230 detached single family homes and 65,000 square feet of retail. The residential will be served by one full-movement access on SR 212 and two full-movement accesses on Oglesby Bridge Road and the retail tract will have one access on each road. The following are the findings and recommendations of this study:

- 1. The existing analysis reveals acceptable traffic operations at all study locations. Therefore, no mitigation is identified for the existing condition.
- 2. Traffic volume growth in this area has been a mix of positive and negative. An annual growth rate of 2.0%, applied for five years, for a total of 10.4% growth, was used in developing future volume projections.
- 3. The no-build analysis reveals continued acceptable traffic operations at most study locations, comparable to the existing condition, with just modest increases in delays due to anticipated growth in volumes. One location, the westbound approach of Oglesby Bridge Road at Union Church Road, will fail. A westbound right turn lane is recommended to be added on Oglesby Bridge Road. A change in control to a signal or roundabout should be evaluated and implemented if and when appropriate. The mitigation identified here are considered system improvements, which are recommended whether or not the proposed mixed-use development is built.
- 4. The proposed mixed-use development will generate 319 new a.m. peak hour trips, 588 new p.m. peak hour trips, and 6,664 new weekday trips. The retail driveway volumes will be higher because they will also include the pass-by trips which already exist passing the site.
- 5. The future analysis with the addition of the proposed development's trips reveals a slight deterioration in operations at each study intersection. The mitigation recommended at the Union Church Road / Oglesby Bridge Road intersection will continue to be appropriate. No mitigation, other than the lanes recommended at the project accesses, is identified as a consequence of the proposed mixed-use development.
- 6. On SR 212, a southbound right turn lane and a northbound left turn lane are required at both the residential access and the retail access. These turn lanes should be designed and constructed to Georgia DOT standards. The northbound left turn lanes, notably for the retail access, may conflict with the existing southbound left turn lane on SR 212 at Oglesby Bridge Road. Should a design solution not be achievable, the retail access should be restricted to RIRO movements.
- 7. A westbound right turn lane should be built on Oglesby Bridge Road at the west and east residential accesses and the retail access. These lanes are required by the County and should be designed and built to applicable standards.

- 8. An eastbound left turn lane is required on Oglesby Bridge Road at the west residential access and at the retail access. A left turn lane at the east residential access merits consideration given the widening of the road to accommodate the left turn lanes at the adjacent accesses.
- 9. All project accesses should be built with one entering lane and one exiting lane and each exiting approach should be controlled by side street stop sign and accompanying stop bar.
- 10. An interparcel vehicular connection between the residential and retail portions of the project would provide for mobility between the tracts without the need for traveling out of the project onto the public roadways. Therefore, this connection is recommended.
- 11. The project civil/site engineer should comply with all applicable design standards including sight distances, turn lane storage and taper lengths, turn radii, driveway widths, islands, angles with the adjacent roadways, and grades.

Intersection Analysis Methodology

Intersection Analysis Methodology

The methodology used for evaluating traffic operations at intersections is presented in the Transportation Research Board's 2022 *Highway Capacity Manual*, 7th Edition (HCM 7). Synchro 12 software, which emulates the HCM 7 methodology, was used for all analyses. The following is an overview of the methodology employed for the analysis of signalized intersections and roundabouts and stop-sign controlled (unsignalized) intersections. Levels of service (LOS) are assigned letters A through F. LOS A indicates operations with very low control delay while LOS F describes operations with high control delay. LOS F is considered to be unacceptable by most drivers, while LOS E is typically considered to be the limit of acceptable delay.

Signalized Intersections and Roundabouts – Level of service for a signalized intersection and a roundabout is defined in terms of control delay per vehicle. For signalized intersections and roundabouts, a composite intersection level of service is determined. The thresholds for each level of service are higher for signalized intersections and roundabouts than for unsignalized intersections. This is attributable to a variety of factors including expectation and acceptance of higher delays at signals/roundabouts, and the fact that drivers can relax when waiting at a signal as opposed to having to remain attentive as they proceed through the unsignalized intersection. The level of service criteria for signalized intersections and roundabouts are shown in Table A.

Table A – Level of Service Criteria for Signalized Intersections and Roundabouts

Control Delay (s/veh)	LOS
≤ 10	А
> 10 and ≤ 20	В
> 20 and ≤ 35	С
> 35 and ≤ 55	D
> 55 and ≤ 80	Е
> 80	F

Source: Highway Capacity Manual 7

Unsignalized Intersections – Level of service for an unsignalized intersection is defined in terms of control delay per vehicle. Control delay is that portion of delay attributable to the control device and includes initial deceleration delay, queue move-up time, stopped delay, and final acceleration delay. The delays at unsignalized intersections are based on gap acceptance theory, factoring in availability of gaps, usefulness of the gaps, and the priority of right-of-way given to each traffic stream. The level of service criteria for unsignalized intersections are presented in Table B.

Table B – Level of Service Criteria for Unsignalized Intersections

Control Delay (s/veh)	LOS
0-10	А
> 10 and ≤ 15	В
> 15 and ≤ 25	С
> 25 and ≤ 35	D
> 35 and ≤ 50	Е
> 50	F

LEGAL DESCRIPTION TRACT 1A

ALL THAT TRACT or parcel of land lying and being in land lot 111 of the 11th district of Rockdale County, Georgia and being more particularly described as follows:

BEGINNING at an R/W Marker on the north right-of-way of Oglesby Bridge Road (80'r/w) at the south end of a mitered right-of-way of Hwy 212 this being the true point of beginning.

THENCE South 66 degrees 15 minutes 49 seconds West for a distance of 54.83' feet to an R\W Marker;

THENCE South 68 degrees 27 minutes 49 seconds West for a distance of 305.92' feet to an R\W Marker;

THENCE South 20 degrees 36 minutes 12 seconds East for a distance of 9.95' feet to an R\W Marker;

THENCE South 68 degrees 30 minutes 29 seconds West for a distance of 129.30' feet to a point;

THENCE North 21 degrees 29 minutes 31 seconds West for a distance of 879.62' feet to a point;

THENCE North 59 degrees 56 minutes 31 seconds East for a distance of 443.52' feet to a point;

THENCE along a curve to the right having a radius of 2897.00' feet and an arc length of 163.67' feet, being subtended by a chord of South 28 degrees 26 minutes 23 seconds East for a distance of 163.64' feet to a R\W Marker;

THENCE South 26 degrees 42 minutes 37 seconds East for a distance of 126.28' feet to an R\W Marker;

THENCE South 64 degrees 31 minutes 19 seconds West for a distance of 24.99' feet to an R\W Marker;

THENCE South 27 degrees 02 minutes 40 seconds East for a distance of 20.85' feet to an R\W Marker;

THENCE North 66 degrees 06 minutes 18 seconds East for a distance of 24.10' feet to an R\W Marker;

THENCE South 26 degrees 33 minutes 28 seconds East for a distance of 213.64' feet to an R\W Marker;

THENCE South 21 degrees 30 minutes 17 seconds East for a distance of 100.39' feet to an R\W Marker;

THENCE South 26 degrees 39 minutes 41 seconds East for a distance of 138.19' feet to an R\W Marker;

THENCE South 64 degrees 20 minutes 34 seconds West for a

distance of 25.40' feet to an R\W Marker;
 THENCE South 27 degrees 50 minutes 11 seconds East for a
distance of 30.84' feet to an R\W Marker;

THENCE North 61 degrees 24 minutes 09 seconds East for a distance of 24.97' feet to an R\W Marker;

THENCE South 26 degrees 41 minutes 12 seconds East for a distance of 122.29' feet to an R\W Marker;

THENCE South 28 degrees 49 minutes 53 seconds West for a distance of 33.93' feet to an R\W Marker at the true point of beginning.

L E G A L D E S C R I P T I O N TRACT 1B

ALL THAT TRACT or parcel of land lying and being in land lots 82 & 111 of the 11th district of Rockdale County, Georgia and being more particularly described as follows:

BEGINNING at a R\W Marker on the north right-of-way of Oglesby Bridge Road (80'r/w) at the south end of a mitered right-of-way from Hwy 212, thence in a west direction along the north right-of-way of Oglesby Bridge Road for a distance of 500.00 feet to a point at the true point of beginning.

THENCE South 68 degrees 30 minutes 29 seconds West for a distance of 381.20' feet to an IPF $1\2$ "RB;

THENCE South 67 degrees 48 minutes 48 seconds West for a distance of 456.17' feet to an IPF $1\2"RB;$

THENCE North 25 degrees 55 minutes 56 seconds West for a distance of 950.22' feet to a point;

THENCE North 62 degrees 31 minutes 31 seconds East for a distance of 424.60' feet to a point;

THENCE North 35 degrees 44 minutes 42 seconds West for a distance of 1069.99' feet to a point in center line of Creek;

THENCE South 87 degrees 54 minutes 12 seconds East for a distance of 17.69' feet to a point;

THENCE North 58 degrees 51 minutes 22 seconds East for a distance of 16.92' feet to a point;

THENCE North 58 degrees 53 minutes 28 seconds East for a distance of 12.87' feet to a point;

THENCE South 84 degrees 21 minutes 20 seconds East for a distance of 29.28' feet to a point;

THENCE South 56 degrees 25 minutes 04 seconds East for a distance of 20.61' feet to a point;

THENCE South 45 degrees 22 minutes 48 seconds East for a distance of 26.65' feet to a point;

THENCE North 07 degrees 12 minutes 34 seconds East for a distance of 42.15' feet to a point;

THENCE North 01 degrees 31 minutes 41 seconds East for a distance of 24.00' feet to a point;

RE:

Report of Wetland Delineation & State Waters Review

Seay Farm, 140-acre Tract

Oglesby Bridge Road & Hwy. 212

Rockdale County, Georgia

Dear Ms. Nolan:

Applied Environmental Sciences, Inc. has completed a Wetland Delineation and State Waters Review on the Seay Farm, 140-acre Tract. This report contains information obtained during our investigation and our opinion of permitting options for site development.

We appreciate the opportunity to be of service to you on this project and look forward to working with you in the future. Please contact us at your convenience if you have any questions or if we can be of continued service.

Sincerely,

APPLIED ENVIRONMENTAL SCIENCES, INC.

M. Brannon Miles

President

REPORT

OF

WETLANDS DELINEATION AND STATE WATERS REVIEW

ON THE

SEAY FARM, 140-ACRE TRACT OGLESBY BRIDGE ROAD & HWY. 212 ROCKDALE COUNTY, GEORGIA

PREPARED FOR

MS. COURTNEY J. NOLAN, P.E. NEW DIMENSION ENGINEERING, LLC 101 DEVANT STREET, UNIT 908-B FAYETTEVILLE, GA 30214

> DECEMBER 18, 2007 AES PROJECT NO. 27511.1

Project Purpose and Location

Applied Environmental Sciences, Inc. was contracted by New Dimension Engineering, LLC to perform a delineation of wetlands and other jurisdictional waters for the Seay Farm, 140-acre Tract. This site is hereinafter referred to as the Project Site. The investigation included a review of potential Georgia Waters of the State, including those that require a stream buffer. The delineation and review were requested to be used in a determination of potential Federal and State permitting requirements for Project Site development.

Based on the provided information, the Project Site consists of an approximately 140-acre tract adjacent to the northwest of the intersection of Oglesby Bridge Road and Highway 212 in Rockdale County, Georgia. The Project Site is located within the Piedmont Physiographic Province of Georgia. Drainage from the Project Site is generally toward the north to Honey Creek. Honey Creek is located within the South River drainage basin.

Methodology

Wetland Delineation

The purpose of the wetland delineation was to identify Federal jurisdictional waters, including wetlands on the Project Site. In order for an area to qualify as wetland, physical evidence of (1) wetland vegetation, (2) wetland hydrology, and (3) hydric soils must be present. The criteria used to determine these parameters in the field are found in the U.S. Army Corps of Engineers (USACE) 1987 Wetland Delineation Manual. The definition for other Waters of the U.S., found at 33 CFR Section 328.3(a)(3), was used to delineate stream channels and open waters which do not meet the criteria for wetlands, but are jurisdictional to the USACE.

Recommendations for further coordination with the USACE for verification of a wetland delineation, issuance of a jurisdictional determination or permit to discharge fill material in Waters of the U.S. and wetlands are based on our understanding of current Federal wetland regulations, the results of the investigation, and review of provided, proposed development plans for the Project Site.

State Waters Review

The purpose of the state waters review was to identify potential Georgia Waters of the State located on the Project Site, and determine which of those waters should require a stream buffer. The Erosion and Sedimentation Act of Georgia prohibits land disturbing activities within the 25-foot buffer along state waters. However, the EPD provides for a variance process for certain activities within the buffer. Certain activities, such as road and utility line crossings, are typically exempt.

The criteria used for the review is detailed in Section 391-3-7.01 (v) of Chapter 391-3-7 of the Georgia Erosion and Sediment Act, Revised January, 2005. The criteria defined in the EPD Erosion and Sediment Control Manual, Revised January, 2005 was utilized to determine which areas on the Project Site require a state waters buffer. The definition utilized is as follows: "a "Stream Bank" means the confining cut of a stream channel and is usually identified as the point where the normal stream flow has wrested the vegetation. For non trout waters, the normal stream flow is any stream flow that consists solely of base flow or consists of both base flow and direct runoff during any period of the year. Base flow results from groundwater that enters the stream channel through the soil. This includes spring flows into streams. Direct runoff is the water entering stream channels promptly after rainfalls or snow melts."

Wetland Delineation Report Seay Farm Tract December 18, 2007

As a supplemental tool for the review, potential streams and drainage features were evaluated using the current version of the intermittent stream evaluation method developed by the North Carolina Division of Water Quality (NCDWQ). The NCDWQ Stream Classification Method and associated guidance manual is a scoring method developed to distinguish ephemeral channels from intermittent streams. Within the classification method, a stream or stream segment must score a minimum of 19 points for classification as "intermittent." For scores of 18 points or less, the stream will be classified as "ephemeral" unless found to be a natural variant or urbanized channel.

Results

AES personnel completed the Wetland Delineation and State Waters Review on December 6, 2007. The wetland-upland (jurisdictional) boundaries were identified in the field with pink flagging. The head of each stream that originates on the Project Site was also flagged in the filed. The flagged jurisdictional boundaries were field-located using a *Trimble Pro XT GPS*. The collected data was post processed for further accuracy and transferred to the provided site plan. Jurisdictional areas delineated on the Project Site are depicted on the attached Figure 3 and consist of the following:

- Five perennial streams (PS1 − PS5)
- ♦ Four intermittent streams (IS1 IS4)
- Three areas of wetlands (W1 W3)
- ♦ Three ponds (P1 P3)

Five perennial streams were identified on the Project Site. Each stream is well defined and is moderately incised. Perennial stream PS1 originates off site and trends generally northward across the western portion of the Project Site. Perennial stream PS2 flows to the northeast across the northwestern corner of the Project Site. Perennial stream PS3 forms the northern property boundary. Perennial stream PS4 begins on site and flows generally to the north-northeast across the central portion of the Project Site. Perennial stream PS5 originates at the outflow structure of a small pond (pond P2) on the northeastern portion of the Project Site. PS5 converges with PS4 approximately 350-ft to the west of the outflow structure.

Pond P1 is located on the western side of the Project Site and is an impoundment of PS1. An area of emergent and forested wetlands (W1) was identified within the headwaters of this pond. Intermittent stream IS1 commences on site to the east of the pond. A second area of forested wetlands (W2) was identified adjacent to this stream and to the east of the pond. Ponds P2 and P3 are located on the northeastern portion of the site. Pond P3 is an impoundment of intermittent streams IS3 and IS4. Pond P2 is located adjacent and down gradient of pond P3. Wetland area W3 consists of an emergent and forested wetlands system within the headwaters of perennial stream PS4. This wetland exhibits hydrologic influence from the adjacent upland landscape positions.

Discussion

Based on our investigation, each of the above-described areas should be considered jurisdictional to the USACE. Also, the streams and ponds should be considered Georgia Waters of the State jurisdictional to the Georgia EPD, and should require buffers.

Federal Permitting Requirements

Based on our review of the provided site plan, a residential development is proposed for the Project Site. Impacts to Waters of the U.S., including wetlands, can be authorized through USACE Nationwide and Individual Permits. Generally, impacts for residential developments less than 300-linear feet of stream

Wetland Delineation Report Seay Farm Tract December 18, 2007

channel and less than 0.50-acres of wetlands may be authorized under USACE Nationwide Permit No. 29. USACE Nationwide Permit No. 29 requires a 45-day review period after submittal to the USACE. Compensatory mitigation is required to offset impacts in excess of 100-linear feet of stream channel and 0.10-acres of wetlands. Impacts to greater than 300-linear feet of stream channel or 0.50-acre of wetlands require a USACE Individual Permit. A USACE Individual permit typically takes 7 to 13-months for approval.

State Permitting Requirements

The Georgia Erosion & Sedimentation Act prohibits land disturbing activities within the 25-foot buffer adjacent to state waters. The EPD does provide for a variance process for buffer encroachment for certain activities. Typically, road and utility line crossings are exempt from the variance process if they are constructed perpendicular to the stream.

Based on our review, all of the streams and ponds on the Project Site should be considered state waters and should require buffers. The delineated wetland areas are not inundated, and should not require buffers. Based on our review of the site plan, two road crossings across state waters are proposed. The crossings appear to be perpendicular to the respective stream channels. Therefore, they should not, in our opinion, require stream buffer variances.

Conclusions

Jurisdictional areas consisting of five perennial stream, four intermittent streams, two ponds, and three wetlands systems were identified on the Project Site. All of these areas should be considered jurisdictional to the <u>USACE</u>. The streams and ponds should also be considered jurisdictional to the <u>EPD</u> and should require buffers.

Based on the provided site plan, a residential development is proposed for the Project Site. Under the current design, two road crossings across live streams are proposed. Permitting for the crossings should be possible through the use of a USACE Nationwide Permit No. 29. Authorization from the USACE in the form of an approved Pre-Construction Notification is required prior to construction of the development. If the cumulative impacts to stream channel are greater than 100-lf, compensatory mitigation will be required. 7

The streams and ponds on the Project Site should be considered Georgia Waters of the State and require buffers. The proposed road crossings appear to be perpendicular to the stream channels. Therefore, the crossings should not, in our opinion, require buffer variances. Following the preparation of the final development and grading plans, proposed impacts to jurisdictional waters should be calculated to determine the appropriate permitting requirements and necessary coordination with the USACE and EPD. Applied Environmental Sciences would be glad to assist you with the impact determination and then provide recommendations concerning permitting options.

ZONING HISTORY

The subject site is located at 4250 SE Highway 20 and is zoned A-R (Agricultural-Residential District). No prior zoning changes are on record for this property.

EXISTING SITE CONDITIONS

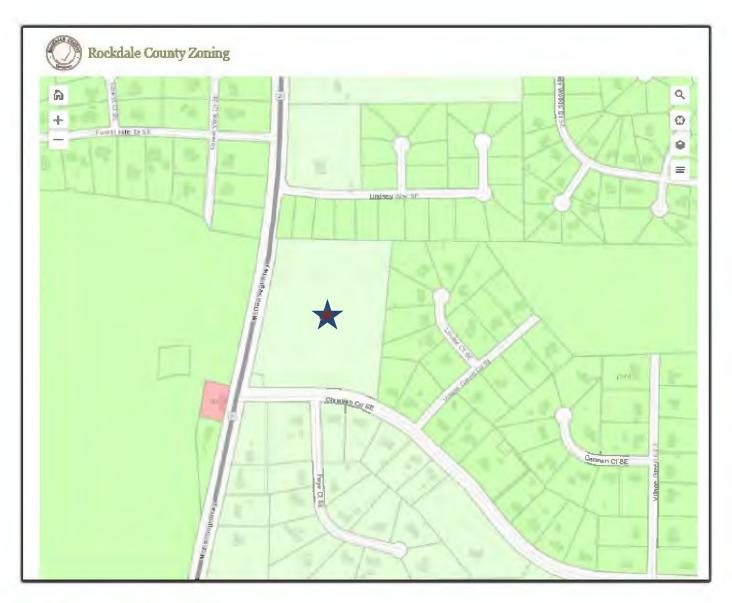

The subject site is a 12.88-acre property along Highway 20 SE. The parcel has road frontage along both Highway 20 SE and S Christian Circle SE. Sidewalks are not present along any of the property's road frontage. There are no streams, wetlands, or flood hazard areas on the property. The parcel is undeveloped and heavily wooded.

SURROUNDING USE AND ZONING

The subject site is surrounded by residential uses. The following is a summary of surrounding uses and zoning:

	ADJACENT ZON	ING AND CUR	RENT LAND USE
Direction	Address	Zoning District	Current Land Use
	4201 SE Lindsey Way	R-1	Single-Family Residence

AERIAL MAP

PROJECT SUMMARY

The applicant is requesting a rezoning and a future land use amendment for a 12.88-acre site. The project includes the following:

- A request to rezone the site from A-R (Agricultural-Residential) to C-2 (General Commercial) for the development of a 29,850 square foot retail commercial complex.
- A request to amend the Future Land Use Map from Medium Density Residential to Commercial.

The site includes the following elements:

- Three buildings totaling 29,850 square feet
- Three access points to the commercial complex
 - o Two access points from Highway 20 SE (with deceleration lanes and tapers)
 - o One access point from S Christian Circle SE
- Proposed stormwater detention pond with a surface area of 24,616 square feet
- Proposed three primary septic fields and three secondary septic fields
- Proposed 50-foot-wide transitional buffer adjacent to R-1 zoned properties (meets code requirements)

ZONING AND DEVELOPMENT STANDARDS

The following is a summary of applicable development standards from the Rockdale Unified Development Ordinance (UDO):

ZONING AND DEVELOPMENT STANDARDS							
Standard	Required	Proposed	Meets Standard?				
Minimum Lot Size	15,000 SF	12.88 acres	YES				
Minimum Lot Width	100 Feet	>100 Feet	YES				
Front Setback	25 Feet	25 Feet	YES				
Rear Setback	35 Feet	>25 Feet (with additional natural buffer)	YES				
Side Setback	25 Feet	25 Feet	YES				
Gross Density	15,000SF/Acre maximum	450,000 SF	YES				
Front Landscape Strip	20 Feet	20 Feet	YES				
Side/Rear Landscape Strip	10 Feet	>10 Feet	YES				
Transitional Buffer (Adjacent to R-1)	50 Feet	50 Feet	YES				

INTERNAL AND EXTERNAL AGENCY REVIEW

In addition to the above referenced development standards, the applicant must meet all other UDO requirements related to infrastructure improvements. Internal and External agency comments are attached and provided below.

<u>Fire</u>

Fire Hydrants shall be spaced a maximum 500 feet apart for non-sprinkled structures and maximum of 600 feet apart for sprinkled structures.

Board of Education

No impact – Commercial property.

Stormwater Department

Based on the submitted rezoning documents, there are no known environmental impacts which still acquire Rockdale County requirements that must be adhered to by Federal, State and County ordinances. Tree protection must be adhered to as it relates to the Stormwater Management Department for Land Disturbance Permitting.

CHAPTER 328 – Buffers, landscaping, and Tree Protection

Sec. 328-15. - Authority, findings, purpose and intent.

- (a) *Authority*. This article is enacted pursuant to the county's exclusive planning authority granted by the Constitution of the State of Georgia, including but not limited to Ga. Const. art. IX, § II, para. IV, and Ga. Const. art. IX, § II, para. III, as well as authority granted by the General Assembly of the State of Georgia, including by not limited to O.C.G.A. § 36-70-3, as well as 1977 Ga. Laws, page 2817, as amended, and 1969 Ga. Laws, page 3639, as amended, and the general police powers of the county and other authority provided by federal, state and local laws applicable to this article.
- (b) Findings, purpose, and intent. It is the intent of this article to provide standards for landscaping and for the preservation and replacement of trees as part of the land development and building construction process in unincorporated areas of the county. The county finds that the existence of adequate tree cover and landscaping in the county directly affects the public health, safety and welfare to comprehensively address these concerns through the adoption of the regulations in this article. The purpose and intent of the board of commissioners in enacting this article are as follows:
- (1) To protect the health, safety and general welfare of the citizens of the county, and to implement the policies and objectives of the comprehensive plan through the enactment of a comprehensive ordinance governing tree preservation and replacement in the county.
- (2) To require landscaping and the preservation and replacement of trees in certain areas within the county in order to ensure the continued health of its citizens through improved air and water quality.
- (3) To provide developers and others active in the county with the appropriate guidance to better ensure proper tree preservation and replacement in the course of the land development process in the county.
- (4) To preserve property values in the county by maintaining a safe, aesthetically pleasing environment.
- (5) To reduce flooding of county rivers and streams by planting trees and other vegetation so as to aid in slowing the rate of stormwater runoff.
- (6) To reduce soil erosion in the county by planting trees and other vegetation so as to aid in prevention of soil loss through stormwater runoff and flooding and to promote stormwater infiltration.
- (7) To reduce noise and glare on adjacent properties from properties that has been extensively developed.
- (8) To conserve energy by cooling surrounding air temperatures through the existence of adequate shade trees.
- (9) To provide improved atmospheric quality by reducing airborne particulates and carbon monoxide and by increasing oxygen through adequate tree cover.
- (10) To promote the saving of trees in nodes throughout a development, rather than as individual trees scattered over a development or around the periphery of a development.
- (11) To prevent clear-cutting and mass grading of land that results in the loss of mature trees, and to ensure appropriate replanting when tree loss does occur.

Sec. 328-25. - Requirements for other developments.

- (a) Each new development not covered by <u>section 328-24</u> shall prepare a landscape and tree protection and replacement plan showing compliance with this section.
- (b) The tree protection and replacement plan must, at a minimum, protect or plant 15 units per acre of trees on the land being developed. The tree density calculations shall not utilize trees within required buffers in determining for the overall density factor, existing density factor, or replacement density factor. All new development with eight (8) or more parking spaces, or expanded development that results in eight (8) or more parking spaces, shall provide interior landscaping.
- (c) Rockdale County has given priority to the retention and placement of trees in frontage planting strips and parking lot planting islands. Trees retained or placed in these areas may be used to meet the tree density factor for a project. However, if the tree density factor is met with trees saved or planted in other areas, the tree location guidelines outlined below must still be performed with additional tree plantings.
- (d) Required landscape strips and re-vegetated buffers. Landscape strips shall meet the minimum depth requirements as indicated in the following table. Trees may be planted in groups rather than in a single line. Adjoining residential zoning districts, evergreen trees shall be saved or planted in such density or spacing as to provide an eight-foot tall visual barrier within two years of planting. Required landscaping strips shall not be encroached upon by parking space, driveway surfaces or storm water detention facilities except when complying with requirements below. Driveway crossings may traverse such strip as near to a perpendicular alignment as practical. Signs may be located in the required landscape strip.

Transportation

Sec. 222 – Off Street Parking Standards:
$\hfill \square$ Ensure parking space dimensions remain in accordance with Rockdale ordinance and requirements.
☐ Appears to have enough parking and ADA parking spaces.
☐ Lights will be required if the parking and loading areas are to be used at night.
Sec. 332, Article I – Streets and Sidewalks
$\ \square$ Ensure deceleration lane tapers are the appropriate length for posted speed limits on Hwy 20
and if required on Christian Cir.
☐ Provide documentation that site-distance-requirements were considered.
Provide a traffic impact study to consider the change in zoning to accommodate this proposed site.
□ Provide documentation of GDOT's review and approval of a ROW/driveway encroachment of
Highway 20 with future permit submissions to Rockdale County.
$\ \square$ Ensure driveway entrance from Christian Cir. has a centerline aligned directly across from Faye Ct.
☐ Developer to provide a lighting plan for the site.
*RDOT comments are not all inclusive and are subject to change or be updated on future
submissions, esp. as this conceptual site plan is revised and refined.

Water/Sewer Department

Existing 8" DIP Water main along GA Hwy 20 SE and South Christian Circle SE. Public Wastewater is not available. See Map Attached.

EVALUATION OF THE FUTURE LAND USE REQUEST

Sec. 238-4(g)(2) Standards for review of comprehensive plan amendments

When considering an application to amend the future land use map, the Board of Commissioners, the Planning

Commission, and the Planning & Development Department shall consider the following:

A. Whether a proposed future land use map amendment would result in a future land use classification that is more consistent with the text and policies of the comprehensive plan than the current classification of the property on the future land use map.

The subject site currently has a future land use designation of Medium Density Residential and is surrounded by other properties with the same future land use designation of Medium Density Residential. The proposed Future Land Use amendment to Commercial may be a viable option for the subject site due to its location along Highway 20 SE—a corridor which will likely experience increased commercial development in the following decades.

B. Whether the proposed amendment would result in a land use that is more compatible with the current and future land use of adjacent and nearby property.

Staff believes that the proposed amendment to allow a commercial complex would be compatible in the area as the site is located along Highway 20 and is within 1,200 feet of an existing commercial node.

C. Whether the proposed amendment would result in more efficient use of publicly financed community facilities and infrastructure.

The proposed commercial complex will be served by public water and a septic system. The project will have an impact on transportation facilities, so the applicant was required to submit a Traffic Impact Study for the project. The study needs to be further analyzed by Rockdale County Transportation staff. The development will have no impact on the Rockdale County school system.

D. The extent to which the proposed amendment would increase adverse impacts on the natural environment, especially water quality, green space preservation and air quality.

The proposed commercial development would not increase adverse impacts on the natural environment. Additionally, there are no streams, floodplains, or wetlands on the site that would be impacted from the proposed development.

E. Whether the proposed amendment would reduce dependence on the automobile

The proposed commercial development would not reduce dependence on the automobile due to the development's location along Highway 20 SE.

F. The extent to which the proposed amendment would increase adverse impacts on historic or cultural resources.

There are no known historic or cultural resources in the vicinity of this property; therefore, no adverse impacts are anticipated.

G. If an amendment would affect only a single parcel, whether it should be made part of an area-wide review of future land use that includes review of future land use for the subject parcel and other surrounding property.

The proposed amendment would be compatible with the surrounding properties in the area that have Medium Density Residential and Commercial future land use designations.

H. The degree to which the proposed amendment would have adverse impacts on land in adjacent municipalities and local governments.

This development would have no impact on the City of Conyers as the property is not in proximity to City limits.

I. Whether the proposed amendment would result in any negative impacts on the public water supply and wastewater collection and treatment systems or would conflict with adopted long-term water and sewer plans.

If all land development and stormwater regulations are designed and permitted in accordance with the

code requirements, the proposed amendment will not affect the public water supply. Furthermore, the development will be utilizing a septic system.

EVALUATION OF THE REZONING REQUEST

When considering an application to amend the current zoning designation of a property, the Board of Commissioners, the Planning Commission, and the Planning & Development Department shall consider the following standards as described in Section 238-4(G1) of the UDO:

A. Is the zoning proposal permitted as a use that is suitable in view of the use and development of adjacent and nearby property?

The subject site is surrounded by residential uses on all sides. The residential properties adjacent to the site are zoned R-1 (Single-Family Residential) and A-R (Agricultural-Residential). The residences to the south and east of the subject property are within the Village Green Subdivision and were constructed in the 1970's, while the homes in the Stafford Glen Subdivision to the north were constructed throughout the 2010's and 2020's. Though surrounded by residential subdivisions, the subject property is located along Highway 20 SE, which will likely experience commercial growth in the next few decades as the county continues to grow. An existing commercial node along Highway 20 SE is located approximately 1,200 feet to the southwest of the subject site. This commercial complex includes a shopping complex with discount stores, fast-food restaurants, an auto parts store, retail shops, and a lawn and garden supplies store. Property records indicate that these commercial uses were constructed from 1996 to 2018.

As such, the area surrounding the subject site appears to be experiencing residential and commercial growth concurrently. Furthermore, the applicant's site plan provides a viable separation of the proposed shopping complex and surrounding residential properties. The proposed undisturbed transitional buffer meets the required width listed in Sec. 328-6 of the Unified Development Ordinance.

B. Will the zoning proposal adversely affect the existing use or usability of adjacent or nearby property?

The existing uses of adjacent or nearby properties would likely not be adversely impacted by the zoning change. Allowing the rezoning for a commercial complex in accordance with the application would be consistent with existing commercial uses along Highway 20 SE. Proposed landscaping and transitional buffers will buffer the adjacent residential properties. The submitted Traffic Impact Study found that transportation infrastructure is currently operating at low levels of service, and that the proposed project would result in "slightly longer delays" in evening peak hours.

C. Will the property to be affected by the zoning proposal have a reasonable economic use as currently zoned?

The property has reasonable economic use as currently zoned. However, the site would have a greater economic use if rezoned to C-2 (General Commercial) due to the parcel's location; the proposed commercial center's retail and restaurant uses will likely receive foot-traffic from Highway 20 SE.

D. Will the zoning proposal result in a use which will or could cause an excessive or burdensome use of existing streets, transportation, facilities, utilities, or schools?

If all land development and stormwater regulations are designed and permitted in accordance with the code requirements, the proposed rezoning would likely not increase adverse impacts on public facilities. The proposed commercial complex will be served by public water and a septic system. The project will have an impact on transportation facilities and traffic patterns, and a Traffic Impact Study was provided that evaluated these impacts. A growth factor of approximately 1% was used in the analysis. The analysis included evaluation of "no-build" and "build" conditions, both of which account for the volume increases due to annual growth of through traffic. The results of the "build" conditions indicate that "the stop-controlled approach of Christian Circle will continue to operate at LOS "F" with slightly longer delays in

the PM peak hour. The stop-controlled full access driveway at SR 20 will also experience some delays and will operate at LOS "E" and "F" in AM and PM peak hours respectively." Due to the low levels of service, Transportation Staff need to further analyze the impacts of the proposed project. The development will have no impact on the Rockdale County school system.

E. Is the zoning proposal in conformity with the Future Land Use Map and the policy intent of the Comprehensive Land Use Plan?

Concurrent to the rezoning request, the applicant is requesting to amend the Future Land Use Map from Medium Density Residential to Commercial. Staff believes that Commercial would be appropriate in this location along Highway 20 SE. The applicant's request for a rezoning and future land use map is in conformity with commercial uses in the surrounding area. The Future Land Use Map is a designation of the highest use available; and is utilized for staff and commissioners to consider the most compatible use for the proposed area. In effect, the land use categories proscribed as part of this plan specifies which zoning districts are deemed suitable surrounding uses (Section 206-2), and Commercial is deemed a use that reflects the future zoning for the area.

F. Are other existing or changing conditions affecting the use and development of the property, which give supporting grounds for either approval, or disapproval of the zoning proposal?

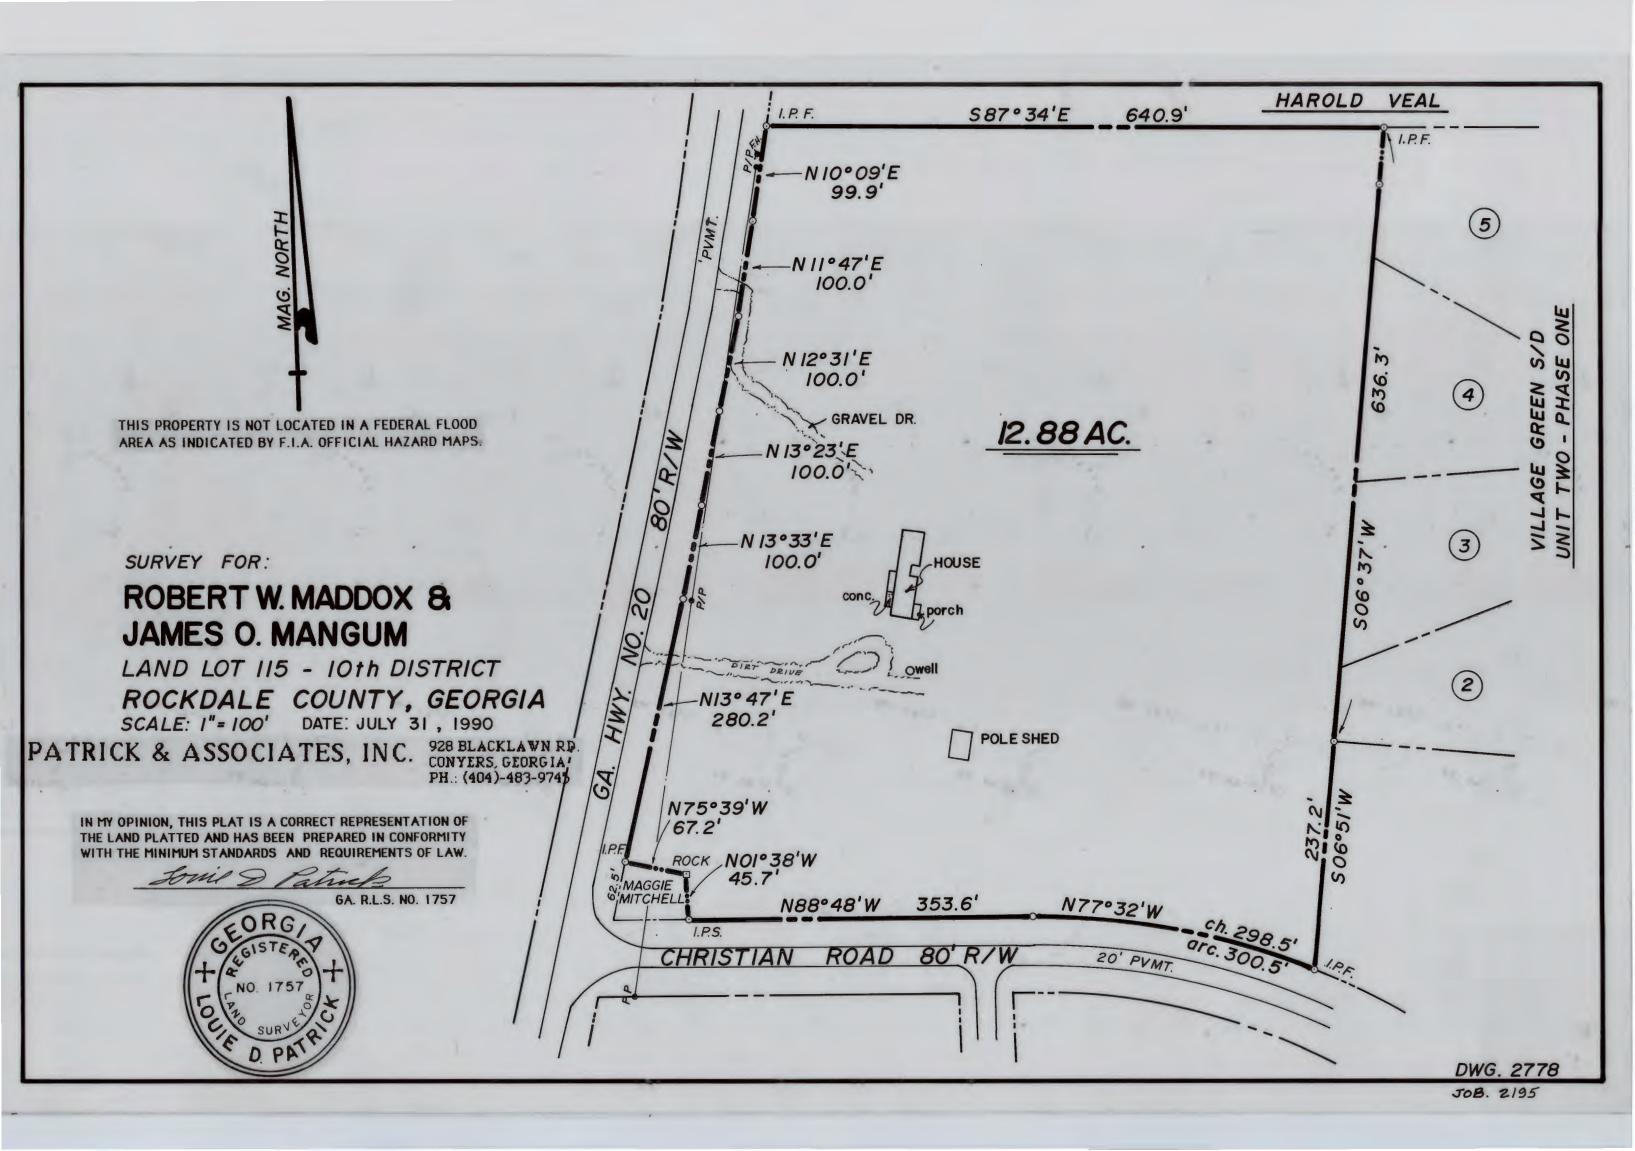

The area along Highway 20 SE has been experiencing both commercial and residential development in the past several decades, and staff believe that a rezoning of the property from A-R (Agricultural-Residential) to C-2 (General Commercial) would allow the property to be better utilized. However, staff recommend Deferral/No Recommendation to allow Transportation Staff adequate time to thoroughly review the Traffic Impact Study. The Transportation Study was received after all Technical Reviews were submitted.

PLANNING AND DEVELOPMENT STAFF RECOMMENDATIONS

Based on staff's evaluation of the request, and the standards governing exercise of zoning power, the Department of Planning and Development recommends <u>Deferral/No Recommendation</u> of the requests to amend the Future Land Use Plan from Medium Density Residential to Commercial and to rezone from A-R (Agricultural-Residential) to C-2 (General Commercial). Should the application be approved, staff recommend the following conditions:

- 1. The applicant shall abide by all applicable standards of the Unified Development Ordinance for the C-2 Zoning District, unless otherwise specified in these conditions or through approval of a variance by the Zoning Board of Appeals.
- 2. The applicant shall provide the Traffic Impact Study prior to the submittal of an application for a Land Disturbance Permit (LDP). Any recommendations for improvements shall be required to be shown on the Land Disturbance Permit (LDP). Additionally, as determined by Rockdale County Department of Transportation, a new study may be required for the development. Any recommendations for improvements from any new studies shall be required to be shown on the LDP.
- 3. The applicant shall provide documentation of GDOT's review and approval of a ROW/driveway encroachment of Highway 20 with future permit submissions to Rockdale County.
- 4. The applicant shall ensure that the driveway entrance from Christian Circle has a centerline aligned directly across from Faye Court.
- 5. The developer shall provide a lighting plan for the site.

- 6. No elevations or architectural renderings were provided with this submittal. Buildings shall be of a brick, stacked stone and/or glass finish on all sides. Final building elevations shall be submitted for review by the Director of Planning and Development prior to land development disturbance approval.
- 7. As indicated on the site plan, the development shall provide a 50-foot-wide natural undisturbed buffer adjacent to all residentially zoned properties. Buffers shall be replanted where sparsely vegetated and shall be subject to the review and approval of the Director of Planning and Development.
- 8. The applicant shall provide a 20-foot-wide landscape strip adjacent to all rights-of-way.
- 9. No tents, canopies, temporary banners, streamers or roping decorated with flags, tinsel, or other similar material shall be displayed, hung, or strung on the site. No decorative balloons or hot-air balloons shall be displayed on the site. Yard and/or bandit signs, sign walkers and sign-twirlers shall be prohibited.
- 10. Outdoor lighting shall be contained in cut-off type luminaries and shall be directed in toward the property so as not to reflect into adjacent properties or rights-of-way.
- 11. Where infrastructure capacity is later deemed unavailable at the time of application submittal, the applicant shall appear before the Planning Commission (PC) prior to submittal of the Land Disturbance Permit (LDP) with proof of capacity.
- 12. All utilities shall be placed underground.
- 13. Natural vegetation shall remain on the property until the issuance of a development permit.

JUSTIFICATION OF THE REZONING REQUEST

In your own words, type the reason you believe the zoning of the subject property should be amended. Please address the following:

The intent of the proposed amendment and the intended timing and phasing of development. State the reasons why you believe the current zoning

_	district classification for the subject rezoning site is incorrect and why approval of a different zoning district classification is appropriate.
	Please refer to Tab D.
2.	The impact of the proposed amendment on the capacities of public facilities including, but not limited to, transportation facilities, sewage facilities, water supply, parks, drainage, schools, solid waste, and emergency medical facilities.
3.	The impact of the proposed amendment on the natural environment, especially existing trees, water bodies, and water quality.
_	
4.	The contribution of the proposed amendment to an orderly and logical development pattern.
_	

REZONING REVIEW STANDARDS

Additionally, provide justification for each of the following review standards (UDO Sec. 238-4(g)(1)). The Board of Commissioners, the Planning Commission and the Department will use these standards to evaluate the request:

a.	Whether a proposed rezoning will permit a use that is suitable, in view of the use and development of adjacent and nearby property.
	Pleave refer to Tab D.
b.	Whether the property to be affected by a proposed rezoning has a reasonable economic use as currently zoned.
	whether the property to be affected by a proposed rezoliting has a reasonable economic use as entremtly zoned.
с.	The impact of the proposed amendment on the natural environment, especially existing trees, water bodies and water quality.
d.	Whether the proposed rezoning will result in a use that will or could cause an excessive or burdensome use of existing streets, transportation facilities,
_	utilities or schools.
e.	Whether the proposed rezoning is in conformity with the policy and intent of the comprehensive plan.
	Whether there are other existing or changing conditions affecting the use and development of the property that give supporting grounds for either
	approval or disapproval of the proposed rezoning.
g.	Whether, and the extent to which, the proposed amendment would result in significant adverse impacts on the natural environment.
	The familiar of anxing the apparent with public proctourter treatment carries and the immage of such on the wastewater system; and if an
h.	The feasibility of serving the property with public wastewater treatment service and the impacts of such on the wastewater system; and, if an alternative wastewater treatment method is proposed, whether such wastewater treatment method is authorized in Rockdale County and will have a detrimental impact on the environment.

APPLICANT CERTIFICATION

Please read and initial the following statements: Thereby request the County consider the information contained within this application relative to the property shown on the attached plats and site plan and further request that this item be placed on the Planning Commission (PC) and/or Board of Commissioners (BOC) Agenda for a public Multiply I understand that my request will be rejected if all the necessary information and/or requirements are not presented. I understand that I have an obligation to present all necessary information required by the Rockdale County Department of Planning & Development (P&D) to enable the PC and/or BOC to make an informed determination on my request. 1 will seek advice of P&D Staff or an attorney if I am not familiar with the zoning and land use requirements. Down. I understand that my request will be acted upon at the PC and BOC Public Hearings and that I am required to be present or to be represented by the authorized representative as indicated on this application, so that someone is available to present all facts and answer questions. I understand that failure to appear at a public hearing may result in the postponement or denial of my request. I further understand that it is my responsibility to be aware of relevant public hearing dates and times regardless of notification from Rockdale County. The Rockdale County Unified Development Ordinance requires a public participation sign on the subject property. In order to ensure that the correct information is included on the public participation sign, P&D will prepare the sign and post the sign. I hereby acknowledge that I understand the requirements listed on the checklist for what constitutes a complete application. I have checked off each box and included a page number where the item is located. I confirm that the requirements for a complete application have been met. May. I have read and understood the applicable sections of the Rockdale County Unified Development Ordinance, as provided in the Instructions. , the undersigned also hereby verifies that he or she is 18 years of age or older and has provided at least one secure and verifiable document, as required by O.C.G.A. § 50-36-1(e)(1), with this affidavit, Wait to be in front John Andrew Nix of notary to sign: (Applicant's Name) NOTARY The secure and verifiable document provided with this affidavit can best be Contificati classified as: (type of document) Executed in (county) (state) (day) Notary Public signature SEAL SEAL OIMSDAY

JUSTIFICATION OF THE REQUEST AND ZONING REVIEW STANDARDS

JUSTIFICATION OF THE REQUEST

In your own words, type or hand write the reason you believe the zoning of the subject property should be amended. Please address the following, and the review standards (see below):

1. The intent of the proposed amendment and the intended timing and phasing of development. State the reasons why you believe the current zoning district classification for the subject rezoning site is incorrect and why approval of a different zoning district classification is appropriate.

The proposed amendment is consistent with evolving development character of Georgia Highway 20 as commercial uses develop along the corridor in response to the needs of residents in the area and those who travel the route. From the Newton County line north to the intersection of Honey Creek Road commercial nodes have been developed over the last thirty years. The Subject Property is large enough to accommodate the design concept proposed by the applicant which allows for buffers to address existing residential uses and permit a use that would for some reasons be less impactful than the use envisioned by the FLUM – medium residential.

2. The impact of the proposed amendment on the capacities of public facilities including, but not limited to, transportation facilities, sewage facilities, water supply, parks, drainage, schools, solid waste and emergency medical facilities.

The proposed use, a blend of commercial and retail will have negligible impact relative to water and wastewater facilities (sewer is not available to the Subject Property and septic tank system would be required). Rockdale Water Resources has confirmed the availability of public water service. Access to the proposed use would be predominately provided from two entrances located on Georgia Highway 20.

The use requested by the Applicant would not generate additional students relative to the public school system.

3. The impact of the proposed amendment on the natural environment, especially existing trees, water bodies and water quality.

The use requested by the Applicant would be subject to the general development standards of Rockdale County as well as the applicable provisions of state and federal law. The impact of the proposed amendment would be minimal from a natural environmental perspective.

