Reminders:

■ Georgia 811's ThoughtSpot data dashboard has a *Billing* pinboard allowing members to interactively drill-down and explore their billable ticket and late notice data. Members already signed up for ThoughtSpot can log in and select *Pinboards*, then *Billing*. Members not already signed up for the free data tool may visit the *Members-->Member Reporting - Thoughtspot* page at Georgia811.com to request access.

■ Our *Billing Explanation* document can also be found on our website at Georgia811.com. Navigate to the *Members* menu, then *Member Resources*, then *Membership PDF Documents* at the bottom of the page.

Billable Ticket:

A member's original notification with a unique identifier (ticket number). A member is only billed for that one instance of an original ticket notification regardless of how many of their service area codes or delivery destinations are associated with that one ticket. Ticket numbers generated from cancels are excluded.

Billable Late Notice:

Your total number of late notices automatically generated by our system and sent to you, precipitated by one or more of your service areas not responding to PRIS by the Response Due Date on a ticket. Each service area code linked to a member code on a ticket can be billed for a late notice since each service area code requires a response to PRIS by law.