4. The contribution of the proposed amendment to an orderly and logical development pattern.

The Georgia Highway 20 corridor previously described from the intersection with Honey Creek Road traveling south to the Newton County line has developed over the course of the last three decades with a mixture of commercial uses and single family residential uses. The proposed amendment provides an opportunity to provide a mixed use for commercial and retail with a proposed Class A-1 buildings interconnected on the site in this area of the county.

REVIEW STANDARDS UDO SEC.238-4(g)(1)

Additionally, provide justification for each of the following review standards. The Board of Commissioner, the Planning Commission and the Department will use these standards to evaluate the request.

a. Whether a proposed rezoning will permit a use that is suitable, in view of the use and development of adjacent and nearby property.

The rezoning of the Subject Property would be consistent with commercial and residential development l along the corridor. The site is large enough to be developed consistent with the proposed site plan in a way to minimize any potential impact to nearby residential uses. The planned development of the subject site as depicted in the conceptual site plan represents an up-scale design approach.

b. Whether a proposed rezoning will adversely affect the existing use or usability of adjacent or nearby property.

The proposed design as depicted on the Site Plan identifies a 50 foot natural buffer along the northern and eastern boundaries of the property as well as an additional 25 foot set back. The intent of the Applicant is to maintain the 50 natural buffer as undisturbed subject only to initial construction requirements, if any. The southern and western boundaries provide for heavily planted landscaping strips along the right of way of Georgia Highway 20 and Christian Circle.

 Whether the property to be affected by a proposed rezoning has a reasonable economic use as currently zoned.

The subject property has been zoned AR for over thirty years and remains undeveloped. The previous owners had marketed the property for decades prior to the sale to the Applicant/Owner. The purchase was made for the express purpose of developing a site consistent with the site plan to provide an upscale commercial use along the Georgia Highway 20 Corridor.

d. Whether the proposed rezoning will result in a use that will or could cause an excessive or burdensome use of existing streets, transportation facilities, utilities or schools.

The use of the Subject Property planned by the Applicant would not cause an excessive or burdensome impact to existing transportation facilities or traffic patterns. The rezoning amendment proposed would have a minimal impact on utilities and will have no impact as to the public school system.

e. Whether the proposed rezoning is in conformity with the policy and intent of the comprehensive plan.

The requested rezoning is not consistent with the policy and intent of Rockdale's Future Land Use Map now in effect.

f. Whether there are other existing or changing conditions affecting the use and development of the property that give supporting grounds for either approval or disapproval of the proposed rezoning.

None that have not been referenced in this application as filed.

g. Whether, and the extent to which, the proposed amendment would result in significant adverse impacts on the natural environment.

The proposed rezoning will not create any significant adverse impacts upon any environmentally sensitive area or natural resource. The use proposed by the Applicant would be subject to the general development standards of Rockdale County as well as the applicable provisions of state and federal law.

h. The feasibility of serving the property with public wastewater treatment service and the impacts of such on the wastewater system; and, if an alternative wastewater treatment method is proposed, whether such wastewater treatment method is authorized in Rockdale County and will have a detrimental impact on the environment.

Public water is available and the Subject Property is not served by public sewer. The installation of an alternative wastewater treatment method by the Applicant would be subject to the ordinances of Rockdale County and state law and would not have a detrimental impact on the environment.

TAB I <u>CONSTITUTIONAL OBJECTIONS</u>

Parcel 080A010014 4250 SE Highway 20 ReZoning (Zoning Map Amendment) Application 1618 Land Holdings, LLC July 30, 2024

CONSTITUTIONAL OBJECTIONS

These constitutional objections are submitted on behalf of the owners, 1618 Land Holdings, LLC (hereafter the "Applicant/Owner") in the above-referenced ReZoning (Zoning Map Amendment) Application, and directed to the governing authority of Rockdale County, Georgia. The intent of this statement is to respectfully apprise and place the governing authority of Rockdale County on notice that denial of the Applicant/Owner's zoning amendment application would be unconstitutional as stated herein, thus allowing said governing authority the opportunity to prevent these unconstitutional actions, as well as to respectfully comply with all notice requirements imposed by the Georgia and federal judiciary.

The Applicant/Owner believes that its application meets and satisfies each of the criteria relative to the grant of a zoning amendment as specified in Section 238-4 et seq. of the Code of Ordinances of Rockdale County and related ordinances of Rockdale County and accordingly must be granted by the Board of Commissioners. Any application of the Rockdale County Zoning Ordinance or action by the Board of Commissioners of Rockdale County that would restrict the subject site other than as presented in this zoning amendment application as requested by the Applicant/Owner would be unconstitutional, illegal, null and void, constituting a destruction of Applicant/Owner's protected property interests and a taking of Applicant/Owner's property in violation of the Just Compensation Clause of the Fifth and Fourteenth Amendments to the Constitution of the United States, Article I, Section I, Paragraph I, and Article I, Section III, Paragraph I of the Constitution of the State of Georgia of 1983, and the Equal Protection and Due Process Clauses of the Georgia Constitution and the Constitution of the United States, denying the Applicant/Owner an economically viable use of its land while not substantially advancing legitimate state interests.

A denial of this zoning amendment application would constitute a gross abuse of discretion and an arbitrary and capricious act by the Board of Commissioners without any rational basis in violation of Article I, Section I, Paragraph I and Article I, Section III, Paragraph I of the Constitution of the State of Georgia 1983, and the Due Process Clause of the Fourteenth Amendment to the Constitution of the United States. To the extent that the proposed zoning amendment application is denied based upon Rockdale County standards and criteria applicant contends said standards and criteria are unconstitutionally vague and arbitrary in violation of Article I, Section I, Paragraph I and Article I, Section III, Paragraph I of the Constitution of the State of Georgia 1983, and the Due Process Clause of the Fourteenth Amendment to the Constitution of the United States.

Parcel 080A010014 4250 SE Highway 20 ReZoning (Zoning Map Amendment) Application 1618 Land Holdings, LLC July 30, 2024

A refusal to approve the zoning amendment as proposed by this Applicant/Owner as applied to this property would be unconstitutional and discriminate in an arbitrary, capricious and unreasonable manner between this Applicant/Owner and owners of similarly situated property in violation of Article I, Section I, Paragraph II of the Constitution of the State of Georgia of 1983 and the Equal Protection Clause of the Fourteenth Amendment of the Constitution of the United States.

Any imposition of conditions upon the subject property restricting the utilization of the subject site other than conditions agreed to by Applicant/Owner also would constitute an arbitrary, capricious and discriminatory act and would likewise violate each of the provisions of the State and Federal Constitutions set forth hereinabove, particularly the referenced takings clauses of said State and Federal Constitutions.

See pages 12 and 13 of the Application Instructions for No No more information.

JUSTIFICATION OF THE REQUEST

In your own words, type the reason you believe the zoning of the subject property should be amended. Please address the following:

1.	The intent of the proposed amendment and the intended timing and phasing of development. State the reasons why you believe the current zoning district classification for the subject rezoning site is incorrect and why approval of a different zoning district classification is appropriate.
	Please refer to Tab D.
2.	The impact of the proposed amendment on the capacities of public facilities including, but not limited to, transportation facilities, sewage facilities, water supply, parks, drainage, schools, solid waste, and emergency medical facilities.
3.	The impact of the proposed amendment on the natural environment, especially existing trees, water bodies, and water quality.
4.	The contribution of the proposed amendment to an orderly and logical development pattern.

FUTURE LAND USE MAP AMENDMENT REVIEW STANDARDS

Additionally, provide justification for each of the following review standards (UDO Sec. 238-4(g)(2)). The Board of Commissioners, the Planning Commission, and the Department will use these standards to evaluate the request:

a.	Whether a proposed future land use map amendment would result in a future land use classification that is more consistent with the text and policies of the comprehensive plan than the current classification of the property on the future land use map.
	Pleave refer to Tab D.
b.	Whether the proposed amendment would result in a land use that is more compatible with the current and future land use of adjacent and nearby property.
c.	Whether the proposed amendment would result in more efficient use of publicly financed community facilities and infrastructure.
d.	The extent to which the proposed amendment would increase adverse impacts on the natural environment; especially water quality, greenspace preservation and air quality.
e.	Whether the proposed amendment would reduce dependence on the automobile.
f.	The extent to which the proposed amendment would increase adverse impacts on historic or cultural resources.
g.	If an amendment would affect only a single parcel, whether it should be made part of an area-wide review of future land use that includes review of future land use for the subject parcel and other surrounding property.
h.	The degree to which the proposed amendment would have adverse impacts on land in adjacent municipalities and local governments.
i.	Whether the proposed amendment would result in any negative impacts on the public water supply and wastewater collection and treatment systems or would conflict with adopted long-term water and sewer plans.

JUSTIFICATION OF THE REQUEST AND ZONING REVIEW STANDARDS

JUSTIFICATION OF THE REQUEST

In your own words, type or hand write the reason you believe the zoning of the subject property should be amended. Please address the following, and the review standards (see below):

1. The intent of the proposed amendment and the intended timing and phasing of development. State the reasons why you believe the current zoning district classification for the subject rezoning site is incorrect and why approval of a different zoning district classification is appropriate.

The proposed amendment is consistent with evolving development character of Georgia Highway 20 as commercial uses develop along the corridor in response to the needs of residents in the area and those who travel the route. From the Newton County line north to the intersection of Honey Creek Road commercial nodes have been developed over the last thirty years. The Subject Property is large enough to accommodate the design concept proposed by the applicant which allows for buffers to address existing residential uses and permit a use that would for some reasons be less impactful than the use envisioned by the FLUM—medium residential.

2. The impact of the proposed amendment on the capacities of public facilities including, but not limited to, transportation facilities, sewage facilities, water supply, parks, drainage, schools, solid waste and emergency medical facilities.

The proposed use, a blend of commercial and retail will have negligible impact relative to water and wastewater facilities (sewer is not available to the Subject Property and septic tank system would be required). Rockdale Water Resources has confirmed the availability of public water service. Access to the proposed use would be predominately provided from two entrances located on Georgia Highway 20.

The use requested by the Applicant would not generate additional students relative to the public school system.

3. The impact of the proposed amendment on the natural environment, especially existing trees, water bodies and water quality.

The use requested by the Applicant would be subject to the general development standards of Rockdale County as well as the applicable provisions of state and federal law. The impact of the proposed amendment would be minimal from a natural environmental perspective.

4. The contribution of the proposed amendment to an orderly and logical development pattern.

The Georgia Highway 20 corridor previously described from the intersection with Honey Creek Road traveling south to the Newton County line has developed over the course of the last three decades with a mixture of commercial uses and single family residential uses. The proposed amendment provides an opportunity to provide a mixed use for commercial and retail with a proposed Class A-1 buildings interconnected on the site in this area of the county.

REVIEW STANDARDS UDO SEC. 238-4(g)(2)

Additionally, provide justification for each of the following review standards. The Board of Commissioner, the Planning Commission and the Department will use these standards to evaluate the request.

a. Whether a proposed future land use map amendment would result in a future land use classification that is more consistent with the text and policies of the comprehensive plan than the current classification of the property on the future land use map.

The proposed amendment would be consistent with commercial and residential development along the corridor. The site is large enough to be developed consistent with the proposed site plan in a way to minimize any potential impact to nearby residential uses. The planned development of the subject site as depicted in the conceptual site plan represents an up-scale design approach.

b. Whether the proposed amendment would result in a land use that is more compatible with the current and future land use of adjacent and nearby property.

The proposed amendment would permit a commercial use rather than the allowed medium density residential use envisioned by the current future land use map. However, the Georgia Highway corridor has commercial uses located intermittently from the intersection of Honey Creek Road and the Newton County line which are compatible and provide services to a significant residential community. As depicted on the Site Plan a 50 foot natural buffer along the northern and eastern boundaries of the property as well as an additional 25 foot set back allow the commercial use to be buffered based on the size of the Subject Property. The proposed land use is compatible with current and possible future uses of nearby property and when compared to medium density residential offers a viable alternative given the development of the Highway 20 corridor in the immediate vicinity.

c. Whether the proposed amendment would result in a more efficient use of publicly financed community facilities and infrastructure.

The impact of the proposed amendment by allowing a commercial use would have minimal impact on the efficient use of publicly financed community facilities and infrastructure — as the demands would be generally comparable to medium residential uses. The amendment and resulting commercial use would not cause an excessive or burdensome impact to existing transportation facilities or traffic patterns. The rezoning amendment proposed would have a minimal impact on utilities and will have no impact as to the public school system.

d. The extend to which the proposed amendment would increase adverse impacts on the natural environment; especially water quality, greenspace preservation and air quality.

The proposed would not create any significant adverse impacts on the natural environment. A portion of the proposed site will remain undisturbed as part of the buffer that will remain for the benefit of existing residential uses and result in the preservation of greenspace on the Subject Property. The general development standards of Rockdale County as well as the applicable provisions of state and federal law would address water quality.

e. Whether the proposed amendment would reduce dependence on the automobile.

With multiple buildings associated with the Applicant's proposed use for the site the resulting commercial uses could allow 'one stop shopping' or services that reduce the need to travel to other locations but generally the impact of the use would not have a great impact on the reliance on the automobile.

f. The extent to which the proposed amendment would increase adverse impacts on historic or cultural resources.

None.

g. If an amendment would affect only a single parcel, whether it should be made part of an area-wide review of future land use that includes review of future land use for the subject parcel and other surrounding property.

The subject property has been zoned AR for over thirty years and has remained undeveloped. The location of the Subject Property, the size of the tract and the historic development of the Georgia Highway 20 Corridor limits the necessity of an area wide consideration of future land use for other surrounding property. The Subject Property is unique as to location and size which is reflected in the use proposed by the Applicant.

h. The degree to which the proposed amendment would have adverse impacts on land in adjacent municipalities and local governments.

None.

i. Whether the proposed amendment would result in any negative impacts on the public water supply and wastewater collection and treatment systems or would conflict with adopted long-term water and sewer plans.

The permitted capacity of the county's water treatment plant is 22 MGD with an average daily utilization of 12MGD with peak utilization at 16 MGD. Public sewer is not currently available to the Subject Property. The proposed amendment would not cause any negative impacts on either system.

TAB I CONSTITUTIONAL OBJECTIONS

Parcel 080A010014 4250 SE Highway 20 Future Land Use Map Amendment (Comprehensive Plan) 1618 Land Holdings, LLC July 30, 2024

CONSTITUTIONAL OBJECTIONS

These constitutional objections are submitted on behalf of the owner, 1618 Land Holdings, LLC (hereafter the "Applicant/Owner") in the above-referenced Future Land Use Map Amendment (Comprehensive Plan) Application, and directed to the governing authority of Rockdale County, Georgia. The intent of this statement is to respectfully apprise and place the governing authority of Rockdale County on notice that denial of the Applicant/Owner's future land use map amendment application would be unconstitutional as stated herein, thus allowing said governing authority the opportunity to prevent these unconstitutional actions, as well as to respectfully comply with all notice requirements imposed by the Georgia and federal judiciary.

The Applicant/Owner believes that its application meets and satisfies each of the criteria relative to the grant of a future land use map amendment in the Zoning Ordinance of Rockdale County and related ordinances of Rockdale County and accordingly must be granted by the Board of Commissioners. Any application of the Rockdale County Zoning Ordinance or action by the Board of Commissioners of Rockdale County that would restrict the subject site other than as presented in this future land use map amendment application as requested by the Applicant/Owner would be unconstitutional, illegal, null and void, constituting a destruction of Applicant/Owner's protected property interests and a taking of Applicant/Owner's property in violation of the Just Compensation Clause of the Fifth and Fourteenth Amendments to the Constitution of the United States, Article I, Section I, Paragraph I, and Article I, Section III, Paragraph I of the Constitution of the State of Georgia of 1983, and the Equal Protection and Due Process Clauses of the Georgia Constitution and the Constitution of the United States, denying the Applicant/Owner an economically viable use of its land while not substantially advancing legitimate state interests.

A denial of this future land use map amendment application would constitute a gross abuse of discretion and an arbitrary and capricious act by the Board of Commissioners without any rational basis in violation of Article I, Section I, Paragraph I and Article I, Section III, Paragraph I of the Constitution of the State of Georgia 1983, and the Due Process Clause of the Fourteenth Amendment to the Constitution of the United States. To the extent that the proposed future land use map amendment application is denied based upon Rockdale County standards and criteria applicant contends said standards and criteria are unconstitutionally vague and arbitrary in violation of Article I, Section I, Paragraph I and Article I, Section III, Paragraph I of the Constitution of the State of Georgia 1983, and the Due Process Clause of the Fourteenth Amendment to the Constitution of the United States.

Parcel 080A010014
4250 SE Highway 20
Future Land Use Map Amendment
(Comprehensive Plan)
1618 Land Holdings, LLC
July 30, 2024

A refusal to approve the future land use map amendment as proposed by this Applicant/Owner as applied to this property would be unconstitutional and discriminate in an arbitrary, capricious and unreasonable manner between this Applicant/Owner and owners of similarly situated property in violation of Article I, Section I, Paragraph II of the Constitution of the State of Georgia of 1983 and the Equal Protection Clause of the Fourteenth Amendment of the Constitution of the United States.

Any imposition of conditions upon the subject property restricting the utilization of the subject site other than conditions agreed to by Applicant/Owner also would constitute an arbitrary, capricious and discriminatory act and would likewise violate each of the provisions of the State and Federal Constitutions set forth hereinabove, particularly the referenced takings clauses of said State and Federal Constitutions.

1.0 INTRODUCTION

The purpose of this study is to determine the traffic impact from the proposed commercial development that will be located at 4250 SR 20 (McDonough Highway) in the City of Conyers, Rockdale County, Georgia. The traffic analysis includes evaluation of the current operations and future conditions with the traffic generated by the development. The proposed commercial development will consist of:

- Strip Retail Plaza (<40K): 24,000 sf
- High-Turnover (Sit Down) Restaurant: 5,850 sf.

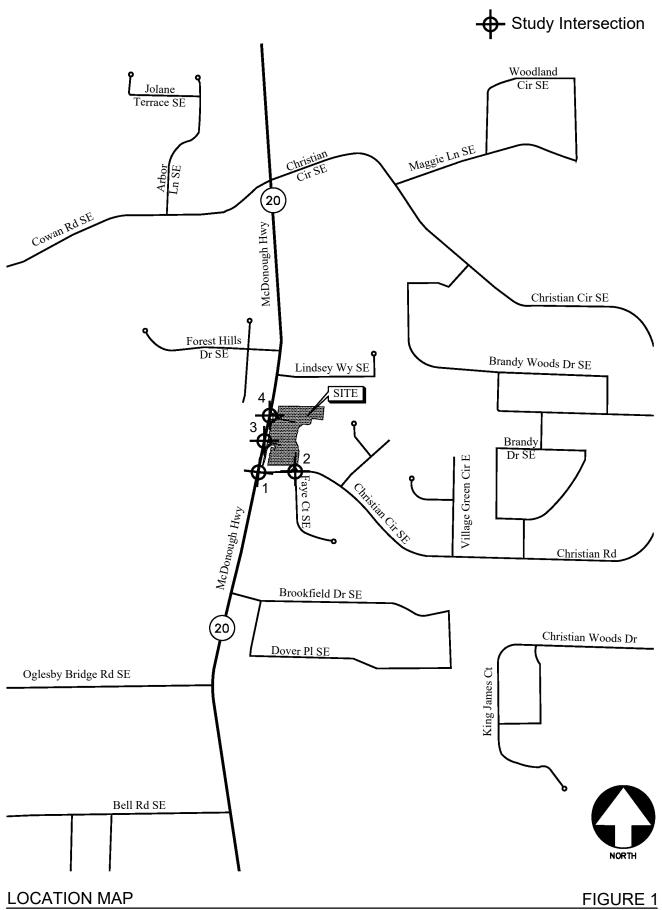

The development proposes access at the following locations:

- Site Driveway 1: Full access driveway on SR 20 (McDonough Highway)
- Site Driveway 2: Right-In/ Right-Out driveway on SR 20 (McDonough Highway)
- Site Driveway 3: Full access driveway on Christian Circle, aligned with Faye Court

The AM and PM peak hours have been analyzed in this study. In addition to the site access point, this study includes the evaluation of traffic operations at the intersection of:

1. SR 20 (McDonough Highway) at Christian Circle

Recommendations to improve traffic operations have been identified as appropriate and are discussed in detail in the following sections of the report. The location of the development and the surrounding roadway network are shown in Figure 1.

A&R Engineering Inc.

2.0 EXISTING FACILITIES / CONDITIONS

2.1 Roadway Facilities

The following is a brief description of each of the roadway facilities located in proximity to the site:

2.1.1 SR 20 (McDonough Highway)

SR 20 (McDonough Highway) is a north-south, two-lane, undivided roadway and a posted speed limit of 45 mph in the vicinity of the site. Georgia Department of Transportation (GDOT) traffic counts (Station ID: 247-0227) indicate that the daily traffic volume on SR 20 (McDonough Highway) in 2022 was 19,600 vehicles per day south of Lindsey Way. GDOT classifies SR 20 (McDonough Highway) as an urban minor arterial roadway.

2.1.2 Christian Circle

Christian Circle is an east-west, two-lane, undivided roadway and a posted speed limit of 30 mph in the vicinity of the site. Georgia Department of Transportation (GDOT) traffic counts (Station ID: 247-8009) indicate that the daily traffic volume on Christian Circle in 2022 was 1,850 vehicles per day, northeast of Eden Glen Drive. GDOT classifies Christian Circle as an urban local roadway.

2.1.3 Faye Court

Faye Court is a north-south, two-lane, undivided roadway and a posted speed limit of 25 mph in the vicinity of the site.

3.0 STUDY METHODOLOGY

In this study, the methodology used for evaluating traffic operations at each of the subject intersections is based on the criteria set forth in the Transportation Research Board's Highway Capacity Manual, 6th edition (HCM 6). Synchro software, which utilizes the HCM methodology, was used for the analysis. The following is a description of the methodology employed for the analysis of unsignalized and signalized intersections.

3.1 Unsignalized Intersections

For unsignalized intersections controlled by a stop sign on minor streets, the level-of-service (LOS) for motor vehicles with controlled movements is determined by the computed control delay according to the thresholds stated in Table 1 below. LOS is determined for each minor street movement (or shared movement), as well as major street left turns. LOS is not defined for the intersection as a whole or for major street approaches. The LOS of any controlled movement which experiences a volume to capacity ratio greater than 1 is designated as "F" regardless of the control delay.

Control delay for unsignalized intersections includes initial deceleration delay, queue move-up time, stopped delay, and final acceleration delay. Several factors affect the control delay for unsignalized intersections, such as the availability and distribution of gaps in the conflicting traffic stream, critical gaps, and follow-up time for a vehicle in the queue.

Level-of-service is assigned a letter designation from "A" through "F". Level-of-service "A" indicates excellent operations with little delay to motorists, while level-of-service "F" exists when there are insufficient gaps of acceptable size to allow vehicles on the side street to cross the main road without experiencing long delays.

Table 1 — Level-of-service Criteria for Unsignalized Intersections									
Control Delay (sec/vehicle)	LOS by Volume-to-Capacity Ratio*								
Control Delay (sec/venicle)	v/c ≤ 1.0	v/c > 1.0							
≤ 10	А	F							
> 10 and ≤ 15	В	F							
> 15 and ≤ 25	С	F							
> 25 and ≤ 35	D	F							
> 35 and ≤ 50	E	F							
> 50	F	F							

^{*}The LOS criteria apply to each lane on a given approach and to each approach on the minor street. LOS is not calculated for major-street approaches or for the intersection.

Source: Highway Capacity Manual, 6th edition, Exhibit 20-2 LOS Criteria: Motorized Vehicle Mode

3.2 Signalized Intersections

According to HCM procedures, LOS can be calculated for the entire intersection, each intersection approach, and each lane group. HCM uses control delay alone to characterize LOS for the entire intersection or an approach. Control delay per vehicle is composed of initial deceleration delay, queue move-up time, stopped delay, and final acceleration delay. Both control delay and volume-to-capacity ratio are used to characterize LOS for a lane group. A volume-to-capacity ratio greater than 1.0 for a lane group indicates failure from capacity perspective. Therefore, such a lane group is assigned LOS F regardless of the amount of control delay.

Table 2 below summarizes the LOS criteria from HCM for motorized vehicles at signalized intersection.

Table 2 — Level-of-service Criteria for Signalized Intersections									
Control Delay (sec/vehicle) *	LOS for Lane Group by Volume-to-Capacite Ratio*								
	v/c ≤ 1.0	v/c > 1.0							
≤ 10	Α	F							
> 10 and ≤ 20	В	F							
> 20 and ≤ 35	С	F							
> 35 and ≤ 55	D	F							
> 55 and ≤ 80	E	F							
> 80	F	F							

^{*}For approach-based and intersection wide assessments, LOS is defined solely by control delay

Source: Highway Capacity Manual, 6th edition, Exhibit 19-8 LOS Criteria: Motorized Vehicle Mode

LOS A is typically assigned when the volume-to-capacity (v/c) ratio is low and either progression is exceptionally favorable, or the cycle length is very short. LOS B is typically assigned when the v/c ratio is low and either progression is highly favorable, or the cycle length is short. However, more vehicles are stopped than with LOS A. LOS C is typically assigned when progression is favorable, or the cycle length is moderate. Individual cycle failures (one or more queued vehicles are not able to depart because of insufficient capacity during the cycle) may begin to appear at this level. Many vehicles still pass through the intersection without stopping, but the number of vehicles stopping is significant. LOS D is typically assigned when the v/c ratio is high and either progression is ineffective, or the cycle length is long. There are many vehicle-stops and individual cycle failures are noticeable. LOS E is typically assigned when the v/c ratio is high, progression is very poor, the cycle length is long, and individual cycle failures are frequent. LOS F is typically assigned when the v/c ratio is very high, progression is very poor, the cycle length is long, and most cycles fail to clear the queue.

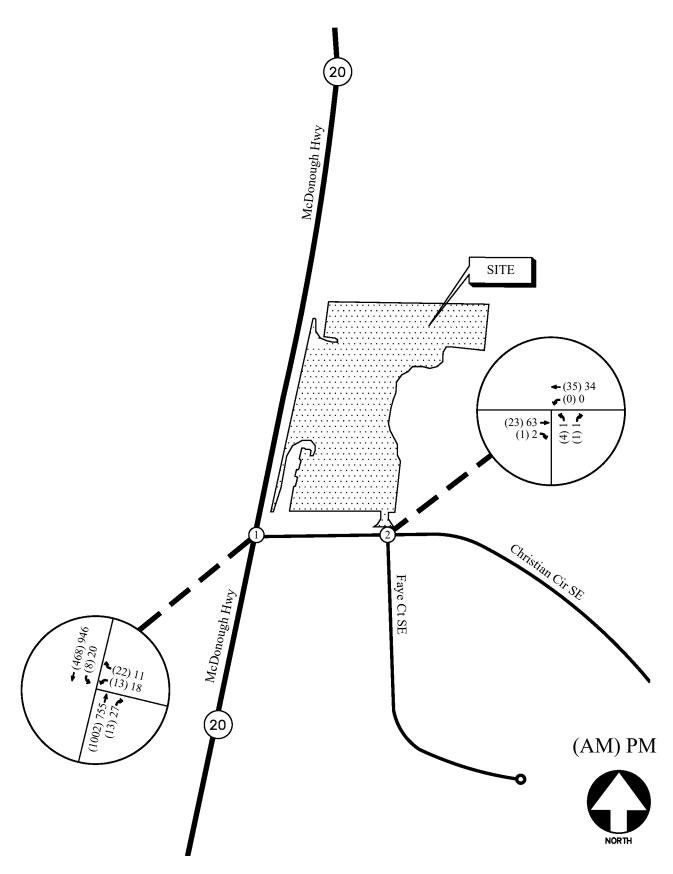

4.0 EXISTING 2023 TRAFFIC ANALYSIS

4.1 Existing Traffic Volumes

Existing traffic counts were obtained at the following study intersections:

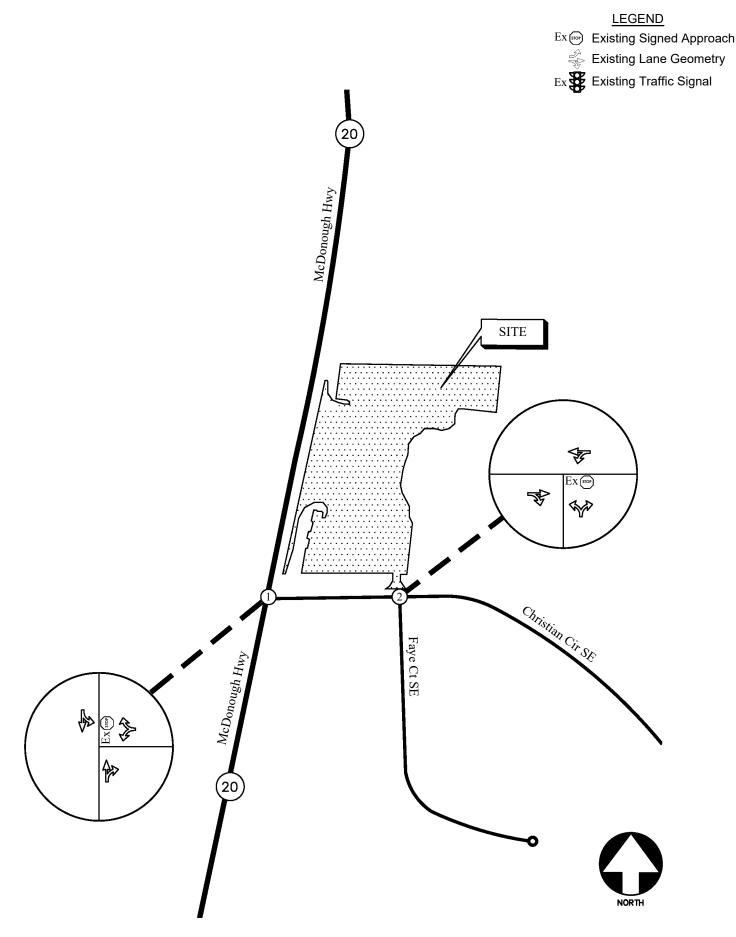

- 1. SR 20 (McDonough Highway) at Christian Circle
- 2. Christian Circle at Faye Court

Turning movement counts were collected on Tuesday, November 28, 2023. All turning movement counts were recorded during the AM and PM peak hours between 7:00 am to 9:00 am and 4:00 pm to 6:00 pm, respectively. The four consecutive 15-minute interval volumes that produced the highest volume at the intersections were then determined. These volumes make up the peak hour traffic volumes for the intersections counted and are shown in Figure 2. The existing traffic control and lane geometry for the intersections are shown in Figure 3.

EXISTING WEEKDAY PEAK-HOUR VOLUMES

FIGURE 2 **A&R Engineering Inc.**

EXISTING TRAFFIC CONTROL AND LANE GEOMETRY

4.2 Existing Traffic Operations

Existing 2023 traffic operations were analyzed at the study intersections in accordance with the HCM methodology. The results of the analyses are shown in Table 3.

Table 3 — Existing Intersection Operations									
	Intersection	Traffic Control	LOS (I	Delay)					
intersection		Traffic Control	AM Peak Hour	PM Peak Hour					
1	SR 20 (McDonough Highway) @ Christian Circle -Westbound Approach -Southbound Left	Stop Controlled on WB Approach	D (30.7) B (10.7)	E (46.0) A (9.5)					
2	-Westbound Left -Northbound Approach	Stop Controlled on NB Approach	A (0) A (8.8)	A (0) A (8.9)					

The results of existing traffic operations analysis indicate that the stop-controlled westbound approach of Christian Circle at the un-signalized intersection with SR 20 is operating at a level of service "E" in the PM peak hour.

5.0 PROPOSED DEVELOPMENT

The proposed commercial development will consist of:

- Strip Retail Plaza (<40K): 24,000 sf.
- High-Turnover (Sit Down) Restaurant: 5,850 sf.

The development proposes access at the following locations:

- Site Driveway 1: Full access driveway on SR 20 (McDonough Highway)
- Site Driveway 2: Right-In/ Right-Out driveway on SR 20 (McDonough Highway)
- Site Driveway 3: Full access driveway on Christian Circle, aligned with Faye Court

A site plan is shown in Figure 4.

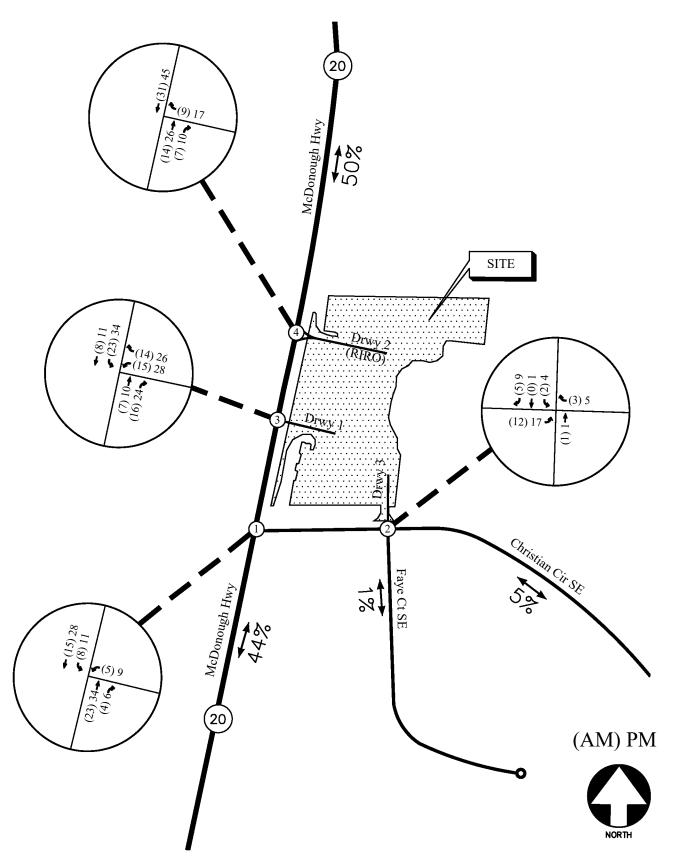

5.1 Trip Generation

Trip generation estimates for the project were based on the rates and equations published in the 11th edition of the Institute of Transportation Engineers (ITE) Trip Generation report. This reference contains traffic volume count data collected at similar facilities nationwide. The trip generation was based on the following ITE Land Uses: 822 – Strip Retail Plaza (<40k) and 932 – High-Turnover (Sit-Down) Restaurant. The calculated total trip generation for the proposed development is shown in Table 4 below.

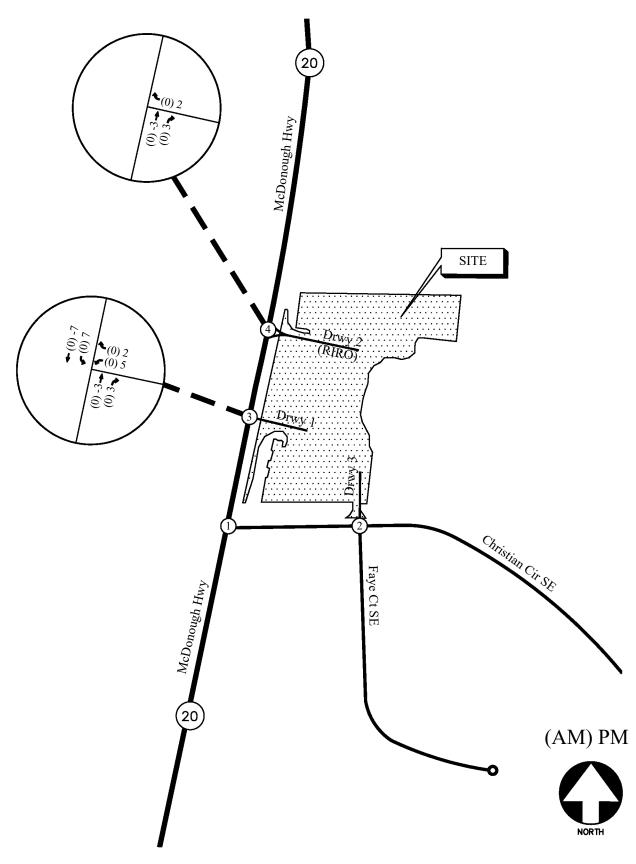

Table 4 — Trip Generation											
Land Use	Size	AM	Peak H	our	PM	Peak Ho	our	24 Hour			
Land Ose	Size	Enter	Exit	Total	Enter	Exit	Total	Two-Way			
ITE 822 – Strip Retail Plaza (<40 k)	24,000 sf	31	20	51	72	73	145	1242			
ITE 932 – High-Turnover (Sit-Down) Restaurant	5,850 sf	31	25	56	32	21	53	627			
Pass-by Trips (0%) 43%			0	0	-14	-9	-23	-230			
Total Trips (Without Reductions)			45	107	104	94	198	1869			
New External Trips (With Reductions)			45	107	90	85	175	1639			

5.2 Trip Distribution

The trip distribution describes how traffic arrives and departs from the site. An overall trip distribution was developed for the site based on a review of the existing travel patterns in the area and the locations of major roadways and highways that will serve the development. The site-generated peak hour traffic volumes, shown in Table 4, were assigned to the study area intersections based on this distribution. The outer-leg distribution and AM and PM peak hour new traffic generated by the site are shown in Figure 5. Pass-by volumes have also been distributed based on existing travel patterns and are shown in Figure 6.

TRIP DISTRIBUTION AND NEW SITE-GENERATED

SITE PEAK HOUR PASS-BY VOLUMES

FIGURE 6
A&R Engineering Inc.

6.0 FUTURE 2026 TRAFFIC ANALYSIS

The future 2026 traffic operations are analyzed for the "Build" and "No-Build" conditions.

6.1 Future "No-Build" Conditions

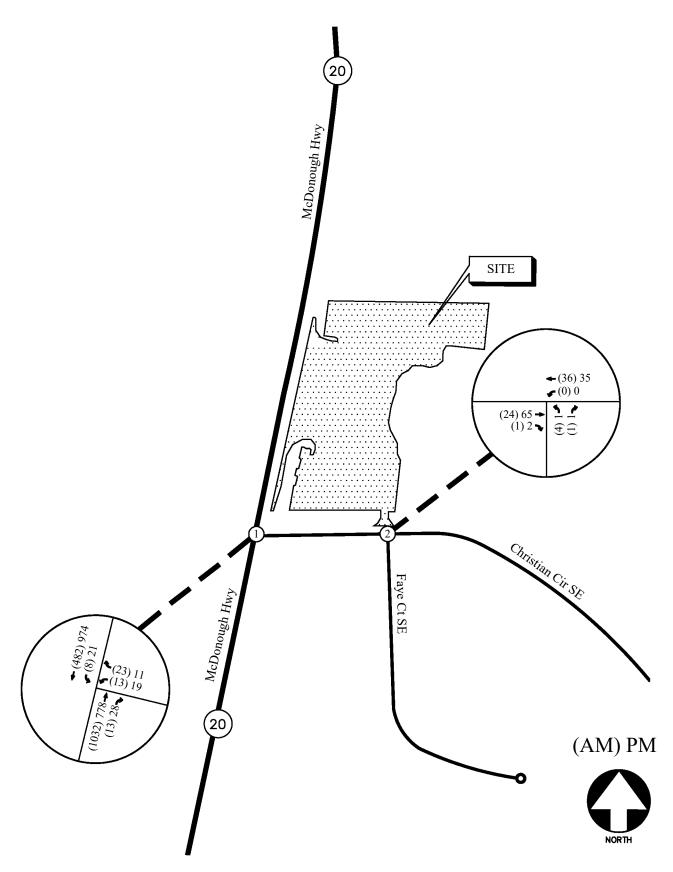

The "No-Build" (or background) conditions provide an assessment of how traffic will operate in the study horizon year without the study site being developed as proposed, with projected increases in through traffic volumes due to normal annual growth. The Future "No-Build" volumes consist of the existing traffic volumes (Figure 2) plus increases for annual growth of through traffic.

6.1.1 Annual Traffic Growth

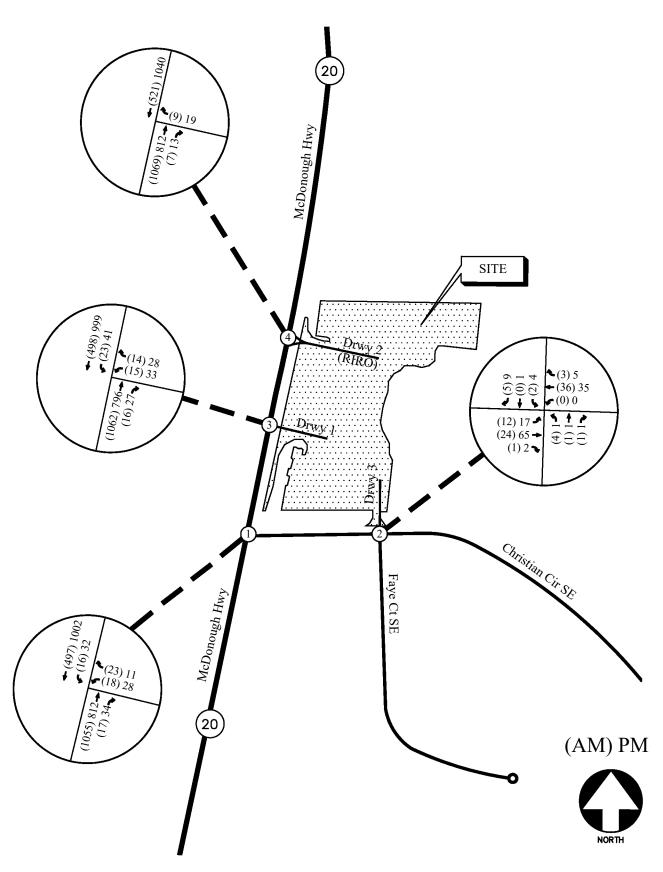

To evaluate future traffic operations in this area, a projection of normal traffic growth was applied to the existing volumes. The Georgia Department of Transportation recorded average daily traffic volumes at several locations in the vicinity of the site. Reviewing the growth over the last five years revealed growth of approximately 1% in the area was used in the analysis. This growth factor was applied to the existing traffic volumes between collector and arterial roadways to estimate the future year traffic volumes prior to the addition of total site-generated traffic. The resulting Future "No-Build" volumes on the roadway are shown in Figure 8.

6.2 Future "Build" Conditions

The "Build" or development conditions include the estimated background traffic from the "No-Build" conditions plus the added traffic from the proposed development. To evaluate future traffic operations in this area, the additional traffic volumes from the site (Figure 5) and pass-by volumes (Figure 6) were added to base traffic volumes (Figure 7) to calculate the future traffic volumes after the construction of the development. These total future "Build" traffic volumes are shown in Figure 8.

FUTURE (NO-BUILD) WEEKDAY PEAK HOUR VOLUMES

FUTURE (BUILD) WEEKDAY PEAK HOUR VOLUMES

FIGURE 8
A&R Engineering Inc.

6.3 Auxiliary Lane Analysis

Included below are analyses for left-turn lanes and deceleration lanes for all site driveways per GDOT standards. The analyses below are based off the trip distribution included in Section 5.2. According to the trip distribution, the 24-hour two-way volume entering and exiting the site is 1,869 vehicles.

6.3.1 Left Turn Lane Analysis

Per GDOT standards, for two lane roadways with AADT's greater than or equal to 6,000 vehicles and a posted speed limit of 45 mph, the daily site generated traffic left-turn movement's threshold to warrant a left-turn lane is 175 left-turning vehicles a day. For two lane roadways with AADT's of less than 6,000 vehicles and a posted speed limit of 30 mph, the daily site generated traffic left-turn movement's threshold to warrant a left-turn lane is 300 left-turning vehicles a day. The projected left-turn volumes per day for the full access driveway is included in Table 5.

Table 5 — GDOT Requirements for Left Turn Lanes											
			Roadway	GDOT							
Intersection	Left turn traffic	Left-turn Volume	Speed/#	Threshold							
intersection	(% total entering)	(vehicles/day)	lanes /	(vehicles/	Warrants						
			ADT	day)	met?						
SR 20 (McDonough Hwy) @ Site Driveway 1	37.5%	350 (Total trips) ÷ 2 × 0.375 = (1869) ÷ 2 × 0.375 = 350	45 mph / 2-Lane / ≥ 6,000	175	Yes						
Christian Circle @ Faye Court /Site Driveway 3	19.1%	178 (Total trips) ÷ 2 × 0.191= (1869) ÷ 2 × 0.191 =178	30 mph / 2-Lane / < 6,000	300	No						

A left turn lane is warranted at site driveway 1 on SR 20 (McDonough Highway) as per GDOT Standards.

6.3.2 Deceleration Turn Lane Analysis

Per GDOT standards, for two-lane roadways with AADT's greater than or equal to 6,000 vehicles and a posted speed limit of 45 mph, the daily site-generated traffic right turns threshold to warrant a deceleration lane is 75. For two-lane roadways with AADT's less than 6,000 vehicles and a posted speed limit of 30 mph, it is 200 right-turning vehicles a day. The projected right turn volumes per day for each driveway is included in Table 6.

TA	ABLE 6 — GDOT	REQUIREMENTS FOR DE	CELERAT	ON LANES	
Intersection	Right-turn traffic (% total entering)	Right-turn Volume (vehicles/day)	Roadway Speed/# lanes/ ADT	GDOT Threshold (vehicles/day)	Warrants met?
SR 20 (McDonough Hwy) @ Site Driveway 1	26.4%	247 (Total trips) ÷ 2 × 0.264 = (1869) ÷ 2 × 0.264 = 247	45 mph / 2-Lane / ≥ 6,000	75	Yes
SR 20 (McDonough Hwy) @ Site Driveway 2 (RIRO)	11%	103 (Total trips) ÷ 2 × 0.11 = (1869) ÷ 2 × 0.11 = 103	45 mph / 2-Lane / ≥ 6,000	75	Yes
Christian Circle @ Faye Court /Site Driveway 3	5%	47 (Total trips) ÷ 2 × 0.05 = (1869) ÷ 2 × 0.05 = 47	30 mph / 2-Lane / < 6,000	200	No

A deceleration lane is warranted at site driveway 1 and 2 on SR 20 (McDonough Highway), per GDOT Standards.

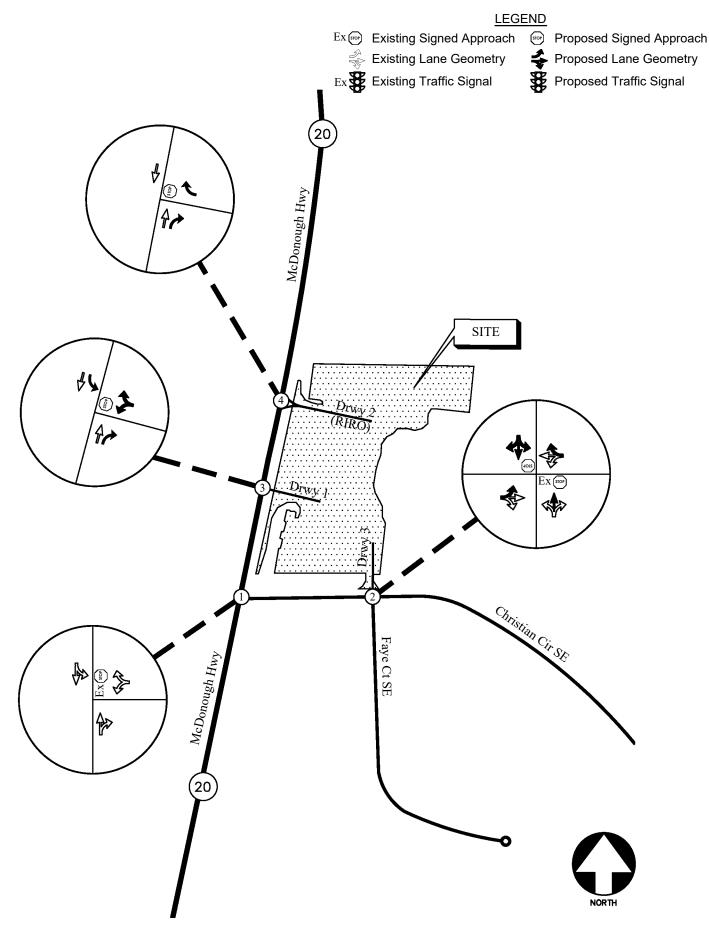

6.4 Future Traffic Operations

The future "No-Build" and "Build" traffic operations were analyzed using the volumes in Figures 7 and 8, respectively. The results of the future traffic operations analysis are shown below in Table 7. Recommendations on traffic control and lane geometry are shown in Figure 9.

	Table 7 – Future I	NTERSECTIO	N OPERATIO	ONS						
		LOS (Delay)								
	Intersection	NO B	UILD	Bl	JILD					
		AM Peak	PM Peak	AM Peak	PM Peak					
	SR 20 (McDonough Highway) @ Christian									
1	Circle									
-	-Westbound Approach	D (32.7)	F (52.4)	E (40.0)	F (85.3)					
	-Southbound Left	B (10.9)	A (9.6)	B (11.1)	A (9.9)					
	Christian Circle @ Faye Court/ Site Drwy 3									
	-Eastbound Left	-	-	A (7.3)	A (7.3)					
2	-Westbound Left	A (0.0)	A (0.0)	A (0.0)	A (0.0)					
	-Northbound Approach	A (8.8)	A (8.9)	A (9.2)	A (9.4)					
	-Southbound Approach	-	-	A (8.8)	A (9.0)					
	SR 20 (McDonough Hwy) @ Site Drwy 1									
3	-Westbound Approach	-	-	E (41.3)	F (105.7)					
	-Southbound Left			B (11.3)	B (10.0)					
	SR 20 (McDonough Hwy) @ Site Drwy 2									
4	(RIRO)									
	-Westbound Approach	-	-	C (20.8)	C (16.1)					

The results of future "No-Build" conditions traffic analysis indicate that the stop-controlled approach of Christian Circle at its un-signalized intersection with SR 20 will operate at LOS "F" in PM peak hour.

The results of the future "Build" conditions traffic analysis indicate that the stop controlled approach of Christian Circle will continue to operate at LOS "F" with slightly longer delays in the PM peak hour. The stop-controlled full access driveway at SR 20 will also experience some delays and will operate at LOS "E" and "F" in AM and PM peak hours respectively. It is not unusual for stop-controlled side-streets along arterial roadways to have elevated delays during peak periods as delays caused by side-streets wait times to turn left onto the mainline. All other approaches operate satisfactorily.

FUTURE TRAFFIC CONTROL AND LANE GEOMETRY

7.0 CONCLUSIONS AND RECOMMENDATIONS

Traffic impacts were evaluated for the proposed commercial development that will be located at 4250 SR 20 (McDonough Highway) in the City of Conyers, Rockdale County, Georgia.

The development will consist of:

- Strip Retail Plaza (<40K): 24,000 sf
- High-Turnover (Sit Down) Restaurant: 5,850 sf

The development proposes access at the following locations:

- Site Driveway 1: Full access driveway on SR 20 (McDonough Highway)
- Site Driveway 2: Right-In/ Right-Out driveway on SR 20 (McDonough Highway)
- Site Driveway 3: Full access driveway on Christian Circle, aligned with Faye Court

Existing and future operations after completion of the project were analyzed at the intersections of:

- 1. SR 20 (McDonough Highway) at Christian Circle
- 2. Christian Circle at Faye Court/ Site Driveway 3
- 3. SR 20 (McDonough Highway) at Site Driveway 1
- 4. SR 20 (McDonough Highway) at Site Driveway 2 (RIRO)

The analysis included the evaluation of future operations for "No-Build" and "Build" conditions, both of which account for the volume increases due to the annual growth of through traffic.

The results of the future "Build" conditions traffic analysis indicate that the stop controlled approach of Christian Circle will continue to operate at LOS "F" with slightly longer delays in the PM peak hour. The stop-controlled full access driveway at SR 20 will also experience some delays and will operate at LOS "E" and "F" in AM and PM peak hours respectively. It is not unusual for stop-controlled side-streets along arterial roadways to have elevated delays during peak periods as delays caused by side-streets wait times to turn left onto the mainline. All other approaches operate satisfactorily.

7.1 Recommendations for Site Access Configuration

The following access configuration is recommended for the proposed site driveway intersection.

- Site Driveway 1: Full access driveway on SR 20 (McDonough Highway)
 - One entering lane and one exiting lane.
 - o Stop-sign controlled on the driveway approach.
 - o A left turn and deceleration lanes for entering traffic.
 - Provide adequate sight distance per AASHTO standards.
- Site Driveway 2: Right-In/ Right Out driveway on SR 20 (McDonough Highway)
 - One entering lane and one exiting right-turn lane.
 - Stop-sign controlled on the driveway approach.
 - o A deceleration lane for entering traffic.
 - o Provide adequate sight distance per AASHTO standards.

- Site Driveway 3: Full access driveway on Christian Circle, aligned with Faye Court
 - One entering lane and one exiting lane.
 - o Stop-sign controlled on the driveway approach.
 - o Provide adequate sight distance per AASHTO standards.

PLANNING COMMISSION AND BOARD OF COMMISSIONERS ROCKDALE COUNTY PLANNING STAFF REPORT

FLU Case Number: FLU2024-06 **REZ Case Number:** REZ2024-20

Address: 1362 and 1390 NW Rockbridge Road

Tax Parcel ID: 0410010013, 041001013H, 041001013J, 041001013K

Site Area: 47.72 acres

Current Zoning: R-1 (Single-Family Residential) and R-3 (Multi-Family Residential)

Existing Conditions: Single-Family Residence/Woods

FLU Request: To amend the Comprehensive Plan Future Land Use Map Category from Low

Density Residential to Light Industrial.

REZ Request: To rezone from R-1 (Single-Family Residential) and R-3 (Multi-Family

Residential) to M-1 (Limited Industrial) to allow the property to be developed

with a construction company's headquarters.

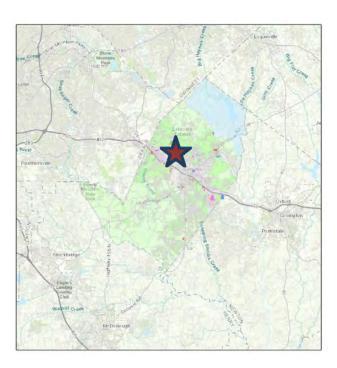

Applicant: Pittman Construction Company

Owner: Veritas Group LLC, Pamela A. Meadows, and Pamela A. Meadows as

Executor of the Estate of Joanne Mumpher

Staff Recommendation: Approval with Conditions

PC Hearing Date: October 10, 2024 BOC Hearing Date: October 24, 2024

ZONING HISTORY

The subject site is comprised of the following four parcels: 0410010013, 041001013J, 041001013K, zoned R-1 (Single-Family Residential), and 041001013H, zoned R-3 (Multi-Family Residential). No prior zoning changes are on record for the site.

EXISTING SITE CONDITIONS

The subject site is a 47.72-acre property developed with a single-family residence surrounded by woods. According to property records, the 2,140 square-foot residence was constructed in 1968 and is in good condition. The subject site has 1,284.09 feet of road frontage along Rockbridge Road NW; a sidewalk is not present. The Rockdale County Stormwater Map indicates that a stream and associated floodplain and wetlands are present on parcel 041001013J. The topography of the site slopes generally down from east to west.

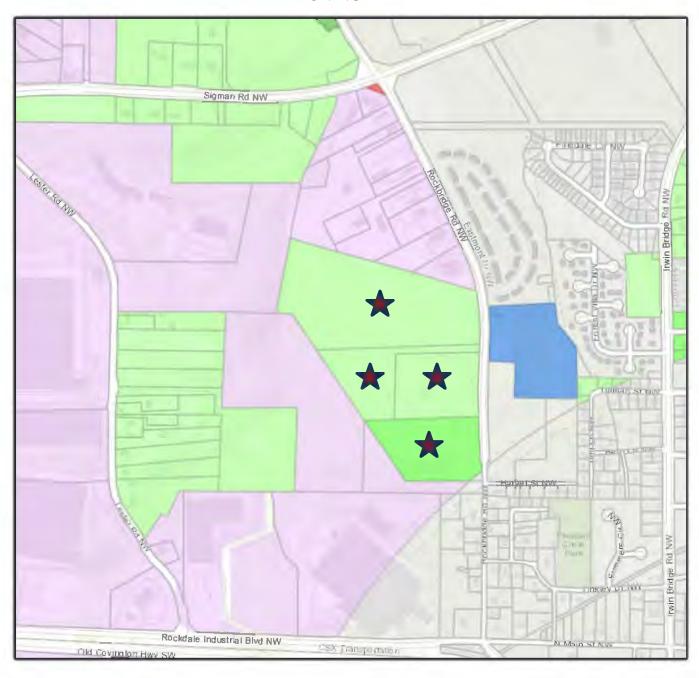

SURROUNDING USE AND ZONING

The subject site is directly adjacent to industrially zoned properties. The following is a summary of surrounding uses and zoning:

	ADJACENT ZONIN	G AND CURR	RENT LAND USE
Direction	Address	Zoning District	Current Land Use
	1496 NW Rockbridge Road	M-1	Rockdale County Fire Station
NI 41	1506 NW Rockbridge Road	M-1	Rockdale County Animal Services
North	1530 A NW Rockbridge Road	M-1	Storage/Warehouse Building
	1532 NW Rockbridge Road	M-1	Service Repair Garage
East*	1381 NW Rockbridge Road NW Rockbridge Road	O-I RS14	Office Building City of Conyers – Conyers Housing Corporation
South	1308 NW Rockbridge Road	M-1	Undeveloped
West	1400 NW Lester Road NW Lester Road	M-1	Undeveloped - Development Authority of Rockdale County

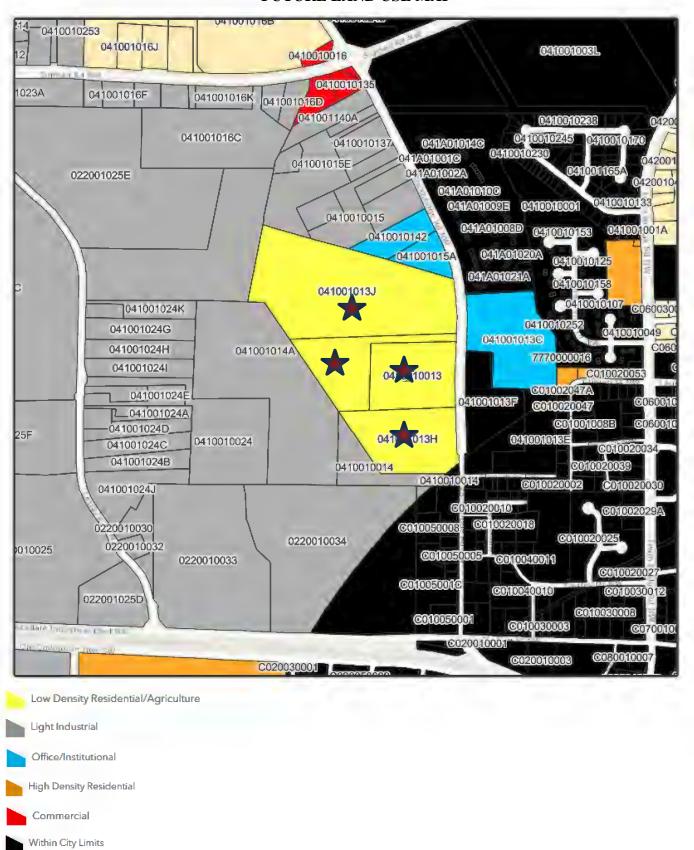

^{*}Subject Property is separated from 1381 NW Rockbridge Road and NW Rockbridge Road by Rockbridge Road NW.

ZONING MAP

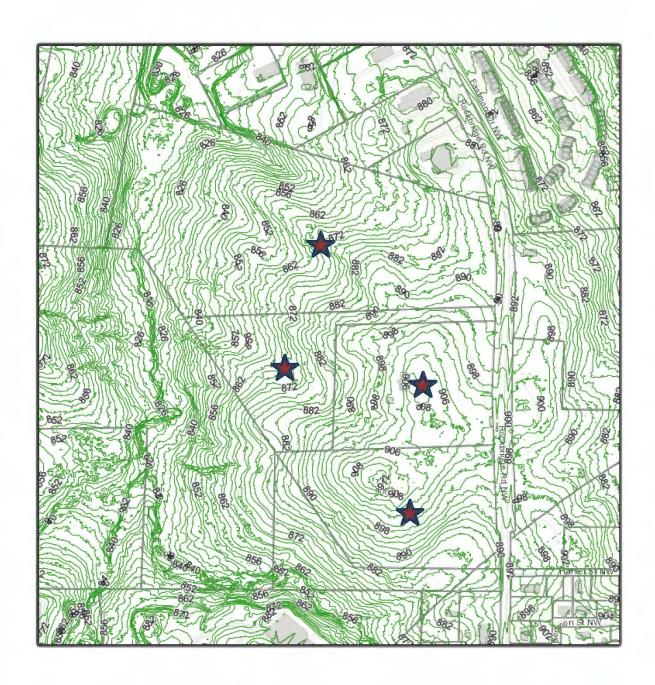

- M1 Limited Inustrial District
- Ol Office-Institutional District
 - R1 Single-Family Residential
- R2 Two-Family Residential District

FUTURE LAND USE MAP

TOPOGRAPHY MAP

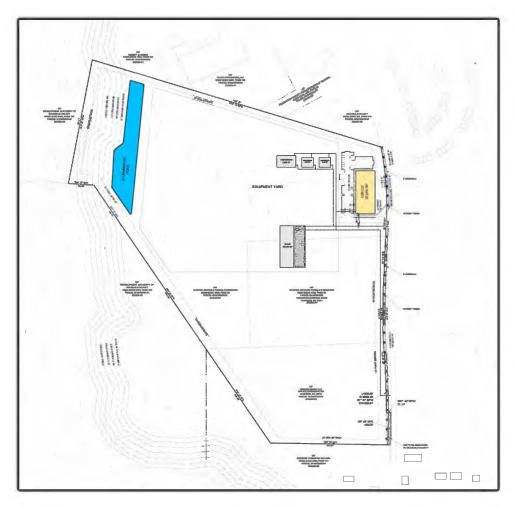

AERIAL

PROJECT SUMMARY

The applicant is requesting a future land use amendment and rezoning for a 47.72-acre parcel. The project includes the following:

- A request to amend the Comprehensive Plan Future Land Use Map Category from Low Density Residential to Light Industrial.
- A request to rezone from R-1 (Single-Family Residential) and R-3 (Multi-Family Residential) to M-1 (Limited Industrial) to allow the property to be developed with a construction company's headquarters, which includes:
 - o A 22,000-square-foot office building located towards the front of the property facing Rockbridge Rd;
 - o 70 car parking spaces towards the rear of the office building;
 - o A 15,000-square-foot shop;
 - o Three warehouses (a 6,000-square-foot warehouse and two 3,000-square-foot warehouses);
 - o An equipment yard;
 - A stormwater management pond located towards the rear of the property adjacent to the stream;
 - o A five-foot-wide sidewalk adjacent to Rockbridge Rd;
 - One point of ingress/egress to the site.
- Setbacks meeting M-1 Standards:
 - o 40-foot front setback
 - o 25-foot side setback
 - o 50-foot rear setback
- No transitional buffers are proposed, as the property is adjacent to industrial uses.

INTERNAL AND EXTERNAL AGENCY REVIEW

The applicant must meet all other UDO requirements related to infrastructure improvements. Internal and External agency comments are attached and provided below.

<u>Fire</u>

FIRE HYDRANTS SHALL BE SPACED A MAXIMUM 500 FEET APART FOR NON-SPRINKLED STRUCTURES; MAXIMUM OF 600 FT OF A SPRINKLED STRUCTURE. STRUCTURES SHALL BE WITHIN AT LEAST 150 FEET HOSE LAY TO THE MOST REMOTE PORTION OF ALL STRUCTURES. ENSURE EMERGENCY VEHICLE ACCESS IS AVAILABLE TO ALL STRUCTURES. EMERGENCY VEHICLE ACCESS ROAD SHALL BE OF ALL WEATHER SURFACE CAPABLE OF SUPPORTING AT LEAST 75,000 LBS.

Rockdale Board of Education

Commercial – no impact to RCPS.

Stormwater Department

Based on the submitted rezoning documents, there are existing State waters, Wetlands, and Rockdale County Future flood plain requirements that must be adhered to by Federal, State and County ordinances. Tree protection must be adhered to as it relates to the Stormwater Management Department for Land Disturbance Permitting.

ARTICLE IV – STREAM BUFFER PROTECTION Sec. 310 - 103 Land development stream buffer requirements.

- (a) All land development activity, including subdivisions of land and platting activities governed by chapter 302 of the UDO, shall meet the following buffer and setback requirements unless otherwise exempted in this article:
- (1) An undisturbed natural vegetative buffer shall be maintained for 50 feet, measured horizontally, on both banks (as applicable) of the stream as measured from the top of the stream bank.
- (2) An additional setback shall be maintained for 25 feet, measured horizontally, beyond the undisturbed natural vegetative buffer, in which all impervious cover shall be prohibited. Grading, filling and earthmoving shall be minimized within the setback.
- (3) No septic tanks or septic tank drain fields shall be permitted within the buffer or the setback.
- (b) Any land development activity within a buffer established hereunder or any impervious cover within a setback established hereunder is prohibited unless a variance is granted pursuant to section 310-105.

CHAPTER 324 – ENVIRONMENTAL PLANNING CRITERIA

Sec. 324-2. - Protection of wetlands.

(a) *Purpose and intent*. Pursuant to O.C.G.A. <u>12-2-8</u> and the DNR, environmental protection division's Rules for Environmental Planning Criteria chapter 391-3-16, this section establishes regulations to promote the wise use of wetlands and protect them from alterations that will significantly affect or reduce their primary functions for water quality, floodplain and erosion control, groundwater recharge, aesthetic natural areas and wildlife habitat areas.

(b) Wetlands development permit requirements. No activity or use, except those identified in subsection (c), shall be allowed in the wetlands without issuance of a local development permit. Local permits will be issued only if the proposed use is in compliance with the requirements of the underlying zoning district and this section. Furthermore, if the area of proposed development is located within 100 feet of the wetlands boundaries, as established by Figure IV-2 of the Rockdale County Comprehensive Land Use Plan, a U.S. Army Corps of Engineers delineation is required under Section 404 of the Clean Water Act. If wetlands are altered or degraded, mitigation to offset losses may be required as a condition of a Section 404 permit. Local development permits will not be issued until after any necessary Section 404 permits have been secured.

CHAPTER 328 – Buffers, landscaping, and Tree Protection

Sec. 328-15. - Authority, findings, purpose and intent.

- (a) Authority. This article is enacted pursuant to the county's exclusive planning authority granted by the Constitution of the State of Georgia, including but not limited to Ga. Const. art. IX, § II, para. IV, and Ga. Const. art. IX, § II, para. III, as well as authority granted by the General Assembly of the State of Georgia, including by not limited to O.C.G.A. § 36-70-3, as well as 1977 Ga. Laws, page 2817, as amended, and 1969 Ga. Laws, page 3639, as amended, and the general police powers of the county and other authority provided by federal, state and local laws applicable to this article.
- (b) Findings, purpose, and intent. It is the intent of this article to provide standards for landscaping and for the preservation and replacement of trees as part of the land development and building construction process in unincorporated areas of the county. The county finds that the existence of adequate tree cover and landscaping in the county directly affects the public health, safety and welfare to comprehensively address these concerns through the adoption of the regulations in this article. The purpose and intent of the board of commissioners in enacting this article are as follows:
- (1) To protect the health, safety and general welfare of the citizens of the county, and to implement the policies and objectives of the comprehensive plan through the enactment of a comprehensive ordinance governing tree preservation and replacement in the county.
- (2) To require landscaping and the preservation and replacement of trees in certain areas within the county in order to ensure the continued health of its citizens through improved air and water quality.
- (3) To provide developers and others active in the county with the appropriate guidance to better ensure proper tree preservation and replacement in the course of the land development process in the county.
- (4) To preserve property values in the county by maintaining a safe, aesthetically pleasing environment.
- (5) To reduce flooding of county rivers and streams by planting trees and other vegetation so as to aid in slowing the rate of stormwater runoff.
- (6) To reduce soil erosion in the county by planting trees and other vegetation so as to aid in prevention of soil loss through stormwater runoff and flooding and to promote stormwater infiltration.
- (7) To reduce noise and glare on adjacent properties from properties that has been extensively developed.
- (8) To conserve energy by cooling surrounding air temperatures through the existence of adequate shade trees.
- (9) To provide improved atmospheric quality by reducing airborne particulates and carbon monoxide and by increasing oxygen through adequate tree cover.

- (10) To promote the saving of trees in nodes throughout a development, rather than as individual trees scattered over a development or around the periphery of a development.
- (11) To prevent clear-cutting and mass grading of land that results in the loss of mature trees, and to ensure appropriate replanting when tree loss does occur.

Sec. 328-25. - Requirements for other developments.

- (a) Each new development not covered by <u>section 328-24</u> shall prepare a landscape and tree protection and replacement plan showing compliance with this section.
- (b) The tree protection and replacement plan must, at a minimum, protect or plant 15 units per acre of trees on the land being developed. The tree density calculations shall not utilize trees within required buffers in determining for the overall density factor, existing density factor, or replacement density factor. All new development with eight (8) or more parking spaces, or expanded development that results in eight (8) or more parking spaces, shall provide interior landscaping.
- (c) Rockdale County has given priority to the retention and placement of trees in frontage planting strips and parking lot planting islands. Trees retained or placed in these areas may be used to meet the tree density factor for a project. However, if the tree density factor is met with trees saved or planted in other areas, the tree location guidelines outlined below must still be performed with additional tree plantings.
- (d) Required landscape strips and re-vegetated buffers. Landscape strips shall meet the minimum depth requirements as indicated in the following table. Trees may be planted in groups rather than in a single line. Adjoining residential zoning districts, evergreen trees shall be saved or planted in such density or spacing as to provide an eight-foot tall visual barrier within two years of planting. Required landscaping strips shall not be encroached upon by parking space, driveway surfaces or storm water detention facilities except when complying with requirements below. Driveway crossings may traverse such strip as near to a perpendicular alignment as practical. Signs may be located in the required landscape strip.

CHAPTER 320 – FLOOD DAMAGE PREVENTION

Sec. 320-1. - Introduction.

- (a) It is hereby determined that:
- (1) The flood hazard areas of Rockdale County, GA are subject to periodic inundation which may result in loss of life and property, health and safety hazards, disruption of commerce and governmental services, extraordinary public expenditures for flood relief and protection, and impairment of the tax base, all of which adversely affect the public health, safety and general welfare.
- (2) Flood hazard areas can serve important stormwater management, water quality, streambank protection, stream corridor protection, wetland preservation and ecological purposes when permanently protected as undisturbed or minimally disturbed areas.
- (3) Effective floodplain management and flood hazard protection activities can:
- a. Protect human life and health,
- b. Minimize damage to private property,

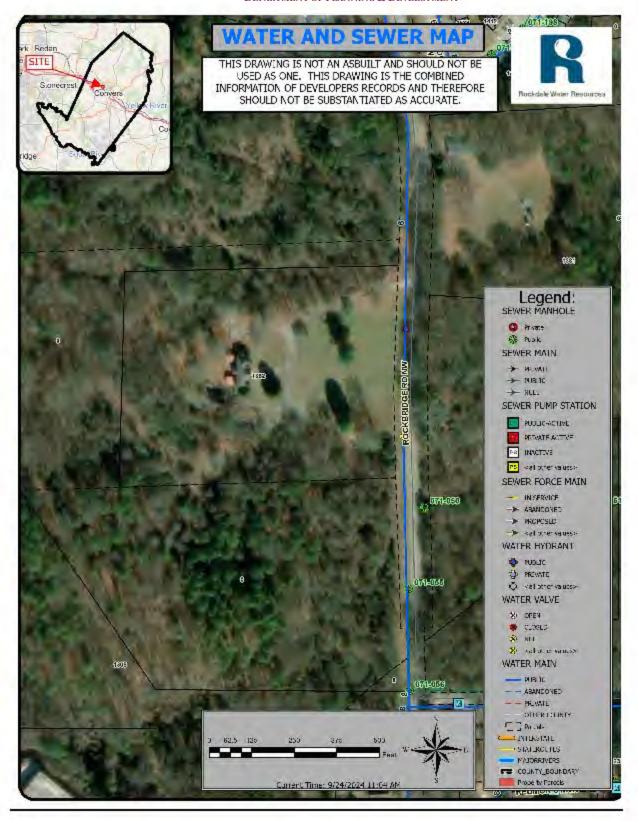

- c. Minimize damage to public facilities and infrastructure such as water and gas mains, electric, telephone and sewer lines, streets and bridges located in floodplains, and
- d. Minimize expenditure of public money for costly flood control projects associated with flooding and generally undertaken at the expense of the general public.
- (b) Article IX, Section II of the Constitution of the State of Georgia and Section 36-1-20(a) of the Official Code of Georgia Annotated have delegated the responsibility to local governmental units to adopt regulations designed to promote the public health, safety, and general welfare of its citizenry. Therefore, Rockdale County, GA, does ordain this chapter and establishes this set of floodplain management and flood hazard reduction provisions for the purpose of regulating the use of flood hazard areas. It is determined that the regulation of flood hazard areas and the prevention of flood damage are in the public interest and will minimize threats to public health and safety, as well as to private and public property.

Transportation Department

Please provide site plans for Transportation to review.

Water/Sewer

Existing 6" DIP and 8" DIP Water mains along NW Rockbridge Rd. Public Wastewater is not available. See Map Attached.

EVALUATION OF THE FUTURE LAND USE REQUEST

Sec. 238-4(g)(2) Standards for review of comprehensive plan amendments

When considering an application to amend the future land use map, the Board of Commissioners, the Planning Commission, and the Planning & Development Department shall consider the following:

A. Whether a proposed future land use map amendment would result in a future land use classification that is more consistent with the text and policies of the comprehensive plan than the current classification of the property on the future land use map.

The subject site currently has a future land use designation of Low Density Residential and is adjacent to properties with the future land use designations of Light Industrial and Office/Institutional. The proposed Future Land Use amendment to Light Industrial is consistent with the surrounding adjacent land use designations, which is primarily that of Light Industrial.

B. Whether the proposed amendment would result in a land use that is more compatible with the current and future land use of adjacent and nearby property.

Staff believe that the proposed amendment to allow the development of a construction company's headquarters would be compatible in the area, as the site is located along Rockbridge Road NW and is adjacent to industrial uses to the north of the property.

C. Whether the proposed amendment would result in more efficient use of publicly financed community facilities and infrastructure.

The proposed construction company headquarters will be served by public water. The project will not likely have a significant impact on transportation facilities. The applicant stated that trucks will be accessing the site from Sigman Road. The development will have no impact on the Rockdale County school system.

D. The extent to which the proposed amendment would increase adverse impacts on the natural environment, especially water quality, green space preservation and air quality.

The proposed construction company headquarters would not increase adverse impacts on the natural environment if all land development regulations are adhered to.

E. Whether the proposed amendment would reduce dependence on the automobile.

The proposed development would not reduce dependence on the automobile.

F. The extent to which the proposed amendment would increase adverse impacts on historic or cultural resources.

There are no known historic or cultural resources in the vicinity of this property; therefore, no adverse impacts are anticipated.

G. If an amendment would affect only a single parcel, whether it should be made part of an areawide review of future land use that includes review of future land use for the subject parcel and other surrounding property.

The proposed amendment would be compatible with the surrounding properties in the area that have Light Residential and Office-Institutional future land use designations.

H. The degree to which the proposed amendment would have adverse impacts on land in adjacent municipalities and local governments.

This development would have not likely have a significant impact on the City of Conyers, as the applicant stated that trucks would be accessing the site from Sigman Road.

I. Whether the proposed amendment would result in any negative impacts on the public water supply and wastewater collection and treatment systems or would conflict with adopted long-term water and sewer plans.

The proposed amendment would not result in negative impacts on the public water supply or wastewater collection.

EVALUATION OF THE REZONING REQUEST

When considering an application to amend the current zoning designation of a property, the Board of Commissioners, the Planning Commission, and the Planning & Development Department shall consider the following standards as described in Section 238-4(G1) of the UDO:

A. Is the zoning proposal permitted as a use that is suitable in view of the use and development of adjacent and nearby property?

The subject site is adjacent to industrially zoned properties that are developed with industrial uses including a county fire station, a county animal control center, several service repair garages, and storage/warehousing uses. The buildings that house these uses were constructed in the 1980's, 90's, and early 2000's. The townhome community to the northeast of the subject site, Eastmont, was constructed in the early 2000's after the industrial uses were established. Due to the pre-existing industrial character of the area, staff believe that the proposed rezoning would be consistent with other developments in the area.

B. Will the zoning proposal adversely affect the existing use or usability of adjacent or nearby property?

The existing uses of adjacent or nearby properties would not likely be adversely impacted by the requested zoning change. Allowing the rezoning from R-1 (Single-Family Residential) and R-3 (Multi-Family Residential) to M-1 (Limited Industrial) would be consistent with adjacent uses along Rockbridge Road NW. Furthermore, the required 20-foot-wide landscape strip and required fencing will mitigate impacts from view of the public street.

C. Will the property to be affected by the zoning proposal have a reasonable economic use as currently zoned?

Development of the property as R-1 (Single-Family Residential) and R-3 (Multi-Family Residential) would not be compatible with the industrial uses to the north, and therefore, the property's economic use is depreciated as currently zoned. The site would have a greater economic use if rezoned to M-1 (Limited Industrial).

D. Will the zoning proposal result in a use which will or could cause excessive or burdensome use of existing streets, transportation, facilities, utilities, or schools?

If land development is permitted in accordance with code requirements, the proposed rezoning would not likely increase adverse impacts on public facilities. Public water is available at the site. Impacts to transportation infrastructure are not anticipated. Development of the site for industrial use will have no impact on the Rockdale County School System.

E. Is the zoning proposal in conformity with the Future Land Use Map and the policy intent of the Comprehensive Land Use Plan?

The request to rezone the subject property to M-1 (Limited Industrial) will be in conformance with the Future Land Use category should the land use be amended to Light Industrial as requested.

F. Are other existing or changing conditions affecting the use and development of the property, which give supporting grounds for either approval, or disapproval of the zoning proposal?

Staff believe that a rezoning of the property from R-1 (Single-Family Residential) and R-3 (Multi-Family Residential) to M-1 (Limited Industrial) would allow the property to be utilized in a manner consistent with surrounding properties.

PLANNING AND DEVELOPMENT STAFF RECOMMENDATIONS

Based on staff's evaluation of the request, and the standards governing exercise of zoning power, the Department of Planning and Development recommends <u>Approval with Conditions</u> of the request to amend the Future Land Use Plan from Low Density Residential to Light Industrial and rezone from R-1 (Single-Family Residential) and R-3 (Multi-Family Residential) to M-1 (Limited Industrial) with the following conditions:

- 1. The proposed development must comply with all Rockdale County Land Disturbance requirements.
- 2. The proposed development must comply with all Rockdale County Standard Design and Construction Details.
- 3. The applicant shall abide by all applicable standards of the Unified Development Ordinance for the M-1 (Limited Industrial) Zoning District, unless otherwise specified in these conditions or through approval of a variance by the Zoning Board of Appeals.
- 4. A 20-foot-wide landscape strip shall be provided along the frontage of the development. Trees may be planted in groups rather than in a single line.
- 5. Outdoor storage shall not be located in the area between the front of the principal structure and the public street.
- 6. Outdoor storage shall be set back at least 15 feet from any side or rear property lines.
- 7. Outdoor storage shall be screened by a solid fence or wall at least eight feet high or as required to screen view from adjacent property and public streets.
- 8. All utilities shall be placed underground.
- 9. Natural vegetation shall remain on the property until the issuance of a development permit.

FUTURE LAND USE MAP AMENDMENT (COMPREHENSIVE PLAN) AND ZONING MAP AMENDMENT (REZONING) **COMBINED APPLICATION**

CHECKLIST

This application is rea	uired for Rezoning	submittals that red	nuire a Future Land	Use (FLU) Man Am	endment The Instr	uctions provide further details

This application is required for Rezoning submittals that require a Future Land Use (FLU) Map Amendment. The Instructions provide further details.
FILING INFORMATION (OFFICE USE ONLY)
Filing Date: BOC 1R WS: BOC 1R VS: PC Hearing: BOC 4R WS: BOC 2R WS: BOC 2R VS:
PROPERTY
Property Address(es): 1362 and 1390 NW Rockbridge Rd (With City and Zip Code) Conyers 30012 Tax Parcel Numbers: 041001013, 041001013H, 041001013J & 041001013K
Total Acreage: 47.722 Number of Properties: 4
Per 2019 House Bill 493, detailed checklists of items required to be submitted for each type of project are supplemental to this application. Each item must
be checked off and a page number where the item is located must be noted and included with the application. The applicant must sign the affidavit, at the end of the application and each required checklist, certifying that all required items are provided. If there are questions regarding items required for your specific project, contact staff for clarification prior to submitting the application.
Applications that do not provide documentation or required materials will be noted as incomplete and may result in delays in the Board of Commissioners', Planning Commission's, or Staff's review of the application and/or denial of the request. The Board of Commissioners and Planning Commission reserves the right to require additional information if it believes that the submission of such information is necessary to understand the nature of the intended activity.
Revisions made to the applications after the submittal deadline and prior to the Board of Commissioners' or Planning Commission's hearing may be continued to the following month's hearing.
The Unified Development Ordinance (UDO) Sec. 202.6 provides the zoning districts that are permitted within each FLU Category. If the FLU Category does not permit the proposed zoning district, this application is required.
The filing fee is based upon the number of properties, the amount of acreage of each property that require a FLU Amendment, the requested Zoning District that is being requested, and the amount of acreage of each property to be rezoned.
REQUIRED Pre-Application Conference (UDO Sec. 238-4(d)(1)):
Date attended and with which staff member:
Completed Application: Provide one (1) digital copy and four (4) hard copies of the entire submittal packet.
Property Information (Page 4)
Contact Information (Page 4): Property Owner(s), Applicant, Authorized Agent, Attorney.
Site and Development Information (Page 5): General information on the property, services, and utilities.
Letters from Service Providers:
Applied Rockdale Water Resources (770-278-7450) or other provider: Public Water Service; Sewer Map; Wastewater Availability and Treatment Capacity; Hydrant Flow;
Applied Rockdale County Public Schools (770-483-4713), if residential: What Schools are Zoned for Your Address?; Enrollment Count and Capacity;
☐ Electrical Service;
☐ Natural Gas Service;
Telecommunications Service (Internet, Landline Phone, and Cable).
Justification of the Request (Page 6): In your own words, type the reason you believe the zoning of the subject property should be amended.
Future Land Use Map Amendment Review Standards (Page 7): Provide justification for each of the review standards listed in UDO Sec. 238-4(g)(2). The Board of Commissioners, the Planning Commission, and the Department will use these standards to evaluate the request.
Rezoning Review Standards (Page 8): Provide justification for each of the review standards listed in UDO Sec. 238-4(g)(1). The Board of Commissioners, the Planning Commission, and the Department will use these standards to evaluate the request.

	JUSTIFICATION OF THE REQUEST
In y	your own words, type the reason you believe the zoning of the subject property should be amended. Please address the following:
1.	The intent of the proposed amendment and the intended timing and phasing of development. State the reasons why you believe the current zoning district classification for the subject rezoning site is incorrect and why approval of a different zoning district classification is appropriate.
	The Subject Property is currently zoned R1and is largely undeveloped, except for one single family home. The site is adjacent to the Rockdale Anima Control center, and near multiple industrial uses along NW Rockbridge Road and Sigman Rd. As such the Subject Property is not suitable for residential development. Rezoning the Subject Property will allow for consistency along the corridor, particularly in light of the surrounding uses Woof the Subject Property.
2.	The impact of the proposed amendment on the capacities of public facilities including, but not limited to, transportation facilities, sewage facilities, water supply, parks, drainage, schools, solid waste, and emergency medical facilities.
	The proposed amendment will have no negative impact on public facilities. There is sewer and water availability within the area. There will be no impact on schools, solid waste, parks, drainage or emergency facilities.
3.	The impact of the proposed amendment on the natural environment, especially existing trees, water bodies, and water quality.
	The proposed project will not result in an increased impact on the natural environment, greenspace preservation or air quality.
4.	The contribution of the proposed amendment to an orderly and logical development pattern.
	The proposed amendment will allow for an orderly and logical development pattern as the area in question is one of the County's primary industria areas.

FUTURE LAND USE MAP AMENDMENT REVIEW STANDARDS

Additionally, provide justification for each of the following review standards (UDO Sec. 238-4(g)(2)). The Board of Commissioners, the Planning Commission, and the Department will use these standards to evaluate the request:

a. Whether a proposed future land use map amendment would result in a future land use classification that is more consistent with the text and policies of the comprehensive plan than the current classification of the property on the future land use map.

The proposed future land use map amendment will result in a more consistent classification as all of the parcel on the west side of NW Rockbridge Road adjacent to the Subject Property are zoned for industrial use.

b. Whether the proposed amendment would result in a land use that is more compatible with the current and future land use of adjacent and nearby property.

The proposed amendment will allow for a land use that is more consistent with the current and future land use of adjacent and nearby parcels

c. Whether the proposed amendment would result in more efficient use of publicly financed community facilities and infrastructure.

The proposed amendment will have less impact on the infrastructure. There are no publicly financed community facilities that will be impacted by the project.

d. The extent to which the proposed amendment would increase adverse impacts on the natural environment; especially water quality, greenspace preservation and air quality.

The proposed project will not result in an increased impact on the natural environment, greenspace preservation or air quality.

e. Whether the proposed amendment would reduce dependence on the automobile.

The proposed amendment will not reduce dependence on automobiles.

f. The extent to which the proposed amendment would increase adverse impacts on historic or cultural resources.

There will be no adverse impacts on historic or cultural resources considering there are no historic preservation development within close vicinity of the Subject Property.

g. If an amendment would affect only a single parcel, whether it should be made part of an area-wide review of future land use that includes review of future land use for the subject parcel and other surrounding property.

The amendment affects multiple parcels that are located adjacent to other industrial uses.

h. The degree to which the proposed amendment would have adverse impacts on land in adjacent municipalities and local governments.

There will be no adverse impacts to land in adjacent municipalities and local governments., as the Subject Property does not abut any other jurisdictions. Additionally, all code regulations in regards to development, transitional buffer, etc will be adhered to.

i. Whether the proposed amendment would result in any negative impacts on the public water supply and wastewater collection and treatment systems or would conflict with adopted long-term water and sewer plans.

The proposed amendment will not result in any negative impacts on the public water supply and wasterwater collection and treatment systems or conflict with any adopted long-term water and sewer plans.

REZONING REVIEW STANDARDS

Additionally, provide justification for each of the following review standards (UDO Sec. 238-4(g)(1)). The Board of Commissioners, the Planning Commission and the Department will use these standards to evaluate the request:

a. Whether a proposed rezoning will permit a use that is suitable, in view of the use and development of adjacent and nearby property.

The proposed rezoning will permit a use that is suitable to the use and development of adjacent and nearby properties.

b. Whether the property to be affected by a proposed rezoning has a reasonable economic use as currently zoned.

The Subject Property as no reasonable use as currently zoned R1. The Subject Property is within an industrial corridor. The redevelopment of the Subject Property for residential use would result in no appropriate transition from the adjacent residential uses.

- c. The impact of the proposed amendment on the natural environment, especially existing trees, water bodies and water quality.

 The proposed amendment will honor the stream buffer at the rear of the site. Trees will be removed from the site in accordance with County rules and regulations.
- d. Whether the proposed rezoning will result in a use that will or could cause an excessive or burdensome use of existing streets, transportation facilities, utilities or schools.

The proposed rezoning will have little to no impact on the existing streets and transportation facilities. The truck route for accessing the site will be solely from Sigman Road, which is already an established truck route. This will have no impact on the service in the area. Additionally, the proposed project will have no impact on local schools.

e. Whether the proposed rezoning is in conformity with the policy and intent of the comprehensive plan.

The proposed rezoning will be accompanied with a Future Land Use Map change application to allow conformity with the policy and intent of the comprehensive plan.

f. Whether there are other existing or changing conditions affecting the use and development of the property that give supporting grounds for either approval or disapproval of the proposed rezoning.

There are no known existing or changing conditions affecting the use and development of the property that give supporting grounds for disapproval of the proposed rezoning.

g. Whether, and the extent to which, the proposed amendment would result in significant adverse impacts on the natural environment.

The proposed development will incorporate on-site stormwater management basins that will manage stormwater runoff generated from the development.

h. The feasibility of serving the property with public wastewater treatment service and the impacts of such on the wastewater system; and, if an alternative wastewater treatment method is proposed, whether such wastewater treatment method is authorized in Rockdale County and will have a detrimental impact on the environment.

There are no alternative wastewater treatment method proposed.

ALTERATIONS TO OR REPEAL OF THE CONDITIONS OF APPROVAL

This page is only required for existing Conditions of Approval that were imposed with the adoption of the Future Land Use Map (Comprehensive Plan) and/or Zoning Map Amendments (Rezoning). If Conditions of Approval exist for a Special Use Permit that need to be changed, a separate application is required.

NOTICE OF CONSTITUTIONAL ALLEGATIONS AND PRESERVATION OF CONTITUTIONAL RIGHTS

Submitted for Applicant Pittman Construction Company by:

Michèle L. Battle, Esq.
Battle Law, P.C.
Habersham at Northlake, Building J, Suite 100
Tucker, Georgia 300384
(404) 601-7616 Phone
(404) 745-0045 Facsimile
mlb@battlelawpc.com

The portions of the Rockdale County Unified Development Ordinance, facially and as applied to the Subject Property, which restrict or classify or may restrict or classify the Subject Property so as to prohibit its development as proposed by the Applicant are or would be unconstitutional in that they would destroy the Applicant's property rights without first paying fair, adequate and just compensation for such rights, in violation of the Fifth Amendment and Fourteenth Amendment of the Constitution of the United States and Article I, Section I, Paragraph I of the Constitution of the State of Georgia of 1983, Article I, Section III, Paragraph I of the Constitution of the State of Georgia of 1983, and would be in violation of the Commerce Clause, Article I, Section 8, Clause 3 of the Constitution of the United States.

The application of the Rockdale County Unified Development Ordinance to the Subject Property which restricts its use to any classification other than that proposed by the Applicant is unconstitutional, illegal, null and void, constituting a taking of Applicant's Property in violation of the Just Compensation Clause of the Fifth Amendment to the Constitution of the United States, Article I, Section I, Paragraph I, and Article I, Section III, Paragraph I of the Constitution of the State of Georgia of 1983, and the Equal Protection and Due Process Clauses of the Fourteenth Amendment to the Constitution of the United States denying the Applicant an economically viable use of its land while not substantially advancing legitimate state interests.

A denial of this Application would constitute an arbitrary irrational abuse of discretion and unreasonable use of the zoning power because they bear no substantial relationship to the public health, safety, morality or general welfare of the public and substantially harm the Applicant in violation of the due process and equal protection rights guaranteed by the Fifth Amendment and Fourteenth Amendment of the Constitution of the United States, and Article I, Section I, Paragraph I and Article I, Section III, Paragraph 1 of the Constitution of the State of Georgia.

A refusal by the Rockdale County Board of Commissioners to amend the land use and/or rezone the Subject Property to the classification as requested by the Applicant would be unconstitutional and discriminate in an arbitrary, capricious and unreasonable manner between the Applicant and owners of similarly situated property in violation of Article I, Section I, Paragraph II of the Constitution of the State of Georgia of 1983 and the Equal Protection Clause of the Fourteenth Amendment to the Constitution of the United States. Any combined rezoning and future land use map amendment to the Property subject to conditions which are different from the conditions requested by the Applicant, to the extent such different conditions would have the effect of further restricting Applicant's utilization of the property, would also constitute an arbitrary, capricious and discriminatory act in zoning the Subject Property to an unconstitutional classification and would likewise violate each of the provisions of the State and Federal Constitutions set forth hereinabove.

A refusal to allow the combined rezoning and future land use map amendment in questions would be unjustified from a fact-based standpoint and instead would result only from constituent opposition, which would be an unlawful delegation of authority in violation of Article IX, Section II, Paragraph IV of the Georgia Constitution.

A refusal to allow the combined rezoning and future land use map amendment in question would be invalid inasmuch as it would be denied pursuant to an ordinance which is not in compliance with the Zoning Procedures Law, O.C.G.A Section 36-66/1 et seq., due to the manner in which the Ordinance as a whole and its map(s) have been adopted.

The existing land use designation and/or zoning classification on the Subject Property is unconstitutional as it applies to the Subject Property. This notice is being given to comply with the provisions of O.C.G.A. Section 36-11-1 to afford the County an opportunity to revise the Property to a constitutional classification. If action is not taken by the County to rectify this unconstitutional land use designation and/or zoning classification within a reasonable time, the Applicant is hereby placing the County on notice that it may elect to file a claim in the Superior Court of Rockdale County demanding just and adequate compensation under Georgia law for the taking of the Subject Property, diminution of value of the Subject Property, attorney's fees and other damages arising out of the unlawful deprivation of the Applicant's property rights.

WARRANTY DEED

STATE OF GEORGIA

COUNTY OF FULTON

THIS INDENTURE, made the **27**44 day of February in the year of our Lord Two Thousand Seven, between

JOANNE MUMPER fka NORA JOANNE BRISENDINE and fka NORA JOANNE BECK

of the County of Rockdale, State of Georgia, as party or parties of the first part, hereinafter called Grantor, and

JOANNE MUMPER and PAMELA S. MEADOWS, as joint tenants with right of survivorship and not as tenants in common

as party or parties of the second part, hereinafter called Grantees (the words "Grantor" and Grantees" to include their respective heirs, successors and assigns where the context requires or permits).

WITNESSETH THAT: Grantor, for and in consideration of love and affection for Grantor's daughter, and for the purpose of titling the property in her and her daughter's names as joint tenants with right of survivorship, has granted, bargained, sold, aliened, conveyed and confirmed, and by these presents does hereby grant, bargain, sell, alien, convey and confirm unto the said Grantees all of her right, title and interest in and to:

All that tract or parcel of land lying and being in Land Lot 265, 16th District, Rockdale County, Georgia, being the same property deeded to Grantor by Deed of Assent recorded in Deed Book 226, Page 662, Rockdale County, Georgia records, and being 14.83 acres of improved property known as 1362 Rockbridge Road, Conyers, Georgia, according to the present system of numbering in Rockdale County, Georgia, all as more particularly described in Exhibit A attached hereto and by this reference made a part hereof.

TO HAVE AND TO HOLD the said tract or parcel of land, together with all and singular the rights, members and appurtenances thereof, to the same being, belonging or in any wise appertaining, to the only proper use, benefit and behoof of the said Grantees forever, IN FEE SIMPLE.

AND THE SAID Grantor will warrant and forever defend the right and title to the above described property unto the said Grantees against the lawful claims of all persons whomsoever.

IN WITNESS WHEREOF, the Grantor has signed and sealed this Deed, the day and year first above written.

Signed, sealed and delivered in the presence of:

Witness

Jo anne Mumper (SEAL)

All that tract or parcel of land lying and being in Land Lot 265 of the 16th District, Rockdale, County, Georgia, and being shown as TRACT 2 (14.83 acres) on plat of survey prepared for the WILLIAM HOMER BRISENDINE, JR. ESTATE, by David Patrick, Ga. R.L.S., dated October 9, 1980, and being more particularly described as follows: TO ARRIVE AT THE TRUE POINT OF BEGINNING, begin at that point where the northern right-of-way of Harvell Street and the eastern right-of-way of Rockbridge Road intersect; thence crossing Rockbridge Road running South 84. 11. West 40.6 feet to an ixon pin set on the western right-of-way of Rockbridge Road; thence running along the western right-of-way of Rockbridge Road; thence running along the western right-of-way of Rockbridge Road the following courses and distances, to-wit: North 02° 02' East 165.9 feet; North 85° 48' West 19.9 feet; North 00° 16' East a chord distance of 205.2 feet with an arc distance of 155.0 feet with an arc distance of 155.1 feet to a right-of-way marker on the western right-of-way of Rockbridge Road, which is the TRUE POINT OF BEGINNING; thence leaving the right-of-way of Rockbridge Road running South 89° 35' West 919.4 feet to an iron pin found at corner; thence running North 32° 44' West 686.3 feet to an iron pin set at corner; thence running North 89° 35' East 1317.7 feet to an iron pin set at corner on the western right-of-way of Rockbridge Road; thence running along said right-of-way South 04° 13' West 278.8 feet to a right-of-way marker; thence continuing South 01° 15' West a chord distance of 302.2 feet with an arc distance of 302.3 feet to the TRUE POINT OF BEGINNING.

PLANNING COMMISSION & BOARD OF COMMISSIONERS ROCKDALE COUNTY PLANNING STAFF REPORT

FLU Case Number: FLU2024-07 **REZ Case Number:** REZ2024-25

Address: 2245 NE White Road

 Tax Parcel:
 0860010008

 Site Area:
 94.31 acres

Current Zoning: WP (Watershed Protection) and A-R (Agricultural-Residential)

Existing Conditions: Single-Family Residence/Woods and Pastures

FLU Request: To amend the Future Land Use Map from Watershed Protection to Medium Density

Residential.

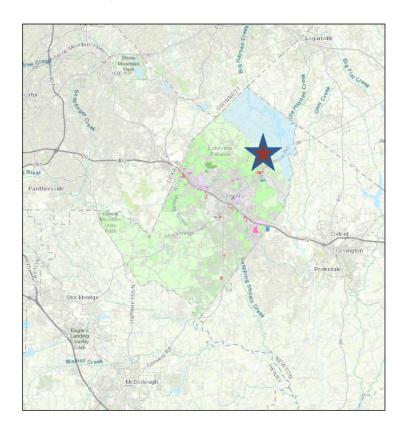

REZ Request: To rezone 94.31 acres from WP (Watershed Protection) and A-R (Agricultural-

Residential) to MRU (Mixed Residential Uses) for a mixed-residential development.

Applicant: Agnes Slack LLLP of Georgia **Owner:** Agnes Slack LLLP of Georgia

Staff Recommendation: Denial

PC Hearing Date: October 10, 2024 BOC Hearing Date: October 24, 2024

Zoning History

The subject property is split-zoned WP (Watershed Protection) and A-R (Agricultural-Residential). No prior zoning requests are on record for this property.

Existing Site Conditions

The subject site is a 94.31-acre property located at 2245 NE White Road (parcel 0860010008) located north of the intersection of White Road NE and Highway 138 NE. The site is developed with a single-family residence and is characterized by woods and pastures. The site has road frontage along White Road NE and Highway 138 NE; sidewalks are not present along the frontages. According to the Rockdale County Stormwater Map, a stream and riverine wetland are present on the property.

Surrounding Use and Zoning

The subject site is adjacent to residential properties. The following is a summary of surrounding uses and zoning:

	Adjacent Zoning and Current Land Use						
Direction	Address	Zoning District	Current Land Use				
	2860 NE WHITE CT	WP	Single-Family Residence (White Hill Sub.)				
	2865 NE WHITE CT	WP	Single-Family Residence (White Hill Sub.)

Project Summary

The applicant is requesting a future land use amendment and rezoning for a 94.31-acre parcel. The project includes:

- The development of a residential community with 199* total residential units. *The applicant requested 173 units in the original application. A site plan indicating 199 units was submitted after the application deadline, but 173 units is the number that was publicly advertised.
 - o 26 proposed single-family bungalow units
 - o 173 proposed single-family detached units
- Proposed dimensional standards
 - o Minimum lot size of 4,000 SF with a proposed typical lot layout of 4,830 SF, meeting code requirements.
 - o Minimum lot width of 40 feet, meeting code requirement.
 - o Minimum heated floor area, meeting code requirements:
 - 1,800 SF single-family detached units
 - 1,400 SF 3-bedroom bungalow units
 - 1,200 SF 2-bedroom bungalow units
- Proposed open space of 56.1% of total site area; code requires a minimum of 15% of total site area.
- Proposed density of 2.11 units per acre; code allows for up to 8 units per acre.
- Proposed 50-foot-wide transitional buffer.
- Proposed 5-foot-wide concrete sidewalks on one side of internal streets; code requires that sidewalks be placed on both sides of internal streets.
- Proposed amenities including community greenspace, amenity area, and pocket parks.

INTERNAL AND EXTERNAL AGENCY REVIEW

The applicant must meet all other UDO requirements related to infrastructure improvements. Internal and External agency comments are attached and provided below.

Fire

FIRE HYDRANTS SHALL BE SPACED A MAXIMUM 500 FEET APART FOR NON-SPRINKLED STRUCTURES; MAXIMUM OF 600 FT APART FOR SPRINKLED STRUCTURES.

Rockdale Board of Education

School:	Current Enrollment	Projected Enrollment	Current Capacity
RCHS	1374	1435	1500
CMS	929	952	1242
HTE	508	511	760

The lack of data on predicted per unit average student occupancy prohibits predicting the school's full occupancy dateline upon build out of this project.

RCPS first steps to address impactful student enrollment numbers is to add mobile units to the site campus affected or consider larger class sizes. Second step, rezoning.

Transportation Department

Coordinate with GDOT on deceleration lane on Hwy 138

Deceleration lane on White Road should be 175' travel lane and 100' taper.

New developments require traffic calming, streetlights, and a traffic study.

Stormwater Department

Based on the submitted rezoning documents, there are existing State waters, Wetlands, and Rockdale County Future flood plain requirements that must be adhered to by Federal, State and County ordinances.

Tree protection must be adhered to as it relates to the Stormwater Management Department for Land Disturbance Permitting.

ARTICLE IV – STREAM BUFFER PROTECTION Sec. 310 – 103 Land development stream buffer requirements.

- (a) All land development activity, including subdivisions of land and platting activities governed by chapter 302 of the UDO, shall meet the following buffer and setback requirements unless otherwise exempted in this article:
- (1) An undisturbed natural vegetative buffer shall be maintained for 50 feet, measured horizontally, on both banks (as applicable) of the stream as measured from the top of the stream bank.
- (2) An additional setback shall be maintained for 25 feet, measured horizontally, beyond the undisturbed natural vegetative buffer, in which all impervious cover shall be prohibited. Grading, filling and earthmoving shall be minimized within the setback.
- (3) No septic tanks or septic tank drain fields shall be permitted within the buffer or the setback.
- (b) Any land development activity within a buffer established hereunder or any impervious cover within a setback established hereunder is prohibited unless a variance is granted pursuant to section 310-105.

CHAPTER 324 - ENVIRONMENTAL PLANNING CRITERIA

Sec. 324-2. - Protection of wetlands.

(a) *Purpose and intent*. Pursuant to O.C.G.A. <u>12-2-8</u> and the DNR, environmental protection division's Rules for Environmental Planning Criteria chapter 391-3-16, this section establishes regulations to promote the wise

use of wetlands and protect them from alterations that will significantly affect or reduce their primary functions for water quality, floodplain and erosion control, groundwater recharge, aesthetic natural areas and wildlife habitat areas.

(b) Wetlands development permit requirements. No activity or use, except those identified in subsection (c), shall be allowed in the wetlands without issuance of a local development permit. Local permits will be issued only if the proposed use is in compliance with the requirements of the underlying zoning district and this section. Furthermore, if the area of proposed development is located within 100 feet of the wetlands boundaries, as established by Figure IV-2 of the Rockdale County Comprehensive Land Use Plan, a U.S. Army Corps of Engineers delineation is required under Section 404 of the Clean Water Act. If wetlands are altered or degraded, mitigation to offset losses may be required as a condition of a Section 404 permit. Local development permits will not be issued until after any necessary Section 404 permits have been secured.

CHAPTER 328 – Buffers, landscaping, and Tree Protection

Sec. 328-15. - Authority, findings, purpose and intent.

- (a) *Authority*. This article is enacted pursuant to the county's exclusive planning authority granted by the Constitution of the State of Georgia, including but not limited to Ga. Const. art. IX, § II, para. IV, and Ga. Const. art. IX, § II, para. III, as well as authority granted by the General Assembly of the State of Georgia, including by not limited to O.C.G.A. § 36-70-3, as well as 1977 Ga. Laws, page 2817, as amended, and 1969 Ga. Laws, page 3639, as amended, and the general police powers of the county and other authority provided by federal, state and local laws applicable to this article.
- (b) Findings, purpose, and intent. It is the intent of this article to provide standards for landscaping and for the preservation and replacement of trees as part of the land development and building construction process in unincorporated areas of the county. The county finds that the existence of adequate tree cover and landscaping in the county directly affects the public health, safety and welfare to comprehensively address these concerns through the adoption of the regulations in this article. The purpose and intent of the board of commissioners in enacting this article are as follows:
- (1) To protect the health, safety and general welfare of the citizens of the county, and to implement the policies and objectives of the comprehensive plan through the enactment of a comprehensive ordinance governing tree preservation and replacement in the county.
- (2) To require landscaping and the preservation and replacement of trees in certain areas within the county in order to ensure the continued health of its citizens through improved air and water quality.
- (3) To provide developers and others active in the county with the appropriate guidance to better ensure proper tree preservation and replacement in the course of the land development process in the county.
- (4) To preserve property values in the county by maintaining a safe, aesthetically pleasing environment.
- (5) To reduce flooding of county rivers and streams by planting trees and other vegetation so as to aid in slowing the rate of stormwater runoff.
- (6) To reduce soil erosion in the county by planting trees and other vegetation so as to aid in prevention of soil loss through stormwater runoff and flooding and to promote stormwater infiltration.
- (7) To reduce noise and glare on adjacent properties from properties that has been extensively developed.
- (8) To conserve energy by cooling surrounding air temperatures through the existence of adequate shade trees.
- (9) To provide improved atmospheric quality by reducing airborne particulates and carbon monoxide and by increasing oxygen through adequate tree cover.
- (10) To promote the saving of trees in nodes throughout a development, rather than as individual trees scattered over a development or around the periphery of a development.
- (11) To prevent clear-cutting and mass grading of land that results in the loss of mature trees, and to ensure appropriate replanting when tree loss does occur.

- (a) Each new development not covered by <u>section 328-24</u> shall prepare a landscape and tree protection and replacement plan showing compliance with this section.
- (b) The tree protection and replacement plan must, at a minimum, protect or plant 15 units per acre of trees on the land being developed. The tree density calculations shall not utilize trees within required buffers in determining for the overall density factor, existing density factor, or replacement density factor. All new development with eight (8) or more parking spaces, or expanded development that results in eight (8) or more parking spaces, shall provide interior landscaping.
- (c) Rockdale County has given priority to the retention and placement of trees in frontage planting strips and parking lot planting islands. Trees retained or placed in these areas may be used to meet the tree density factor for a project. However, if the tree density factor is met with trees saved or planted in other areas, the tree location guidelines outlined below must still be performed with additional tree plantings.
- (d) Required landscape strips and re-vegetated buffers. Landscape strips shall meet the minimum depth requirements as indicated in the following table. Trees may be planted in groups rather than in a single line. Adjoining residential zoning districts, evergreen trees shall be saved or planted in such density or spacing as to provide an eight-foot tall visual barrier within two years of planting. Required landscaping strips shall not be encroached upon by parking space, driveway surfaces or storm water detention facilities except when complying with requirements below. Driveway crossings may traverse such strip as near to a perpendicular alignment as practical. Signs may be located in the required landscape strip.

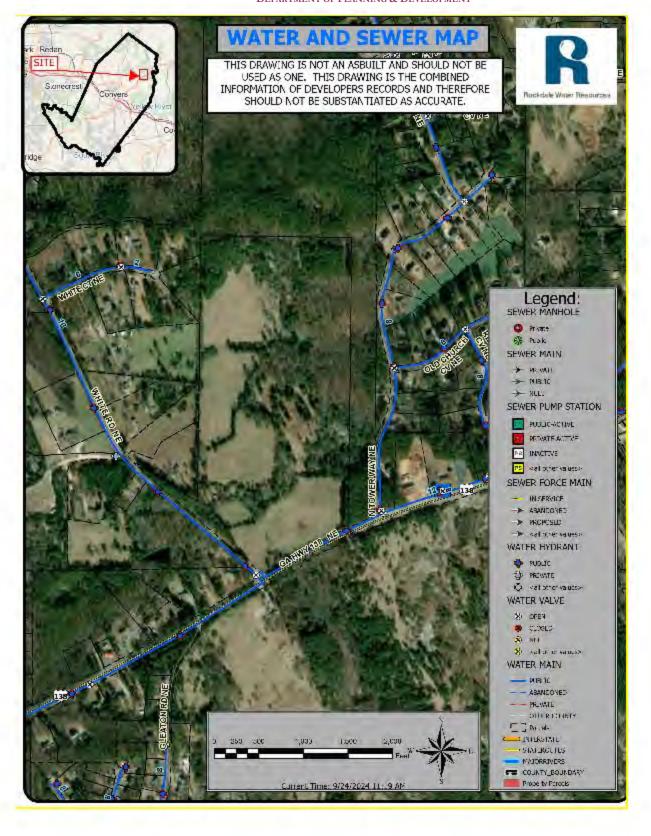

CHAPTER 320 – FLOOD DAMAGE PREVENTION

Sec. 320-1. - Introduction.

- (a) It is hereby determined that:
- (1) The flood hazard areas of Rockdale County, GA are subject to periodic inundation which may result in loss of life and property, health and safety hazards, disruption of commerce and governmental services, extraordinary public expenditures for flood relief and protection, and impairment of the tax base, all of which adversely affect the public health, safety and general welfare.
- (2) Flood hazard areas can serve important stormwater management, water quality, streambank protection, stream corridor protection, wetland preservation and ecological purposes when permanently protected as undisturbed or minimally disturbed areas.
- (3) Effective floodplain management and flood hazard protection activities can:
- a. Protect human life and health,
- b. Minimize damage to private property,
- c. Minimize damage to public facilities and infrastructure such as water and gas mains, electric, telephone and sewer lines, streets and bridges located in floodplains, and
- d. Minimize expenditure of public money for costly flood control projects associated with flooding and generally undertaken at the expense of the general public.
- (b) Article IX, Section II of the Constitution of the State of Georgia and Section 36-1-20(a) of the Official Code of Georgia Annotated have delegated the responsibility to local governmental units to adopt regulations designed to promote the public health, safety, and general welfare of its citizenry. Therefore, Rockdale County, GA, does ordain this chapter and establishes this set of floodplain management and flood hazard reduction provisions for the purpose of regulating the use of flood hazard areas. It is determined that the regulation of flood hazard areas and the prevention of flood damage are in the public interest and will minimize threats to public health and safety, as well as to private and public property.

Water/Sewer

Existing 16" DIP water main along White Rd NE and a 12" DIP Water main along GA Hwy 138 NE. Public Wastewater is currently been constructed along Hwy 138 to White Rd. See Map Attached

EVALUATION OF THE FUTURE LAND USE REQUEST

Sec. 238-4(g)(2) Standards for review of comprehensive plan amendments

When considering an application to amend the future land use map, the Board of Commissioners, the Planning Commission, and the Planning & Development Department shall consider the following:

A. Whether a proposed future land use map amendment would result in a future land use classification that is more consistent with the text and policies of the comprehensive plan than the current classification of the property on the future land use map.

The subject site currently has a future land use designation of Medium Density Residential and Watershed Protection. A majority of the site is designated for a future land use of Watershed Protection with only a small portion of the site—approximately 16.37 acres-designated for Medium Density Residential. The request to amend the majority of the site from Watershed Protection to Medium Density Residential is inconsistent with the creation and intent of the Watershed Protection District and surrounding properties that are designated for Watershed Protection.

B. Whether the proposed amendment would result in a land use that is more compatible with the current and future land use of adjacent and nearby property.

Staff believe that the proposed amendment to allow the development of a mixed residential subdivision would be incompatible in the area, as the site is located at the southern border of the Watershed Protection District. The Watershed Protection future land use designation, as well as zoning category, allows for 1 unit per 3 acres.

C. Whether the proposed amendment would result in more efficient use of publicly financed community facilities and infrastructure.

The proposed residential subdivision will be served by public water. The project is likely to have an impact on transportation facilities, as Highway 138 is highly trafficked. The development is likely to have an impact on the Rockdale County school system, as it is adding 199 new homes to the area.

D. The extent to which the proposed amendment would increase adverse impacts on the natural environment, especially water quality, green space preservation and air quality.

The proposed residential subdivision would not directly increase adverse impacts on the natural environment if all land development regulations are adhered to. However, the Watershed Protection District was intended to preserve the natural resources in the area, specifically the Big Haynes Creek Watershed and the region's water supply. The long-term effects of the requested land use amendment cannot be fully anticipated, but the degradation of the Watershed Protection's boundary line is not to be taken lightly. The development of a subdivision with 199 homes increases impervious surfaces which results in increased stormwater runoff that can negatively impact the water supply.

E. Whether the proposed amendment would reduce dependence on the automobile.

The proposed development would not reduce dependence on the automobile.

F. The extent to which the proposed amendment would increase adverse impacts on historic or cultural resources.

There are no known historic or cultural resources in the vicinity of this property; therefore, no adverse impacts are anticipated.

G. If an amendment would affect only a single parcel, whether it should be made part of an area-wide review of future land use that includes review of future land use for the subject parcel and other surrounding property.

The proposed amendment would affect only a single parcel; however, the amendment could set a precedent for amending the future land use of the Watershed Protection District which would disrupt the integrity of the district and the intended water protection goals.

H. The degree to which the proposed amendment would have adverse impacts on land in adjacent municipalities and local governments.

This development would not likely have a direct significant impact on the City of Conyers, but the whole

region, including Conyers, relies on the Watershed Protection District for water supply preservation.

I. Whether the proposed amendment would result in any negative impacts on the public water supply and wastewater collection and treatment systems or would conflict with adopted long-term water and sewer plans.

The proposed amendment would result in negative impacts on adopted long-term public water supply plans.

EVALUATION OF THE REZONING REQUEST

O.C.G.A. Chapter 36-66: Zoning Procedure Act

When considering an application to amend the current zoning designation of a property, the Board of Commissioners, the Planning Commission, and the Planning & Development Department shall consider the following:

A. Is the zoning proposal permitted as a use that is suitable in view of the use and development of adjacent and nearby property?

The applicant's request for a rezoning from WP (Watershed Protection) and A-R (Agricultural-Residential) to MRU (Mixed Residential Uses) for single-family detached units and single-family bungalows is proposed on an undeveloped area of 94.31 acres. The residential properties adjacent to the site are zoned WP (Watershed Protection) and A-R (Agricultural-Residential).

The lots in the White Hill Subdivision to the west are zoned WP (Watershed Protection), with the smallest lot being 2.41 acres and the largest lot being 4.00 acres. The plat for the White Hill Subdivision was recorded in 1972. The lots in the Northampton Subdivision to the east are zoned WP (Watershed Protection), with the smallest lot being 1.05 acres and the largest lot being 3.24 acres. The plat was recorded in 1986.

The proposed single-family detached units and bungalows are proposed to be on an average lot size of 4,830 SF, or 0.11 acre. Staff believe that the proposed mixed-residential development is not suitable in view of the surrounding single-family lots.

B. Will the zoning proposal adversely affect the existing use or usability of adjacent or nearby property?

The Watershed Protection District was established in part to protect the aesthetic qualities and low-density character of the area. A rezoning of the property for almost 200 homes (the development is just shy of requiring a traffic study) would affect the existing use and character of the area.

C. Will the property to be affected by the zoning proposal have a reasonable economic use as currently zoned?

The property has reasonable economic use as currently zoned; the Watershed Protection District is an economically reasonable zoning district as it protects the water supply.

D. Will the zoning proposal result in a use that will or could cause excessive or burdensome use of existing streets, transportation, facilities, utilities, or schools?

The project will likely have an impact on transportation infrastructure as Highway 138 is a widely trafficked route. Rockdale Water Resources (RWR) has indicated that public water is available at the site location, and public wastewater is currently under construction. Schools in the area would likely be impacted by the addition of 199 new homes.

E. Is the zoning proposal in conformity with the Future Land Use Map and the policy intent of the Comprehensive Land Use Plan?

The Future Land Use Category of this site is Medium Density Residential and Watershed Protection. The request to rezone to MRU (Mixed Residential Uses) is not in conformity with the future land use designation of Watershed Protection, which requires a minimum of 1 unit per 3 acres.

F. Are other existing or changing conditions affecting the use and development of the property, which

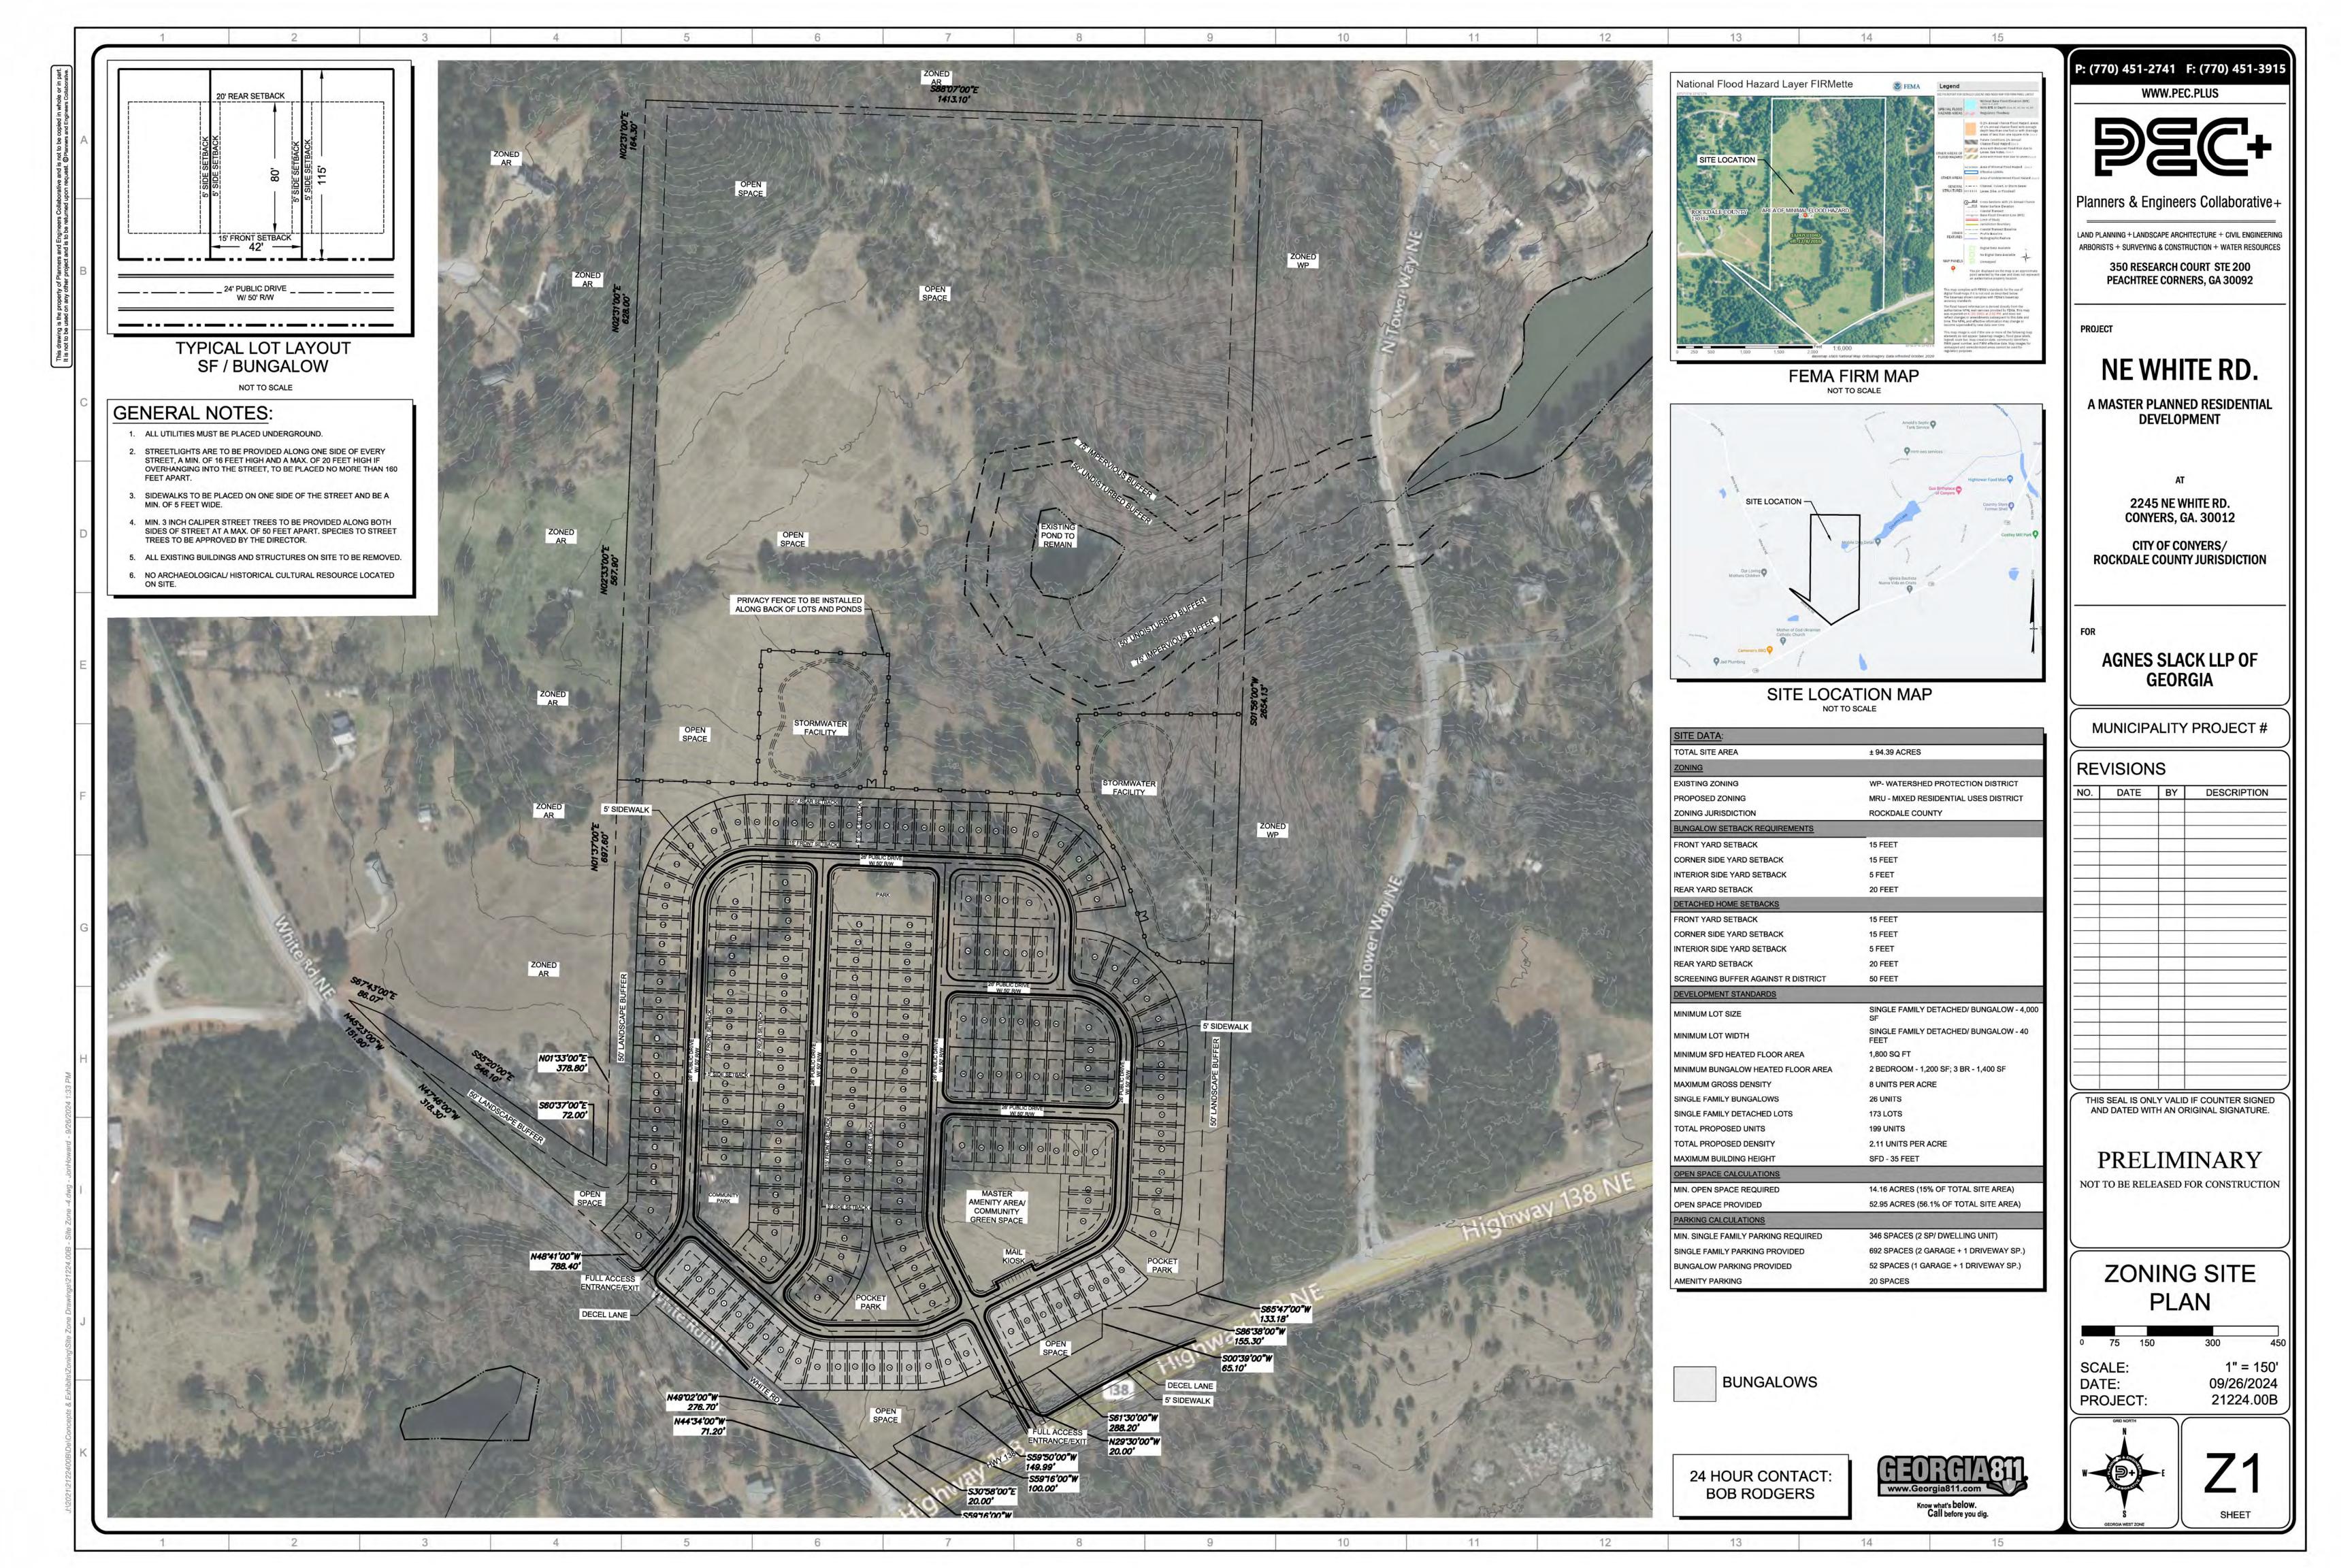

give supporting grounds for either approval, or disapproval of the zoning proposal?

The small-lot residential uses proposed on the subject site are in close proximity to large-lot residential uses in the area. Furthermore, the subject site's location within the Watershed Protection District give supporting grounds for disapproval of the zoning proposal.

PLANNING & DEVELOPMENT STAFF RECOMMENDATIONS

Staff recommends <u>Denial</u> of the requests to amend the future land use map from Watershed Protection to Medium Density Residential and to rezone from WP (Watershed Protection) and A-R (Agricultural-Residential) to MRU (Mixed Residential Uses). Should the requests be approved, staff recommend the following conditions:

- 1. The site shall be developed in compliance with the Mixed Residential Uses (MRU) Zoning District if adopted.
- 2. The applicant shall provide the Traffic Impact Study with the Preliminary Plat. Any recommendations for improvements shall be required to be shown on the Land Disturbance Permit (LDP). Additionally, as determined by the Rockdale County Department of Transportation, a new study may be required for the development. Any recommendations for improvements from any new studies shall be required to be shown on the LDP.
- 3. The site shall be restricted not to exceed 173 residential units.
- 4. A mandatory Homeowners' Association shall be established and shall be responsible for the maintenance of all common areas and facilities.
- 5. The Homeowners' Association covenants shall include a rental restriction of five percent (5%) of all single-family residential dwelling units.
- 6. All single-family detached units and townhome units shall have a two-car garage.
- 7. Provide a five-foot-wide concrete sidewalk along both sides of the proposed internal streets. Provide a two-foot-wide grass strip on all internal public roads between the back of the curb and the sidewalk. Provide a five-foot-wide landscape strip. All trees planted in this landscape strip shall be counted towards any Rockdale County required tree recompense credits or tree density units as mandated by the required development permit.
- 8. Provide a five-foot-wide concrete sidewalk along White Road NE and Highway 138 NE. Provide a ten-foot-wide landscape strip within existing right-of-way between the roadway and the sidewalk.
- 9. All grassed areas shall be sodded.
- 10. All utilities shall be placed underground.
- 11. Natural vegetation shall remain on the property until the issuance of a development permit.
- 12. All front building elevations shall be constructed with at least fifty (50) percent of the following building materials: Brick, Indigenous Rock, Natural Stone, and Synthetic Stone, or a combination of Brick, Indigenous Rock, Natural Stone, and Synthetic Stone, with accent building materials that may include but not be limited to Stucco, EIFS, Metal, Painted Cement Siding, and Wood where masonry products are not provided.
- 13. Streetlights shall be provided throughout the residential development along the internal streets where residential units directly abut. When internal to the block, all streetlights shall be residential in character and meet the minimum lighting standards of Rockdale County, GA as defined in the current edition of the development regulations at the time of development permitting.
- 14. Stormwater detention ponds shall be screened from view from adjoining residential properties. Screening plans shall be subject to review and approval of the Director of Planning and Development.
- 15. Any structures in the amenity areas shall be constructed using exterior building materials that complement the adjacent residential structures. The amenity areas may be in a single area or in multiple areas.

REZONING APPLICATION

UNIFIED DEVELOPMENT ORDINANCE DEPARTMENT OF PLANNING AND DEVELOPMENT

1117 West Avenue NW Conyers, Georgia 30012

Phone: 770-278-7100 Fax: 770-278-8940 www.rockdalecounty.org

ROCKDALE COUNTY REZONING APPLICATION CHECKLIST

FILING DEADLINE:

Deadline is the First Friday of Each Month, Before 4:00pm.

Fees may be paid by check or card. We do not accept American Express or cash.

The filing fee is based upon the number of properties, the acreage of each property, and the requested zoning district.

REQUIRED ITEMS FOR REZONING:

Revsions made to the applications after the submittal deadline and prior to the Planning Commission and Board of Commissioners Pu	blic Hearings may be
continued to the following month's hearing.	

abla	Pre-Application Conference: Date attended and with which staff member
abla	Completed Applicaton: Provide one PDF copy to planning@rockdalecountyga.gov and one hard copy of the entire submittal packet.
\overline{V}	Letter of Intent: In your own words, type the reason you believe the zoning of the subject property should be amended.
Z	Proof of Ownership: Deed recorded with Rockdale County Clerk of Courts. A copy of the deed of the property or properties may be obtained at the Rockdale County Courthouse in the Real Estate Records Room on the 1st floor.
	Plat: Plat recorded with Rockdale County Clerk of Courts or referenced by the Deed, if not recorded. A copy of the existing survey plat of the property or properties may be obtained at the Rockdale County Courthouse in the Real Estate Records Room on the 1st floor. However, one complete boundary survey is required for projects with more than one property.
	OR
V	Survey: Survey should be signed and sealed by an architect, engineer, landscape architect or land surveyor.
Z	Legal Description of the Property: This written description, found on the property deed, containing the metes & bounds of the property or properties. However, the legal description must be provided in Word with this application.
V	Site Plan: Drawn to scale, showing all existing property improvements, and all proposed improvements. The Conceptual Plan may include any additional graphics which will explain the features of the development, but shall include the following:

- A written description of the details of the proposed use and development details;
- · A vicinity map showing the use and zoning of all surrounding properties;
- · Proposed setbacks and transitional buffers;
- · Proposed open or recreational spaces, if any;
- · Proposed lot sizes, buildings, fences and walls, dumpsters, and other improvements;
- Proposed stormwater management facilities, subject to the approval of the Rockdale County Stormwater Department;
- Proposed location and capacities of public and private utilities, subject to the approval of the Rockdale County Environmental Health Department or Rockdale County Water Resources;
- · Lakes, streams, floodplains, wetlands, and associated buffers;
- Proposed public improvements including sidewalks, street trees, and right-of-way dedications;
- · Existing and proposed easements;
- Impact on school enrollment and transportation facilities;
- Impact on existing water, sewer, and stormwater facilities;
- Any additional information as may be requested by the Department.
- Traffic Study (if required)
- Development of Regional Impact Review Form (DRI) per UDO Sec. 238-5 (if required)

Applications that do not provide documentation or required materials will be noted as incomplete and may result in delays in Staff's review of the application. The Planning Commission and Board of Commissioners reserve the right to require additional information if they believe that the submission of such information is necessary to understand the nature of the intended activity.

JUSTIFICATION OF THE REZONING REQUEST

In your own words, type the reason you believe the zoning of the subject property should be amended. Please address the following:

1.	The intent of the proposed amendment and the intended timing and phasing of development. State the reasons why you believe the current zoning district classification for the subject rezoning site is incorrect and why approval of a different zoning district classification is appropriate.
	The proposed amendment intends to change the zoning of the Subject Property from WP/
	AR to MUR. There will not be phases to the development and construction can start as
	early as the end of 2026 assuming all applications are approved.
2.	The impact of the proposed amendment on the capacities of public facilities including, but not limited to, transportation facilities, sewage facilities, water supply, parks, drainage, schools, solid waste, and emergency medical facilities.
	The proposed amendment will have an insignificant impact on transportation
	facilities, sewage facilities, water supply, parks, drainage, schools, solid waste
	and emergency medical facilities.
3.	The impact of the proposed amendment on the natural environment, especially existing trees, water bodies, and water quality.
	The proposed amendment will have an insignificant impact on the natural
	environment.
4.	The contribution of the proposed amendment to an orderly and logical development pattern.
٧,	The contribution of the proposed amendment to an orderly and logical development pattern.
	The proposed amendment will contribute to an orderly and logical development
	pattern by continuing the trend of residential development in the area while also providing future
	residents access to the nearby parks.

REZONING REVIEW STANDARDS

Additionally, provide justification for each of the following review standards (UDO Sec. 238-4(g)(1)). The Department, the Planning Commission, and the Board of Commissioners will use these standards to evaluate the request:

1.	Whether a proposed rezoning will permit a use that is suitable, in view of the use and development of adjacent and nearby property.
2.	Whether the property to be affected by a proposed rezoning has a reasonable economic use as currently zoned.
3.	The impact of the proposed amendment on the natural environment, especially existing trees, water bodies and water quality.
4.	Whether the proposed rezoning will result in a use that will or could cause an excessive or burdensome use of existing streets, transportation facilities, utilities or schools.
5.	Whether the proposed rezoning is in conformity with the policy and intent of the comprehensive plan.
6.	Whether there are other existing or changing conditions affecting the use and development of the property that give supporting grounds for either approval or disapproval of the proposed rezoning.
7.	Whether, and the extent to which, the proposed amendment would result in significant adverse impacts on the natural environment.
8.	The feasibility of serving the property with public wastewater treatment service and the impacts of such on the wastewater system; and, if an alternative wastewater treatment method is proposed, whether such wastewater treatment method is authorized in Rockdale County and will have a detrimental impact on the environment.

AGENT/ATTORNEY AUTHORIZATION STATEMENT

To be completed by the Agent or Attorney of the subject property or properties as it appears on the Rockdale County tax records if they wish to have an agent represent them in all matters related to this application. I. <u>LETTER OF INTENT</u>

Agnes Slack LLLP of Georgia (the "Applicant") is seeking to develop on +/- 94.311 acres of land being Tax Parcel No. 0860010008 having frontage on 2245 White Road (the "Subject Property") with single-family detached homes and townhomes. The Applicant is seeking a future land use amendment from WP to MDR and a rezoning from WP/AR to MUR of the Subject Property to allow for 173 single-family detached homes and townhomes.

This document serves as a statement of intent, analysis of the criteria under the Rockdale County Zoning Ordinance and contains notice of constitutional allegations as a reservation of the Applicant's rights.

II. ROCKDALE COUNTY FUTURE LAND USE AMENDMENT AND REZONING CRITERIA

 Whether a proposed amendment would result in a future land use classification that is more consistent with the text and policies of the comprehensive plan than the current classification of the property on the future land use map;

The future land use amendment would result in a future land use classification that is consistent with the text and policies of the comprehensive plan.

 Whether the proposed amendment would result in a land use that is more compatible with the current and future land use of adjacent and nearby properties;

The proposed amendment would result in a land use that is more compatible with the current and future land use of adjacent and nearby properties.

 Whether the proposed amendment would result in more efficient use of publicly financed community facilities and infrastructure;

The proposed amendment would result in more efficient use of publicly financed community facilities and infrastructure.

4. The extent to which the proposed amendment would increase adverse impacts on the natural environment; especially water quality, green space preservation and air quality;

The proposed amendment would not increase adverse impacts on the natural environment.

5. Whether the proposed amendment would reduce dependence on the automobile;

Whether the proposed amendment would not reduce dependence on the automobile.

6. The extent to which the proposed amendment would increase adverse impacts on historic or cultural resources;

The proposed amendment would not increase adverse impacts on historic or cultural resources.

7. If an amendment would affect only a single parcel, whether it should be made part of an area-wide review of future land use that includes review of future land use for the subject parcel and other surrounding property;

The amendment should not be made part of an area-wide review of future land use.

8. The degree to which the proposed amendment would have adverse impacts on land in adjacent municipalities and local governments;

The proposed amendment would not have adverse impacts on land in adjacent municipalities and local governments.

 Whether the proposal amendment would result in any negative impacts on the public water supply and wastewater collection and treatment systems or would conflict with adopted long-term water and sewer plan.

The proposed amendment would not result in any negative impacts on the public water supply and wastewater collection and treatment systems nor would it conflict with adopted long-term water and sewer plans.

III. ROCKDALE COUNTY REZONING CRITERIA

10. Whether a proposed rezoning will permit a use that is suitable, in view of the use and development of adjacent and nearby property;

The proposed rezoning will permit a use that is suitable in view of the use and development of adjacent and nearby property. Nearby properties are developed with residential uses. This rezoning will further that pattern.

11. Whether the property to be affected by a proposed rezoning has a reasonable economic use as currently zoned;

The property to be affected by the proposed rezoning does not have a reasonable economic use as currently zoned.

12. The impact of the proposed amendment on the natural environment, especially existing trees, water bodies and water quality;

The proposed amendment will not impact the natural environment. A great majority of the Subject Property will be set aside for conservation.

13. Whether the proposed rezoning will result in a use that will or could cause an excessive or burdensome use of existing streets, transportation facilities, utilities or schools;

The proposed rezoning will not result in a use that will or could cause an excessive or burdensome use of existing streets, transportation facilities, utilities, or schools.

14. Whether the proposed rezoning is in conformity with the policy and intent of the comprehensive plan;

This rezoning accompanies a future land use amendment. Granting both the future land use amendment and rezoning will result in a rezoning that is in conformity with the policy and intent of the comprehensive plan.

15. Whether there are other existing or changing conditions affecting the use and development of the property that give supporting grounds for either approval or disapproval of the proposed rezoning;

The Applicant is not aware of existing or changing conditions affecting the use and development of the property that give supporting grounds for either approval or disapproval of the proposed rezoning.

16. Whether, and the extent to which, the proposed amendment would result in significant adverse impacts on the natural environment;

The rezoning would not result in significant adverse impacts on the natural environment.

17. The feasibility of serving the property with public wastewater treatment service and the impacts of such on the wastewater system; and, if an alternative wastewater treatment method is proposed, whether such wastewater treatment method is authorized in Rockdale County and will have a detrimental impact on the environment.

It is feasible to serve the Subject Property with public wastewater treatment service. The impacts of serving the Subject Property with wastewater treatment services is not significant.

IV. CONCLUSION

For the foregoing reasons, the Applicant hereby requests that the application for a future land use amendment and rezoning to allow for 173 single-family detached homes and townhomes be approved. The Applicant welcomes any questions and feedback from the planning staff.

V. NOTICE OF CONSTITUTIONAL ALLEGATIONS AND PRESERVATION OF CONSTITUTIONAL RIGHTS

The portions of the Rockdale County Zoning Ordinance, facially and as applied to the Subject Property, which restrict or classify or may restrict or classify the Subject Property so as to prohibit its development as proposed by the Applicant are or would be unconstitutional in that they would destroy the Applicant's property rights without first paying fair, adequate and just compensation for such rights, in violation of the Fifth Amendment and Fourteenth Amendment of the Constitution of the United States and Article I, Section I, Paragraph I of the Constitution of the State of Georgia of 1983, Article I, Section III, Paragraph I of the Constitution of the State of Georgia of 1983, and would be in violation of the Commerce Clause, Article I, Section 8, Clause 3 of the Constitution of the United States.

The application of the Rockdale County Zoning Ordinance to the Subject Property which restricts its use to any classification other than that proposed by the Applicant is unconstitutional, illegal, null and void, constituting a taking of Applicant's Property in violation of the Just Compensation Clause of the Fifth Amendment to the Constitution of the United States, Article I, Section I, Paragraph I, and Article I, Section III, Paragraph I of the Constitution of the State of Georgia of 1983, and the Equal Protection and Due Process Clauses of the Fourteenth Amendment to the Constitution of the United States denying the Applicant an economically viable use of its land while not substantially advancing legitimate state interests.

A denial of this Application would constitute an arbitrary irrational abuse of discretion and unreasonable use of the zoning power because they bear no substantial relationship to the public health, safety, morality or general welfare of the public and substantially harm the Applicant in violation of the due process and equal protection rights guaranteed by the Fifth Amendment and Fourteenth Amendment of the Constitution of the United States, and Article I, Section I, Paragraph I and Article I, Section III, Paragraph 1 of the Constitution of the State of Georgia.

A refusal by the Rockdale County Board of Commissioners to amend the land use and/or rezone the Subject Property to the classification as requested by the Applicant would be unconstitutional and discriminate in an arbitrary, capricious and unreasonable manner between the Applicant and owners of similarly situated property in violation of Article I, Section I, Paragraph II of the Constitution of the State of Georgia of 1983 and the Equal Protection Clause of the Fourteenth Amendment to the Constitution of the United States. Any Future Land Use Amendment and Rezoning of the Property subject to conditions which are different from the conditions requested by the Applicant, to the extent such different conditions would have the effect of further restricting Applicant's utilization of the property, would also constitute an arbitrary, capricious and

discriminatory act in zoning the Subject Property to an unconstitutional classification and would likewise violate each of the provisions of the State and Federal Constitutions set forth hereinabove.

A refusal to allow the land use amendment and/or Future Land Use Amendment and Rezoning in questions would be unjustified from a fact-based standpoint and instead would result only from constituent opposition, which would be an unlawful delegation of authority in violation of Article IX, Section II, Paragraph IV of the Georgia Constitution.

A refusal to allow the land use amendment and/or Future Land Use Amendment and Rezoning in question would be invalid inasmuch as it would be denied pursuant to an ordinance which is not in compliance with the Zoning Procedures Law, O.C.G.A Section 36-66/1 et seq., due to the manner in which the Ordinance as a whole and its map(s) have been adopted.

The existing land use designation and/or zoning classification on the Subject Property is unconstitutional as it applies to the Subject Property. This notice is being given to comply with the provisions of O.C.G.A. Section 36-11-1 to afford the County an opportunity to revise the Property to a constitutional classification. If action is not taken by the County to rectify this unconstitutional land use designation and/or zoning classification within a reasonable time, the Applicant is hereby placing the County on notice that it may elect to file a claim in the Superior Court of Rockdale County demanding just and adequate compensation under Georgia law for the taking of the Subject Property, diminution of value of the Subject Property, attorney's fees and other damages arising out of the unlawful deprivation of the Applicant's property rights.

LIMITED WARRANTY DEED WARRANTY DEED WARRANTY DEED

THIS INDENTURE, made and entered into this day of June, in the year One Thousand time Hundred Ninety-Two between A. RONALD SLACK, of the State of Georgia, as party of the first part, hereinafter called "Grantor"; and AGNES SLACK L.P. OF GEORGIA, a Georgia Limited Partnership, as party of the second part, hereinafter called "Grantee" (the words "Grantor" and "Grantees" to include their respective successors and assigns where the context requires or permits).

WITNESSETH:

That Grantor, for and in consideration of the sum of Ten and No/100 (\$10.00) Dollars and other good and valuable consideration, the receipt and sufficiency of which consideration is hereby acknowledged, has granted, bargained, sold, aliened, conveyed and confirmed and by these presents does grant, bargain, sell, alien, convey and confirm unto the said Grantee, the following described property:

ALL THAT TRACT OR PARCEL OF LAND LYING AND BEING in Land Lots 374, 375 and 360 of the 1.6th District of Rockdale County, Georgia being more fully and particularly described on Exhibit "A" attached hereto and incorporated by reference herein.

This Deed is subject to all matters of record and is further subject to all matters which would be determined by an accurate survey and inspection of the property including rights, if any, of persons who may be in possession.

TO HAVE AND TO HOLD said land and property with all and singular the rights, members and appurtenances thereof, to the proper use, benefit and behoof of the said Grantee forever in fee simple.

AND THE SAID Grantor will warrant and forever defend the right and title to the above-described property unto the said Grantee only against the claims of persons claiming by, through or under Grantor during the time of Grantor's ownership of the property.

IN WITNESS WHEREOF, the undersigned, Grantor has signed and sealed this Deed the day and year above written.

ROCKDALE COUNTY DEPARTMENT OF PLANNING & DEVELOPMENT

FUTURE LAND USE MAP (FLUM) AMENDMENT APPLICATION

UNIFIED DEVELOPMENT ORDINANCE DEPARTMENT OF PLANNING AND DEVELOPMENT

1117 West Avenue NW Conyers, Georgia 30012

Phone: 770-278-7100 Fax: 770-278-8940 www.rockdalecounty.org

ROCKDALE COUNTY FUTURE LAND USE AMENDMENT APPLICATION CHECKLIST

FILING DEADLINE:

Deadline is the First Friday of Each Month, Before 4:00pm.

Fees may be paid by check or card. We do not accept American Express or cash.

The filing fee is based upon the number of properties, the acreage of each property, and the requested zoning district.

REQUIRED ITEMS FOR A FUTURE LAND USE AMENDMENT:

	vsions made to the applications after the submittal deadline and prior to the Planning Commission and Board of Commissioners Public Hearings may be stinued to the following month's hearing.
V	Pre-Application Conference: Date attended and with which staff member
/	Completed Application: Provide one PDF copy to planning@rockdalecountyga.gov and one hard copy of the entire submittal packet.
/	Letter of Intent: In your own words, type the reason you believe the future land use map of the subject property should be amended.
✓	Proof of Ownership: Deed recorded with Rockdale County Clerk of Courts. A copy of the deed of the property or properties may be obtained at the Rockdale County Courthouse in the Real Estate Records Room on the 1st floor.
	Plat: Plat recorded with Rockdale County Clerk of Courts or referenced by the Deed, if not recorded. A copy of the existing survey plat of the property or properties may be obtained at the Rockdale County Courthouse in the Real Estate Records Room on the 1st floor. However, one complete boundary survey is required for projects with more than one property.
	OR
V	Survey: Survey should be signed and sealed by an architect, engineer, landscape architect or land surveyor.
/	Legal Description of the Property: This written description, found on the property deed, containing the metes & bounds of the property or properties However, the legal description must be provided in Word with this application.

A written description of the details of the proposed use and development details;

Site Plan: Drawn to scale, showing all existing property improvements, and all proposed improvements.

- · A vicinity map showing the use and zoning of all surrounding properties;
- Proposed setbacks and transitional buffers;
- · Proposed open or recreational spaces, if any;
- · Proposed lot sizes, buildings, fences and walls, dumpsters, and other improvements;
- Proposed stormwater management facilities, subject to the approval of the Rockdale County Stormwater Department;
- Proposed location and capacities of public and private utilities, subject to the approval of the Rockdale County Environmental Health Department or Rockdale County Water Resources;

The Conceptual Plan may include any additional graphics which will explain the features of the development, but shall include the following:

- · Lakes, streams, floodplains, wetlands, and associated buffers;
- · Proposed public improvements including sidewalks, street trees, and right-of-way dedications;
- Existing and proposed easements;
- Impact on school enrollment and transportation facilities;
- Impact on existing water, sewer, and stormwater facilities;
- Any additional information as may be requested by the Department.

Applications that do not provide documentation or required materials will be noted as incomplete and may result in delays in Staff's review of the application. The Planning Commission and Board of Commissioners reserve the right to require additional information if they believe that the submission of such information is necessary to understand the nature of the intended activity.

JUSTIFICATION OF THE REQUEST

In your own words, type the reason you believe the future land use of the subject property should be amended. Please address the following:

 The intent of the proposed amendment and the intended timing and phasing of development. State the reasons why you believe the current future land use of the subject site is incorrect and why approval of a different classification is appropriate.

The proposed amendment intends to change the future land use of the Subject Property from WP to MDR to match properties to the south. There will not be phases to the development and construction can start as early as the end of 2026 assuming all applications are approved. The future land use designation on the property is split with most of it being WP and some of it being MDR. It is the Applicant's contention that either is acceptable, but properties to the south have MDR. So, MDR is appropriate for the area.

The impact of the proposed amendment on the capacities of public facilities including, but not limited to, transportation facilities, sewage facilities, water supply, parks, drainage, schools, solid waste, and emergency medical facilities.

The proposed amendment will have an insignificant impact on transportation facilities, sewage facilities, water supply, parks, drainage, schools, solid waste and emergency medical facilities.

3. The impact of the proposed amendment on the natural environment, especially existing trees, water bodies, and water quality.

The proposed amendment will have an insignificant impact on the natural environment.

4. The contribution of the proposed amendment to an orderly and logical development pattern.

The proposed amendment will contribute to an orderly and logical development pattern by continuing the trend of residential development in the area while also providing future residents access to the nearby parks.

REVIEW STANDARDS

Additionally, provide justification for each of the following review standards (UDO Sec. 238-4(g)(2)). The Department, the Planning Commission, and the Board of Commissioners will use these standards to evaluate the request:

Whether a proposed amendment would result in a future land use classification that is more consistent with the text and policies of the comprehensive plan than the current classification of the property on the future land use map.

	See Attached
2.	Whether the proposed amendment would result in a land use that is more compatible with the current and future land use of adjacent and nearby properties.
3.	Whether the proposed amendment would result in more efficient use of publicly financed community facilities and infrastructure.
4.	The extent to which the proposed amendment would increase adverse impacts on the natural environment; especially water quality, green space preservation and air quality.
5.	Whether the proposed amendment would reduce dependence on the automobile.
6.	The extent to which the proposed amendment would increase adverse impacts on historic or cultural resources.
7.	If an amendment would affect only a single parcel, whether it should be made part of an area-wide review of future land use that includes review of future land use for the subject parcel and other surrounding property.
8.	The degree to which the proposed amendment would have adverse impacts on land in adjacent municipalities and local governments.
9.	Whether the proposed amendment would result in any negative impacts on the public water supply and wastewater collection and treatment systems or would conflict with adopted long-term water and sewer plans.

AGENT/ATTORNEY AUTHORIZATION STATEMENT

To be completed by the Agent or Attorney of the subject property or properties as it appears on the Rockdale County tax records if they wish to have an agent represent them in all matters related to this application. Husband and wife or other individuals shall each sign individually. Make copies if needed.

I. <u>LETTER OF INTENT</u>

Agnes Slack LLLP of Georgia (the "Applicant") is seeking to develop on +/- 94.311 acres of land being Tax Parcel No. 0860010008 having frontage on 2245 White Road (the "Subject Property") with single-family detached homes and townhomes. The Applicant is seeking a future land use amendment from WP to MDR and a rezoning from WP/AR to MUR of the Subject Property to allow for 173 single-family detached homes and townhomes.

This document serves as a statement of intent, analysis of the criteria under the Rockdale County Zoning Ordinance and contains notice of constitutional allegations as a reservation of the Applicant's rights.

II. ROCKDALE COUNTY FUTURE LAND USE AMENDMENT AND REZONING CRITERIA

 Whether a proposed amendment would result in a future land use classification that is more consistent with the text and policies of the comprehensive plan than the current classification of the property on the future land use map;

The future land use amendment would result in a future land use classification that is consistent with the text and policies of the comprehensive plan.

 Whether the proposed amendment would result in a land use that is more compatible with the current and future land use of adjacent and nearby properties;

The proposed amendment would result in a land use that is more compatible with the current and future land use of adjacent and nearby properties.

 Whether the proposed amendment would result in more efficient use of publicly financed community facilities and infrastructure;

The proposed amendment would result in more efficient use of publicly financed community facilities and infrastructure.

4. The extent to which the proposed amendment would increase adverse impacts on the natural environment; especially water quality, green space preservation and air quality;

The proposed amendment would not increase adverse impacts on the natural environment.

5. Whether the proposed amendment would reduce dependence on the automobile;

Whether the proposed amendment would not reduce dependence on the automobile.

6. The extent to which the proposed amendment would increase adverse impacts on historic or cultural resources;

The proposed amendment would not increase adverse impacts on historic or cultural resources.

7. If an amendment would affect only a single parcel, whether it should be made part of an area-wide review of future land use that includes review of future land use for the subject parcel and other surrounding property;

The amendment should not be made part of an area-wide review of future land use.

8. The degree to which the proposed amendment would have adverse impacts on land in adjacent municipalities and local governments;

The proposed amendment would not have adverse impacts on land in adjacent municipalities and local governments.

 Whether the proposal amendment would result in any negative impacts on the public water supply and wastewater collection and treatment systems or would conflict with adopted long-term water and sewer plan.

The proposed amendment would not result in any negative impacts on the public water supply and wastewater collection and treatment systems nor would it conflict with adopted long-term water and sewer plans.

III. ROCKDALE COUNTY REZONING CRITERIA

10. Whether a proposed rezoning will permit a use that is suitable, in view of the use and development of adjacent and nearby property;

The proposed rezoning will permit a use that is suitable in view of the use and development of adjacent and nearby property. Nearby properties are developed with residential uses. This rezoning will further that pattern.

11. Whether the property to be affected by a proposed rezoning has a reasonable economic use as currently zoned;

The property to be affected by the proposed rezoning does not have a reasonable economic use as currently zoned.

12. The impact of the proposed amendment on the natural environment, especially existing trees, water bodies and water quality;

The proposed amendment will not impact the natural environment. A great majority of the Subject Property will be set aside for conservation.

13. Whether the proposed rezoning will result in a use that will or could cause an excessive or burdensome use of existing streets, transportation facilities, utilities or schools;

The proposed rezoning will not result in a use that will or could cause an excessive or burdensome use of existing streets, transportation facilities, utilities, or schools.

14. Whether the proposed rezoning is in conformity with the policy and intent of the comprehensive plan;

This rezoning accompanies a future land use amendment. Granting both the future land use amendment and rezoning will result in a rezoning that is in conformity with the policy and intent of the comprehensive plan.

15. Whether there are other existing or changing conditions affecting the use and development of the property that give supporting grounds for either approval or disapproval of the proposed rezoning;

The Applicant is not aware of existing or changing conditions affecting the use and development of the property that give supporting grounds for either approval or disapproval of the proposed rezoning.

16. Whether, and the extent to which, the proposed amendment would result in significant adverse impacts on the natural environment;

The rezoning would not result in significant adverse impacts on the natural environment.

17. The feasibility of serving the property with public wastewater treatment service and the impacts of such on the wastewater system; and, if an alternative wastewater treatment method is proposed, whether such wastewater treatment method is authorized in Rockdale County and will have a detrimental impact on the environment.

It is feasible to serve the Subject Property with public wastewater treatment service. The impacts of serving the Subject Property with wastewater treatment services is not significant.

IV. CONCLUSION

For the foregoing reasons, the Applicant hereby requests that the application for a future land use amendment and rezoning to allow for 173 single-family detached homes and townhomes be approved. The Applicant welcomes any questions and feedback from the planning staff.

V. NOTICE OF CONSTITUTIONAL ALLEGATIONS AND PRESERVATION OF CONSTITUTIONAL RIGHTS

The portions of the Rockdale County Zoning Ordinance, facially and as applied to the Subject Property, which restrict or classify or may restrict or classify the Subject Property so as to prohibit its development as proposed by the Applicant are or would be unconstitutional in that they would destroy the Applicant's property rights without first paying fair, adequate and just compensation for such rights, in violation of the Fifth Amendment and Fourteenth Amendment of the Constitution of the United States and Article I, Section I, Paragraph I of the Constitution of the State of Georgia of 1983, Article I, Section III, Paragraph I of the Constitution of the State of Georgia of 1983, and would be in violation of the Commerce Clause, Article I, Section 8, Clause 3 of the Constitution of the United States.

The application of the Rockdale County Zoning Ordinance to the Subject Property which restricts its use to any classification other than that proposed by the Applicant is unconstitutional, illegal, null and void, constituting a taking of Applicant's Property in violation of the Just Compensation Clause of the Fifth Amendment to the Constitution of the United States, Article I, Section I, Paragraph I, and Article I, Section III, Paragraph I of the Constitution of the State of Georgia of 1983, and the Equal Protection and Due Process Clauses of the Fourteenth Amendment to the Constitution of the United States denying the Applicant an economically viable use of its land while not substantially advancing legitimate state interests.

A denial of this Application would constitute an arbitrary irrational abuse of discretion and unreasonable use of the zoning power because they bear no substantial relationship to the public health, safety, morality or general welfare of the public and substantially harm the Applicant in violation of the due process and equal protection rights guaranteed by the Fifth Amendment and Fourteenth Amendment of the Constitution of the United States, and Article I, Section I, Paragraph I and Article I, Section III, Paragraph 1 of the Constitution of the State of Georgia.

A refusal by the Rockdale County Board of Commissioners to amend the land use and/or rezone the Subject Property to the classification as requested by the Applicant would be unconstitutional and discriminate in an arbitrary, capricious and unreasonable manner between the Applicant and owners of similarly situated property in violation of Article I, Section I, Paragraph II of the Constitution of the State of Georgia of 1983 and the Equal Protection Clause of the Fourteenth Amendment to the Constitution of the United States. Any Future Land Use Amendment and Rezoning of the Property subject to conditions which are different from the conditions requested by the Applicant, to the extent such different conditions would have the effect of further restricting Applicant's utilization of the property, would also constitute an arbitrary, capricious and

discriminatory act in zoning the Subject Property to an unconstitutional classification and would likewise violate each of the provisions of the State and Federal Constitutions set forth hereinabove.

A refusal to allow the land use amendment and/or Future Land Use Amendment and Rezoning in questions would be unjustified from a fact-based standpoint and instead would result only from constituent opposition, which would be an unlawful delegation of authority in violation of Article IX, Section II, Paragraph IV of the Georgia Constitution.

A refusal to allow the land use amendment and/or Future Land Use Amendment and Rezoning in question would be invalid inasmuch as it would be denied pursuant to an ordinance which is not in compliance with the Zoning Procedures Law, O.C.G.A Section 36-66/1 et seq., due to the manner in which the Ordinance as a whole and its map(s) have been adopted.

The existing land use designation and/or zoning classification on the Subject Property is unconstitutional as it applies to the Subject Property. This notice is being given to comply with the provisions of O.C.G.A. Section 36-11-1 to afford the County an opportunity to revise the Property to a constitutional classification. If action is not taken by the County to rectify this unconstitutional land use designation and/or zoning classification within a reasonable time, the Applicant is hereby placing the County on notice that it may elect to file a claim in the Superior Court of Rockdale County demanding just and adequate compensation under Georgia law for the taking of the Subject Property, diminution of value of the Subject Property, attorney's fees and other damages arising out of the unlawful deprivation of the Applicant's property rights.

PLANNING COMMISSION & BOARD OF COMMISSIONERS ROCKDALE COUNTY PLANNING STAFF REPORT

Case Number: REZ2024-19

Address: 3031 NE Highway 138

Tax Parcel: 0870010001

Site Area: 230.35 acres of a 353.04-acre property

Current Zoning: A-R (Agricultural-Residential)

Existing Conditions: Woods and Pastures

Request: To rezone 230.35 acres of a 353.04-acre property from A-R (Agricultural-Residential)

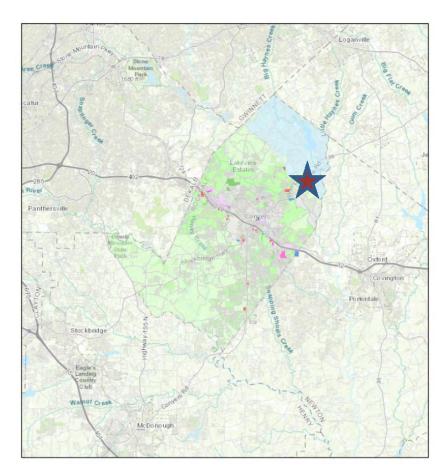

to MRU (Mixed Residential Uses) for a 347-unit, mixed-residential development.

Applicant: Andrew C Shipp, Sr. for Grove Park Farm, LLC/Allied Capital, LLC

Owner: Grove Park Farm, LLC and Allied Capital, LLC

Staff Recommendation: Denial

PC Hearing Date: October 10, 2024 BOC Hearing Date: October 24, 2024

Zoning History

The subject property is zoned A-R (Agricultural-Residential). No prior zoning changes are on record for this property.

Existing Site Conditions

The subject site is a 353.04-acre property located at 3031 NE Highway 138 (parcel 0870010001). The applicant's request for a rezoning applies to 230.35 acres of the property. The site is undeveloped and characterized by woods and pastures. The subject property has road frontage along Highway 138 NE; a sidewalk is not present along the frontage. Streams, riverine wetlands, freshwater ponds, and floodplains are present on the property, according to the Rockdale County Stormwater Map.

Surrounding Use and Zoning

The subject site is surrounded by residential properties. The following is a summary of surrounding uses and zoning:

Adjacent Zoning and Current Land Use

Project Summary

The applicant is requesting a rezoning for 230.35 acres of a 353.04-acre parcel. The project includes:

- The two-phase development of a residential community with 347 total units, including:
 - o Phase 1
 - 163 single-family residences
 - 76 townhomes
 - o Phase 2
 - 108 single-family residences
 - 35 townhomes
- Proposed density of 1.51 units per acre; code allows for up to 8 units per acre.
- Proposed 92 acres of permanent green space, creating a buffer of almost 500 feet adjacent to neighboring properties.
- Proposed amenities include two fishing ponds and walking paths.

INTERNAL AND EXTERNAL AGENCY REVIEW

The applicant must meet all other UDO requirements related to infrastructure improvements. Internal and External agency comments are attached and provided below.

Fire

FIRE HYDRANTS SHALL BE SPACED A MAXIMUM 500 FEET APART FOR NON-SPRINKLED STRUCTURES; MAXIMUM OF 600 FT APART FOR SPRINKLED STRUCTURES.

Rockdale Board of Education

School:	Current Enrollment	Projected Enrollment	Current Capacity
RCHS	1374	1435	1500
CMS	929	952	1242
HTE	508	511	760

The lack of data on predicted per unit average student occupancy prohibits predicting the school's full occupancy dateline upon build out of this project.

Note that this month's projects include multiple requests for the Hightower Trail ES, Conyers MS, and Rockdale County HS school zones. There is no comprehensive report providing potential student enrollment impacts on these three schools.

RCPS first steps to address impactful student enrollment numbers is to add mobile units to the site campus affected or consider larger class sizes. Second step, rezoning.

Transportation Department

Coordinate with GDOT on Hwy 138 deceleration lane.

Provide plans with lots numbered and road names (names can be temporary).

All new developments require a traffic study, traffic calming, and streetlights.

Deceleration lane on Gleaton Road should be 75' travel lane and 50' taper.

Stormwater Department

Based on the submitted rezoning documents, there are existing State waters, Wetlands, and Rockdale County Future flood plain requirements that must be adhered to by Federal, State and County ordinances.

Tree protection must be adhered to as it relates to the Stormwater Management Department for Land Disturbance Permitting.

ARTICLE IV – STREAM BUFFER PROTECTION Sec. 310 – 103 Land development stream buffer requirements.

- (a) All land development activity, including subdivisions of land and platting activities governed by chapter 302 of the UDO, shall meet the following buffer and setback requirements unless otherwise exempted in this article:
- (1) An undisturbed natural vegetative buffer shall be maintained for 50 feet, measured horizontally, on both banks (as applicable) of the stream as measured from the top of the stream bank.
- (2) An additional setback shall be maintained for 25 feet, measured horizontally, beyond the undisturbed natural vegetative buffer, in which all impervious cover shall be prohibited. Grading, filling and earthmoving shall be minimized within the setback.
- (3) No septic tanks or septic tank drain fields shall be permitted within the buffer or the setback.

(b) Any land development activity within a buffer established hereunder or any impervious cover within a setback established hereunder is prohibited unless a variance is granted pursuant to section 310-105.

CHAPTER 324 – ENVIRONMENTAL PLANNING CRITERIA

Sec. 324-2. - Protection of wetlands.

- (a) *Purpose and intent*. Pursuant to O.C.G.A. <u>12-2-8</u> and the DNR, environmental protection division's Rules for Environmental Planning Criteria chapter 391-3-16, this section establishes regulations to promote the wise use of wetlands and protect them from alterations that will significantly affect or reduce their primary functions for water quality, floodplain and erosion control, groundwater recharge, aesthetic natural areas and wildlife habitat areas.
- (b) Wetlands development permit requirements. No activity or use, except those identified in subsection (c), shall be allowed in the wetlands without issuance of a local development permit. Local permits will be issued only if the proposed use is in compliance with the requirements of the underlying zoning district and this section. Furthermore, if the area of proposed development is located within 100 feet of the wetlands boundaries, as established by Figure IV-2 of the Rockdale County Comprehensive Land Use Plan, a U.S. Army Corps of Engineers delineation is required under Section 404 of the Clean Water Act. If wetlands are altered or degraded, mitigation to offset losses may be required as a condition of a Section 404 permit. Local development permits will not be issued until after any necessary Section 404 permits have been secured.

CHAPTER 328 – Buffers, landscaping, and Tree Protection

Sec. 328-15. - Authority, findings, purpose and intent.

- (a) *Authority*. This article is enacted pursuant to the county's exclusive planning authority granted by the Constitution of the State of Georgia, including but not limited to Ga. Const. art. IX, § II, para. IV, and Ga. Const. art. IX, § II, para. III, as well as authority granted by the General Assembly of the State of Georgia, including by not limited to O.C.G.A. § 36-70-3, as well as 1977 Ga. Laws, page 2817, as amended, and 1969 Ga. Laws, page 3639, as amended, and the general police powers of the county and other authority provided by federal, state and local laws applicable to this article.
- (b) Findings, purpose, and intent. It is the intent of this article to provide standards for landscaping and for the preservation and replacement of trees as part of the land development and building construction process in unincorporated areas of the county. The county finds that the existence of adequate tree cover and landscaping in the county directly affects the public health, safety and welfare to comprehensively address these concerns through the adoption of the regulations in this article. The purpose and intent of the board of commissioners in enacting this article are as follows:
- (1) To protect the health, safety and general welfare of the citizens of the county, and to implement the policies and objectives of the comprehensive plan through the enactment of a comprehensive ordinance governing tree preservation and replacement in the county.
- (2) To require landscaping and the preservation and replacement of trees in certain areas within the county in order to ensure the continued health of its citizens through improved air and water quality.
- (3) To provide developers and others active in the county with the appropriate guidance to better ensure proper tree preservation and replacement in the course of the land development process in the county.
- (4) To preserve property values in the county by maintaining a safe, aesthetically pleasing environment.
- (5) To reduce flooding of county rivers and streams by planting trees and other vegetation so as to aid in slowing the rate of stormwater runoff.
- (6) To reduce soil erosion in the county by planting trees and other vegetation so as to aid in prevention of soil loss through stormwater runoff and flooding and to promote stormwater infiltration.
- (7) To reduce noise and glare on adjacent properties from properties that has been extensively developed.
- (8) To conserve energy by cooling surrounding air temperatures through the existence of adequate shade trees.

- (9) To provide improved atmospheric quality by reducing airborne particulates and carbon monoxide and by increasing oxygen through adequate tree cover.
- (10) To promote the saving of trees in nodes throughout a development, rather than as individual trees scattered over a development or around the periphery of a development.
- (11) To prevent clear-cutting and mass grading of land that results in the loss of mature trees, and to ensure appropriate replanting when tree loss does occur.

CHAPTER 320 – FLOOD DAMAGE PREVENTION

Sec. 320-1. - Introduction.

- (a) It is hereby determined that:
- (1) The flood hazard areas of Rockdale County, GA are subject to periodic inundation which may result in loss of life and property, health and safety hazards, disruption of commerce and governmental services, extraordinary public expenditures for flood relief and protection, and impairment of the tax base, all of which adversely affect the public health, safety and general welfare.
- (2) Flood hazard areas can serve important stormwater management, water quality, streambank protection, stream corridor protection, wetland preservation and ecological purposes when permanently protected as undisturbed or minimally disturbed areas.
- (3) Effective floodplain management and flood hazard protection activities can:
- a. Protect human life and health,
- b. Minimize damage to private property,
- c. Minimize damage to public facilities and infrastructure such as water and gas mains, electric, telephone and sewer lines, streets and bridges located in floodplains, and
- d. Minimize expenditure of public money for costly flood control projects associated with flooding and generally undertaken at the expense of the general public.
- (b) Article IX, Section II of the Constitution of the State of Georgia and Section 36-1-20(a) of the Official Code of Georgia Annotated have delegated the responsibility to local governmental units to adopt regulations designed to promote the public health, safety, and general welfare of its citizenry. Therefore, Rockdale County, GA, does ordain this chapter and establishes this set of floodplain management and flood hazard reduction provisions for the purpose of regulating the use of flood hazard areas. It is determined that the regulation of flood hazard areas and the prevention of flood damage are in the public interest and will minimize threats to public health and safety, as well as to private and public property.

Water/Sewer

Existing 12" DIP Water main along GA Hwy 138 NE. Public Wastewater is currently been constructed along Hwy 138 to White Rd . See Map Attached

EVALUATION OF THE REZONING REQUEST

O.C.G.A. Chapter 36-66: Zoning Procedure Act

When considering an application to amend the current zoning designation of a property, the Board of Commissioners, the Planning Commission, and the Planning & Development Department shall consider the following:

A. Is the zoning proposal permitted as a use that is suitable in view of the use and development of adjacent and nearby property?

The applicant's request for rezoning from A-R (Agricultural-Residential) to MRU (Mixed Residential Uses) for a mixed-residential development is proposed on an undeveloped area of 230.35 acres.

The residential properties adjacent to the site are zoned WP (Watershed Protection), A-R (Agricultural-Residential), and R-1 (Single-Family Residential). The lots to the west of the subject site are in the Gleaton Manor Subdivision and are approximately an acre in size. The lots to the south are in the Fern Creek Subdivision and are larger and range from 3 to 15 acres in size.

The proposed mixed-residential development features both townhomes and single-family residences. Due to the proposed 92 acres of permanent green space that surround the development, the proposal will be suitable in view of adjacent properties.

B. Will the zoning proposal adversely affect the existing use or usability of adjacent or nearby property?

The proposed residential development will likely have some impact on the surrounding properties with the addition of 347 new residences that will utilize Highway 138 NE, a widely used route. Staff require a Traffic Impact Study be submitted to further evaluate the impacts to transportation infrastructure.

C. Will the property to be affected by the zoning proposal have a reasonable economic use as currently zoned?

The property has reasonable economic use as currently zoned. Staff believe that MRU (Mixed Residential Uses) with townhomes is not an appropriate zoning category directly adjacent to the Watershed Protection District, which is intended for low density, large lot development.

D. Will the zoning proposal result in a use that will or could cause excessive or burdensome use of existing streets, transportation, facilities, utilities, or schools?

The project will likely have an impact on transportation infrastructure. Staff require a traffic study be submitted. Rockdale Water Resources (RWR) has indicated that public water is available at the site location, and public wastewater is currently under construction. Schools in the area would likely be impacted by the addition of 347 new homes.

E. Is the zoning proposal in conformity with the Future Land Use Map and the policy intent of the Comprehensive Land Use Plan?

The request to rezone the property to MRU (Mixed Residential Uses) is in conformity with the Future Land Use Category of Medium Density Residential. However, the Comprehensive Plan designates Medium Density Residential for single-family detached residential dwellings. Townhomes are not listed as an intended use for Medium Density Residential.

F. Are other existing or changing conditions affecting the use and development of the property, which give supporting grounds for either approval, or disapproval of the zoning proposal?

Staff believe that the project's proposal to preserve 92 acres of green space is in conformance with the goal of the MRU district, which is intended to encourage "innovative development projects that set high standards...for greenspace." However, staff do not believe that MRU (Mixed Residential Uses) is appropriate on the requested parcel as it is surrounded by large lots and adjacent to the Watershed Protection District.

PLANNING & DEVELOPMENT STAFF RECOMMENDATIONS

Staff recommends <u>Denial</u> of the request to rezone 230.35 acres of a 353.04-acre property from A-R (Agricultural-Residential) to MRU (Mixed Residential Uses) for single-family residences and townhomes. Should the application be approved, staff recommend the following conditions:

- 1. The site shall be developed in compliance with the Mixed Residential Uses (MRU) Zoning District if adopted.
- 2. The applicant shall provide the Traffic Impact Study with the Preliminary Plat. Any recommendations for improvements shall be required to be shown on the Land Disturbance Permit (LDP). Additionally, as determined by the Rockdale County Department of Transportation, a new study may be required for the development. Any recommendations for improvements from any new studies shall be required to be shown on the LDP.
- 3. The site shall be restricted not to exceed 347 residential units.
- 4. A mandatory Homeowners' Association shall be established and shall be responsible for the maintenance of all the greenspace and common areas.
- 5. The Homeowners' Association covenants shall include a rental restriction of five percent (5%) of all single-family residential dwelling units.
- 6. All single-family detached units and townhome units shall have a two-car garage.
- 7. Provide a five-foot-wide concrete sidewalk along both sides of the proposed internal streets. Provide a two-foot-wide grass strip on all internal public roads between the back of the curb and the sidewalk. Provide a five-foot-wide landscape strip. All trees planted in this landscape strip shall be counted towards any Rockdale County required tree recompense credits or tree density units as mandated by the required development permit.
- 8. Provide a five-foot-wide concrete sidewalk along the Highway 138 NE right-of-way. A ten-foot-wide landscape strip shall be provided within the existing right-of-way between the roadway and the sidewalk.
- 9. All grassed areas shall be sodded.
- 10. All utilities shall be placed underground.
- 11. Natural vegetation shall remain on the property until the issuance of a development permit.
- 12. All front building elevations shall be constructed with at least fifty (50) percent of the following building materials: Brick, Indigenous Rock, Natural Stone, and Synthetic Stone, or a combination of Brick, Indigenous Rock, Natural Stone, and Synthetic Stone, with accent building materials that may include but not be limited to Stucco, EIFS, Metal, Painted Cement Siding, and Wood where masonry products are not provided.
- 13. Streetlights shall be provided throughout the residential development along the internal streets where residential units directly abut. When internal to the block, all streetlights shall be residential in character and meet the minimum lighting standards of Rockdale County, GA as defined in the current edition of the development regulations at the time of development permitting.
- 14. Stormwater detention ponds shall be screened from view from adjoining residential properties. Screening plans shall be subject to review and approval of the Director of Planning and Development.
- 15. Any structures in the amenity areas shall be constructed using exterior building materials that complement the adjacent residential structures. The amenity areas may be in a single area or in multiple areas.

ROCKDALE COUNTY REZONING APPLICATION CHECKLIST

FILING DEADLINE:

Deadline is the First Friday of Each Month, Before 4:00pm.

Fees may be paid by check or card. We do not accept American Express or cash.

The filing fee is based upon the number of properties, the acreage of each property, and the requested zoning district.

REQUIRED ITEMS FOR REZONING:

Revsions made to the applications after the submittal deadline and prior to the Planning Commission and Board of Commissioners Public Hearings may be continued to the following month's hearing.

Pre-Application Conference: Date attended and with which staff member
July 11, 2024 with Ms. Tracie Roberts and Ms. Carolina Angulo

Completed Applicaton: Provide one PDF copy to planning@rockdalecountyga.gov and one hard copy of the entire submittal packet.

Letter of Intent: In your own words, type the reason you believe the zoning of the subject property should be amended.

Proof of Ownership: Deed recorded with Rockdale County Clerk of Courts. A copy of the deed of the property or properties may be obtained at the Rockdale County Courthouse in the Real Estate Records Room on the 1st floor.

Plat: Plat recorded with Rockdale County Clerk of Courts or referenced by the Deed, if not recorded. A copy of the existing survey plat of the property or properties may be obtained at the Rockdale County Courthouse in the Real Estate Records Room on the 1st floor. However, one complete boundary survey is required for projects with more than one property.

OR

X Survey: Survey should be signed and sealed by an architect, engineer, landscape architect or land surveyor.

Legal Description of the Property: This written description, found on the property deed, containing the metes & bounds of the property or properties.

However, the legal description must be provided in Word with this application.

X Site Plan: Drawn to scale, showing all existing property improvements, and all proposed improvements.

The Conceptual Plan may include any additional graphics which will explain the features of the development, but shall include the following:

- · A written description of the details of the proposed use and development details;
- · A vicinity map showing the use and zoning of all surrounding properties;
- · Proposed setbacks and transitional buffers;
- · Proposed open or recreational spaces, if any;
- · Proposed lot sizes, buildings, fences and walls, dumpsters, and other improvements;
- Proposed stormwater management facilities, subject to the approval of the Rockdale County Stormwater Department;
- Proposed location and capacities of public and private utilities, subject to the approval of the Rockdale County Environmental Health Department or Rockdale County Water Resources;
- · Lakes, streams, floodplains, wetlands, and associated buffers;
- · Proposed public improvements including sidewalks, street trees, and right-of-way dedications;
- · Existing and proposed easements;
- · Impact on school enrollment and transportation facilities;
- · Impact on existing water, sewer, and stormwater facilities;
- Any additional information as may be requested by the Department.
- · Traffic Study (if required)
- Development of Regional Impact Review Form (DRI) per UDO Sec. 238-5 (if required)

Applications that do not provide documentation or required materials will be noted as incomplete and may result in delays in Staff's review of the application. The Planning Commission and Board of Commissioners reserve the right to require additional information if they believe that the submission of such information is necessary to understand the nature of the intended activity.

JUSTIFICATION OF THE REZONING REQUEST

In your own words, type the reason you believe the zoning of the subject property should be amended. Please address the following:

 The intent of the proposed amendment and the intended timing and phasing of development. State the reasons why you believe the current zoning district classification for the subject rezoning site is incorrect and why approval of a different zoning district classification is appropriate.

The subject property has very unique physical and geological characteristics. Situated on a ridge line at one of the highest elevations in the County, the tract is located just south of Costley Mill Park and just north of the Georgia International Horse Park. Granite outcroppings similar to those of Stone Mountain Park and Arabia Mountain provide natural beauty. As the granite monolith dives below the surface, the property has areas of very deep soil. Two ponds frame the deepest soil before the granite re-emerges along the southern property line. These physical features and a location between two first-class outdoor recreation facilities provide an opportunity rarely available. The Mixed Residential Uses District (MRU) zoning district was designed for situations like this - "encouraging innovative development projects". Working with the unique geological features, the creative design will benefit all stakeholders. Developed in two phases: phase one homeowners will enjoy an unheard of 92 acres of usable permanent green space with two fishing ponds and walking paths. The community will protect environmental sensitive natural resources as we group homes on less environmentally sensitive areas. Together, we will create a sense of place which promotes a healthy walkable lifestyle and an appreciation of natural beauty unique to our area.

Reference is made to the Addendum which is attached to this form and included by reference.

The impact of the proposed amendment on the capacities of public facilities including, but not limited to, transportation facilities, sewage facilities, water supply, parks, drainage, schools, solid waste, and emergency medical facilities.

The proposed subject development, Grove Park, is located along Highway 138 NE. This GDOT controlled roadway is a paved two lane road with center median turn lane. The attached availability letter shows that water supply and sewage capacity are sufficient to support the development. The school system has capacity to support the development. A new Fire Station is just across the Highway 138 from the development. Final, the MRU zoning district will allow creation of new common area green space which will protect drainage areas.

3. The impact of the proposed amendment on the natural environment, especially existing trees, water bodies, and water quality.

Grove Park will have a large 92-acre green space in phase one, with its two serene ponds, serves as a crucial ecological and recreational bridge between Costley Mill Park to the north and the Georgia International Horse Park to the south. This green expanse preserves sensitive natural resources and offers an invaluable opportunity for connectivity and continuity of natural habitats. The ponds enhance the ecological value by providing habitats for aquatic species and serving as a water source for terrestrial wildlife.

From a land use perspective, the green space promotes wildlife movement and supports biodiversity, while offering recreational opportunities for residents and visitors. Trails and pathways could link Costley Mill Park with the Georgia International Horse Park, encouraging hiking, biking, and equestrian activities. This connectivity will create a cohesive network of outdoor recreational spaces, fostering a greater sense of community and promoting healthy lifestyles.

4. The contribution of the proposed amendment to an orderly and logical development pattern.

Grove Park exemplifies an orderly and logical development pattern by establishing a significant green space which protects sensitive natural resources and maintains the continuity of natural habitats, facilitating wildlife movement and bolstering biodiversity, in line with sustainable development principles. This development is uniquely suited to the MRU zoning district, which fosters the design flexibility necessary for such innovative projects. Furthermore, it aligns with the zoning intent, presenting a logical application within the medium-density zoning specified in the future land use map. The seamless integration of ecological preservation with recreational amenities, coupled with a strategic zoning transition, underscores a balanced and structured approach to land use, contributing to a coherent and advantageous development pattern.

REZONING REVIEW STANDARDS

Additionally, provide justification for each of the following review standards (UDO Sec. 238-4(g)(1)). The Department, the Planning Commission, and the Board of Commissioners will use these standards to evaluate the request:

1. Whether a proposed rezoning will permit a use that is suitable, in view of the use and development of adjacent and nearby property.

Given the unique geological and physical characteristics of the site, the property is well suited to the purposes of the mixed residential uses (MRU) zoning district. The owner's are conditioning the zoning density to a blended maximum of 1.51 units per acre, only slightly higher than the currently allowed 1.00 unit per acre. Most importantly, the phase one site plan will provide a massive 92-acres of permanent green space. For most of the neighboring properties, this means a buffer increase of near 10 times current requirements to nearly 500 feet!

2. Whether the property to be affected by a proposed rezoning has a reasonable economic use as currently zoned.

The property has very unique geological and physical features that negatively impact the site's economic utility and marketability as zoned. The MRU zoning district will allow the property to be developed using the sites deepest soils in an manner which will preserve huge expanses of green space, valuable view sheds and sensitive natural resources, promoting the healthy and welfare of all stakeholders in the community.

The impact of the proposed amendment on the natural environment, especially existing trees, water bodies and water quality.

The proposed development will preserve the natural environment by creating a large green space around a developed core. This expansive area will protect sensitive natural resources including two ponds.

Whether the proposed rezoning will result in a use that will or could cause an excessive or burdensome use of existing streets, transportation facilities, utilities or schools.

The proposed development fronts a major multi-lane highway offering easy access both north and south. Based on the Availability Letters attached, utilities and schools have the capacity to handle the project.

5. Whether the proposed rezoning is in conformity with the policy and intent of the comprehensive plan.

Mixed Residential Uses (MRU) zoning is in conformity with the comprehensive plan in the Medium Density Residential areas.

Whether there are other existing or changing conditions affecting the use and development of the property that give supporting grounds for either
approval or disapproval of the proposed rezoning.

There is a pressing demand for residential properties that incorporate expansive community green spaces. The MRU zoning district is specifically designed to accommodate properties with unique geological and physical characteristics, fostering innovative and sustainable development - the subject property exemplifies these core objectives. Spanning 92 acres of green space and featuring two picturesque ponds, its design not only aligns perfectly with the district's Intent and Purposes but also addresses the critical need for quality housing and communal spaces.

7. Whether, and the extent to which, the proposed amendment would result in significant adverse impacts on the natural environment.

It is our firmly held view that the zoning change offers a unique benefit to all stakeholders by preserving the natural environment and placing sensitive natural resources into permanent green spaces.

8. The feasibility of serving the property with public wastewater treatment service and the impacts of such on the wastewater system; and, if an alternative wastewater treatment method is authorized in Rockdale County and will have a detrimental impact on the environment.

Rockdale Water Resources has the sewer capacity necessary to serve the development.

OWNER'S CAMPAIGN DISCLOSURE STATEMENT

To be completed by each owner of the subject property or properties as it appears on the Rockdale County tax records. Husband and wife or other individuals shall each sign individually. Make copies if needed.

Grove Park Farm, LLC Allied Capital, LLC PO Box 1375 Conyers, GA 30012

July 30, 2024

Rockdale County Planning and Development Department 1117 West Avenue, NW Conyers, GA 30012

Dear Members of the Rockdale County Planning and Development Department, Planning Commission and Board of Commissioners,

I am writing to express our intent and outline the reasons for proposing the rezoning of Grove Park to Mixed Residential Uses (MRU). The subject property, with its unique physical and geological characteristics, presents a compelling case for this rezoning.

Situated on a ridge line at one of the highest elevations in Rockdale County, the property is located just south of Costley Mill Park and north of the Georgia International Horse Park. These prime locations provide easy access to first-class outdoor recreational facilities, enhancing the appeal of the property. The land features granite outcroppings reminiscent of Stone Mountain Park and Arabia Mountain, adding natural beauty and making it a significant geological site.

As the granite monolith dives below the surface, areas of very deep soil are revealed, framed by two ponds that highlight the deepest soils before the granite re-emerges along the southern property line. These diverse physical features present a rare opportunity for innovative and environmentally conscious development, aligning perfectly with the intent of the MRU zoning district.

The MRU zoning district is designed to encourage creative and innovative development projects, especially those that can harmonize with unique geological features. By working with the natural characteristics of the land, our proposed development will benefit all stakeholders involved.

The total site comprises 353.05 acres, which we are dividing into two tracts for the purposes of this rezoning. Tract One contains 230.35 acres and is located on the southern portion of the property. The Grove Park development is located exclusively within this tract. Tract Two, the northern portion of the property, will not be rezoned and remains zoned as WP (Watershed Protection) and AR (Agricultural Residential).

The Grove Park development located entirely within Tract One will occur in two phases. Phase one will comprise 239 homes, with 68% (163) being single-family homes and 32% (76) townhomes. Phase two will comprise 108 homes, with 68% (73) being single-family homes and 32% (35) townhomes.

Phase one homeowners will enjoy a **massive 92 acres of usable permanent green space**, featuring two fishing ponds and walking paths. This design will protect environmentally sensitive natural resources by concentrating homes in less sensitive areas, thus promoting environmental stewardship. For most neighboring properties, this means a buffer increase of near 10 times current requirements to nearly 500 feet!

Moreover, the community design aims to create a sense of place that promotes a healthy, walkable lifestyle and an appreciation for the area's unique natural beauty. This thoughtful approach not only enhances the living experience for residents but also preserves the ecological integrity of the region.

In summary, the rezoning of Grove Park to Mixed Residential Uses is a reasonable and beneficial move. It leverages the property's unique geological features, enhances recreational opportunities, and promotes sustainable development. I kindly request your favorable consideration of this rezoning application.

Thank you for your attention to this matter. We look forward to working with the Rockdale County Planning and Development Department to bring this innovative project to fruition.

Sincerely,

Andrew C. Shipp, Sr. Grove Park Farm, LLC 770/329-4200 Wendell D McNeal Allied Capital, LLC 770/388-7777 The Applicant submits the previous Forms and this Addendum as a Statement of Intent with regard to its application, a preservation of the Applicant's constitutional rights, and a written justification for the proposed rezoning, and an analysis of the rezoning criteria listed in the Rockdale County Unified Development Ordinance ("Rockdale UDO"), §§ 238-4 (g) (1) and (2).

PRESERVATION OF CONSTITUTIONAL RIGHTS

The current zoning and land use of the Subject Property and any intervening zoning district other than that requested is unconstitutional and contrary to the best interest of the health and welfare of the citizens of Rockdale County and constitutes an arbitrary and capricious act. As a result, the Zoning Ordinance is in violation of Article I, section I, Paragraphs 1 and 2 of the Constitution of the State of Georgia 1983; Article I, Section III, Paragraph 1 of the Constitution of the State of Georgia; and Article I, Section II, Paragraph 3 of the Constitution of the State of Georgia, 1983. Furthermore, the current zoning and land use violate the due process clause and equal protection clauses of the Fifth and Fourteenth Amendments to the Constitution of the United States of America.

In addition, the current zoning and land use of the Subject Property and any intervening district other than that requested is unconstitutional in that it renders the Subject Property unusable and destroys it marketability. Therefore, the current zoning and land use constitute a taking of the Applicant's property without just and adequate compensation and without due process of law in violation of the Fifth and Fourteenth Amendments to the United States Constitution and in violation of Article I, Section I, Paragraph I and Article I, Section III, Paragraph 1(a) of the Constitution of Georgia.

The Zoning Ordinance of Rockdale County lacks adequate standards for the Board of Commissioners to exercise its power to zone and rezone. In essence, the standards are not sufficient to contain the discretion of the Board of Commissioners and to provide the Courts with a reasonable basis for judicial review. Because the stated standards (individually and collectively) are too vague and uncertain to provide reasonable guidance to the Board of Commissioners, the Zoning Ordinance violates the Fifth and Fourteenth amendments of the Constitution of the United States in matters of zoning. The Zoning Ordinance also violates Article, Section III, Paragraph 1; and Article I, Paragraphs 1 and 2 of the Constitution of the State of Georgia, 1983.

Failure to approve this Rezoning Application would be contrary to the best interest of the health and welfare of the citizens of Rockdale County, and would further constitute an arbitrary and capricious act. As such, failure to approve this Application would constitute a violation of Article I, Section I, Paragraph I of the Constitution of the State of Georgia, 1983; and Article I, Section III, Paragraph I of the Constitution of the State of Georgia; and Article I, Section III, Paragraph 3 of the Constitution of the State of Georgia, 1983, together with the due process clause and equal protection clauses of the Fifth and Fourteenth Amendments to the Constitution of the United States of America.

Opponents to this request lack standing, have failed to exhaust administrative remedies, and have waived their rights to appeal by failing to assert legal and constitutional objections.

LEGAL DESCRIPTION Tract one

ALL THAT TRACT or parcel of land lying and being in land lots 361,373,374~&~375 of the 16th district Rockdale County, Georgia and being more particularly described as follows:

BEGINNING at a R\W M. at the intersection of the south right-of-way of State Hwy.No.138 and the east right-of-way of Gleaton Road this being the true point of beginning.

THENCE North 59 degrees 18 minutes 18 seconds East for a distance of 124.60 feet to an R\W M.;

THENCE North 58 degrees 03 minutes 58 seconds East for a distance of 483.23 feet to a R\WM;

THENCE North 58 degrees 03 minutes 15 seconds East for a distance of 271.90 feet to a point;

THENCE South 41 degrees 37 minutes 19 seconds East for a distance of 24.65 feet to an $R\W$ M.;

THENCE North 59 degrees 01 minutes 15 seconds East for a distance of 13.49 feet to an R\W M.;

THENCE along a curve to the right having a radius of 2048000.00 feet and an arc length of 206.59 feet, being subtended by a chord of North 59 degrees 34 minutes 19 seconds East for a distance of 206.59 feet to a point;

THENCE along a curve to the right having a radius of 2048000.00 feet and an arc length of 100.00 feet, being subtended by a chord of North 59 degrees 34 minutes 35 seconds East for a distance of 100.00 feet to an R\W M.;

THENCE North 33 degrees 23 minutes 40 seconds West for a distance of 25.28 feet to an $R\W$.;

THENCE along a curve to the right having a radius of 3715.67 feet and an arc length of 322.21 feet, being subtended by a chord of North 63 degrees 01 minutes 59 seconds East for a distance of 322.11 feet to an R\W M.

THENCE along a curve to the right having a radius of 5576.82 feet and an arc length of 805.41 feet, being subtended by a chord of North 68 degrees 27 minutes 42 seconds East for a distance of 804.71 feet to an R\W M.;

THENCE North 72 degrees 32 minutes 27 seconds East for a distance of 285.24 feet to a point;

THENCE South 30 degrees 30 minutes 00 seconds East for a distance of 1966.26 feet to a point;

THENCE South 59 degrees 30 minutes 00 seconds West for a distance of 1493.00 feet to a point;

THENCE South 37 degrees 38 minutes 28 seconds East for a distance of 1334.82 feet to an Rock Fnd.;

THENCE South 01 degrees 04 minutes 44 seconds East for a distance of 324.00 feet to an IPS $1\2$ "RB;

THENCE South 63 degrees 42 minutes 16 seconds West for a distance of 159.20 feet to an IPS 1\2"RB;

THENCE South 61 degrees 35 minutes 01 seconds West for a distance of 154.61 feet to an Rock Fnd.;

THENCE South 60 degrees 52 minutes 57 seconds West for a distance of 556.53 feet to an IPF 1\2"RB;

THENCE South 61 degrees 35 minutes 57 seconds West for a distance of 163.36 feet to an Rock Fnd.;

THENCE South 76 degrees 39 minutes 09 seconds West for a

distance of 324.75 feet to an Rock Fnd.;

THENCE South 66 degrees 58 minutes 01 seconds West for a distance of 386.70 feet to an Rock Fnd.;

THENCE North 20 degrees 18 minutes 55 seconds West for a distance of 1040.36 feet to an IPS $1\2$ "RB;

THENCE North 84 degrees 23 minutes 14 seconds West for a distance of 1102.35 feet to an Rock Fnd.;

THENCE North 01 degrees 06 minutes 38 seconds East for a distance of 1404.14 feet to an Conc.Marker Fnd.;

THENCE North 86 degrees 48 minutes 05 seconds West for a distance of 186.70 feet to an IPS 1\2"RB;

THENCE North 01 degrees 44 minutes 55 seconds East for a distance of 188.50 feet to a point;

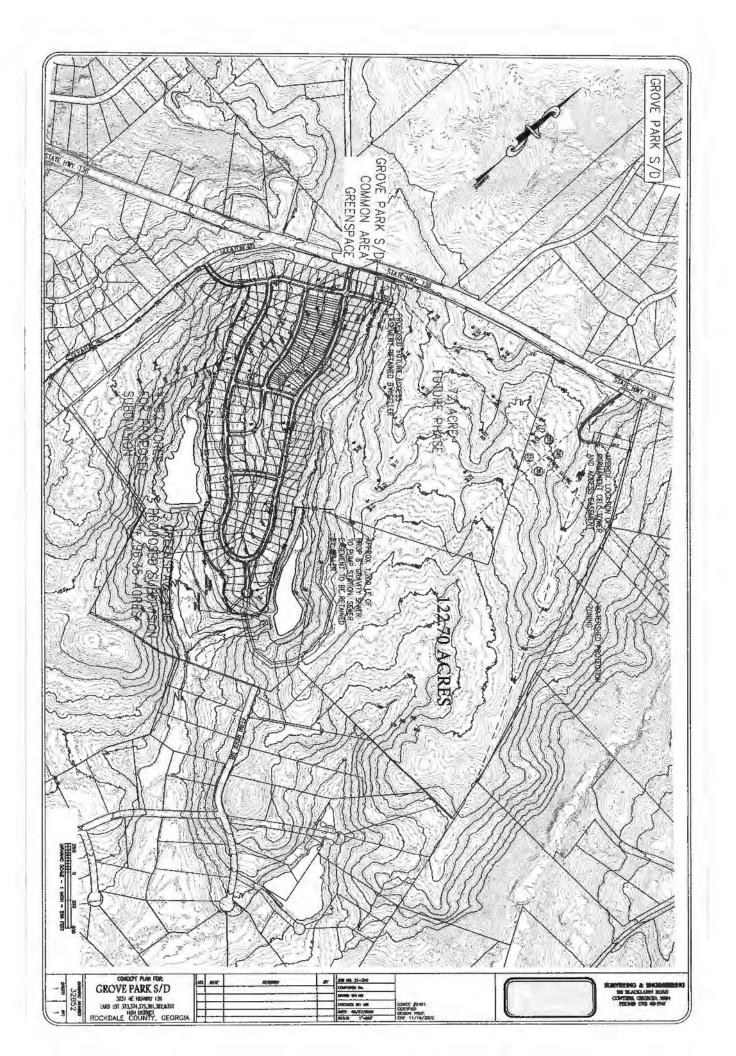

THENCE along a curve to the right having a radius of 983.35 feet and an arc length of 370.83 feet, being subtended by a chord of North 13 degrees 05 minutes 21 seconds East for a distance of 368.63 feet to an R\W M.;

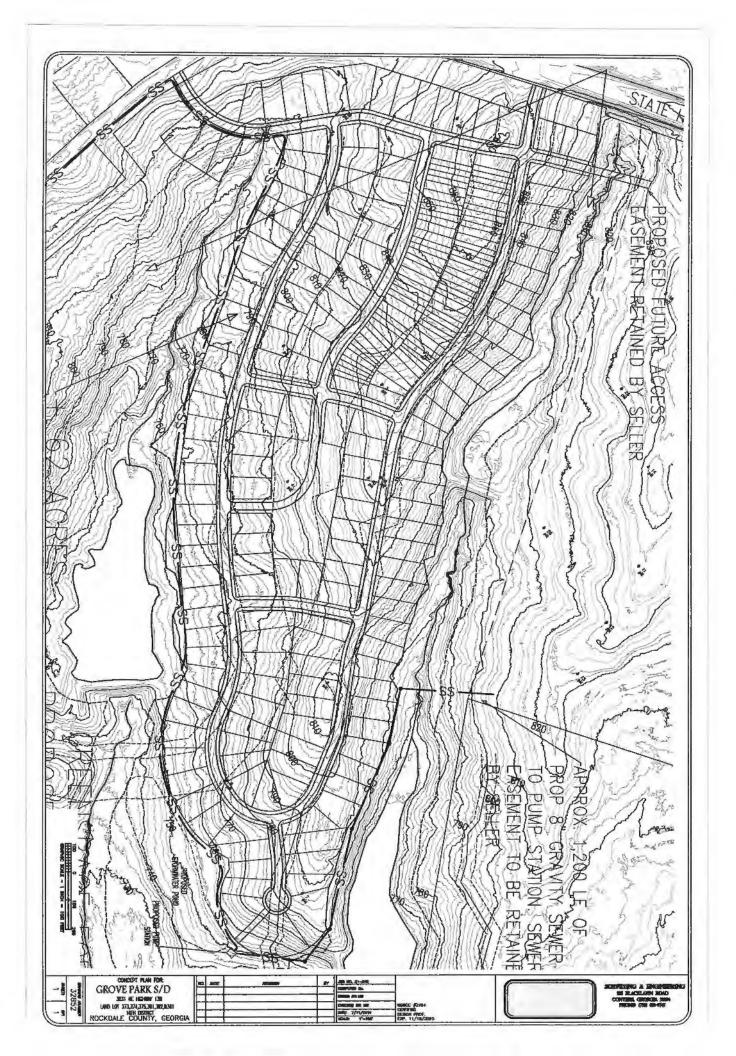

THENCE South 64 degrees 12 minutes 01 seconds East for a distance of 25.12 feet to an R\W M.;

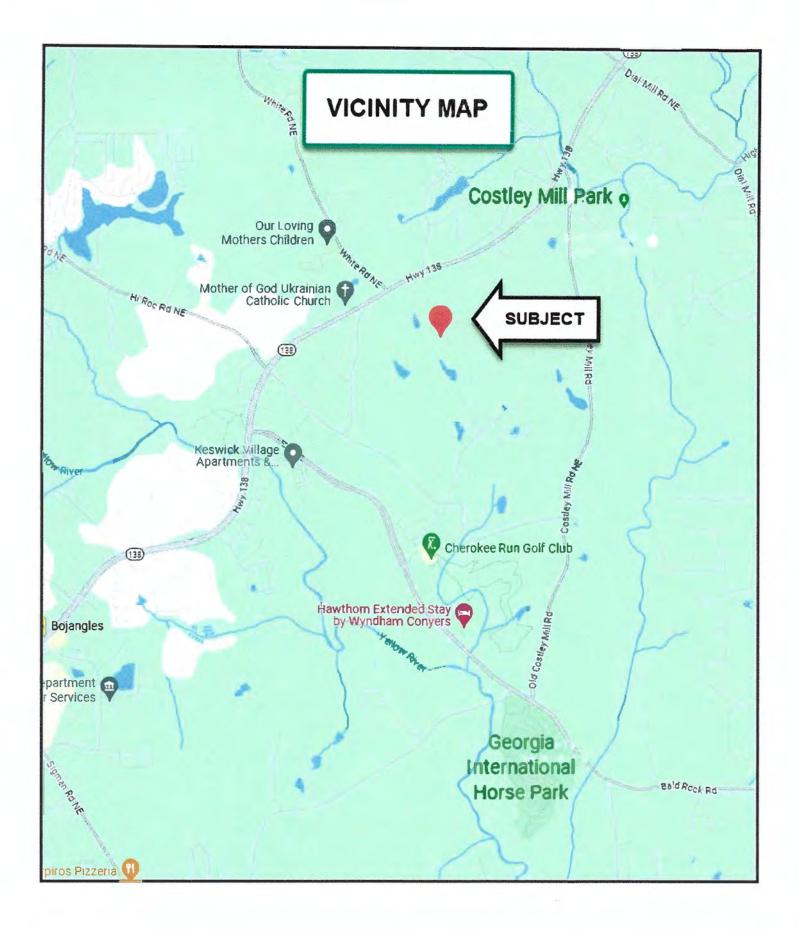

THENCE along a curve to the right having a radius of 1005.29 feet and an arc length of 227.96 feet, being subtended by a chord of North 29 degrees 55 minutes 07 seconds East for a distance of 227.47 feet to an R\W M.;

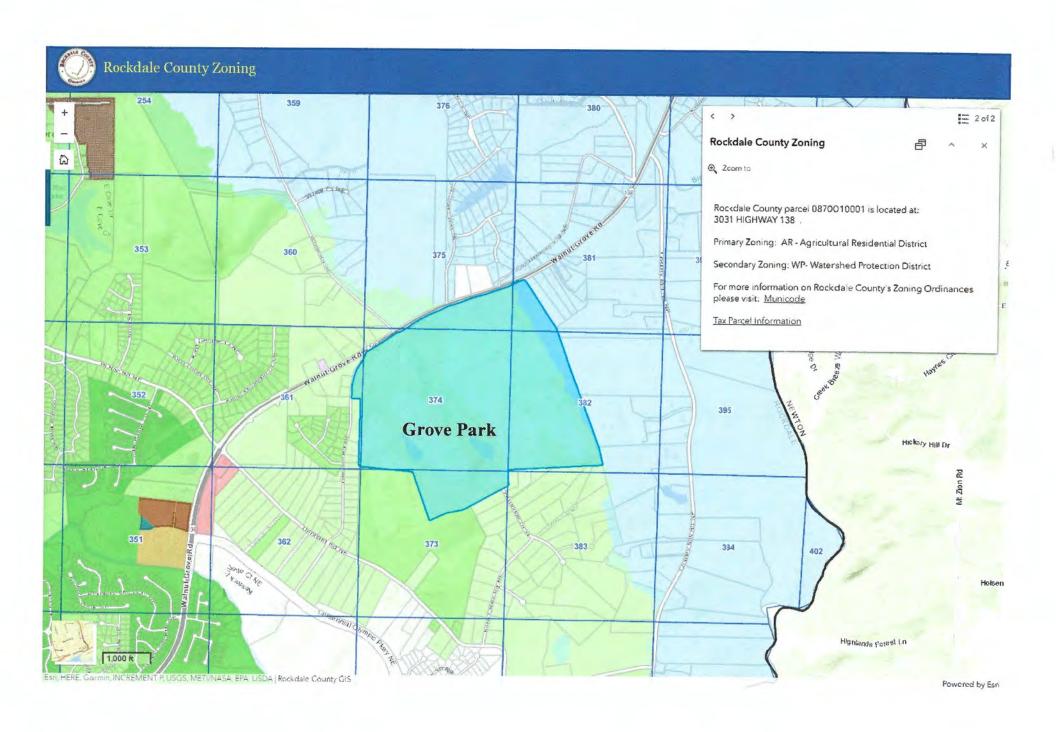

THENCE North 32 degrees 36 minutes 18 seconds East for a distance of 196.17 feet to an R\W M. at the true point of beginning.

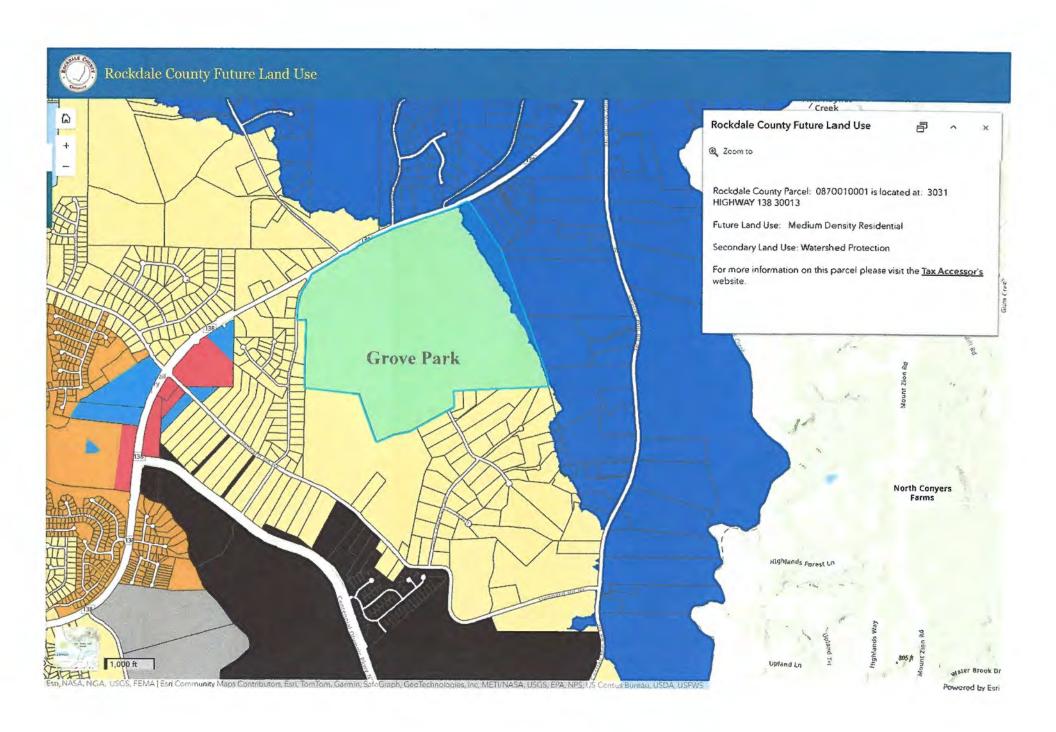

Said property contains 230.35 acres.

Andy Shipp Grove Park Farm, LLC Allied Capital, LLC PO Box 1375 Conyers, GA 30012

Dear Andy Shipp

As of the date of this letter, Rockdale County does have wastewater availability and treatment capacity to accommodate your request for wastewater treatment for your site at 3031 Highway 138 Conyers, GA 30013 property - tax parcel # 0870010001

This availability does not constitute a sewer reservation nor promise of a sewer reservation. Such reservations can only be facilitated by way of an approved wastewater service permit. The wastewater service permit includes submittal of the sewer reservation application (i.e. permit), payment made for such reservation, and approval by Rockdale County per Rockdale County Rate-Resolution-R-2019-06-approved-5-14-2019. Wastewater conveyance and treatment capacity availability is subject to change and sewer reservations are made on a first come, first serve basis. The wastewater conveyance capacity is the responsibility of the developer to ensure that existing sewer line can handle the existing flow plus a peak flow from the proposed development.

If you should have any questions, please contact us at 770-278-7450.

Sincerely, Rockdale Water Resources Engineering Division

RE: Grove Park Farm, LLC - 3031 GA-138 Conyers, GA 30013

Dear Andy,

This is to advise you that natural gas is presently available to serve the above residential location.

This is to further advise you that natural gas service will be made available to the above referenced project, in accordance with the Rules and Regulations governing our operations on file with the Georgia Public Service Commission at the time said service is requested (the "Rules"), which may require that customer contribute to any excess installation costs (as calculated pursuant to the Rules).

Please contact Aiyana Abron, 678-243-8656 regarding gas installation.

Sincerely.

Here's the latest school student data that I have. I've not seen the projections for this coming school year but the data locations I used for your report is the information I will use until the first twenty-day count in SY25.

I hope this helps. Please let me know if there is any other information you need.

FYI – there are several mobile class units at HTE. They are not in use and not included in the capacity number I shared. Several years ago, I stopped moving trailers until we have a need at another location to save the costs of moving units twice.

There are four units at CMS – brought in during COVID to provide the opportunity to reduce classroom student numbers. These four trailers are not included in the CMS capacity numbers I shared above. To my knowledge, they are not using them for classes currently, although they are not in my available mobile classroom inventory at this point.

School	Current Enrollment	SY24 Projected Enrollment	Current Capacity
RCHS	1,349	1,489	1,500
CMS	868	974	1,242

Staff Recommendation: Approval with Conditions

PC Hearing Date: October 10, 2024 BOC Hearing Date: October 24, 2024

ROCKDALE COUNTY DEPARTMENT OF PLANNING & DEVELOPMENT

Zoning History

The subject property is zoned R-1 (Single-Family Residential). No prior zoning changes are on record for this property.

Existing Site Conditions

The subject site is a 253.03-acre property located at 0 NE Hi Roc Road (parcel 0640010024). The applicant's request for a rezoning applies to 73 acres of the property. The site is undeveloped and largely wooded with rock outcroppings. The subject property has road frontage along Hi Roc Road NE; a sidewalk is not present along the frontage. Carr Branch Floodway flows through the property from the northwest corner of the parcel to the southeast where it empties into the Yellow River. Wetlands and floodplains associated with Carr Branch are also present on the property.

Surrounding Use and Zoning

The subject site is surrounded by residential properties. The following is a summary of surrounding uses and zoning:

Adjacent Zoning and Current Land Use					
Direction	Address	Zoning District	Current Land Use		
West	NE GRANITE DR NE OLD RICHARD RD NE RICHARD RD	R-1 R-1 R-1	Granite Mountain Farms Subdivision Woods/Rock Outcroppings Woods/Rock Outcroppings		
North	2203 NE HI ROC RD 2230 NE HI ROC RD	R-1 R-1	Single-Family Residence Woods		
East	2219 NE HI ROC RD NE FRAGGLE ROC/NE JESSICA WAY	R-1 R-1	Single-Family Residence Hi Roc Plantation Subdivision		
South	NE QUEENIE SMITH RD/NE HWY 138	R-3/COND	River Club at Boar Tusk Subdivision*		

^{*}separated from the subject site by the Yellow River.

Project Summary

The applicant is requesting a rezoning for 73 acres of a 253.03-acre property. The project includes:

- The development of a single-family residential community with 150 lots.
- Proposed gross density of 2.05 units per acre; code allows for up to 8 units per acre.
- Proposed 50-foot-wide transitional buffer.
- Proposed conservation space of 37%; code requires a minimum of 30%.
- Proposed amenity area that includes a mail kiosk and small park.

INTERNAL AND EXTERNAL AGENCY REVIEW

The applicant must meet all other UDO requirements related to infrastructure improvements. Internal and External agency comments are attached and provided below.

Fire

FIRE HYDRANTS SHALL BE SPACED A MAXIMUM 500 FEET APART FOR NON-SPRINKLED STRUCTURES; MAXIMUM OF 600 FT APART FOR SPRINKLED STRUCTURES.

PROVIDE SECOND REMOTE EXIT.

Rockdale Board of Education

School:	Current Enrollment	Projected Enrollment	Current Capacity
RCHS	1374	1435	1500
CMS	929	952	1242
HTE	508	511	760

The lack of data on predicted per unit average student occupancy prohibits predicting the school's full occupancy dateline upon build out of this project.

Note that this month's projects include multiple requests for the Hightower Trail ES, Conyers MS, and Rockdale County HS school zones. There is no current comprehensive report providing potential student enrollment impacts on these three schools.

RCPS first steps to address impactful student enrollment numbers is to add mobile units to the site campus affected or consider larger class sizes. Second step, rezoning.

Transportation Department

Deceleration lane on Stanton Road should be 175' travel lane and 100' taper.

Deceleration lane on HI Roc Road should be 150' travel lane and 50' taper.

Phase Two needs two access points over 101 homes.

All new developments require traffic study, traffic calming and streetlights.

Stormwater Department

Based on the submitted rezoning documents, there are existing State waters, Wetlands, and Rockdale County Future flood plain requirements that must be adhered to by Federal, State and County ordinances.

Tree protection must be adhered to as it relates to the Stormwater Management Department for Land Disturbance Permitting.

ARTICLE IV – STREAM BUFFER PROTECTION Sec. 310 – 103 Land development stream buffer requirements.

- (a) All land development activity, including subdivisions of land and platting activities governed by chapter 302 of the UDO, shall meet the following buffer and setback requirements unless otherwise exempted in this article:
- (1) An undisturbed natural vegetative buffer shall be maintained for 50 feet, measured horizontally, on both banks (as applicable) of the stream as measured from the top of the stream bank.
- (2) An additional setback shall be maintained for 25 feet, measured horizontally, beyond the undisturbed natural vegetative buffer, in which all impervious cover shall be prohibited. Grading, filling and earthmoving shall be minimized within the setback.
- (3) No septic tanks or septic tank drain fields shall be permitted within the buffer or the setback.

(b) Any land development activity within a buffer established hereunder or any impervious cover within a setback established hereunder is prohibited unless a variance is granted pursuant to section 310-105.

CHAPTER 324 – ENVIRONMENTAL PLANNING CRITERIA

Sec. 324-2. - Protection of wetlands.

- (a) *Purpose and intent*. Pursuant to O.C.G.A. <u>12-2-8</u> and the DNR, environmental protection division's Rules for Environmental Planning Criteria chapter 391-3-16, this section establishes regulations to promote the wise use of wetlands and protect them from alterations that will significantly affect or reduce their primary functions for water quality, floodplain and erosion control, groundwater recharge, aesthetic natural areas and wildlife habitat areas.
- (b) Wetlands development permit requirements. No activity or use, except those identified in subsection (c), shall be allowed in the wetlands without issuance of a local development permit. Local permits will be issued only if the proposed use is in compliance with the requirements of the underlying zoning district and this section. Furthermore, if the area of proposed development is located within 100 feet of the wetlands boundaries, as established by Figure IV-2 of the Rockdale County Comprehensive Land Use Plan, a U.S. Army Corps of Engineers delineation is required under Section 404 of the Clean Water Act. If wetlands are altered or degraded, mitigation to offset losses may be required as a condition of a Section 404 permit. Local development permits will not be issued until after any necessary Section 404 permits have been secured.

CHAPTER 328 – Buffers, landscaping, and Tree Protection

Sec. 328-15. - Authority, findings, purpose and intent.

- (a) *Authority*. This article is enacted pursuant to the county's exclusive planning authority granted by the Constitution of the State of Georgia, including but not limited to Ga. Const. art. IX, § II, para. IV, and Ga. Const. art. IX, § II, para. III, as well as authority granted by the General Assembly of the State of Georgia, including by not limited to O.C.G.A. § 36-70-3, as well as 1977 Ga. Laws, page 2817, as amended, and 1969 Ga. Laws, page 3639, as amended, and the general police powers of the county and other authority provided by federal, state and local laws applicable to this article.
- (b) Findings, purpose, and intent. It is the intent of this article to provide standards for landscaping and for the preservation and replacement of trees as part of the land development and building construction process in unincorporated areas of the county. The county finds that the existence of adequate tree cover and landscaping in the county directly affects the public health, safety and welfare to comprehensively address these concerns through the adoption of the regulations in this article. The purpose and intent of the board of commissioners in enacting this article are as follows:
- (1) To protect the health, safety and general welfare of the citizens of the county, and to implement the policies and objectives of the comprehensive plan through the enactment of a comprehensive ordinance governing tree preservation and replacement in the county.
- (2) To require landscaping and the preservation and replacement of trees in certain areas within the county in order to ensure the continued health of its citizens through improved air and water quality.
- (3) To provide developers and others active in the county with the appropriate guidance to better ensure proper tree preservation and replacement in the course of the land development process in the county.
- (4) To preserve property values in the county by maintaining a safe, aesthetically pleasing environment.
- (5) To reduce flooding of county rivers and streams by planting trees and other vegetation so as to aid in slowing the rate of stormwater runoff.
- (6) To reduce soil erosion in the county by planting trees and other vegetation so as to aid in prevention of soil loss through stormwater runoff and flooding and to promote stormwater infiltration.
- (7) To reduce noise and glare on adjacent properties from properties that has been extensively developed.
- (8) To conserve energy by cooling surrounding air temperatures through the existence of adequate shade trees.
- (9) To provide improved atmospheric quality by reducing airborne particulates and carbon monoxide and by increasing oxygen through adequate tree cover.

- (10) To promote the saving of trees in nodes throughout a development, rather than as individual trees scattered over a development or around the periphery of a development.
- (11) To prevent clear-cutting and mass grading of land that results in the loss of mature trees, and to ensure appropriate replanting when tree loss does occur.

Sec. 328-25. - Requirements for other developments.

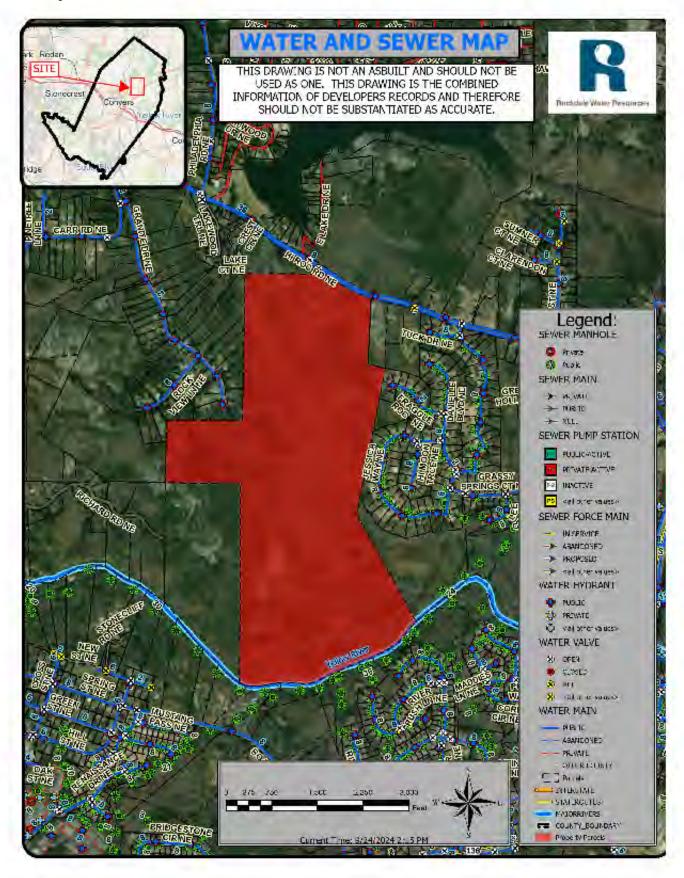

- (a) Each new development not covered by <u>section 328-24</u> shall prepare a landscape and tree protection and replacement plan showing compliance with this section.
- (b) The tree protection and replacement plan must, at a minimum, protect or plant 15 units per acre of trees on the land being developed. The tree density calculations shall not utilize trees within required buffers in determining for the overall density factor, existing density factor, or replacement density factor. All new development with eight (8) or more parking spaces, or expanded development that results in eight (8) or more parking spaces, shall provide interior landscaping.
- (c) Rockdale County has given priority to the retention and placement of trees in frontage planting strips and parking lot planting islands. Trees retained or placed in these areas may be used to meet the tree density factor for a project. However, if the tree density factor is met with trees saved or planted in other areas, the tree location guidelines outlined below must still be performed with additional tree plantings.
- (d) Required landscape strips and re-vegetated buffers. Landscape strips shall meet the minimum depth requirements as indicated in the following table. Trees may be planted in groups rather than in a single line. Adjoining residential zoning districts, evergreen trees shall be saved or planted in such density or spacing as to provide an eight-foot tall visual barrier within two years of planting. Required landscaping strips shall not be encroached upon by parking space, driveway surfaces or storm water detention facilities except when complying with requirements below. Driveway crossings may traverse such strip as near to a perpendicular alignment as practical. Signs may be located in the required landscape strip.

CHAPTER 320 – FLOOD DAMAGE PREVENTION

Sec. 320-1. - Introduction.

- (a) It is hereby determined that:
- (1) The flood hazard areas of Rockdale County, GA are subject to periodic inundation which may result in loss of life and property, health and safety hazards, disruption of commerce and governmental services, extraordinary public expenditures for flood relief and protection, and impairment of the tax base, all of which adversely affect the public health, safety and general welfare.
- (2) Flood hazard areas can serve important stormwater management, water quality, streambank protection, stream corridor protection, wetland preservation and ecological purposes when permanently protected as undisturbed or minimally disturbed areas.
- (3) Effective floodplain management and flood hazard protection activities can:
- a. Protect human life and health.
- b. Minimize damage to private property,
- c. Minimize damage to public facilities and infrastructure such as water and gas mains, electric, telephone and sewer lines, streets and bridges located in floodplains, and
- d. Minimize expenditure of public money for costly flood control projects associated with flooding and generally undertaken at the expense of the general public.
- (b) Article IX, Section II of the Constitution of the State of Georgia and Section 36-1-20(a) of the Official Code of Georgia Annotated have delegated the responsibility to local governmental units to adopt regulations designed to promote the public health, safety, and general welfare of its citizenry. Therefore, Rockdale County, GA, does ordain this chapter and establishes this set of floodplain management and flood hazard reduction provisions for the purpose of regulating the use of flood hazard areas. It is determined that the regulation of flood hazard areas and the prevention of flood damage are in the public interest and will minimize threats to public health and safety, as well as to private and public property.

Existing 8" DIP Water main along Hi Roc Road. Public Wastewater is available from the Quigg Branch Sewer Basin. See Map Attached

EVALUATION OF THE REZONING REQUEST

O.C.G.A. Chapter 36-66: Zoning Procedure Act

When considering an application to amend the current zoning designation of a property, the Board of Commissioners, the Planning Commission, and the Planning & Development Department shall consider the following:

A. Is the zoning proposal permitted as a use that is suitable in view of the use and development of adjacent and nearby property?

The applicant's request for rezoning from R-1 (Single-Family Residential District) to CRS (Collaborative Residential Subdivision) is proposed on an undeveloped area of 73 acres.

The residential subdivisions adjacent to the site are zoned R-1. The Hi Roc Plantation Subdivision to the east of the subject site features lots that range in size from 20,000 SF to 40,000 SF. The Granite Mountain Farms Subdivision to the west features lots that range in size from 1 to 6 acres; the larger lots in the subdivision have floodplain present. The River Club at Boar Tusk Subdivision to the south of the subject site features lots that range in size from 10,000 SF to 16,000 SF.

The proposed single-family residential development features lots on a minimum of 10,000 SF, and staff believe that the project will be suitable in use of surrounding properties. The required 50-foot transitional buffer and required conservation space appear to be sufficient to buffer adjacent properties.

B. Will the zoning proposal adversely affect the existing use or usability of adjacent or nearby property?

The proposed residential development will likely have some impact on the surrounding properties with the addition of 150 new residences that will utilize Hi Roc Road NE.

C. Will the property to be affected by the zoning proposal have a reasonable economic use as currently zoned?

The property has reasonable economic use as currently zoned; however, the property could be better utilized if rezoned to CRS (Collaborative Residential Subdivision).

D. Will the zoning proposal result in a use that will or could cause excessive or burdensome use of existing streets, transportation, facilities, utilities, or schools?

The project will likely have an impact on transportation infrastructure. Staff have required a traffic study be submitted with the land disturbance permit application. Rockdale Water Resources (RWR) has indicated that public water and wastewater is available at the site location. Schools in the area would likely be impacted by the addition of 150 new homes.

E. Is the zoning proposal in conformity with the Future Land Use Map and the policy intent of the Comprehensive Land Use Plan?

The request to rezone the property to CRS (Collaborative Residential Subdivision) is in conformity with the Future Land Use Category of Medium Density Residential.

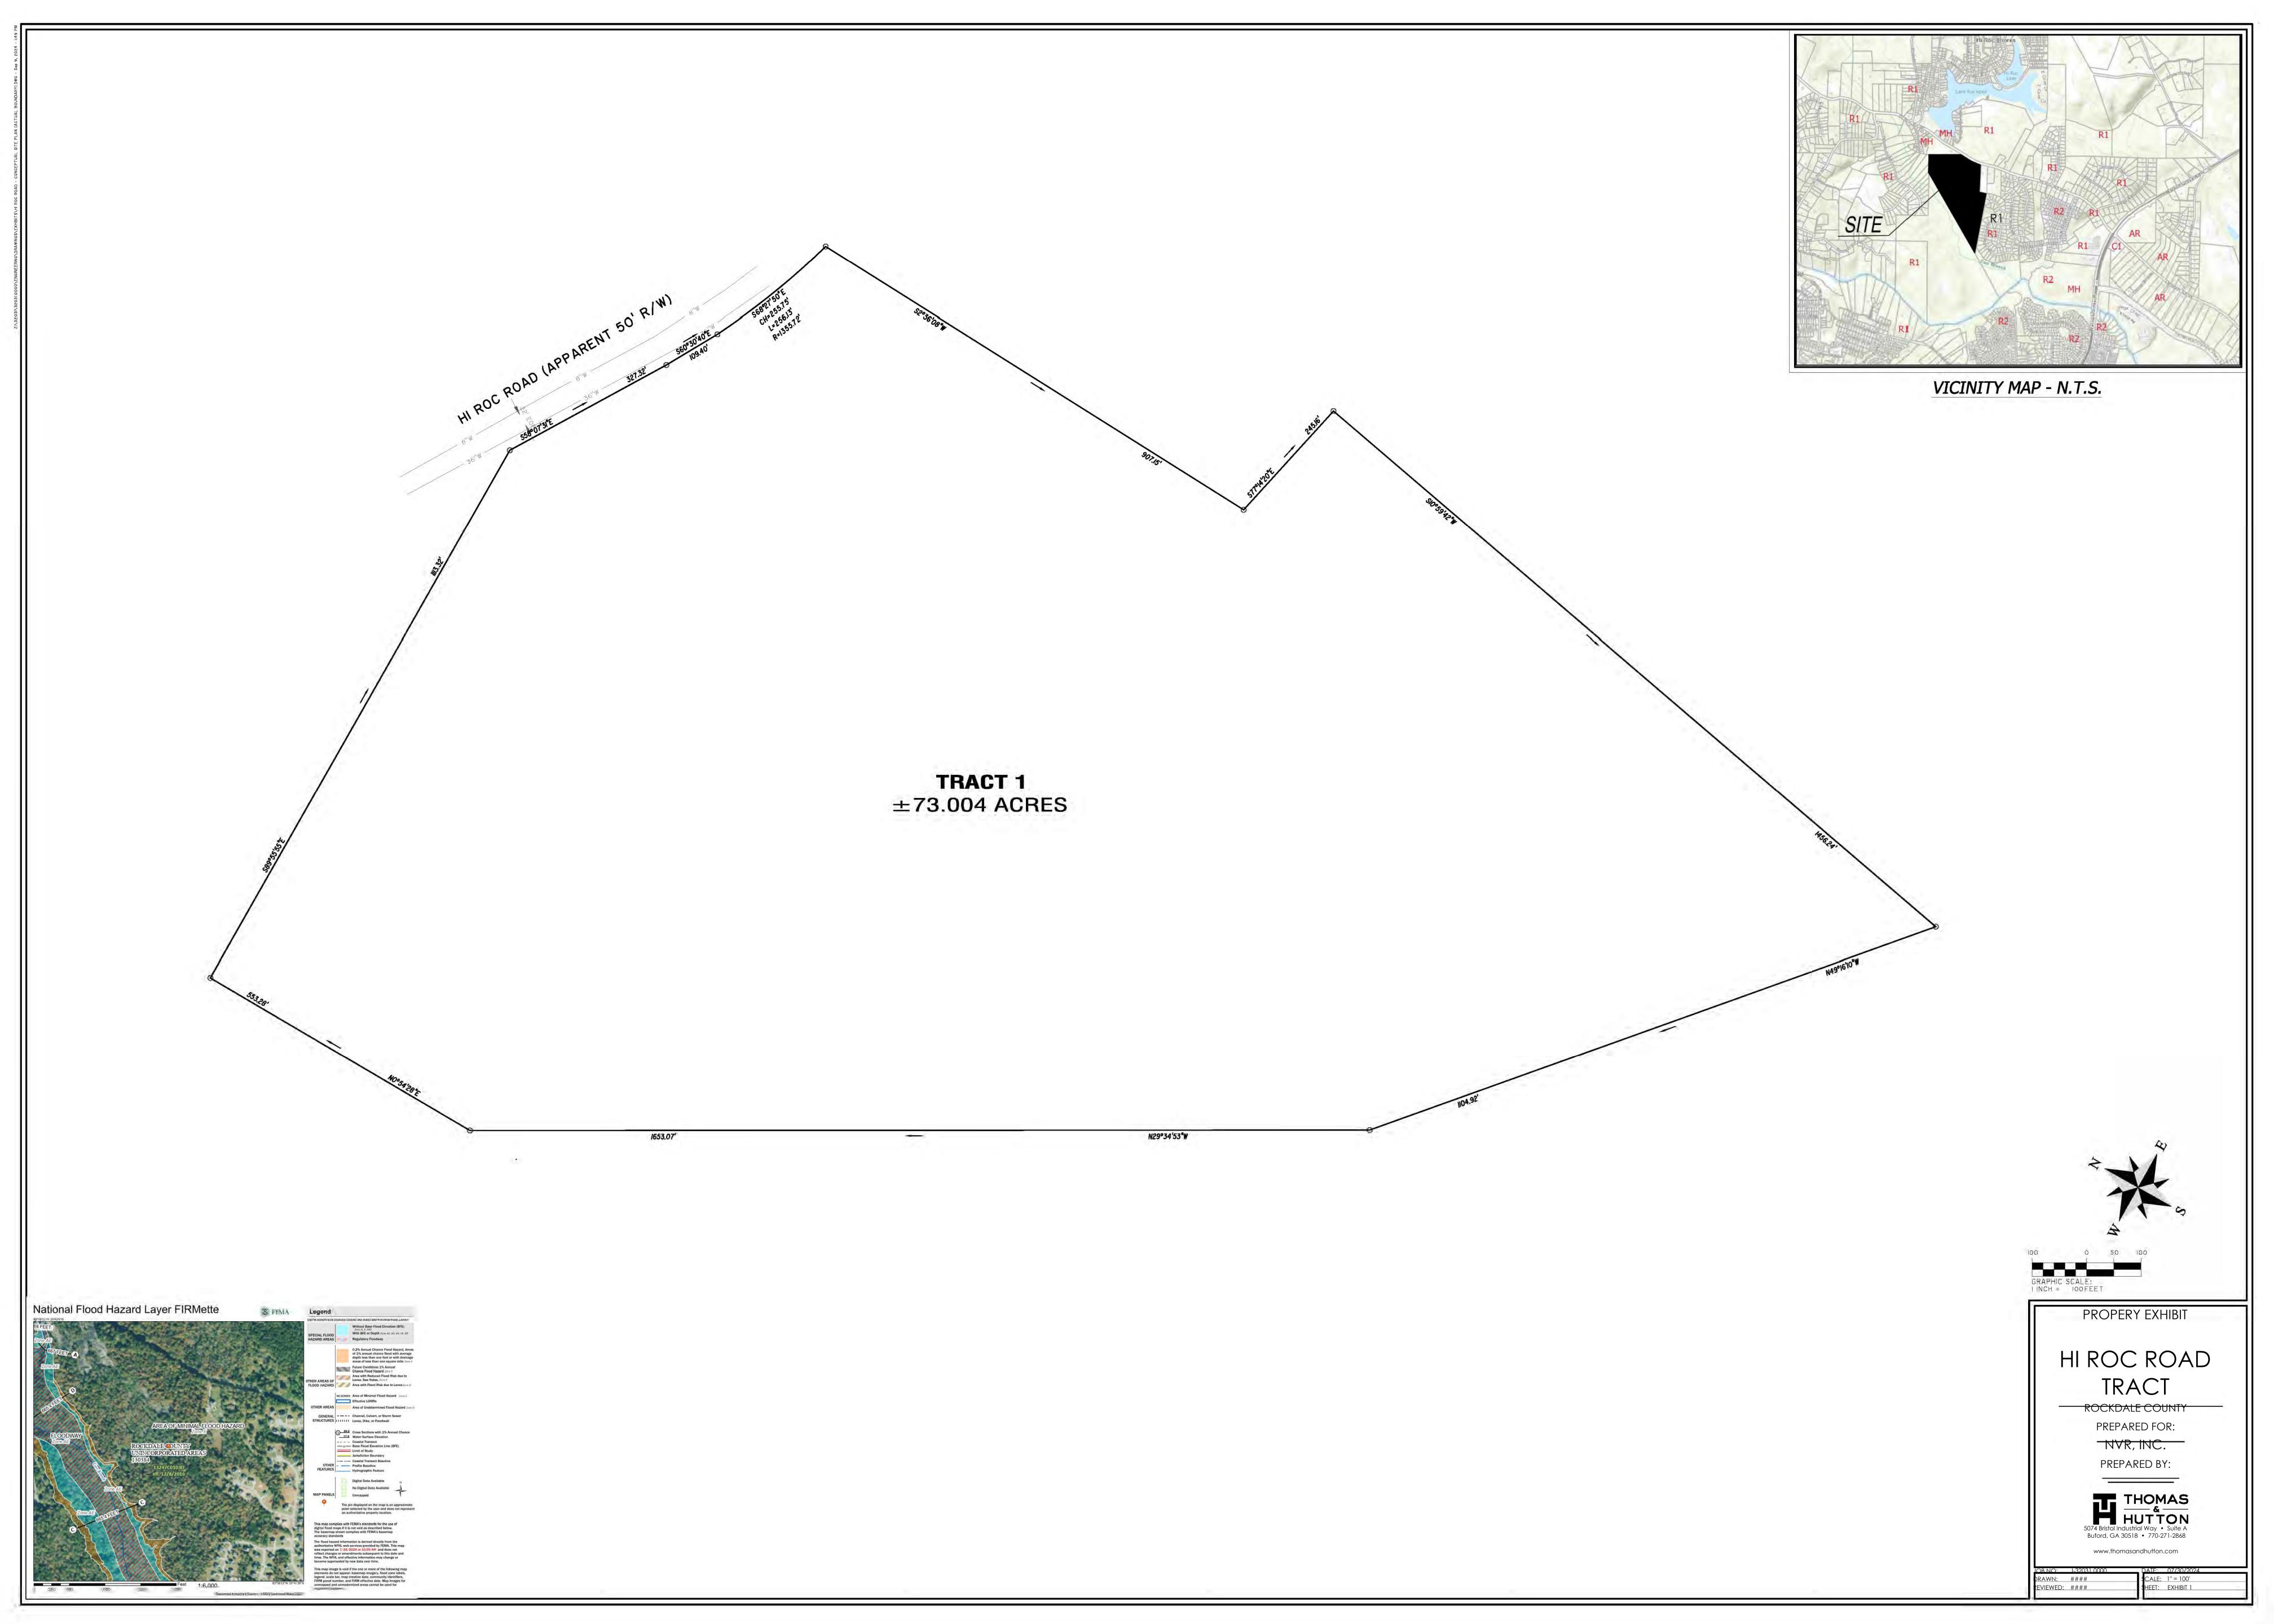

F. Are other existing or changing conditions affecting the use and development of the property, which give supporting grounds for either approval, or disapproval of the zoning proposal?

The residential uses proposed on the subject site are in close proximity to similar residential uses in the area.

PLANNING & DEVELOPMENT STAFF RECOMMENDATIONS

Staff recommends <u>Approval with Conditions</u> of the request to rezone 73 acres of a 253.03-acre property from R-1 (Single-Family Residential District) to CRS (Collaborative Residential Subdivision) for single-family residences with the following conditions:

- 1. The site shall be developed in compliance with the Collaborative Residential Subdivision (CRS) Zoning District if adopted.
- 2. The applicant shall provide a Traffic Impact Study with the Preliminary Plat. Any recommendations for improvements shall be required to be shown on the Land Disturbance Permit (LDP). Additionally, as determined by the Rockdale County Department of Transportation, a new study may be required for the development. Any recommendations for improvements from any new studies shall be required to be shown on the LDP.
- 3. The site shall be restricted not to exceed 150 residential units.
- 4. A mandatory Homeowners' Association shall be established and shall be responsible for the maintenance of all common areas and facilities.
- 5. The Homeowners' Association covenants shall include a rental restriction of five percent (5%) of all single-family residential dwelling units.
- 6. All single-family detached units shall have a two-car garage.
- 7. Provide a five-foot-wide concrete sidewalk along at least one side of the proposed internal streets.
- 8. Provide a five-foot-wide concrete sidewalk along Hi Roc Road NE.
- 9. All grassed areas shall be sodded.
- 10. All utilities shall be placed underground.
- 11. Natural vegetation shall remain on the property until the issuance of a development permit.
- 12. All front building elevations shall be constructed with at least fifty (50) percent of the following building materials: Brick, Indigenous Rock, Natural Stone, and Synthetic Stone, or a combination of Brick, Indigenous Rock, Natural Stone, and Synthetic Stone, with accent building materials that may include but not be limited to Stucco, EIFS, Metal, Painted Cement Siding, and Wood where masonry products are not provided.
- 13. Streetlights are to be provided along one side of every street, a minimum of 16 feet high and a maximum of 20 feet high if overhanging into the street, and placed no more than 160 feet apart.
- 14. Stormwater detention ponds shall be screened from view from adjoining residential properties. Screening plans shall be subject to review and approval of the Director of Planning and Development.
- 15. Any structures in the amenity areas shall be constructed using exterior building materials that complement the adjacent residential structures. The amenity areas may be in a single area or in multiple areas.

#### JUSTIFICATION OF THE REZONING REQUEST

f	
In y	your own words, type the reason you believe the zoning of the subject property should be amended. Please address the following:
1.	The intent of the proposed amendment and the intended timing and phasing of development. State the reasons why you believe the current zoning district classification for the subject rezoning site is incorrect and why approval of a different zoning district classification is appropriate.
	Soo attached
	See attached
2.	The impact of the proposed amendment on the capacities of public facilities including, but not limited to, transportation facilities, sewage facilities, water supply, parks, drainage, schools, solid waste, and emergency medical facilities.
3.	The impact of the proposed amendment on the natural environment, especially existing trees, water bodies, and water quality.
_	
4.	The contribution of the proposed amendment to an orderly and logical development pattern.

#### **REZONING REVIEW STANDARDS**

Additionally, provide justification for each of the following review standards (UDO Sec. 238-4(g)(1)). The Board of Commissioners, the Planning Commission and the Department will use these standards to evaluate the request:

CUI	minission and the Department will use these standards to evaluate the request.
a.	Whether a proposed rezoning will permit a use that is suitable, in view of the use and development of adjacent and nearby property.
	See attached.
b.	Whether the property to be affected by a proposed rezoning has a reasonable economic use as currently zoned.
c.	The impact of the proposed amendment on the natural environment, especially existing trees, water bodies and water quality.
d.	Whether the proposed rezoning will result in a use that will or could cause an excessive or burdensome use of existing streets, transportation facilities, utilities or schools.
e.	Whether the proposed rezoning is in conformity with the policy and intent of the comprehensive plan.
f.	Whether there are other existing or changing conditions affecting the use and development of the property that give supporting grounds for either approval or disapproval of the proposed rezoning.
	Whether and the extent to which the proposed amendment would result in significant adverse impacts on the natural environment
_ ც.	Whether, and the extent to which, the proposed amendment would result in significant adverse impacts on the natural environment.
h.	The feasibility of serving the property with public wastewater treatment service and the impacts of such on the wastewater system; and, if an alternative wastewater treatment method is proposed, whether such wastewater treatment method is authorized in Rockdale County and will have a detrimental impact on the environment.

#### ALTERATIONS TO OR REPEAL OF THE CONDITIONS OF APPROVAL

This page is only required for existing Conditions of Approval that were imposed with the adoption of a Zoning Map Amendment (Rezoning). If Conditions of Approval exist for a Future Land Use Map Amendment or a Special Use Permit that need to be changed, separate application(s) are required.

а.	List the existing conditions of approval:
	NA
b.	List the existing conditions of approval that are proposed to be altered and/or repealed:
	NA NA
c.	Provide justification for the proposal:
	NA NA

## STATEMENT OF INTENT AND IMPACT ANALYSIS

and

Other Material Required by
Rockdale County Zoning Ordinance
for the
Application for Rezoning

of

Tonya Woods c/o Battle Law, P.C.

for

73± acres of land located at Tax Parcel 0640010024 From R1 to CRS

Submitted for Applicant by:

Michèle L. Battle, Esq. Joshua S. Mahoney Esq. Battle Law, P.C. 3562 Habersham at Northlake, Bldg. J, Suite 100 Phone: (404) 601-7616 Fax: (404) 745-0045

Email: mlb@battlelawpc.com

#### I. STATEMENT OF INTENT

The Applicant, Tonya Woods with Thomas Hutton, is seeking to rezone 73 acres of a 253.03-acre parcel being Tax Parcel No. 0640010024 having frontage on Hi Roc Road (the "Subject Property") from R1 to CRS for the development of a 150-unit single family detached residential community at a gross density of 2.05 units per acre, and a net density of 2.2 units per acre. The Subject Property has a land use designation of Medium Density Residential.

This document is submitted both as a Statement of Intent regarding this Application, a preservation of the Applicant's constitutional rights, and the Impact Analysis of this Application as required by the Rockdale County Zoning Ordinance. A surveyed plat and conceptual site plan of the Subject Property controlled by the Applicant has been filed contemporaneously with the Application, along with other required materials.

#### **JUSTIFICATION OF THE REQUEST**

1. The intent of the proposed amendment and the intended timing and phasing of development. State the reasons why you believe the current zoning district classification for the subject rezoning site is incorrect and why approval of a different zoning district classification is appropriate.

The Subject Property is a portion of a larger tract that has a significant amount of floodplain and rock which results in most of the tract being undevelopable, except for the Subject Property. The R1 zoning district requires minimum 1 acre lots which are is not consistent with the current land use designation of Medium Density Residential which allows up to 4 units per acre. Therefore, the propose rezoning will allow for development that is consistent with the land

use designation and with the Estate Residential Character area in which the County "encourages compact development at higher densities."

2. The impact of the proposed amendment on the capacities of public facilities including, but not limited to, transportation facilities, sewage facilities, water supply, parks, drainage, schools, solid waste and emergency medical facilities.

The proposed project is in an area in which the existing public facilities have the capacity to support the proposed project.

3. The impact of the proposed amendment on the natural environment, especially existing trees, water bodies and water quality.

There will be no negative impact on the natural environment. The Applicant will comply with the land development regulations for tree preservation, stormwater run-off, water quality, and erosion control. Additionally, the balance of the 253.03 acres will be preserved and remain undeveloped.

4. The contribution of the proposed amendment to an orderly and logical development pattern.

The proposed rezoning will support the vision for the County set forth in the County's 2023 Comprehensive Land Use Plan.

#### **II. IMPACT ANALYSIS**

- (a) <u>Suitability of use</u>: The proposed rezoning will permit uses that are suitable in view of the uses and developments adjacent and nearby the Subject Property.
- (b) <u>Effect on adjacent property</u>: The proposed development will have no negative impact on the surrounding community. The proposed units will bring more diversity of housing options into the area, without negatively impacting surrounding subdivisions, as more intense development moves towards Salem Road.
- (c) <u>Economic use of current zoning</u>: The Subject Property has no use as currently zoned. Due to the development challenges with the overall tract, the current R100 zoning would require lots at a size that is not in alignment with current marketing trends. Additionally, the owner of the Subject Property has received no offers for the development of the Subject Property as currently zoned.
- (d) <u>Effect on public facilities</u>: The Subject Property is in an area with public utility availability.

  The proposed rezoning will not cause excessive use of streets, transportation facilities, or utilities in the area.
- (e) <u>Effect on historic building, sites, etc.</u> The approval of this Application will not have any adverse impact on any historic buildings, sites, districts or archaeological resources in the area.
- (f) <u>Compatibility with Comprehensive Land Use Plan</u>. The Subject Property has a land use designation of Medium Density Residential. The proposed rezoning to CRS will allow for development at a density that is consistent with the 2 to 4 units per acre allowed under the MDR land use designation.

(g) Adverse Impact of Environment. The proposed rezoning and proposed project will not

have an adverse impact on the environment. The Applicant will comply with the land

development regulations for tree preservation, stormwater run-off, water quality, and

erosion control.

(h)

<u>Public Wastewater Treatment</u>. The Subject Property will be service by the existing waster

water treatment facilities for the area.

**IV. CONCLUSION** 

For the foregoing reasons, the Applicant respectfully requests that the Rezoning

Application at issue be approved. The Applicant also invites and welcomes any comments from

Staff or other officials of Rockdale County so that such recommendations or input might be

incorporated as conditions of approval of this Application. Please note that the Applicant's Notice

of Constitutional Allegations and Preservation of Constitutional Rights have been submitted with

this Application and are attached hereto and by this reference incorporated herein.

This 1st day of August, 2024.

Respectfully submitted,

Michèle L. Battle, Esq.

Attorney For Applicant

5

#### NOTICE OF CONSTITUTIONAL ALLEGATIONS AND PRESERVATION OF

#### CONSTUTIONAL RIGHTS

The portions of the Rockdale County Zoning Ordinance, facially and as applied to the Subject Property, which restrict or classify or may restrict or classify the Subject Property so as to prohibit its development as proposed by the Applicant are or would be unconstitutional in that they would destroy the Applicant's property rights without first paying fair, adequate and just compensation for such rights, in violation of the Fifth Amendment and Fourteenth Amendment of the Constitution of the United States and Article I, Section I, Paragraph I of the Constitution of the State of Georgia of 1983, Article I, Section III, Paragraph I of the Constitution of the State of Georgia of 1983, and would be in violation of the Commerce Clause, Article I, Section 8, Clause 3 of the Constitution of the United States.

The application of the Rockdale County Zoning Ordinance to the Subject Property which restricts its use to any classification other than that proposed by the Applicant is unconstitutional, illegal, null and void, constituting a taking of Applicant's Property in violation of the Just Compensation Clause of the Fifth Amendment to the Constitution of the United States, Article I, Section I, Paragraph I, and Article I, Section III, Paragraph I of the Constitution of the State of Georgia of 1983, and the Equal Protection and Due Process Clauses of the Fourteenth Amendment to the Constitution of the United States denying the Applicant an economically viable use of its land while not substantially advancing legitimate state interests.

A denial of this Application would constitute an arbitrary irrational abuse of discretion and unreasonable use of the zoning power because they bear no substantial relationship to the public health, safety, morality or general welfare of the public and substantially harm the Applicant in violation of the due process and equal protection rights guaranteed by the Fifth Amendment and Fourteenth Amendment of the Constitution of the United States, and Article I, Section I, Paragraph I and Article I, Section III, Paragraph 1 of the Constitution of the State of Georgia.

A refusal by the Rockdale County Board of Commissioners to rezone the Subject Property to the classification as requested by the Applicant would be unconstitutional and discriminate in an arbitrary, capricious and unreasonable manner between the Applicant and owners of similarly situated property in violation of Article I, Section I, Paragraph II of the Constitution of the State of Georgia of 1983 and the Equal Protection Clause of the Fourteenth Amendment to the Constitution of the United States. Any rezoning of the Property subject to conditions which are different from the conditions requested by the Applicant, to the extent such different conditions would have the effect of further restricting Applicant's utilization of the property, would also constitute an arbitrary, capricious and discriminatory act in zoning the Subject Property to an unconstitutional classification and would likewise violate each of the provisions of the State and Federal Constitutions set forth hereinabove.

A refusal to allow the rezoning in questions would be unjustified from a fact-based standpoint and instead would result only from constituent opposition, which would be an unlawful delegation of authority in violation of Article IX, Section II, Paragraph IV of the Georgia Constitution.

A refusal to allow the rezoning in question would be invalid inasmuch as it would be denied pursuant to an ordinance which is not in compliance with the Zoning Procedures Law, O.C.G.A Section 36-66/1 et seq., due to the manner in which the Ordinance as a whole and its map(s) have been adopted.

The existing zoning classification on the Subject Property is unconstitutional as it applies to the Subject Property. This notice is being given to comply with the provisions of O.C.G.A. Section 36-11-1 to afford the County an opportunity to revise the Property to a constitutional classification. If action is not taken by the County to rectify this unconstitutional zoning classification within a reasonable time, the Applicant is hereby placing the County on notice that it may elect to file a claim in the Superior Court of Rockdale County demanding just and adequate compensation under Georgia law for the taking of the Subject Property, diminution of value of the Subject Property, attorney's fees and other damages arising out of the unlawful deprivation of the Applicant's property rights.

#### APPLICANT CERTIFICATION

Please re	ad and initial the following statements:								
<u>X</u> t,	I hereby request the County consider the information contained within this application relative to the property shown on the attached plats and site plan and further request that this item be placed on the Planning Commission (PC) and/or Board of Commissioners (BOC) Agenda for a public hearing.								
X 2,	I understand that my request will be rejected if a	all the necessary is	nformation a	nd/or i	requirements are not pr	esented.

Hi Roc Road

Portion of Tax Parcel 0640010024

#### LEGAL DESCRIPTION

All that tract or parcel of land, lying and being in Land Lots 339 & 340, 16th Land District, Rockdale County, Georgia, being more particularly described as follows:

Beginning at the Land Lot Corner to Land Lots 329, 330, 338, and 339, said point being THE TRUE POINT OF BEGINNING;

THENCE North 89 degrees 55 minutes 56 seconds East 1113.32 feet to a point located on the southerly right-of-way of Hi Roc Road (50' r/w);

THENCE South 58 degrees 07 minutes 31 seconds East a distance of 327.32 feet to a point;

THENCE South 60 degrees 30 minutes 40 seconds East a distance of 109.40 feet to a point;

THENCE along an arc of curve to the left for an arc length of 256.13 feet, having a radius of 1355.72 feet, being subtended by a chord bearing South 68 degrees 27 minutes 50 seconds East for a distance of 255.75 feet to a point;

THENCE South 02 degrees 36 minutes 08 seconds West a distance of 907.15 feet to a point;

THENCE South 77 degrees 14 minutes 20 seconds East a distance of 245.16 feet to a point;

THENCE South 10 degrees 59 minutes 42 seconds West a distance of 1456.24 feet to a point;

THENCE North 49 degrees 16 minutes 10 seconds West a distance of 1104.92 feet to a point;

THENCE North 29 degrees 34 minutes 53 seconds West a distance of 1653.07 feet to a point;

THENCE North 00 degrees 54 minutes 28 seconds East a distance of 553.28 feet to a point, said point being the TRUE POINT OF BEGINNING.

Said tract contains 73.00 acres.

# PLANNING COMMISSION AND BOARD OF COMMISSIONERS ROCKDALE COUNTY PLANNING STAFF REPORT

Case Number: REZ2024-23

**Address:** 1529 Farmer Rd NW

**Tax Parcel ID:** 0220010015 **Site Area:** 1.03 acres

**Current Zoning:** R-1 (Single-Family Residential)

**Existing Conditions:** Single-Family Residence/Undeveloped

**Request:** To rezone a 1.03-acre property from R-1 (Single-Family Residential) to M-2

(General Industrial) for an Auto Body Shop.

**Applicant:** Marshanda R Ferrell for Oral C Clarke

Owner: Oral C Clarke

**Staff Recommendation:** Approval with Conditions

PC Hearing Date: October 10, 2024 BOC Hearing Date: October 24, 2024

#### **ZONING HISTORY**

The subject site is zoned R-1 (Single-Family Residential). No prior zoning changes are on record for the site.

#### **EXISTING SITE CONDITIONS**

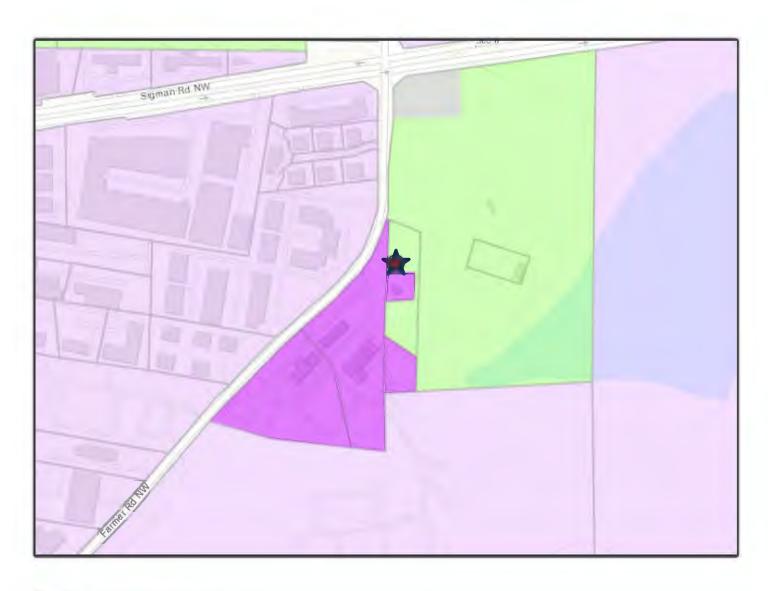

The subject site is a 1.03-acre property developed with a single-family residence. According to property records, the 666 square-foot residence was constructed in 1953 and is in poor condition. The subject site can be accessed from Farmer Road NW. The Rockdale County Stormwater Map indicates that there is stream buffer and floodplain present on the property; however, they do not take up a significant portion of the property.

#### SURROUNDING USE AND ZONING

The subject site is directly adjacent to residential and industrial zoned properties. The following is a summary of surrounding uses and zoning:

ADJACENT ZONING AND CURRENT LAND USE					
Direction	Address	Zoning District	Current Land Use		
North	1565 NW FARMER RD	R-1/M-1	Vacant		
East	1565 NW FARMER RD	R-1/M-1	Vacant		
South	1525 NW FARMER RD	M-2	Outdoor Storage of Machinery and Equipment		
West	1487 NW FARMER RD	M-2	Office Buildings		

#### **ZONING MAP**

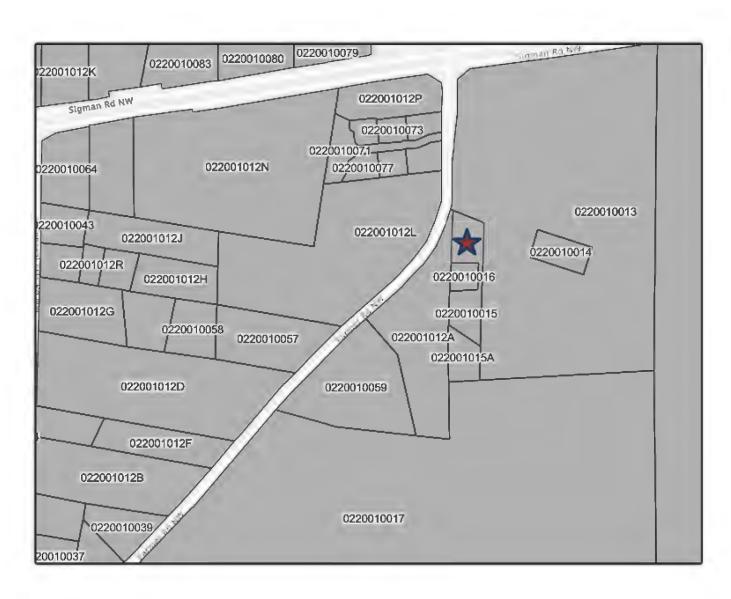

M1 - Limited Inustrial District

M2 - General Industrial District

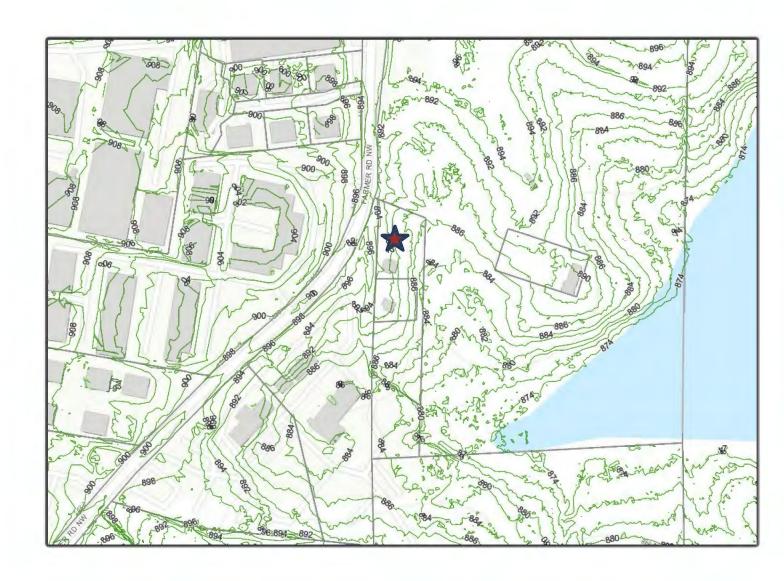

R1 – Single-Family Residential District

#### **FUTURE LAND USE MAP**

Light Industrial

#### **TOPOGRAPHY MAP**

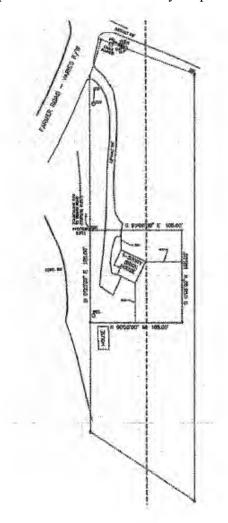

### **AERIAL**

#### **PROJECT SUMMARY**

The applicant is requesting a rezoning for a 1.03-acre parcel. The project includes the following:

- A request to rezone from R-1 (Single-Family Residential) to M-2 (General Industrial) to allow the property to be developed with an auto body shop.
- The applicant intends to demolish the existing residential structure and construct a three-bay industrial building that will house up to three mechanic/auto body shops.

#### INTERNAL AND EXTERNAL AGENCY REVIEW

The applicant must meet all other UDO requirements related to infrastructure improvements. Internal and External agency comments are attached and provided below.

#### Fire

FIRE HYDRANTS SHALL BE SPACED A MAXIMUM 500 FEET APART FOR NON-SPRINKLED STRUCTURES; MAXIMUM OF 600 FT APART FOR SPRINKLED STRUCTURES.

#### **Rockdale Board of Education**

No impact to RCPS.

#### **Stormwater Department**

Based on the submitted rezoning documents, there are existing Rockdale County Future flood plain requirements that must be adhered to by Federal, State and County ordinances.

Tree protection must be adhered to as it relates to the Stormwater Management Department for Land Disturbance Permitting.

#### CHAPTER 328 – Buffers, landscaping, and Tree Protection

#### Sec. 328-15. - Authority, findings, purpose and intent.

- (a) *Authority*. This article is enacted pursuant to the county's exclusive planning authority granted by the Constitution of the State of Georgia, including but not limited to Ga. Const. art. IX, § II, para. IV, and Ga. Const. art. IX, § II, para. III, as well as authority granted by the General Assembly of the State of Georgia, including by not limited to O.C.G.A. § 36-70-3, as well as 1977 Ga. Laws, page 2817, as amended, and 1969 Ga. Laws, page 3639, as amended, and the general police powers of the county and other authority provided by federal, state and local laws applicable to this article.
- (b) Findings, purpose, and intent. It is the intent of this article to provide standards for landscaping and for the preservation and replacement of trees as part of the land development and building construction process in unincorporated areas of the county. The county finds that the existence of adequate tree cover and landscaping in the county directly affects the public health, safety and welfare to comprehensively address these concerns through the adoption of the regulations in this article. The purpose and intent of the board of commissioners in enacting this article are as follows:
- (1) To protect the health, safety and general welfare of the citizens of the county, and to implement the policies and objectives of the comprehensive plan through the enactment of a comprehensive ordinance governing tree preservation and replacement in the county.
- (2) To require landscaping and the preservation and replacement of trees in certain areas within the county in order to ensure the continued health of its citizens through improved air and water quality.
- (3) To provide developers and others active in the county with the appropriate guidance to better ensure proper tree preservation and replacement in the course of the land development process in the county.
- (4) To preserve property values in the county by maintaining a safe, aesthetically pleasing environment.
- (5) To reduce flooding of county rivers and streams by planting trees and other vegetation so as to aid in slowing the rate of stormwater runoff.
- (6) To reduce soil erosion in the county by planting trees and other vegetation so as to aid in prevention of soil loss through stormwater runoff and flooding and to promote stormwater infiltration.
- (7) To reduce noise and glare on adjacent properties from properties that has been extensively developed.
- (8) To conserve energy by cooling surrounding air temperatures through the existence of adequate shade trees.
- (9) To provide improved atmospheric quality by reducing airborne particulates and carbon monoxide and by increasing oxygen through adequate tree cover.

- (10) To promote the saving of trees in nodes throughout a development, rather than as individual trees scattered over a development or around the periphery of a development.
- (11) To prevent clear-cutting and mass grading of land that results in the loss of mature trees, and to ensure appropriate replanting when tree loss does occur.

#### Sec. 328-25. - Requirements for other developments.

- (a) Each new development not covered by <u>section 328-24</u> shall prepare a landscape and tree protection and replacement plan showing compliance with this section.
- (b) The tree protection and replacement plan must, at a minimum, protect or plant 15 units per acre of trees on the land being developed. The tree density calculations shall not utilize trees within required buffers in determining for the overall density factor, existing density factor, or replacement density factor. All new development with eight (8) or more parking spaces, or expanded development that results in eight (8) or more parking spaces, shall provide interior landscaping.
- (c) Rockdale County has given priority to the retention and placement of trees in frontage planting strips and parking lot planting islands. Trees retained or placed in these areas may be used to meet the tree density factor for a project. However, if the tree density factor is met with trees saved or planted in other areas, the tree location guidelines outlined below must still be performed with additional tree plantings.
- (d) Required landscape strips and re-vegetated buffers. Landscape strips shall meet the minimum depth requirements as indicated in the following table. Trees may be planted in groups rather than in a single line. Adjoining residential zoning districts, evergreen trees shall be saved or planted in such density or spacing as to provide an eight-foot tall visual barrier within two years of planting. Required landscaping strips shall not be encroached upon by parking space, driveway surfaces or storm water detention facilities except when complying with requirements below. Driveway crossings may traverse such strip as near to a perpendicular alignment as practical. Signs may be located in the required landscape strip.

#### **CHAPTER 320 – FLOOD DAMAGE PREVENTION**

Sec. 320-1. - Introduction.

- (a) It is hereby determined that:
- (1) The flood hazard areas of Rockdale County, GA are subject to periodic inundation which may result in loss of life and property, health and safety hazards, disruption of commerce and governmental services, extraordinary public expenditures for flood relief and protection, and impairment of the tax base, all of which adversely affect the public health, safety and general welfare.
- (2) Flood hazard areas can serve important stormwater management, water quality, streambank protection, stream corridor protection, wetland preservation and ecological purposes when permanently protected as undisturbed or minimally disturbed areas.
- (3) Effective floodplain management and flood hazard protection activities can:
- a. Protect human life and health,
- b. Minimize damage to private property,

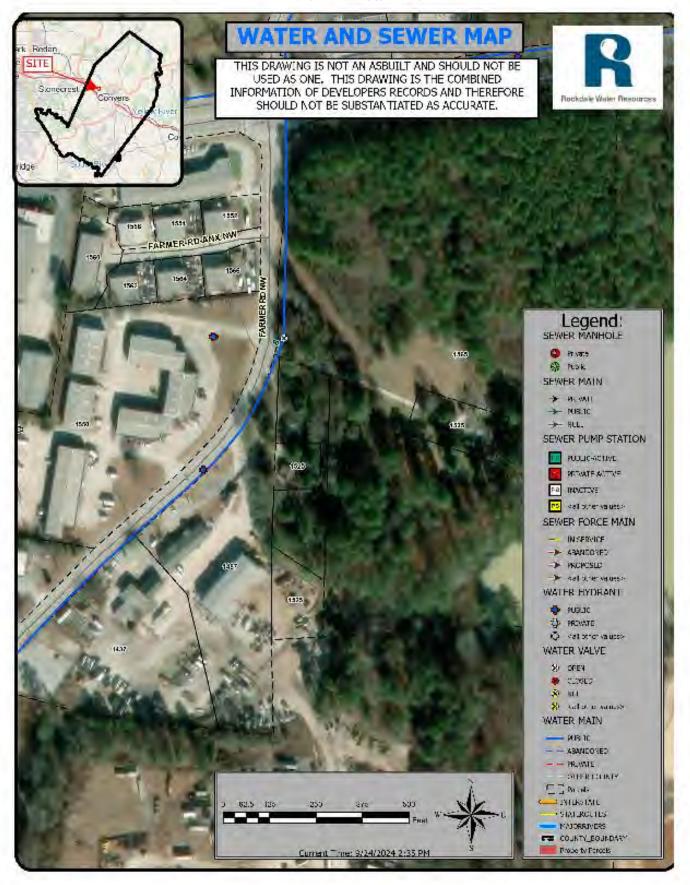

- c. Minimize damage to public facilities and infrastructure such as water and gas mains, electric, telephone and sewer lines, streets and bridges located in floodplains, and
- d. Minimize expenditure of public money for costly flood control projects associated with flooding and generally undertaken at the expense of the general public.
- (b) Article IX, Section II of the Constitution of the State of Georgia and Section 36-1-20(a) of the Official Code of Georgia Annotated have delegated the responsibility to local governmental units to adopt regulations designed to promote the public health, safety, and general welfare of its citizenry. Therefore, Rockdale County, GA, does ordain this chapter and establishes this set of floodplain management and flood hazard reduction provisions for the purpose of regulating the use of flood hazard areas. It is determined that the regulation of flood hazard areas and the prevention of flood damage are in the public interest and will minimize threats to public health and safety, as well as to private and public property.

#### **Transportation Department**

Please provide site plans for Transportation to review.

#### Water/Sewer

Existing 8" DIP Water main along Farmer Rd NW. Public Wastewater is not available. See Map Attached

#### **EVALUATION OF THE REZONING REQUEST**

When considering an application to amend the current zoning designation of a property, the Board of Commissioners, the Planning Commission, and the Planning & Development Department shall consider the following standards as described in Section 238-4(G1) of the UDO:

# A. Is the zoning proposal permitted as a use that is suitable in view of the use and development of adjacent and nearby property?

The subject site is adjacent to industrially zoned properties that are developed with industrial uses including a construction company's offices, storage buildings, and outdoor storage areas. The buildings that house these uses were constructed in the 1970's and 80's. Due to the pre-existing industrial character of the area, staff believe that the proposed rezoning would be consistent with other developments in the area.

# B. Will the zoning proposal adversely affect the existing use or usability of adjacent or nearby property?

The existing uses of adjacent or nearby properties would not be adversely impacted by the requested zoning change. Allowing the rezoning from R-1 (Single-Family Residential) to M-2 (General Industrial) would be consistent with adjacent uses along Farmer Road NW.

# C. Will the property to be affected by the zoning proposal have a reasonable economic use as currently zoned?

Development of the property as R-1 (Single-Family Residential) would not be compatible with the adjacent industrial uses, and therefore, the property's economic use is depreciated as currently zoned. The site would have a greater economic use if rezoned to M-2 (General Industrial).

# D. Will the zoning proposal result in a use which will or could cause excessive or burdensome use of existing streets, transportation, facilities, utilities, or schools?

If land development is permitted in accordance with code requirements, the proposed rezoning would not likely increase adverse impacts on public facilities. Public water is available at the site. Impacts to transportation infrastructure are not anticipated. Development of the site for industrial use will have no impact on the Rockdale County School System.

# E. Is the zoning proposal in conformity with the Future Land Use Map and the policy intent of the Comprehensive Land Use Plan?

The request to rezone the subject property to M-2 (General Industrial) will be in conformance with the Future Land Use category of Light Industrial.

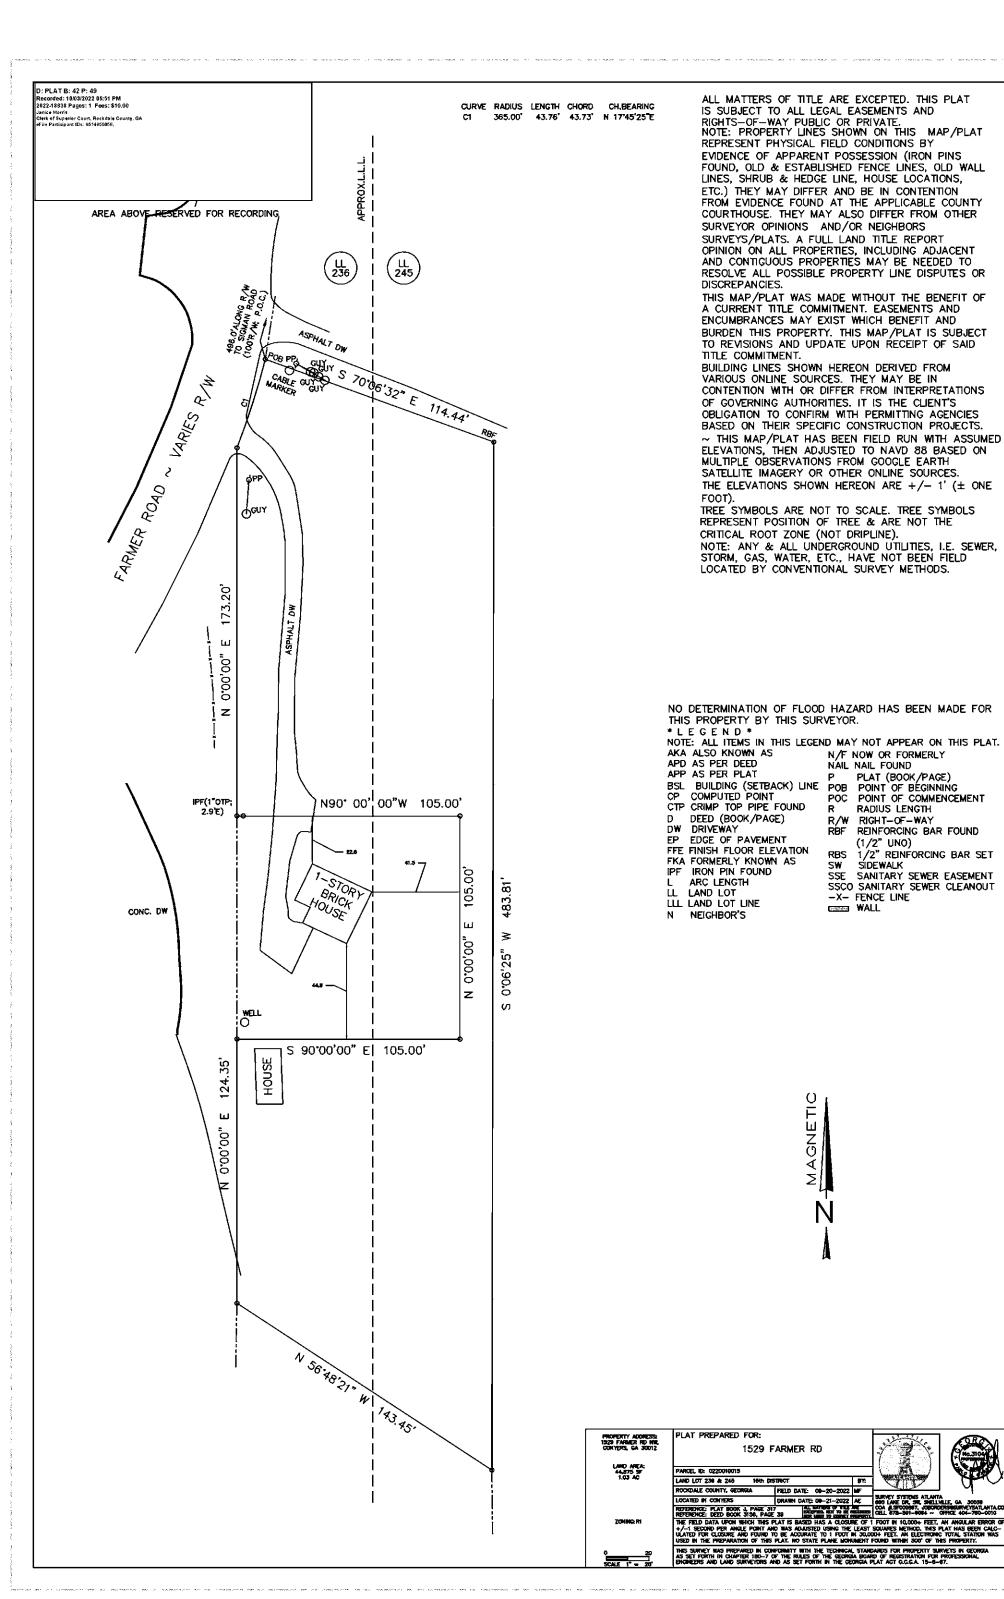

# F. Are other existing or changing conditions affecting the use and development of the property, which give supporting grounds for either approval, or disapproval of the zoning proposal?

Staff believe that a rezoning of the property from R-1 (Single-Family Residential) to M-2 (General Industrial) would allow the property to be utilized in a manner consistent with surrounding properties.

#### PLANNING AND DEVELOPMENT STAFF RECOMMENDATIONS

Based on staff's evaluation of the request, and the standards governing exercise of zoning power, the Department of Planning and Development recommends <u>Approval with Conditions</u> of the request to rezone from R-1 (Single-Family Residential) to M-2 (General Industrial) with the following conditions:

- 1. The proposed development must comply with all Rockdale County Land Disturbance requirements.
- 2. The proposed development must comply with all Rockdale County Standard Design and Construction Details.
- 3. The applicant shall abide by all applicable standards of the Unified Development Ordinance for the M-2 (General Industrial) Zoning District, unless otherwise specified in these conditions or through approval of a variance by the Zoning Board of Appeals.
- 4. Outdoor storage shall not be located in the area between the front of the principal structure and the public street.
- 5. Outdoor storage shall be set back at least 15 feet from any side or rear property lines.
- 6. Outdoor storage shall be screened by a solid fence or wall at least eight feet high or as required to screen view from adjacent property and public streets.
- 7. All utilities shall be placed underground.
- 8. Natural vegetation shall remain on the property until the issuance of a development permit.

#### JUSTIFICATION OF THE REZONING REQUEST

In your own words, type the reason you believe the zoning of the subject property should be amended. Please address the following:

1. The intent of the proposed amendment and the intended timing and phasing of development. State the reasons why you believe the current zoning district classification for the subject rezoning site is incorrect and why approval of a different zoning district classification is appropriate.

Surrounding Properties are listed as industrial.

2. The impact of the proposed amendment on the capacities of public facilities including, but not limited to, transportation facilities, sewage facilities, water supply, parks, drainage, schools, solid waste, and emergency medical facilities.

Impact Should be minimal as the other surrounding Properties are Zoned as Industrial.

3. The impact of the proposed amendment on the natural environment, especially existing trees, water bodies, and water quality.

Should Not be Drastically impacted as we do not Plan to do anything Hazardous.

4. The contribution of the proposed amendment to an orderly and logical development pattern.

Developement that is being proposed Should be Coincide with Other properties that are in the immediate area.

### LIMITED WARRANTY DEED

STATE OF GEORGIA COUNTY OF ROCKDALE APN/Parcel ID: 0220010015

THIS INDENTURE, made this 7th day of September, 2022, between

Mitchell Jermon Alexander and Jacqueline Robinson

as party or parties of the first part, hereinafter called Grantor, and

Oral C Clarke

as party or parties of the second part, hereinafter called Grantee (the words "Grantor" and "Grantee" to include their respective heirs, successors and assigns where the context requires or permits).

WITNESSETH: That Grantor, for and in consideration of the sum of TEN AND 00/100'S (\$10.00) Dollars and other good and valuable consideration in hand paid at and before the sealing and delivery of these presents, the receipt whereof is hereby acknowledged, has granted, bargained, sold, aliened, conveyed and confirmed, and by these presents does grant, bargain, sell, alien, convey and confirm unto the said Grantee, the following described property, to wit:

ALL THAT TRACT OR PARCEL OF LAND LYING AND BEING IN THE 16TH DISTRICT OF ORIGINALLY HENRY, NOW ROCKDALE COUNTY, GEORGIA, SAID LAND BEING PART OF THE ORIGINAL LAND LOT NO. 245, AND MORE FULLY AND PARTICULARLY DESCRIBED AS FOLLOWS:

BEGINNING AT A ROCK CORNER, SAID ROCK BEING LOCATED 660 FEET SOUTH FROM A POINT IN THE CENTER OF THE ROAD LEADING FROM CONYERS TO THE OLD PAUPER FARM, SAID ROCK BEING A CORNER MARK OF THE PROPERTY OF ZACK MARTIN AND MR. ANDERSON AND MR. PLUNKETT; THENCE EAST 120 FEET, MORE OR LESS, TO A ROCK; THENCE NORTH 660 FEET, MORE OR LESS, TO A ROCK; THENCE WEST 120 FEET, MORE OR LESS, TO A POINT IN THE CENTER OF THE ROAD, LEADING FROM CONYERS, GEORGIA, TO THE OLD PAUPER FARM; THENCE SOUTH 660 FEET, MORE OR LESS, TO SAID BEGINNING POINT. SAID TRACT CONTAINING TWO (2) ACRES MORE OR LESS. THE SAID PROPERTY IS BOUNDED AS FOLLOWS; ON THE NORTH BY LANDS OF MARTIN, AND ROAD LEADING FROM CONVERS TO PAUPER FARM: ON THE WEST BY LANDS OF MR. IVER PLUNKETT; ON THE SOUTH BY LANDS OF MR. ANDERSON; AND ON THE EAST BY LANDS OF ZACK MARTIN. SAID PROPERTY BEING A PART OF THE PROPERTY CONVEYED TO ZACK MARTIN BY WARRANTY DEED BY MR., J.W. DAVIS ON OCTOBER 29TH, 1921, AND RECORDED IN DEED BOOK "J", PAGE 317, ROCKDALE COUNTY, GEORGIA RECORDS, AND BEING THE SAME PROPERTY CONVEYED TO WILLIE WORTHEN BY WARRANTY DEED BY MR. ZACK MARTIN ON NOVEMBER 1, 1951 AND RECORDED IN DEED BOOK 31, PAGE 6, ROCKDALE COUNTY, GEORGIA RECORDS. LESS AND EXCEPT: ALL THAT TRACT OR PARCEL OF LAND LYING AND BEING IN LAND LOT 245 OF THE 16TH DISTRICT OF ROCKDALE COUNTY, GEORGIA, AS CONVEYED TO WILLIE F. PRESSLEY, JR. AND MARY L. PRESSLEY BY WARRANTY DEED FROM WILLIE LOVE WORTHEN, DATED SEPTEMBER 13, 1958, AND RECORDED AT DEED BOOK 35, PAGE 247, ROCKDALE COUNTY, GEORGIA RECORDS AND BEING MORE PARTICULARLY DESCRIBED AS FOLLOWS: BEGINNING AT A ROCK CORNER ON THE LINE OF MRS. ZELLA PLUNKETT AND WILLIE WORTHEN; THENCE SOUTH 105 FEET ALONG LANDS OF WILLIE WORTHEN; THENCE EAST 105 FEET ALONG PROPERTY OF WILLIE WORTHEN TO ROCK; THENCE NORTH ALONG LANDS OF MRS. ZELLA PLUNKETT 10S FEET, THENCE WEST ALONG PROPERTY OF WILLIE WORTHEN 105 FEET TO POINT OF BEGINNING. THE ABOVE DESCRIBED PROPERTY BEING BOUNDED ON THE WEST BY MRS. ZELLA PLUNKETT; ON THE SOUTH BY WILLIE WORTHEN; ON THE EAST BY WILLIE WORTHEN; AND ON THE NORTH BY WILLIE WORTHEN.

AN

ALL THAT TRACT OR PARCEL OF LAND LYING AND BEING IN THE 16TH DISTRICT OF ROCKDALE COUNTY, GEORGIA, IN LAND LOT NO. 245 OF SAID DISTRICT, AND BEING MORE FULLY AND PARTICULARLY DESCRIBED AS FOLLOWS: BEGINNING AT A ROCK CORNER ON THE LINE OF MRS. ZELLA PLUNKET AND WILLIE WORTHEN; THENCE EAST 105 FEET ALONG PROPERTY OF WILLIE WORTHEN TO ROCK; THENCE NORTH ALONG LANDS OF MRS. ZELLA PLUNKETT 105 FEET; THENCE WEST ALONG

PROPERTY OF WILLIE WORTHEN 105 FEET TO POINT OF BEGINNING. THE ABOVE DESCRIBED PROPERTY BEING BOUNDED ON THE WEST BY MRS. ZELLA PLUNKETT; ON THE SOUTH BY WILLIE WORTHEN; ON THE EAST BY WILLIE WORTHEN; AND ON THE NORTH BY WILLIE WORTHEN. THE ABOVE DESCRIBED PROPERTY BEING PART OF THE LAND DESCRIBED IN A DEED FROM ZACK MARTIN TO WILLIE WORTHEN DATED NOVEMBER 1, 1951, OF RECORD IN DEED BOOK 31, PAGE 6, RECORDS OF CLERK OF SUPERIOR COURT, ROCKDALE COUNTY, GEORGIA.

Subject to all easements and restrictions of record.

TO HAVE AND TO HOLD the said tract or parcel of land, with all and singular the rights, members and appurtenances thereof, the same being, belonging, or in anywise appertaining, to the only proper use, benefit and behoof of the said Grantee, forever in FEE SIMPLE.

# PLANNING COMMISSION AND BOARD OF COMMISSIONERS ROCKDALE COUNTY PLANNING STAFF REPORT

Case Number: REZ2024-26

Address: 2660 SE Old Salem Road

**Tax Parcel ID:** 0770010007 **Site Area:** 55.34 acre

**Current Zoning:** R-1 (Single-Family Residential District) **Existing Conditions:** Single-Family Residence / Wooded

**Request:** To rezone a 55.34-acre property from R-1 (Single-Family Residential) to CRS

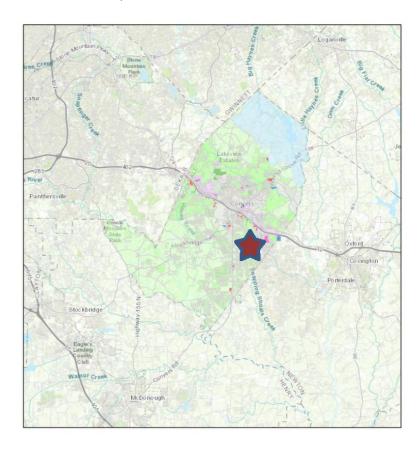

(Collaborative Residential Subdivision) for a single-family residential subdivision.

**Applicant:** Jared Brode/Direct Residential Homes

Owner: Mack H Barnes III

**Staff Recommendation:** Approval with Conditions

PC Hearing Date: October 10, 2024 BOC Hearing Date: October 24, 2024

### ROCKDALE COUNTY DEPARTMENT OF PLANNING & DEVELOPMENT

#### **ZONING HISTORY**

The subject site is located at 2660 SE Old Salem Road and is zoned R-1 (Single-Family Residential District). In 2021 a request was made to rezone a property pursuant to REZ2021-17, however, the property was not rezoned.

### **EXISTING SITE CONDITIONS**

The subject site is a 55.43-acre property developed with a single-family residence. There is a gated driveway across from AnnsBook Swim and Tennis Club INC, AnnsBrook Subdivision. According to property records, the 4,484-square-foot residence was constructed in 1968 and is in average condition. A black wrought-iron fence was installed along the front of the property. Sidewalks are not present along the property's road frontages. The topography of the site generally slopes up from west to east. There's a riverine and floodplain on the property.

### SURROUNDING USE AND ZONING

The subject site is adjacent to residential. The following is a summary of surrounding uses and zoning:

	ADJACENT ZONING AND CURRENT LAND USE							
Direction Address		<b>Zoning District</b>	Current Land Use					
North	2355 Brentmoore Point	R-1	Single-Family Home					
East*	2727 Old Salem Rd Se	R-1	Single-Family Home					
South*	2880 Old Salem Rd	R-1	Single-Family Home					
West	2422 Twin Branches LN	R-1	Single-Family Home					

^{*}THE PROJECT IS SEPARATED FROM THE SUBJECT SITE BY THE OLD SALEM ROAD.

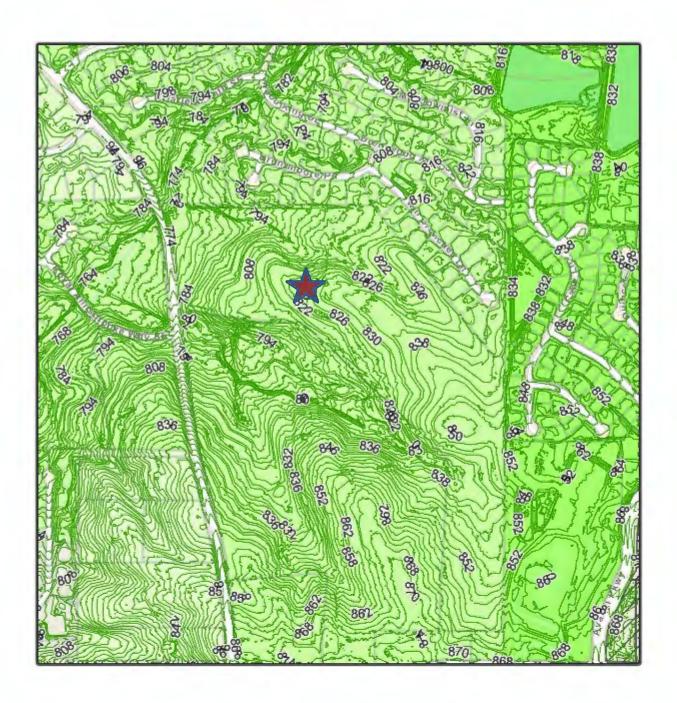

### **ZONING MAP**

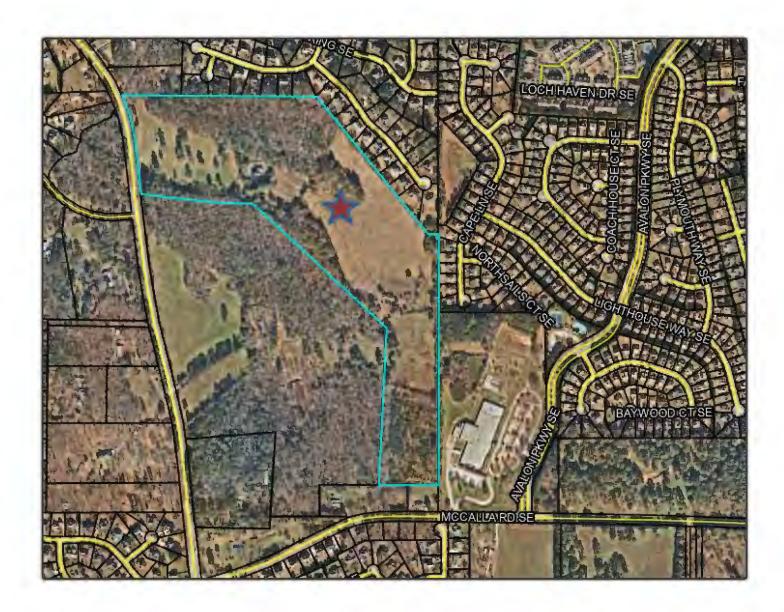

### **FUTURE LAND USE MAP**

### **CONTOUR MAP**

### **AERIAL**

### PROJECT SUMMARY

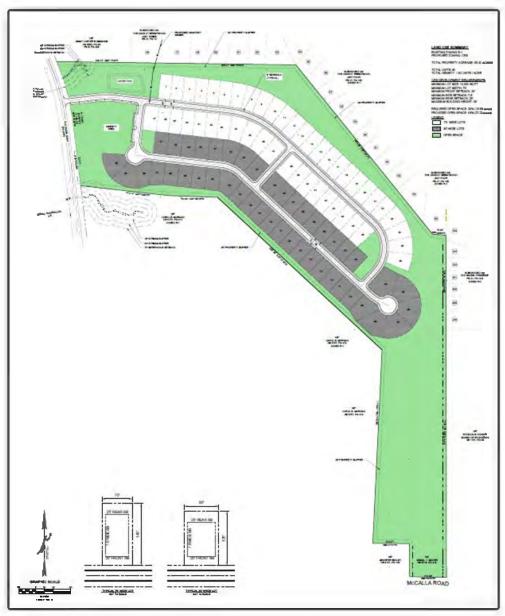

The applicant is requesting a rezoning for a 55.43-acre site. The project includes the following:

- A request to rezone the site from R-1 (Single-Family Residential) to CRS (Collaborative Residential Subdivision) for a 90-unit residential subdivision.
  - Proposed density of 1.62 units per acre.
  - Proposed open space of 49%

The site is currently developed with:

- A single-family residence.
- The only access point is off Old Salem Rd SE.
- Adjacent to residentially zoned properties.

### **SITE PLAN**

### ZONING AND DEVELOPMENT STANDARDS

The following is a summary of applicable development	ent standards from the Rockdale Unified
Development Ordinance (UDO):	ZONING AND
DEVELOPMENT STA	ANDARDS

Standard	Required	Proposed	Meets Standard?
Minimum Lot Size	10,000 SF	10,000 SF	YES
Minimum Lot Width	70 Feet	70 Feet	YES
Setbacks			
Front	20 Feet	20 Feet	YES
Rear	25 Feet	25 Feet	YES
Side	7.5 Feet	7.5 Feet	YES
Transitional Buffer (Adjacent to R-1)	20 Feet	20 Feet	YES

#### INTERNAL AND EXTERNAL AGENCY REVIEW

In addition to the above-referenced development standards, the applicant must meet all other UDO requirements related to infrastructure improvements. Internal and External agency comments are attached and provided below.

### <u>Fire</u>

Fire hydrants shall be spaced 500 ft apart for non-sprinkled structures.

Maximum of 600 ft apart for sprinkled structures.

### **Rockdale Board of Education**

School:	Current Enrollment	Projected Enrollment	Current Capacity
SHS	886	799	1600
MMS	745	699	1012
FSE	625	599	780

All three tier level schools currently have exceeded the projected enrollment for SY24/25. With the project's student impact numbers on these schools, the elementary is impacted the hardest with the reality of many new developments within its zone. FSE is 4.5% over projections and YTD has had a 5% increase in enrollment. With the number of new communities in the FSE zone over the last two years, rezoning becomes a significant consideration.

All three tiers are significantly over the current school year projections but tiers 1 and 3 currently have sufficient growth capacities.

### **Stormwater Department**

### ROCKDALE COUNTY DEPARTMENT OF PLANNING & DEVELOPMENT

Based on the submitted rezoning documents, there are existing State waters, Wetlands, and Rockdale County Future flood plain requirements that must be adhered to by Federal, State and County ordinances. Tree protection must be adhered to as it relates to the Stormwater Management Department for Land Disturbance Permitting.

### ARTICLE IV – STREAM BUFFER PROTECTION Sec. 310 – 103 Land development stream buffer requirements.

- (a) All land development activity, including subdivisions of land and platting activities governed by chapter 302 of the UDO, shall meet the following buffer and setback requirements unless otherwise exempted in this article:
- (1) An undisturbed natural vegetative buffer shall be maintained for 50 feet, measured horizontally, on both banks (as applicable) of the stream as measured from the top of the stream bank.
- (2) An additional setback shall be maintained for 25 feet, measured horizontally, beyond the undisturbed natural vegetative buffer, in which all impervious cover shall be prohibited. Grading, filling and earthmoving shall be minimized within the setback.
- (3) No septic tanks or septic tank drain fields shall be permitted within the buffer or the setback.
- (b) Any land development activity within a buffer established hereunder or any impervious cover within a setback established hereunder is prohibited unless a variance is granted pursuant to section 310-105.

### **Transportation Department**

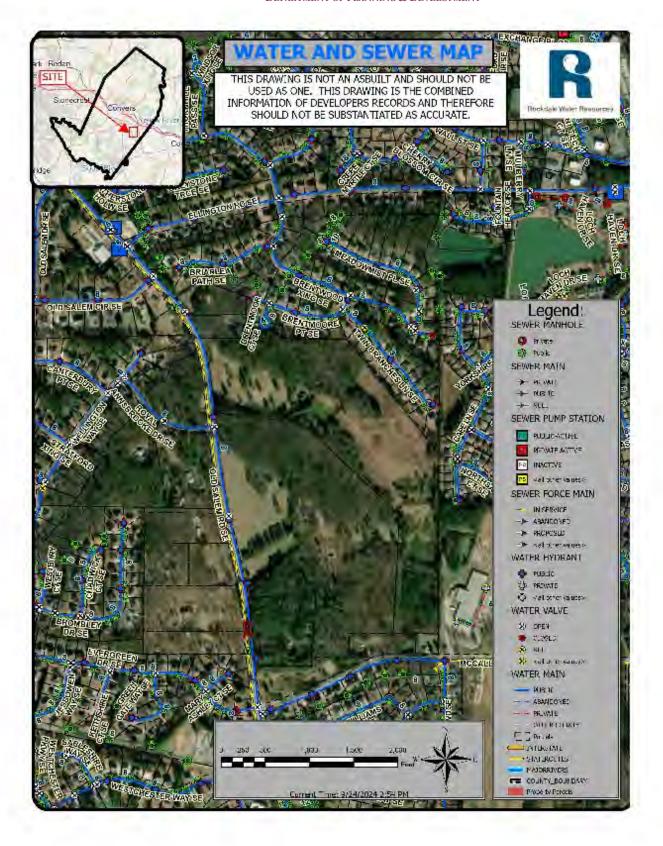

REZ2024-26 2660 Old Salem Road SE

The deceleration lane on Old Salem Road should be a 175' travel lane and 100' taper.

All new developments require a traffic study, traffic calming, and streetlights.

### Water/Sewer

Existing 8" DIP Water main along Old Salem Rd SE. Public Wastewater is available. A downstream sewer analysis must be provided. See Map Attached

#### **EVALUATION OF THE REZONING REQUEST**

1. When considering an application to amend the current zoning designation of a property, the Board of Commissioners, the Planning Commission, and the Planning & Development Department shall consider the following standards as described in Section 238-4(G1) of the UDO:

### A. Is the zoning proposal permitted as a use that is suitable in view of the use and development of adjacent and nearby property?

The subject site is surrounded by residential uses. Further, the properties to the north of the subject site in the OAKS AT BRENTWOOD will be separated from the proposed subdivision by the proposed open space. The subdivision to the west of the subject site, ANNSBROOK SUBDIVISION will also be shielded from view of the proposed residencies by the amenity area, green space, and the required landscape strip.

### B. Will the zoning proposal adversely affect the existing use or usability of adjacent or nearby property?

The existing uses of adjacent or nearby properties would likely not be adversely impacted by the requested zoning change, due to the fact that the proposed subdivision will be less than 100 units. Allowing the rezoning for residential development of the property would be consistent with existing residential uses along Old Salem Road SE. Furthermore, the required open space and transitional buffers will shield the adjacent residential property.

## C. Will the property to be affected by the zoning proposal have a reasonable economic use as currently zoned?

The property has reasonable economic use as currently zoned. However, the site would have a greater economic use if rezoned to CRS (Collaborative Residential Subdivision).

### D. Will the zoning proposal result in a use that will or could cause excessive or burdensome use of existing streets, transportation, facilities, utilities, or schools?

If all land development regulations are permitted in accordance with the code requirements, the proposed rezoning would likely not increase adverse impacts on public facilities. Future residential development on the property will be served by public water. Water and Sewer will be available. Impacts on transportation infrastructure are not anticipated. Residential development will have no impact on the Rockdale County school system.

- E. Is the zoning proposal in conformity with the Future Land Use Map and the policy intent of the Comprehensive Land Use Plan? The request to rezone the subject property to CRS (Collaborative Residential Subdivision) is in conformance with the Future Land Use category of Medium Density Residential and conforms with the policy intent of the Comprehensive Land Use Plan.
- F. Are other existing or changing conditions affecting the use and development of the property, which give supporting grounds for either approval or disapproval of the zoning proposal?

Staff believe that a rezoning of the property from R-1 (Single-Family Residential) to CRS (Collaborative Residential Subdivision) would allow the property to have greater economic use and allow the property to be in conformance with the Medium Density Residential Future Land Use designation.

### ROCKDALE COUNTY DEPARTMENT OF PLANNING & DEVELOPMENT

### PLANNING AND DEVELOPMENT STAFF RECOMMENDATIONS

Based on the staff's evaluation of the request, and the standards governing the exercise of zoning power, the Department of Planning and Development recommends *Approval with Conditions* of the request to rezone from R-1 (Single-Family Residential) to CRS (Collaborative Residential Subdivision) with the following conditions:

- 1. The proposed development shall comply with all Rockdale County Land Disturbance requirements.
- 2. The applicant shall abide by all applicable standards of the Unified Development Ordinance for the CRS Zoning District unless otherwise specified in these conditions or through approval of a variance by the Zoning Board of Appeals.
- 3. The development shall provide a 20-foot-wide transitional buffer adjacent to residentially zoned properties. Buffers shall be replanted where sparsely vegetated and shall be subject to the review and approval of the Director of Planning and Development.
- 4. The applicant shall provide a 20-foot-wide landscape strip adjacent to the Old Salem Rd SE right of way.
- 5. In accordance with Sec. 332-9 of the Unified Development Ordinance. A five-foot-wide concrete sidewalk shall be constructed adjacent to the Salem Rd right-of-way. A strip of grass or other approved landscape material at least four feet in width shall separate all sidewalks from adjacent curbs on public streets.
- 6. All utilities shall be placed underground.
- 7. Natural vegetation shall remain on the property until the issuance of a development permit.

# REZONING (ZONING MAP AMENDMENT) AND ALTERATIONS TO CONDITIONS OF APPROVAL APPLICATION CHECKLIST

This application is required for Rezoning submittals that do NOT require a Future Land Use (FLU) Map Amendment application. Additionally, this application is required for Alterations to or Repeal of Conditions of Approvals. The Instructions provide further details.

		FILING INF	ORMATION (OF	FICE USE ONLY)		
Filing Date:	BOC 1R WS:	BOC 1R VS:	PC Hearing:	BOC Hearing:	BOC 2R WS:	BOC 2R VS:
			PROPERTY	Y		
Property Address(es): 2660 SE Old Salem Road (With City and Zip Code) Convers, GA 30013				arcel Numbers: 0010007		
Total Acreage: 55.34			Number o	of Properties: 1		
Per 2010 House	Bill 403 detailed check	icts of itams required	to be submitted for each	h type of project are su	anlemental to this ann	lication Each item must

Per 2019 House Bill 493, detailed checklists of items required to be submitted for each type of project are supplemental to this application. Each item must be checked off and a page number where the item is located must be noted and included with the application. The applicant must sign the affidavit, at the end of the application and each required checklist, certifying that all required items are provided. If there are questions regarding items required for your specific project, contact staff for clarification prior to submitting the application.

Applications that do not provide documentation or required materials will be noted as incomplete and may result in delays in the Board of Commissioners', Planning Commission's, or Staff's review of the application and/or denial of the request. The Board of Commissioners and Planning Commission reserves the right to require additional information if it believes that the submission of such information is necessary to understand the nature of the intended activity.

Revisions made to the applications after the submittal deadline and prior to the Board of Commissioners' or Planning Commission's Public Hearing may be continued to the following month's hearing.

The Unified Development Ordinance (UDO) Sec. 202.6 provides the zoning districts that are permitted within each FLU Category. If the FLU Category permits the proposed zoning district, this application is required.

The filing fee is based upon the number of properties, the amount of acreage of each property that require a Rezoning, the requested Zoning District that is being requested, and the amount of acreage of each property to be rezoned.

### REQUIRED Pre-Application Conference (UDO Sec. 238-4(d)(1)):

Date attended and with which staff member:

- Completed Application: Provide one (1) digital copy and three (3) hard copies of the entire submittal packet.
- Property Information (Page 4)
- Contact Information (Page 4): Property Owner(s), Applicant, Authorized Agent, Attorney.
- Site and Development Information (Page 5): General information on the property, services and utilities.
- Justification of the Request (Page 6): In your own words, type the reason you believe the zoning of the subject property should be amended.
- Rezoning Review Standards (Page 7): Provide justification for each of the review standards listed in UDO Sec. 238-4(g)(1). The Board of Commissioners, the Planning Commission, and the Department will use these standards to evaluate the request.
- Conditions of Approval (Page 8): UDO Sec. 238-15. Provide justification for each of the review standards listed in UDO Sec. 238-4(g)(1). The Board of Commissioners, the Planning Commission, and the Department will use these standards to evaluate the request.
- Applicant Certification (Page 9)
- Ownership Statement and Campaign Contribution Disclosure Statement (Page 10): If the property is listed in the name of more than one individual or entity, each owner must sign all documents. Property owner(s) signature(s) must be notarized. If the property has been sold within the last 90 days, a copy of the deed with the new owner(s) name(s) is required. Ownership of property will be verified by staff. The owner(s) of the property is required to disclose political campaign contributions. Disclosures must be notarized.
- Agent Authorization Form and Campaign Disclosure Statement (Page 11): If the owner of the property wishes to have someone represent his/her interest in all matters relating to a rezoning application, the notarized signatures of the owner(s) and agent are required. Agents are required to disclose political campaign contributions. Disclosures must be notarized.

K	Attorney Authorization Form and Campaign Disclosure Statement (Page 12): If the owner of the property wishes to have an attorney represent his/her interest in all matters relating to this application, the notarized signatures of the current owner(s) and attorney are required. Attorneys are required to disclose political campaign contributions. Disclosures must be notarized.

### JUSTIFICATION OF THE REZONING REQUEST

In your own words, type the reason you believe the zoning of the subject property should be amended. Please address the following:

1. The intent of the proposed amendment and the intended timing and phasing of development. State the reasons why you believe the current zoning district classification for the subject rezoning site is incorrect and why approval of a different zoning district classification is appropriate.

The existing zoning of R-1 provides an allowable density less than the designated future land use specified by the most recent comprehensive plan update adopted in 2023. In addition, the conceptual design allows for and provides both open space and protection of natural resources as specified for the intent of the zoning classification of CRS as applied for by the applicant.

2. The impact of the proposed amendment on the capacities of public facilities including, but not limited to, transportation facilities, sewage facilities, water supply, parks, drainage, schools, solid waste, and emergency medical facilities.

Water will be provided by the County at an approximate rate slightly less than thirty thousand GPO, and sewer services will be provided by a connection to an existing sanitary sewer line to the North of this property. Industry standards provide an estimated 150-170 children for this development to attend County schools resulting in approximate 1 percent increase in comparison to the existing school system attendance population. This development will only contribute an approximate 90 trips to the existing road system each day and therefore will not congest the existing routes especially considering the proximity to the nearby school.

3. The impact of the proposed amendment on the natural environment, especially existing trees, water bodies, and water quality.

The existing property does not contain a heavily forested area resulting in minimal tree and canopy displacement while the streams adjacent to the property are either included in open space or areas not containing lots for development resulting in minimal to no impact of the existing surface waters and associated environment.

4. The contribution of the proposed amendment to an orderly and logical development pattern.

The rezoning of this property conforms with both the character area and density designation specified by the most recent adoption of the County's comprehensive plan and only slightly exceeds the allowable density under current zoning classification. This site is also nearby to other recently developed and existing developed areas preventing the creation of an isolated community.

#### **REZONING REVIEW STANDARDS**

Additionally, provide justification for each of the following review standards (UDO Sec. 238-4(g)(1)). The Board of Commissioners, the Planning Commission and the Department will use these standards to evaluate the request:

a. Whether a proposed rezoning will permit a use that is suitable, in view of the use and development of adjacent and nearby property.

Yes; the surrounding properties consist of residential neighborhoods similar to the one being proposed.

b. Whether the property to be affected by a proposed rezoning has a reasonable economic use as currently zoned.

No; the current cost to develop lots due to nationwide labor shortage in land development is only negated by the additional lots added in this proposed rezoning. If developed as currently zoned, the property would also not be in compliance with the County's comprehensive plan for density.

c. The impact of the proposed amendment on the natural environment, especially existing trees, water bodies and water quality.

The existing property does not contain a heavily forested area resulting in minimal tree and canopy displacement while the streams adjacent to the property are either included in open space or areas not containing lots for development resulting in minimal to no impact of the existing surface waters and associated environment.

d. Whether the proposed rezoning will result in a use that will or could cause an excessive or burdensome use of existing streets, transportation facilities, utilities or schools.

No burden created; Industry standards provide an estimated 150-170 children for this development to attend County schools resulting in approximate 1 percent increase in comparison to the existing school system attendance population. This development will only contribute an approximate 90 trips to the existing road system each day and therefore will not congest the existing routes especially considering the proximity to the nearby school.

e. Whether the proposed rezoning is in conformity with the policy and intent of the comprehensive plan.

Yes; the comprehensive plan specifies a recommended density of 2-4 dwelling units per acre for this land use designation whereas the overall proposed density is slightly under at 1.62 dwelling units per acre in order to not overtax the existing infrastructure in the area. The character area of traditional residential neighborhood as required by the comprehensive plan is also upheld by this proposed application.

f. Whether there are other existing or changing conditions affecting the use and development of the property that give supporting grounds for either approval or disapproval of the proposed rezoning.

The intent of CRS zoning is to promote conservation and preserve natural elements - with the adherence to the comprehensive plan, the open space, and protection of existing streams adjacent to and on the site, this proposal meets the defined intent of the requested zoning classification.

g. Whether, and the extent to which, the proposed amendment would result in significant adverse impacts on the natural environment.

As referenced throughout this application, the current conceptual design limits impact to the existing streams to a bare minimum while the existing site is not heavily forested resulting in minimal tree canopy loss as a result of development.

h. The feasibility of serving the property with public wastewater treatment service and the impacts of such on the wastewater system; and, if an alternative wastewater treatment method is proposed, whether such wastewater treatment method is authorized in Rockdale County and will have a detrimental impact on the environment.

The intent for this development will be connection to Rockdale County sewer services to the North of this development at a stub from an existing sanitary sewer line as the lots are too small to accommodate a septic system per current regulations. At only 90 total lots, this development will only result in an approximate wastewater demand slightly exceeding twenty thousand GPO in comparison to the average 37,500 GPO for a standard industrial warehouse.

### ALTERATIONS TO OR REPEAL OF THE CONDITIONS OF APPROVAL

a. List the existing conditions of approval:
n/a; new proposal
b. List the existing conditions of approval that are proposed to be altered and/or repealed:
n/a; new proposal  c. Provide justification for the proposal:
n/a; new proposal
Tiva, not proposal

### APPLICANT CERTIFICATION

Please read and initial the following statements:

1 10000 100	ac and minute the rono	5 State Miles					
<u>JB</u> 1.	I hereby request the County consider the information contained within this application relative to the property shown on the attached plats and site plan and further request that this item be placed on the Planning Commission (PC) and/or Board of Commissioners (BOC) Agenda for a public hearing.						
JB 2.	I understand that my request will be rejected if all the necessary information and/or requirements are not presented.						
JB 3.	. I understand that I have an obligation to present all necessary information required by the Rockdale County Department of Planning & Development (P&D) to enable the PC and/or BOC to make an informed determination on my request. I will seek advice of P&D Staff or an attorney if I am not familiar with the zoning and land use requirements.						
<u>JB</u> 4.	I understand that my request will be acted upon at the PC and BOC Public Hearings and that I am required to be present or to be represented by the authorized representative as indicated on this application, so that someone is available to present all facts and answer questions. I understand that failure to appear at a public hearing may result in the postponement or denial of my request. I further understand that it is my responsibility to be aware of relevant public hearing dates and times regardless of notification from Rockdale County.						
<u>JB</u> 5.	5. The Rockdale County Unified Development Ordinance requires a public participation sign on the subject property. In order to ensure that the correct information is included on the public participation sign, P&D will prepare the sign and post the sign.						
<b>JB</b> _ 6.	JB 6. I hereby acknowledge that I understand the requirements listed on the checklist for what constitutes a complete application. I have checked off each box and included a page number where the item is located. I confirm that the requirements for a complete application have been met.

			addition.		

<u>ALL THAT TRACT OR PARCEL OF</u> land lying and being in Land Lots 203 and 204, 10th District, Rockdale County, Georgia, being more particularly described as follows:

BEGINNING at the Land Lot corner common to Land Lots 203, 204, 213 and 214, thence leaving said Land Lot corner South 38°54'43" East a distance of 1258.09 feet to a point; thence South 85°30'33" East a distance of 78.52 feet to a point; thence South 00°02'08" East a distance of 540.10 feet to a point; thence South 00°04'16" East a distance of 1242.76 feet to a point; thence South 00°07'30" East a distance of 195.24 feet to a point located on the northern right of way of McCalla Road (public 60 feet right of way); thence along said right of way North 89°03'07" West a distance of 213.70 feet to a point; thence leaving said right of way North 00°02'23" West a distance of 192.12 feet to a point; thence North 89°41'31" West a distance of 212.27 feet to a point; thence North 02°44'26" East a distance of 1119.84 feet to a point; thence North 47°10'16" West a distance of 1297.33 feet to a point; thence North 87°59'16" West a distance of 281.62 feet to a point; thence North 83°34'50" West a distance of 513.12 feet to a point located on the eastern right of way of Old Salem Road (public 80 feet right of way); thence along said right of way the following courses and distances: North 06°54'53" West a distance of 321.51 feet to a point; thence 190.54 feet along a curve to the left, said curve having a chord of North 09°15'28" West 190.49 feet and a radius of 2428.78 feet to a point; thence 221.73 feet along a curve to the left, said curve having a chord of North 18°08'38" West 221.47 feet and a radius of 1335.60 feet to a point located on the intersection of said right of way with the Land Lot Line common to Land Lots 204 and 213; thence leaving said right of way and along said Land Lot Line South 89°12'04" East a distance of 429.74 feet to a point; thence continuing along said Land Lot Line South 89°13'04" East a distance of 953.21 feet to a point, being the **POINT** OF BEGINNING.

Said tract contains 55.434 Acres.

### **STATEMENT OF INTENT**

Rezoning from R-1 to CRS to allow for a Single-Family Residential Community

For

**Direct Residential Communities** 

For

+/- 55.34 Acres of Land
Being Parcel No. 0770010007
With frontage along Old Salem Rd SE

### I. <u>LETTER OF INTENT</u>

Direct Residential Communities, the applicant, is seeking to develop a detached, single-family residential neighborhood on +/-55.34 acres of land being tax parcel 0770010007 having frontage on Old Salem Road SE. The applicant is seeking rezoning from R-1, Single-Family Residential District, to CRS, Collaborative Residential Subdivision with the proposal of a development containing 90 residential dwelling units at gross density of 1.63 units per acre.

### **II. Zoning Conformity**

As stated in section 206-5(a)(1) of the Rockdale County Ordinances Subpart B – Planning and Development, a CRS (Collaborative Residential Subdivision) is intended to implement the policies of the Board of Commissioners adopted in the Rockdale County Comprehensive Plan. In addition, this zoning classification is intended to allow and encourage conservation in areas where sensitive natural resources are to be preserved. This development has been conceptually planned to produce minimal to no impact to the existing streams adjacent to the parcels intended for this community. Furthermore, the associated buffers for protecting the aforementioned streams have been conceptually planned for minimal location on areas of lots containing impervious surfaces thus protecting the natural environment. The associated parcels are currently zoned R-1 allowing for 1.45 dwelling units per acre whereas the desired CRS zoning allows for up to 3.14 dwelling units per acre. However, the proposed conceptual plan only results in a gross density of 1.63 dwelling units per acre. This development proposal meets both the Future Land Use Map designation of medium density residential and the traditional neighborhood residential character area.

# PLANNING COMMISSION AND BOARD OF COMMISSIONERS ROCKDALE COUNTY PLANNING STAFF REPORT

Case Number: SUP2024-04

Address: 2156 Tucker Mill Road

Tax Parcel IDs:029002013ESite Area:14.27 acres

Current Zoning: A-R (Agricultural Residential)

Future Land Use: Medium Density Residential

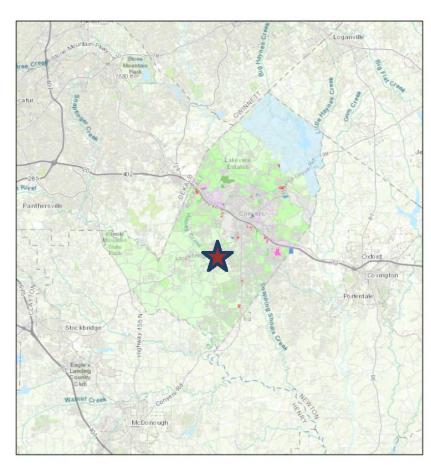

**Existing Conditions:** Single-Family Residence with Barn

**Request:** A special use permit to allow for the operation of Veterinarian Services

**Applicant:** Mr. Glyne Greenidge **Owner:** Mr. Glyne Greenidge

**Staff Recommendation:** Approval with Conditions

PC Hearing Date: October 10, 2024 BOC Hearing Date: October 24, 2024

# **Zoning History**

The subject property is zoned A-R (Agricultural Residential). No prior zoning requests are on record for this property.

### **Existing Site Conditions**

The subject site is a 14.27-acre property located along Tucker Mill Road. The property is accessed by a residential driveway from Tucker Mill Road with a separate entrance to existing barn building. The site is developed with a 2,135 square-foot, single-family residence that was constructed in 1989 according to tax records. The property is open and pastural with a wooded area on the back of the parcel. There are no streams or waterways located on the property.

## **Surrounding Use and Zoning**

The subject site is surrounded by residentially zoned properties. The following is a summary of surrounding uses and zoning:

Adjacent Zoning and Current Land Use						
Direction	Address	Zoning District	Current Land Use			
	2076 SW Walker Rd	A-R	86 acre Farmland			
North	SW Tucker Mill Rd	A-R	1.2 acre undeveloped land			
East	2076 SW Walker Rd	A-R	86 acre Farmland			
West	New Haven Subdivision with Tucker Mill SW Road separating from property	A-R	Single-Family Residential			
South	2208 Happy Hollow Ct					
	2204 Happy Hollow Ct	A-R	Single-Family Residential			
	2198 Happy Hollow Ct					

# **ZONING MAP**

# **FUTURE LAND USE MAP**

# **CONTOUR MAP**

# **AERIAL MAP**

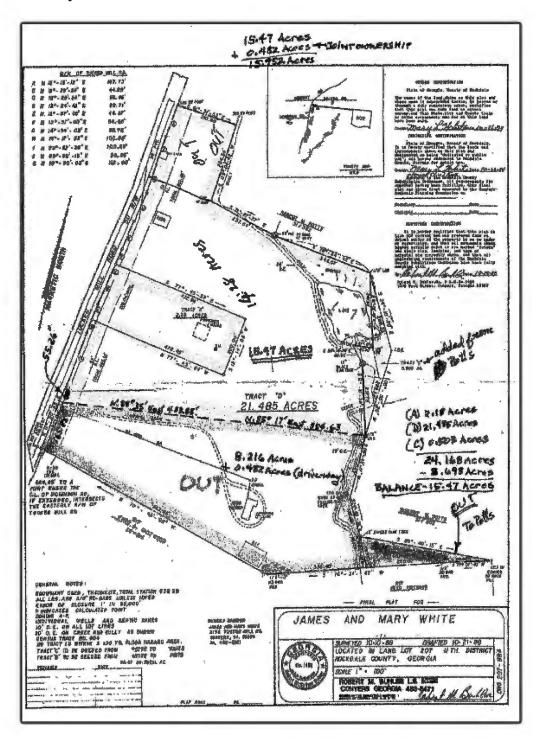

# **Project Summary**

The applicant is requesting a special use permit for to provide veterinarian services to the community.

- The existing barn on the property will be utilized for the veterinarian services
- A driveway with parking to accommodate patrons.
- The property is connected to public water and served by a septic system.

# Survey

### INTERNAL AND EXTERNAL AGENCY REVIEW

In addition to the above-referenced development standards, the applicant must meet all other UDO requirements related to infrastructure improvements. Internal and External agency comments are attached and provided below.

### Fire

Where a portion of the facility or building hereafter constructed or moved into or within the jurisdiction is more than 400 feet (122 m) from a hydrant on a fire apparatus access road as measured by an approved route around the exterior of the facility or building, on-site fire hydrants and mains shall be provided where required by the fire code official.

EMERGENCY VEHICLE ACCESS ROAD SHALL BE CAPABLE OF SUPPORTING A MINIMUM 75,00 LBS SHALL BE MADE OF AN ALL WEATHER SURFACE; SHALL EXTEND TO WITHIN 150 FEET OF THE STRUCTURE.

### **Rockdale Board of Education**

No impact to RCPS

### **Stormwater Department**

Based on the submitted rezoning documents, there are existing State waters, Wetlands, and Rockdale County requirements that must be adhered to by Federal, State and County ordinances.

Tree protection must be adhered to as it relates to the Stormwater Management Department for Land Disturbance Permitting.

# ARTICLE IV – STREAM BUFFER PROTECTION Sec. 310 – 103 Land development stream buffer requirements.

- (a) All land development activity, including subdivisions of land and platting activities governed by chapter 302 of the UDO, shall meet the following buffer and setback requirements unless otherwise exempted in this article:
- (1) An undisturbed natural vegetative buffer shall be maintained for 50 feet, measured horizontally, on both banks (as applicable) of the stream as measured from the top of the stream bank.
- (2) An additional setback shall be maintained for 25 feet, measured horizontally, beyond the undisturbed natural vegetative buffer, in which all impervious cover shall be prohibited. Grading, filling and earthmoving shall be minimized within the setback.
- (3) No septic tanks or septic tank drain fields shall be permitted within the buffer or the setback.
- (b) Any land development activity within a buffer established hereunder or any impervious cover within a setback established hereunder is prohibited unless a variance is granted pursuant to section 310-105.

# CHAPTER 324 – ENVIRONMENTAL PLANNING CRITERIA Sec. 324-2. - Protection of wetlands.

- (a) *Purpose and intent*. Pursuant to O.C.G.A. <u>12-2-8</u> and the DNR, environmental protection division's Rules for Environmental Planning Criteria chapter 391-3-16, this section establishes regulations to promote the wise use of wetlands and protect them from alterations that will significantly affect or reduce their primary functions for water quality, floodplain and erosion control, groundwater recharge, aesthetic natural areas and wildlife habitat areas.
- (b) Wetlands development permit requirements. No activity or use, except those identified in subsection (c), shall be allowed in the wetlands without issuance of a local development permit. Local permits will be issued only if the proposed use is in compliance with the requirements of the underlying zoning district and this section. Furthermore, if the area of proposed development is located within 100 feet of the wetlands boundaries, as established by Figure IV-2 of the Rockdale County Comprehensive Land Use Plan, a U.S. Army Corps of Engineers delineation is required under Section 404 of the Clean Water Act. If wetlands are altered or degraded, mitigation to offset losses may be required as a condition of a Section 404 permit. Local development permits will not be issued until after any necessary Section 404 permits have been secured.

# CHAPTER 328 – Buffers, landscaping, and Tree Protection

### Sec. 328-15. - Authority, findings, purpose and intent.

- (a) *Authority*. This article is enacted pursuant to the county's exclusive planning authority granted by the Constitution of the State of Georgia, including but not limited to Ga. Const. art. IX, § II, para. IV, and Ga. Const. art. IX, § II, para. III, as well as authority granted by the General Assembly of the State of Georgia, including by not limited to O.C.G.A. § 36-70-3, as well as 1977 Ga. Laws, page 2817, as amended, and 1969 Ga. Laws, page 3639, as amended, and the general police powers of the county and other authority provided by federal, state and local laws applicable to this article.
- (b) *Findings, purpose, and intent*. It is the intent of this article to provide standards for landscaping and for the preservation and replacement of trees as part of the land development and building construction process in unincorporated areas of the county. The county finds that the existence of adequate tree cover and landscaping in the county directly affects the public health, safety and welfare to comprehensively address these concerns through the adoption of the regulations in this article. The purpose and intent of the board of commissioners in enacting this article are as follows:
- (1) To protect the health, safety and general welfare of the citizens of the county, and to implement the policies and objectives of the comprehensive plan through the enactment of a comprehensive ordinance governing tree preservation and replacement in the county.
- (2) To require landscaping and the preservation and replacement of trees in certain areas within the county in order to ensure the continued health of its citizens through improved air and water quality.
- (3) To provide developers and others active in the county with the appropriate guidance to better ensure proper tree preservation and replacement in the course of the land development process in the county.
- (4) To preserve property values in the county by maintaining a safe, aesthetically pleasing environment.
- (5) To reduce flooding of county rivers and streams by planting trees and other vegetation so as to aid in slowing the rate of stormwater runoff.
- (6) To reduce soil erosion in the county by planting trees and other vegetation so as to aid in prevention of soil loss through stormwater runoff and flooding and to promote stormwater infiltration.
- (7) To reduce noise and glare on adjacent properties from properties that has been extensively developed.
- (8) To conserve energy by cooling surrounding air temperatures through the existence of adequate shade trees.
- (9) To provide improved atmospheric quality by reducing airborne particulates and carbon monoxide and by increasing oxygen through adequate tree cover.
- (10) To promote the saving of trees in nodes throughout a development, rather than as individual trees scattered over a development or around the periphery of a development.
- (11) To prevent clear-cutting and mass grading of land that results in the loss of mature trees, and to ensure appropriate replanting when tree loss does occur.

### Sec. 328-25. - Requirements for other developments.

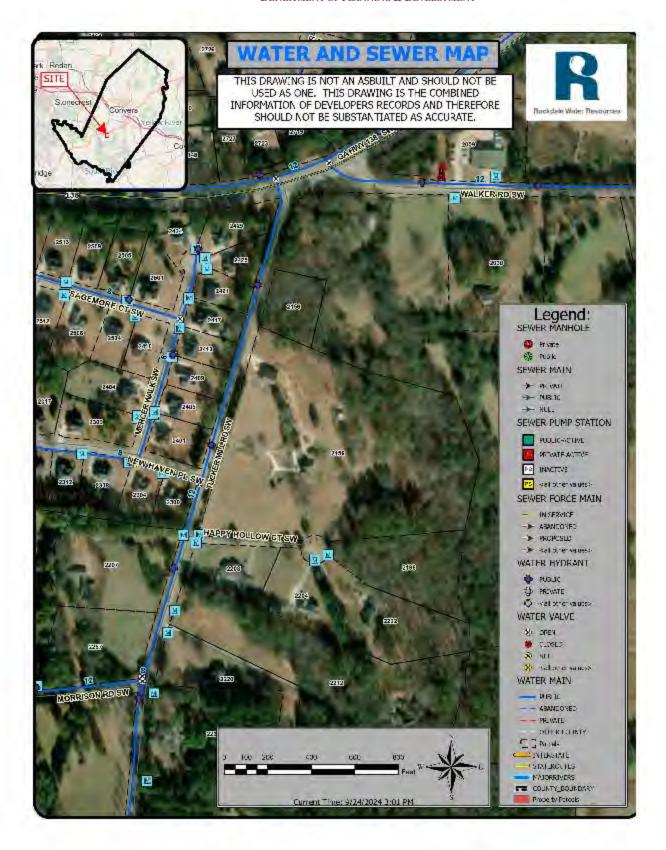

- (a) Each new development not covered by <u>section 328-24</u> shall prepare a landscape and tree protection and replacement plan showing compliance with this section.
- (b) The tree protection and replacement plan must, at a minimum, protect or plant 15 units per acre of trees on the land being developed. The tree density calculations shall not utilize trees within required buffers in determining for the overall density factor, existing density factor, or replacement density factor. All new development with eight (8) or more parking spaces, or expanded development that results in eight (8) or more parking spaces, shall provide interior landscaping.
- (c) Rockdale County has given priority to the retention and placement of trees in frontage planting strips and parking lot planting islands. Trees retained or placed in these areas may be used to meet the tree density factor for a project. However, if the tree density factor is met with trees saved or planted in other areas, the tree location guidelines outlined below must still be performed with additional tree plantings.
- (d) Required landscape strips and re-vegetated buffers. Landscape strips shall meet the minimum depth requirements as indicated in the following table. Trees may be planted in groups rather than in a single line. Adjoining residential zoning districts, evergreen trees shall be saved or planted in such density or spacing as to provide an eight-foot tall visual barrier within two years of planting. Required landscaping strips shall not be encroached upon by parking space, driveway surfaces or storm water detention facilities except when complying with requirements below. Driveway crossings may traverse such strip as near to a perpendicular alignment as practical. Signs may be located in the required landscape strip.

# **Transportation Department**

Please Provide site plans for Transportation to review.

# Water/Sewer

Existing 12" DIP Water main along Tucker Mill Rd SW. Public Wastewater is not available. See Map Attached

### EVALUATION OF THE SPECIAL USE PERMIT REQUEST

- 1. When considering an application to amend the current zoning designation of a property, the Board of Commissioners, the Planning Commission, and the Planning & Development Department shall consider the following standards as described in Section 238-4(G1) of the UDO:
  - A. Whether or not the proposed plan is consistent with all of the requirements of the zoning district in which the use is proposed to be located, including required parking, loading, setbacks and transitional buffers.

The proposal is consistent with the requirements of the A-R zoning district and has sufficient space for parking. The property is 14.27 acres in size and has sufficient space between the building that will house the Veterinary Services and surrounding residential properties.

B. Compatibility of the proposed use with land uses on adjacent properties and other properties within the same zoning district, including the compatibility of the size, scale and massing of proposed buildings in relation to the size, scale and massing of adjacent and nearby lots and buildings.

Staff believes that the proposed special use permit request for Veterinarian Services would be suitable in view of the adjacent residential uses. The subject property is surrounded by A-R (Agricultural Residential) properties ranging in size from one to 86 acres. Farmland spans most of the subject property's north and east property line. Veterinarian Services may be permitted within the A-R zoning district in accordance with Section 218-13 (zzz) upon approval of a special use permit by the Board of Commissioners. A special use permit may be appropriate where supplemental activities and applicable conditions are imposed to protect surrounding properties from noise and traffic.

C. Adequacy of the ingress and egress to the subject property, and to all proposed buildings, structures, and uses thereon, including the traffic impact of the proposed use on the capacity and safety of public streets providing access to the subject site.

Traffic flow to and from the property will be minimal. The Fire Department will require emergency vehicle access road to be capable of supporting a minimum 75,00 lbs and shall be made of an all weather surface; shall extend to within 150 feet of the structure.

D. Consistency with the county's wastewater treatment system, including the feasibility and impacts of serving the property with public wastewater treatment service and, if an alternative wastewater treatment method is proposed, whether such wastewater treatment method will have a detrimental impact on the environment.

The Rockdale County Water Resources Department stated that public water is available but wastewater is not; therefore, there will be no impact to the wastewater treatment system. The applicant will be required to work with the Environmental Health Department to ensure that the septic system meets all requirements.

E. Adequacy of other public facilities and services, including stormwater management, schools, parks, sidewalks, and utilities, to serve the proposed use.

Impacts to public facilities are not impacted. The applicant will be required to obtain any necessary permits and bring the existing property up to commercial code for the intended occupancy and use. Schools, parks, and sidewalks will not be impacted by the proposed use.

F. Whether or not the proposed use will create adverse impacts upon any adjacent or nearby properties by reason of noise, smoke, odor, dust, or vibration, or by the character and volume of traffic generated by the proposed use.

The proposed use will not create any smoke, odor, dust, or vibration. Minimal noise and traffic will be generated; the applicant has stated that his operation will be small-scale.

# G. Whether or not the proposed use will create adverse impacts upon any adjoining land use by reason of the manner of operation or the hours of operation of the proposed use.

The proposed use should not create any adverse impacts to adjacent properties, as the proposed use is on a 14.27-acre property with adequate space between the proposed use and adjacent properties. Furthermore, the Future Land Use of the subject property is Medium Density Residential and the request for a Veterinarian Service Facility on an A-R zoned property is in conformity with the Future Land Use Map and the policy intent of the Comprehensive Land Use Plan. Therefore, the proposed Veterinarian Service Facility would be acceptable in the A-R Zoning District per Sec. 206-2(b) upon approval of the special use permit application by the Board of Commissioners.

# H. Whether or not the proposed use will create adverse impacts upon any environmentally sensitive areas or natural resources.

No impacts to environmentally sensitive areas or natural resources are anticipated.

### PLANNING AND DEVELOPMENT STAFF RECOMMENDATIONS

Based on the staff's evaluation of the request, and the standards governing the exercise of zoning power, the Department of Planning and Development recommends <u>Approval with Conditions</u> of the request for a special use permit to allow a Veterinarian Services Facility.

- 1. The proposed development shall comply with all Rockdale County Land Disturbance requirements.
- 2. The applicant shall abide by all applicable standards of the Unified Development Ordinance for the A-R Zoning District unless otherwise specified in these conditions or through approval of a variance by the Zoning Board of Appeals.
- 3. Hours of operation to be 8:00am to 5:00pm.
- 4. Any structure used as an animal hospital or veterinary clinic shall be located and its activities conducted at least 50 feet from any property zoned or used for residential purposes, measured along a straight line connecting the nearest points of the subject properties.
- 5. Medical treatment or care shall be practiced only within an enclosed building or structure. All utilities shall be placed underground.
- 6. Kennel or boarding operations incidental to the principal use shall be permitted only within an enclosed building or structure located at least 100 feet from any property zoned or used for residential purposes, measured along a straight line connecting the nearest points of the subject properties.
- 7. The building or structure shall be designed to prevent the adverse impact of noise and/or odor from the animals on adjoining properties.

# SPECIAL USE PERMIT CRITERIA TO BE APPLIED

In your own words, type the reason you believe a special use permit should be granted by providing justification for each of the following review standards (UDO Sec. 238-4(m)). The following criteria shall be applied by the department, the planning commission, and the board of commissioners in evaluating and deciding any application for a special use permit. No application for a special use permit shall be granted by the board of commissioners unless satisfactory provisions and arrangements have been made concerning each of the following criteria, all of which are applicable to each application. Please address the following:

(1) Whether or not the proposed plan is consistent with all of the requirements of the zoning district in which the use is proposed to be located, including required parking, loading, setbacks and transitional buffers. (i.e. Does the proposed project meet all the zoning requirements, including parking, loading, setbacks and buffers?)

The proposed Plan is consistent with the Planning and Zoning department requirements for an animal hospital

(2) Compatibility of the proposed use with land uses on adjacent properties and other properties within the same zoning district, including the compatibility of the size, scale and massing of proposed buildings in relation to the size, scale and massing of adjacent and nearby lots and buildings. (i.e. Is the proposed project compatible with the land uses of neighboring properties, including size, scale and massing of proposed building?)

Auis composibilité compatible Rochdale Countris regulations

(3) Adequacy of the ingress and egress to the subject property, and to all proposed buildings, structures, and uses thereon, including the traffic impact of the proposed use on the capacity and safety of public streets providing access to the subject site. (i.e. Is the access to the property, including all buildings, structures and uses, adequate? Will the project impact traffic, or the capacity and safety on nearby public streets?)

The ingress and ogress one as required by Rochdale regulations.

(4) Consistency with the county's wastewater treatment system, including the feasibility and impacts of serving the property with public wastewater treatment service and, if an alternative wastewater treatment method is proposed, whether such wastewater treatment method will have a detrimental impact on the environment. (i.e. Is the project consistent with the county's wastewater system capacity? If an alternative wastewater treatment method is proposed, would this method have a detrimental impact on the environment?)

The project is consict with County's wasternater regulations

Adequacy of other public facilities and services, including stormwater management, schools, parks, sidewalks, and utilities, to serve the proposed use. (i.e. Are other public facilities and services, such as stormwater management, schools, parks, sidewalks, and utilities, sufficient to serve the proposed tes, all resource in the area one sufficient to support the project. project?) Whether or not the proposed use will create adverse impacts upon any adjacent or nearby properties by reason of noise, smoke, odor, dust, or vibration, or by the character and volume of traffic generated by the proposed use. (i.e. Would the proposed project have adverse impacts on nearby properties, including noise, smoke, odor, dust or vibration?) The project will have minimal to no effect on the neighborhood (7) Whether or not the proposed use will create adverse impacts upon any adjoining land use by reason of the manner of operation or the hours of operation of the proposed use. (i.e. Would the project create adverse impact on nearby properties by its operations, including business hours?) There will be minimal impact. Whether or not the proposed use will create adverse impacts upon any environmentally sensitive areas or natural resources. (i.e. Would the project create adverse impacts on the natural environment?) The environment natural resource will not be adversely affect. In fact additional plunts have been added to enhance the wellbeing of environment

# Supplemental USE STANDARDS (STANDARDS OF USE AND DEVELOPMENT This page is only required for zoning use classifications that have supplemental use standards in UDO Sec. 218-13. 1. List the supplemental use standards: (1) Any structure used as an animal hospital or yet clinic Shall be the titled located and its activities yet clinic Shall be the titled located and its activities yet clinic Shall be the property. Conducted at least 50 feet from res. property. Conducted at least 50 feet from res. property. (2) Medical treatment/care shall be praeticed only within an enclosed building only within an enclosed building to principal use. (3) Kennel | boarding Shell be incidental to principal use and permitted within an enclosed bidgand to cated 100 feet and permitted within an enclosed bidgand to cated 100 feet and permitted within an enclosed bidgand to prevent impacts from residential property. (4) the building shall be designed to prevent impacts from of noise and over b. 	APPLICANT CERTIFICATION						
Please re	ad and initial the following statements:						
1.	I hereby request the County consider the information contained within this application relative to the property shown on the attached plats and site plan and further request that this item be placed on the Planning Commission (PC) and/or Board of Commissioners (BOC) Agenda for a public hearing.						
<u>~</u> 2.	I understand that my request will be rejected if all the necessary information and/or requirements are not presented.						
<b>✓</b> 3.	I understand that I have an obligation to present all necessary information required by the Rockdale County Department of Planning & Development (P&D) to enable the PC and/or BOC to make an informed determination on my request. I will seek advice of P&D Staff or an attorney if I am not familiar with the zoning and land use requirements.						
<u>~</u> 4.	I understand that my request will be acted upon at the PC and BOC Public Hearings and that I am required to be present or to be represented by the authorized representative as indicated on this application, so that someone is available to present all facts and answer questions. I understand that failure to appear at a public hearing may result in the postponement or denial of my request. I further understand that it is my responsibility to be aware of relevant public hearing dates and times regardless of notification from Rockdale County.						
<u>V</u> 5.	The Rockdale County Unified Development Ordinance requires a public participation sign on the subject property. In order to ensure that the correct information is included on the public participation sign, P&D will prepare the sign and post the sign.						
6.	I hereby acknowledge that I understand the requirements listed on the checklist for what constitutes a complete application. I have checked off each box and included a page number where the item is located. I confirm that the requirements for a complete application have been met.						
7.	I have read and understood the applicable sections of the Rockdale County Unified Development Ordinance, as provided in the Instructions.						
aha ia 19	, the undersigned also hereby verifies that he or years of age or older and has provided at least one secure and verifiable document, as required by O.C.G.A. § 50-36-1(e)(1), with this affidavit.

AN ORDINANCE TO AMEND SUBPART B, PLANNING AND DEVELOPMENT, TITLE 2, LAND USE AND ZONING, CHAPTER 222 OFF-STREET PARKING STANDARDS, OF THE CODE OF ROCKDALE COUNTY, GEORGIA, AS AMENDED, SO AS TO REPEAL AND REPLACE SECTION 222-11 PARKING VEHICLES IN RESIDENTIAL DISTRICTS: TO REPEAL CONFLICTING ORDINANCES AND FOR OTHER PURPOSES.

**WHEREAS**, Rockdale County comprehensively regulates land uses pursuant to its general police powers, planning powers, zoning powers and other authority derived from applicable local laws, the Constitution of the State of Georgia, state and federal statutory authority and other sources; and

**WHEREAS**, Commercial vehicles, provided that such vehicle is owned by the Rockdale County Board of Education, or any private school licensed by the State of Georgia.

**NOW, THEREFORE, BE IT ORDAINED** by the Board of Commissioners of Rockdale County, Georgia, and it is hereby ordained by the authority of same as follows:

### **Section I**

That Section 106-1 of Title 2 (Land Use and Zoning) of Subpart B (Planning and Development) of the Code of Ordinances of Rockdale County entitled "Off-Street Parking Standards" is hereby repealed in its entirety and replaced as follows:

Sec. 222-11. - Parking vehicles in residential districts.

- (a) In any residential zoning district except as otherwise provided in this Ordinance, it shall be unlawful for any person to park or stand any commercial vehicle as defined in section 106-1 unless such vehicle is engaged in loading or unloading. Trailers, mobile homes, motorized homes, boats, boat trailers and utility trailers are exempt from this paragraph. For purposes of this section, trailers are defined as vehicles with or without motive power, designed for carrying persons or property and for being drawn by motor vehicles and so constructed that no part of its weight rests upon the towing vehicle.
- (b) In any residential district, the parking of any vehicle shall be within a garage, driveway, or carport or within a side or rear yard, except for moving vans that are loading and unloading. The parking of any commercial vehicle as defined in section 106-1, shall be prohibited unless otherwise authorized by this Ordinance.
- (c) Disposition of commercial vehicles in residential districts. The county is authorized to remove and dispose of any commercial vehicle in a residential district, notwithstanding the fact that such vehicle may be located on private property. No such vehicle shall be disposed of in less than 30 days from the time the commercial vehicle is removed. Prior to the disposal of such vehicle and if such vehicle is affixed with a current license tag, the current owners and lienholders of the motor vehicles shall be identified by a records search in the state department of revenue; and upon the identification of the owners and lienholders, they

Ordinance #		
Text Amendment	TXT	2024-02

shall be notified of the pending disposal by registered or certified mail, return receipt requested.

# (d) Enforcement.

- (1) Enforcement of this article shall be the responsibility of the code enforcement officers of the department of planning and development or any Rockdale County Sheriff's deputy.
- (2) When a motor vehicle is deemed to be a commercial vehicle in violation of this Code by an authorized enforcement officer, such officer may issue a written warning notice to the parties owning or in apparent possession of the commercial vehicle, or the owner of the property upon which the motor vehicle is located, to remove the vehicle within five days. If the owner or person in apparent possession of the vehicle is not ascertainable, written notice may be given by attaching such notice to the vehicle. Written notice to the property owner shall be by certified mail to the address listed in Rockdale County property tax records. If the commercial vehicle is not removed within five days, the owner of the motor vehicle or the owner of the land on which it is located shall be issued a citation. If a commercial vehicle is found in violation on the property of an owner who has been cited within the past 12 months for the same offense, then the authorized enforcement officer may immediately issue a citation to the parties owning or in apparent possession of the motor vehicle, or the owner of the property upon which the motor vehicle is located.
- (3) Each and every day that any such violation exists shall be deemed a separate offense.
- (4) The county may tow the vehicles, at the owner's expense, if not removed within five days of the notice.

AN ORDINANCE TO AMEND THE CODE OF ROCKDALE COUNTY, GEORGIA, AS AMENDED, SO AS TO ADOPT TWO NEW DEFINITIONS IN SECTION 106-1, REGARDING TRADE SCHOOLS AND AMEND SECTION 218-1 TABLE OF PERMITED USES (SUBPART B PLANNING AND DEVELOPMENT); TO PROVIDE FOR REPEAL OF CONFLICTING PROVISIONS; TO PROVIDE FOR AN ADOPTION DATE; AND FOR OTHER PURPOSES.

**WHEREAS**, Rockdale County comprehensively regulates land uses pursuant to its general police powers, planning powers, zoning powers, and other authority derived from applicable local laws, the Constitution of the State of Georgia, state and federal statutory authority, and other sources; and

**WHEREAS** Rockdale County comprehensively regulates land uses so as to substantially advance the public health, safety, morals, and general welfare; and

**WHEREAS** the Board of Commissioners desires to proactively address a more diversified and qualified workforce by supporting avenues to create further opportunity and promote the quality of life within the community; and

**WHEREAS**, specifically addressing trade schools supports and enhances additional education and certification programs for career development for the benefit of the residents of Rockdale County.

**NOW, THEREFORE, BE IT ORDAINED** by the Board of Commissioners of Rockdale County, Georgia, and it is hereby ordained by the authority of same as follows:

# Section 1

That Section 106-1 Definitions (Subpart B Planning and Development) of the Code of Rockdale County, Georgia, as amended, is hereby further amended so as to add two new definitions entitled "Trade School, Cosmetology and Barber" and "Trade School, Apprenticeship Training and Other Technical and Trade Schools", which new definitions shall read as follows:

**Trade School, Cosmetology and Barber:** Establishments primarily engaged in offering training in barbering, hair styling, or the cosmetic arts, such as makeup or skin care. These schools provide job-specific certification. The use is primarily done in classroom settings inside a building.

Trade School, Apprenticeship Training and Other Technical and Trade Schools: Establishments primarily engaged in offering job or career vocational or technical courses which may include but not limited to: electricians', plumbers', mechanics', sheet metal workers', bus driver, dental hygienist, security guard Trade School, Apprenticeship Training and Other Technical and Trade Schools: Establishments primarily engaged in offering job or career vocational or technical courses which may include but not limited to: electricians', plumbers', mechanics', sheet metal workers', bus driver, dental hygienist,
